4. Segments Description	12
5. Segments Layout.....	16
6. Example(s)	63

1. Introduction

Status

MESSAGE TYPE : RECADV
REFERENCE DIRECTORY : D.01B
EANCOM® SUBSET VERSION : 009

Definition

The Receiving Advice message addresses the business needs related to the receipt of goods. It is used either:

- to confirm reception of goods
- in conjunction with the Despatch Advice message to confirm receipt or to advise discrepancies following the reception of goods and/or the controlled contents of a despatch which has been accepted (the waybill is signed).
- to inform about discrepancies between goods received and goods ordered/planned.

Principles

The message relates to one consignor and one consignee and is initiated by the party who has received the goods and/or services according to agreed conditions.

The message relates to a single despatch point and a single receiving point. It may cover a number of different items or packages.

It allows the buyer or recipient of goods to provide the supplier or respective agent with;

- a confirmation of the receipt of goods
- a notification on discrepancies between the number of items RECEIVED AND ACCEPTED and the number of items despatched (and/or ordered)
- a notification or instruction concerning the acceptance or suggested actions for the identified discrepancies.
- an instruction for corrections to be undertaken on the invoice or credit notes to be issued which are based on the despatch advice or despatch note. The receiver of goods may also correct internal invoice(s) for goods which are eventually passed on to the final customer.

The Receiving Advice should always be sent by the buyer to the supplier or their respective agents after the goods are physically received and inspected.

The message should be sent within a commercially agreed time period e.g. 24 hours after receipt of goods. This makes it possible for the supplier to check the data of the despatch, adjust the invoice or issue a credit note, control internal procedures, count stock etc.

Scenarios for the Receiving Advice Message

Any number of business needs and actions affecting the whole production/ordering, delivery and invoicing cycle can arise as a result of the actual delivery of goods.

Discrepancies between goods received and accepted, and goods expected to be delivered might lead to adjustments of delivery schedules, orders, invoices, etc. These actions may be covered by the Receiving Advice, other EDI messages and via other communication channels.

Trading partners should review their business procedures and identify those functions and actions which may be covered by the Receiving Advice message. Scenarios covered by the Receiving Advice message can range from simple to complex, determining the ease and degree of automation.

Simple Scenario

1. Introduction

Within a simple scenario, the Receiving Advice message is only used to confirm or advise discrepancies related to the Despatch Advice or note.

When only confirming or rejecting the reception and acceptance of goods, only the header section of the Receiving Advice message need be transmitted. Confirmation of reception might trigger invoicing for goods and services or may be used by the supplier to control the performance of contracted transportation services.

Within a simple scenario, the Receiving Advice is only used to notify discrepancies between goods received and accepted and goods despatched as communicated in the Despatch Advice. In these cases, the Receiving Advice will usually involve information related to goods lost, stolen or damaged in transit, short or excess shipments, unknown items, etc.

Any adjustments to delivery schedules or purchase orders will have been dealt with beforehand or will be handled through other EDI messages or by other communication channels.

Actions to be taken related to any discrepancies may be agreed beforehand and can be specified in the interchange agreement.

Complex Scenario

The functionalities covered by the Receiving Advice within a more complex scenario may include those described above as part of the simple scenario and in addition, information or instructions which might alter an existing delivery schedule, outstanding order, invoice, etc.

Within a more complex scenario the Receiving Advice message might notify discrepancies for both despatched and received and accepted quantities AND despatched and ordered or planned quantities, e.g. a Receiving Advice could change the status of a line item on backorder by requesting a new delivery date, cancelling the item, etc.

Within a more complex scenario, suggested actions or instructions relevant to delivery discrepancies may vary depending on stock situation, sales forecasting, etc.

Structure of the Receiving Advice Message

The EANCOM® Receiving Advice detail section contains two distinct structures.

1. CPS-PAC Segment Group Structure

The first is the CPS-PAC Segment Group structure which can be used to provide information at the shipping container level, (e.g. containers which have been damaged, serialised containers unknown at the reception point, etc.)

This group of segments allows for the provision of shipping container identification numbers. The function or meaning of the identification numbers transmitted in this part of the message should be bilaterally agreed by trading partners and described in the PCI and GIN segments at the CPS-PAC level.

2. CPS-LIN Segment Group Structure

The second option is CPS-LIN Segment Group structure which can be used to provide detailed receiving information for a particular item (see [Receiving Details per Item](#) below). The item may be contained within any given number of shipping containers which are part of the delivery.

Optionally, more specific receiving information for an item within a particular shipping container can be provided (see [Receiving Details per Serial Shipping Container Code](#) below). In these cases each shipping container is uniquely identified by an EAN.UCC Serial Shipping Container Code.

Receiving Details per Item

The LIN segment identifies the item and the QTY segment provides the total quantity for the item which has been received and accepted. The quantity in the QTY segment is the global quantity received and accepted and will relate to one or more shipping containers containing the item which are part of the delivery.

Discrepancies between the quantity received and accepted and other quantities (ordered/despatched) and actions to be taken are indicated in the QVR and DTM segments.

1. Introduction

No details per specific shipping container are provided in this approach.

Receiving Details per Serial Shipping Container Code (SSCC)

Additionally, receiving details per specific shipping container containing the item identified in LIN may be provided. In these cases, LIN will identify the item and the receiving details will be provided per shipping container using the segment group PCI-QTY-QVR-GIN.

The PCI-GIN segments are used to provide the Serial Shipping Container Code of the container containing the item identified in LIN (PCI-GIN). The QTY segment indicates the quantity received and accepted for the specific shipping container. The QVR segment provides information on quantity discrepancies and actions to be taken.

There will be as many PCI-QTY-QVR-GIN repetitions as there are shipping containers containing the item identified in LIN.

CPS-LIN Structure Examples:

A delivery consists of a three shipping containers identified by the SSCC's A, B and C. The shipping containers contain three different items: GTIN 1, GTIN 2, GTIN 3 in the following composition:

SSCC A contains 10 GTIN 1

SSCC B contains 10 GTIN 1, 15 GTIN 2 and 20 GTIN 3

SSCC C contains 15 GTIN 2 and 15 GTIN 3.

SHIPMENT DELIVERED:

SSCC - A	SSCC - B	SSCC - C
10 GTIN 1	10 GTIN 1	15 GTIN 2
	15 GTIN 2	15 GTIN 3
	20 GTIN 3	

Receiving Details per Item

The Receiving Advice message may specify receiving details globally per item:

LIN 1	=	GTIN 1
QTY 1	=	20
LIN 2	=	GTIN 2
QTY 2	=	30
LIN 3	=	GTIN 3
QTY 3	=	35

Receiving Details per Shipping Container

The Receiving Advice message may specify receiving details globally per SSCC:

LIN 1	=	GTIN 1
PCI-GIN	=	SSCC A
QTY	=	10
PCI-GIN	=	SSCC B
QTY	=	10

1. Introduction

LIN 2	=	GTIN 2
PCI-GIN	=	SSCC B
QTY	=	15
PCI-GIN	=	SSCC C
QTY	=	15

LIN 3	=	GTIN 3
PCI-GIN	=	SSCC B
QTY	=	20
PCI-GIN	=	SSCC C
QTY	=	15

Note:

For simplicity, the above examples assume that all quantities despatched are received and accepted (no discrepancies). Under such conditions normally no Receiving Advice message would be sent or only the header section of the message would be sent to confirm reception.

4. Segments Description

- UNA - C 1 - Service string advice
This segment is used to inform the receiver of the interchange that a set of service string characters which are different to the default characters are being used.
- UNB - M 1 - Interchange header
This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange. The principle of the UNB segment is the same as a physical envelope which covers one or more letters or documents, and which details, both the address where delivery is to take place and the address from where the envelope has come.

Receiving Advice Heading Section

- UNH - M 1 - Message header
This message is used to head, identify and specify a message.
- BGM - M 1 - Beginning of message
This segment is used to indicate the type and function of a message and to transmit the identifying number.
- DTM - M 10 - Date/time/period
This segment is used to specify any dates related to the complete receiving advice message.
- ALI - C 5 - Additional information
This segment is used to specify any additional information related to the complete order.
- FTX - C 99 - Free text
This segment is used to provide any free text information related to the complete message.
- SG1 - C 10 - RFF-DTM**
A group of segments giving references where necessary, dates relating to the whole message, e.g. despatch advice, contract number.
- RFF - M 1 - Reference
This segment is used to specify references which apply to the whole receiving advice message.
- DTM - C 1 - Date/time/period
This segment is used to specify dates relating to the references given in the previous RFF segment.
- SG4 - M 99 - NAD-SG5-SG6**
A group of segments identifying names, addresses and locations, relevant to the whole Receiving advice.
- NAD - M 1 - Name and address
This segment is used to identify the trading partners involved in the Receiving Advice message. Identification of the sender and recipient of the goods is mandatory in the Receiving Advice.
- SG5 - C 10 - RFF**
A group of segments giving references only relevant to the specified party rather than the whole message.
- RFF - M 1 - Reference
This segment is used to specify references related to the party identified in the previous NAD segment.
- SG6 - C 10 - CTA-COM**
A group of segments giving contact details of the specific person or department within the party identified in the NAD segment.

4. Segments Description

CTA - M 1	- Contact information This segment is used to identify contact name and/or department within the party specified in the NAD segment.
COM - C 5	- Communication contact This segment identifies the communications number, and type of communications, for the person and/or department identified in the preceding CTA segment.
SG10 - C 10	- TDT A group of segments specifying details of the mode and means of transport.
TDT - M 1	- Details of transport This segment is used to specify the transport details used to deliver the goods detailed in the receiving advice message.
SG11 - C 9999	- EQD-SG13 A group of segments identifying equipment with which a problem has occurred or if required by the recipient of the message for further identification.
EQD - M 1	- Equipment details This segment is used to provide information on equipment which has been used in the despatch of the products ordered.
SG13 - C 25	- SEL-CDI A group of segments identifying the seal number and reporting anomalies.
SEL - M 1	- Seal number This segment is used to specify a seal number which is connected to the equipment identified in the EQD segment.
CDI - M 10	- Physical or logical state This segment is used to specify the physical state of the seal number.

Receiving Advice Detail Section

SG16 - C 9999	- CPS-SG17-SG22 A group of segments providing details of all packages and/or individual items as received. This segment group provides the capability to give the top-down hierarchical relationship of the package levels.
CPS - M 1	- Consignment packing sequence This segment is used to provide a detailed description of the packaging of the goods.
SG17 - C 9999	- PAC-QVR-SG18 A group of segments identifying packaging, quantities and marks and numbers.
PAC - M 1	- Package This segment is used to identify the total number of packages and package types for the hierarchical level identified in the CPS segment.
QVR - C 1	- Quantity variances This segment is used to indicate quantity variances related to the currently identified package.
SG18 - C 999	- PCI-SG20 A group of segments specifying markings and labels.
PCI - M 1	- Package identification This segment is used to provide markings and labels information relevant to the packaging unit identified in the PAC segment.
SG20 - C 999	- GIN A group of segments giving package identification numbers.

4. Segments Description

GIN - M 1	- Goods identity number This segment is used to provide identification numbers relevant to the packaging unit identified in the PAC segment.
SG22 - C 9999	- LIN-PIA-IMD-QTY-QVR-DTM-FTX-SG28-SG29 A group of segments providing details of the product or service received.
LIN - M 1	- Line item This segment is used to identify the product received.
PIA - C 10	- Additional product id This segment is used to specify additional product codes for the current line item.
IMD - C 25	- Item description This segment is used to provide a description for the current line item.
QTY - C 10	- Quantity This segment is used to specify any quantities related to the current line item.
QVR - C 10	- Quantity variances This segment is used to specify any variances between what was received and accepted and what was ordered/shipped.
DTM - C 5	- Date/time/period This segment is used to specify dates related to the current line item.
FTX - C 99	- Free text
SG28 - C 10	- RFF-DTM A group of segments giving references and dates relevant to the line item.
RFF - M 1	- Reference This segment is used to specify any references associated with the current line item.
DTM - C 1	- Date/time/period This segment is used to specify dates related to the references given in the previous RFF segment.
SG29 - C 9999	- PCI-QTY-QVR-SG31 A group of segments identifying one specific package or a number of packages, the marks and numbers, quantities and receiving conditions.
PCI - M 1	- Package identification This segment is used to provide markings and labels information relevant to the product identified in the LIN segment.
QTY - C 1	- Quantity This segment is used to indicate the quantity of the current line item received and accepted which is contained in the package marked with the Serial Shipping Container Code identified in the following GIN segment.
QVR - C 1	- Quantity variances This segment is used to specify quantity variances for the current line item which is contained in the package marked with the Serial Shipping Container Code identified in the following GIN segment.
SG31 - C 10	- GIN A group of segments giving package identification numbers.
GIN - M 1	- Goods identity number This segment is used to provide the Serial Shipping Container Code marked on the packaging of the current line item.

Receiving Advice Summary Section

4. Segments Description

- | | |
|-----------|--|
| CNT - C 1 | - Control total |
| | This segment is used to provide message control information for checking on the message receivers in-house system. |
| UNT - M 1 | - Message trailer |
| | This segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message. |
| UNZ - M 1 | - Interchange trailer |
| | This segment is used to provide the trailer of an interchange. |

5. Segments Layout

This section describes each segment used in the EANCOM® Receiving advice message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM® subset are indicated.

Notes:

1. The segments are presented in the sequence in which they appear in the message. The segment or segment group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.

2. Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in the second column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

Following the EDIFACT information, EANCOM® specific information is provided in the third, fourth, and fifth columns. In the third column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fourth column the restricted indicator (see point 3 on the following page), and in the fifth column notes and code values used for specific data elements in the message.

2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM®.

2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

- REQUIRED	R	Indicates that the entity is required and must be sent.
- ADVISED	A	Indicates that the entity is advised or recommended.
- DEPENDENT	D	Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.
- OPTIONAL	O	Indicates that the entity is optional and may be sent at the discretion of the user.
- NOT USED	N	Indicates that the entity is not used and should be omitted.

2.3 If a composite is flagged as **N, NOT USED**, all data elements within that composite will have blank status indicators assigned to them.

3. Status indicators detailed in the fourth column which directly relate to the code values detailed in the fifth **column** may have two values:

- RESTRICTED	*	A data element marked with an asterisk (*) in the fourth column indicates that the listed codes in column five are the only codes available for use with this data element, in this segment, in this message.
- OPEN		All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterisk in fourth column). The available codes are listed in the EANCOM® Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.

4. Different colours are used for the code values in the segment details: restricted codes are in red and open codes in blue.

5. Segments Layout

Segment number: 1

UNA - C 1 - Service string advice				
<p>Function:</p> <p>The service string advice shall begin with the upper case characters UNA immediately followed by six characters in the order shown below. The space character shall not be used in positions 010, 020, 040, 050 or 060. The same character shall not be used in more than one position of the UNA.</p>				
	EDIFACT	GS1	*	Description
UNA1 Component data element separator	M an1	M	*	Used as a separator between component data elements contained within a composite data element (default value: ":")
UNA2 Data element separator	M an1	M	*	Used to separate two simple or composite data elements (default value: "+")
UNA3 Decimal mark	M an1	M	*	Used to indicate the character used for decimal notation (default value: ".")
UNA4 Release character	M an1	M	*	Used to restore any service character to its original specification (value: "?").
UNA5 Repetition separator	M an1	M	*	Used to indicate the character used for repetition separation (value: " * ").
UNA6 Segment terminator	M an1	M	*	Used to indicate the end of segment data (default value: " ' ")
<p>Segment Notes:</p> <p>This segment is used to inform the receiver of the interchange that a set of service string characters which are different to the default characters are being used.</p> <p>When using the default set of service characters, the UNA segment need not be sent. If it is sent, it must immediately precede the UNB segment and contain the four service string characters (positions UNA1, UNA2, UNA4 and UNA6) selected by the interchange sender.</p> <p>Regardless of whether or not all of the service string characters are being changed every data element within this segment must be filled, (i.e., if some default values are being used with user defined ones, both the default and user defined values must be specified).</p> <p>When expressing the service string characters in the UNA segment, it is not necessary to include any element separators.</p> <p>The use of the UNA segment is required when using a character set other than level A.</p> <p>UNA:+.?*'</p>				

5. Segments Layout

Segment number: 2

UNB - M 1 - Interchange header					
Function: To identify an interchange.					
Notes: 1. S001/0002, shall be '4' to indicate this version of the syntax. 2. The combination of the values carried in data elements S002, S003 and 0020 shall be used to identify uniquely the interchange, for the purpose of acknowledgement.					
		EDIFACT	GS1	*	Description
S001	SYNTAX IDENTIFIER	M	M		See Part I chapter 5.2.7 and segment notes.
0001	Syntax identifier	M a4	M	*	UNOA = UN/ECE level A UNOB = UN/ECE level B UNOC = UN/ECE level C UNOD = UN/ECE level D UNOE = UN/ECE level E UNOF = UN/ECE level F UNOG = UN/ECE level G UNOH = UN/ECE level H UNOI = UN/ECE level I UNOJ = UN/ECE level J UNOK = UN/ECE level K UNOW = UN/ECE level W UNOX = UN/ECE level X UNOY = UN/ECE level Y
0002	Syntax version number	M an1	M	*	4 = Version 4

0017	Date	M n8	M		CCYYMMDD
0019	Time	M n4	M		HHMM
0020	Interchange control reference	M an..14	M		Unique reference identifying the interchange. Created

5. Segments Layout

Segment number: 2

		EDIFACT	GS1	*	Description
					by the interchange sender.
S005	RECIPIENT REFERENCE/ PASSWORD DETAILS	C	O		
0022	Recipient reference/password	Man..14	M		
0025	Recipient reference/password qualifier	C an2	O		
0026	Application reference	C an..14	O		Message identification if the interchange contains only one type of message.
0029	Processing priority code	C a1	O		A = Highest priority
0031	Acknowledgement request	C n1	O		1 = Requested
0032	Interchange agreement identifier	C an..35	O	*	EANCOM.....
0035	Test indicator	C n1	O		1 = Interchange is a test

Segment Notes:

This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange. The principle of the UNB segment is the same as a physical envelope which covers one or more letters or documents, and which details, both the address where delivery is to take place and the address from where the envelope has come.

S001: The character encoding specified in basic code table of ISO/IEC 646 (7-bit coded character set for information interchange) shall be used for the interchange service string advice (if used) and up to and including the composite data element S001 'Syntax identifier' in the interchange header. The character repertoire used for the characters in an interchange shall be identified from the code value of data element 0001 in S001 'Syntax identifier' in the interchange header. The character repertoire identified does not apply to objects and/or encrypted data.

The default encoding technique for a particular repertoire shall be the encoding technique defined by its associated character set specification.

DE 0001: The recommended (default) character set for use in EANCOM® for international exchanges is character set A (UNOA). Should users wish to use character sets other than A, an agreement on which set to use should be reached on a bilateral basis before communications begin.

DE 0004, 0008, 0010 and 0014: Within EANCOM® the use of the Global Location Number (GLN) is recommended for the identification of the interchange sender and recipient.

DE 0008: Identification (e.g. a division) specified by the sender of the interchange, to be included if agreed, by the recipient in response interchanges, to facilitate internal routing.

DE 0014: The address for routing, provided beforehand by the interchange recipient, is used by the interchange sender to inform the recipient of the internal address, within the latter's systems, to which the interchange should be routed. It is recommended that the GLN be used for this purpose.

DE 0007: Identification (e.g. a division) specified by the recipient of the interchange, to be included if agreed, by the sender in response interchanges, to facilitate internal routing.

DE S004: The date and time specified in this composite should be the date and time at which the interchange sender prepared the interchange. This date and time may not necessarily be the same as the date and time of contained messages.

DE 0020: The interchange control reference number is generated by the interchange sender and is used to identify uniquely each interchange. Should the interchange sender wish to re-use interchange control reference numbers, it is recommended that each number be preserved for at least a period of three months before being re-used. In order to guarantee uniqueness, the interchange control reference number should always be linked to the interchange sender's identification (DE 0004).

DE S005: The use of passwords must first be agreed bilaterally by the parties exchanging the interchange.

DE 0026: This data element is used to identify the application, on the interchange recipient's system, to which the interchange is directed. This data element may only be used if the interchange contains only one type of message, (e.g. only invoices). The reference used in this data element is assigned by the interchange sender.

DE 0031: This data element is used to indicate whether an acknowledgement to the interchange is required. The EANCOM® APERAK or CONTRL message should be used to provide acknowledgement of interchange receipt. In addition, the EANCOM® CONTRL message may be used to indicate when an interchange has been rejected

5. Segments Layout

Segment number: 2

due to syntax errors.

DE 0032: This data element is used to identify any underlying agreements which control the exchange of data. Within EANCOM®, the identity of such agreements must start with the letters 'EANCOM', the remaining characters within the data element being filled according to bilateral agreements.

UNB+UNOC:4+5412345678908:14+8798765432106:14+20020102:1000+12345555+++++EANCOMREF 52'

Segment number: 3

UNH - M 1 - Message header				
<p>Function: To head, identify and specify a message.</p> <p>Notes: 1. Data element S009/0057 is retained for upward compatibility. The use of S016 and/or S017 is encouraged in preference. 2. The combination of the values carried in data elements 0062 and S009 shall be used to identify uniquely the message within its group (if used) or if not used, within its interchange, for the purpose of acknowledgement.</p>				
		EDIFACT	GS1	* Description
0062	Message reference number	M an..14	M	
Senders unique message reference. Sequence number of the messages in the interchange. DE 0062 in the UNT will be identical. Sender generated.				
S009	MESSAGE IDENTIFIER	M	M	
0065	Message type	M an..6	M	*
RECADV = Receiving advice message				
0052	Message version number	M an..3	M	*
D = Draft version/UN/EDIFACT Directory				
0054	Message release number	M an..3	M	*
01B = Release 2001 - B				
0051	Controlling agency, coded	M an..3	M	*
UN = UN/CEFACT				
0057	Association assigned code	C an..6	R	*
EAN009 = GS1 version control number (GS1 Permanent Code) Indicates that the message is the EANCOM version 009 of the Receiving Advice.				
0110	Code list directory version number	C an..6	O	
This data element can be used to identify the codelist agreed by the interchange partners, e.g. EAN001 = EANCOM 2002 S4 codelist released on 01.12.2002 by GS1.				
0113	Message type sub-function identification	C an..6	N	
0068	Common access reference	C an..35	N	
S010	STATUS OF THE TRANSFER	C	N	
0070	Sequence of transfers	M n..2		
0073	First and last transfer	C a1		
S016	MESSAGE SUBSET IDENTIFICATION	C	N	
0115	Message subset identification	M an..14		
0116	Message subset version number	C an..3		
0118	Message subset release number	C an..3		
0051	Controlling agency, coded	C an..3		
S017	MESSAGE IMPLEMENTATION GUIDELINE IDENTIFICATION	C	N	
0121	Message implementation guideline identification	M an..14		
0122	Message implementation guideline version number	C an..3		
0124	Message implementation	C an..3		

5. Segments Layout

Segment number: 3

	EDIFACT	GS1	*	Description
guideline release number				
0051 Controlling agency, coded	C an..3			
S018 SCENARIO IDENTIFICATION	C	N		
0127 Scenario identification	M an..14			
0128 Scenario version number	C an..3			
0130 Scenario release number	C an..3			
0051 Controlling agency, coded	C an..3			

Segment Notes:

This message is used to head, identify and specify a message.

DE's 0065, 0052, 0054 and 0051: Indicate that the message is a UNSM Receiving Advice based on the D.01B directory under the control of the United Nations.

Example:

UNH+ME000001+RECADV:D:01B:UN:EAN009'

5. Segments Layout

Segment number: 4

BGM - M 1 - Beginning of message				
Function:				
To indicate the type and function of a message and to transmit the identifying number.				
	EDIFACT	GS1	*	Description
C002 DOCUMENT/MESSAGE NAME	C	R		
1001 Document name code	C an..3	R	*	632 = Goods receipt
1131 Code list identification code	C an..17	N		
3055 Code list responsible agency code	C an..3	N		
1000 Document name	C an..35	O		
C106 DOCUMENT/MESSAGE IDENTIFICATION	C	R		
1004 Document identifier	C an..35	R		Receiving Advice number assigned by the document sender. For global unique identification of documents Global Document Type Identifier (GDTI) is available.
1056 Version identifier	C an..9	N		
1060 Revision identifier	C an..6	N		
1225 Message function code	C an..3	R	*	5 = Replace 9 = Original 27 = Not accepted 29 = Accepted without amendment 31 = Copy The message function coded, is a critical data element in this segment. It applies to all data indicated in the message. The following definitions apply for the restricted codes: 5 = Replace - This code indicates that the current receiving advice message is a replacement due to an error in a previous message. The previous message should be identified in the RFF segment group 1. 9 = Original - An original transmission of a Receiving Advice. 27 = Not accepted - Message to inform that the referenced message is not accepted by the recipient. The previous message number is specified in the RFF segment. 29 = Accepted without amendment - Referenced message is entirely accepted. The previous message number is specified in the RFF segment. 31 = Copy - A copy of a receiving advice for a third party for information purposes.
4343 Response type code	C an..3	N		
Segment Notes:				
This segment is used to indicate the type and function of a message and to transmit the identifying number. All references other than the document message number DE 1004 are to be put into the RFF segment.				
Example: BGM+632+REC5488+9'				

5. Segments Layout

Segment number: 5

DTM - M 10 - Date/time/period					Description
Function:		EDIFACT	GS1	*	
To specify date, and/or time, or period.					
C507	DATE/TIME/PERIOD	M	M		
2005	Date or time or period function code qualifier	M an..3	M	*	35 = Delivery date/time, actual 50 = Goods receipt date/time 137 = Document/message date/time 178 = Arrival date/time, actual 200 = Pick-up/collection date/time of cargo 369 = Date and or time of handling, estimated 772 = Handling start date and/or time, actual 773 = Handling end date and/or time, estimated 774 = Handling end date and/or time, actual 98E = Discharge date/time, start (GS1 Temporary Code) 35 = Delivery date/time - This code is used to indicate a situation when the date/time of delivery was not the same as the date/time on which the goods were formally received. 200 = Pick-up date/time of cargo (backhauling) - This code is used to indicate the date/time on which goods detailed in the message were collected by the buyer.
2380	Date or time or period value	C an..35	R		
2379	Date or time or period format code	C an..3	R		102 = CCYYMMDD 203 = CCYYMMDDHHMM 718 = CCYYMMDD-CCYYMMDD
Segment Notes: This segment is used to specify any dates related to the complete receiving advice message. DE 2005: Identification of the 'Document/message date/time' (code value 137) is mandatory in an EANCOM message. Example: DTM+137:20021111:102' DTM+50:200211051640:203' The goods were received on the 5th of November 2002 at 4:40pm.					

5. Segments Layout

Segment number: 6

ALI - C 5 - Additional information				
Function: To indicate that special conditions due to the origin, customs preference, fiscal or commercial factors are applicable.				
	EDIFACT	GS1	*	Description
3239 Country of origin name code	C an..3	C		
9213 Duty regime type code	C an..3	N		
4183 Special condition code	C an..3	R		199 = Receipt advice, fully detailed 200 = Receipt advice, only exceptions
4183 Special condition code	C an..3	N		
4183 Special condition code	C an..3	N		
4183 Special condition code	C an..3	N		
4183 Special condition code	C an..3	N		
Segment Notes: This segment is used to specify any additional information related to the complete order. This segment is used to specify the type of receiving advice. Example: ALI+++199'				

5. Segments Layout

Segment number: 7

FTX - C 99 - Free text				
Function: To provide free form or coded text information.				
	EDIFACT	GS1	*	Description
4451 Text subject code qualifier	M an..3	M		AAI = General information DAR = Damage remarks ZZZ = Mutually defined
4453 Free text function code	C an..3	O	*	1 = Text for subsequent use 3 = Text for immediate use
C107 TEXT REFERENCE	C	D		References to a standard text. This composite is only used when trading partners have agreed to use mutually defined code values.
4441 Free text value code	M an..17	M		001 = ...standard text...
1131 Code list identification code	C an..17	O		
3055 Code list responsible agency code	C an..3	D		91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C108 TEXT LITERAL	C	D		This composite is only used if coded text can not be used.
4440 Free text value	M an..512	M		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
3453 Language name code	C an..3	D		ISO 639 two alpha code This data element is only used when non-coded free text has been provided in data element C108.
4447 Free text format code	C an..3	N		
Segment Notes: This segment is used to provide any free text information related to the complete message. Use of this segment in free form is not recommended since it may inhibit automatic processing of the message. Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission and processing overheads. Standard texts should be mutually defined among trading partners and can be used to cover legal and other requirements. Example: FTX+AAI+1+001::91'				

5. Segments Layout

Segment number: 8

SG1	- C	10 - RFF-DTM	
RFF	- M	1 - Reference	
Function: To specify a reference.			
	EDIFACT	GS1 * Description	
C506 REFERENCE	M	M	
1153 Reference code qualifier	M an..3	M	AAK = Despatch advice number AAU = Despatch note number ALO = Receiving advice number CR = Customer reference number ON = Order number (buyer) POR = Purchase order response number PP = Purchase order change number VN = Order number (supplier) The code 'ALO' should only be used when the code value '5' was used in DE 1225 of the BGM segment.
1154 Reference identifier	C an..70	R	
1156 Document line identifier	C an..6	N	
4000 Reference version identifier	C an..35	N	
1060 Revision identifier	C an..6	N	
Segment Notes: This segment is used to specify references which apply to the whole receiving advice message. Example: RFF+AAK:533662'			

5. Segments Layout

Segment number: 10

SG4	- M	99 - NAD-SG5-SG6		
NAD	- M	1 - Name and address		
Function: To specify the name/address and their related function, either by C082 only and/or unstructured by C058 or structured by C080 thru 3207.				
	EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	M	BY = Buyer DP = Delivery party DEQ = Shipper SU = Supplier UC = Ultimate consignee
C082	PARTY IDENTIFICATION DETAILS	C	A	
3039	Party identifier	M an..35	M	For identification of parties it is recommended to use GLN - Format n13.
1131	Code list identification code	C an..17	N	
3055	Code list responsible agency code	C an..3	R	* 9 = GS1
C058	NAME AND ADDRESS	C	O	This composite may only be used to fulfill the requirements of directive 2003/58/EC, article 4.
3124	Name and address description	M an..35	M	
3124	Name and address description	C an..35	O	
3124	Name and address description	C an..35	O	
3124	Name and address description	C an..35	O	
3124	Name and address description	C an..35	O	
C080	PARTY NAME	C	D	
3036	Party name	M an..35	M	Party Name in clear text.
3036	Party name	C an..35	O	
3036	Party name	C an..35	O	
3036	Party name	C an..35	O	
3036	Party name	C an..35	O	
3045	Party name format code	C an..3	O	
C059	STREET	C	D	
3042	Street and number or post office box identifier	M an..35	M	Building Name/Number and Street Name and/or P.O. Box
3042	Street and number or post office box identifier	C an..35	O	
3042	Street and number or post office box identifier	C an..35	O	
3042	Street and number or post office box identifier	C an..35	O	
3164	City name	C an..35	D	City/Town, clear text.
C819	COUNTRY SUB-ENTITY DETAILS	C	D	
3229	Country sub-entity name code	C an..9	O	

5. Segments Layout

Segment number: 10

		EDIFACT	GS1	*	Description
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	O		
3228	Country sub-entity name	C an..70	O		County/State in clear text.
3251	Postal identification code	C an..17	D		Postal Code
3207	Country name code	C an..3	D		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the trading partners involved in the Receiving Advice message. Identification of the sender and recipient of the goods is mandatory in the Receiving Advice.

Example:

NAD+BY+5412345000013::9'
NAD+SU+5412345000020::9'

Dependency Notes:

The following composites and data elements are only used when a coded name and address can not be used.

The affected composites and data elements are as follows:

C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 12

SG4	- M	99 - NAD-SG5-SG6
SG6	- C	10 - CTA-COM
CTA	- M	1 - Contact information

Function:
To identify a person or a department to whom communication should be directed.

		EDIFACT	GS1	*	Description
3139	Contact function code	C an..3	R		GR = Goods receiving contact
C056	DEPARTMENT OR EMPLOYEE DETAILS	C	O		
3413	Department or employee name code	C an..17	O		
3412	Department or employee name	C an..35	O		

Segment Notes:
This segment is used to identify contact name and/or department within the party specified in the NAD segment.
The Global Location Number GLN - Format n13 - is particularly suitable for this purpose.

Example:
CTA+GR+:C SANCHEZ'

5. Segments Layout

Segment number: 13

SG4	- M	99 - NAD-SG5-SG6		
SG6	- C	10 - CTA-COM		
COM	- C	5 - Communication contact		
Function: To identify a communication number of a department or a person to whom communication should be directed.				
	EDIFACT	GS1	*	Description
C076	COMMUNICATION CONTACT	M	M	
3148	Communication address identifier	Man..512	M	
3155	Communication address code qualifier	Man..3	M	AO = Uniform Resource Location (URL) EI = EDI EM = Electronic mail TE = Telephone
Segment Notes: This segment identifies the communications number, and type of communications, for the person and/or department identified in the preceding CTA segment. Example: COM+00445885521:TE'				

5. Segments Layout

Segment number: 14

SG10	- C	10 - TDT			
TDT	- M	1 - Details of transport			
Function: To specify the transport details such as mode of transport, means of transport, its conveyance reference number and the identification of the means of transport. The segment may be pointed to by the TPL segment.					
		EDIFACT	GS1	*	Description
8051	Transport stage code qualifier	M an..3	M		20 = Main-carriage transport
8028	Means of transport journey identifier	C an..17	O		Reference number covering the transport.
C220	MODE OF TRANSPORT	C	A		
8067	Transport mode name code	C an..3	R		
8066	Transport mode name	C an..17	N		
C228	TRANSPORT MEANS	C	O		Data Elements 8179 and 8178 are only used when the type of transport must be specifically identified, that is, when a generic description such as road transport is unsuitable.
8179	Transport means description code	C an..8	D		23 = Rail bulk car 31 = Truck
8178	Transport means description	C an..17	D		
C040	CARRIER	C	O		
3127	Carrier identifier	C an..17	A		Global Location Number GLN - Format n13
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	D		9 = GS1
3128	Carrier name	C an..35	O		
8101	Transit direction indicator code	C an..3	O		BS = Buyer to supplier SB = Supplier to buyer
C401	EXCESS TRANSPORTATION INFORMATION	C	N		
8457	Excess transportation reason code	M an..3			
8459	Excess transportation responsibility code	M an..3			
7130	Customer shipment authorisation identifier	C an..17			
C222	TRANSPORT IDENTIFICATION	C	O		
8213	Transport means identification name identifier	C an..9	O		
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	D		DE 3055 must be used if DE 8213 is used.
8212	Transport means identification name	C an..35	R		Vehicle licence plate/Aircraft number
8453	Transport means nationality code	C an..3	O		ISO 3166 two alpha code

5. Segments Layout

Segment number: 14

	EDIFACT	GS1	*	Description
8281 Transport means ownership indicator code	C an..3	N		
<p>Segment Notes:</p> <p>This segment is used to specify the transport details used to deliver the goods detailed in the receiving advice message.</p> <p>Example: TDT+20++30+31'</p>				

5. Segments Layout

Segment number: 15

SG11 - C 9999 - EQD-SG13				
EQD - M 1 - Equipment details				
Function: To identify a unit of equipment.				
	EDIFACT	GS1	*	Description
8053 Equipment type code qualifier	M an..3	M		CN = Container TE = Trailer
C237 EQUIPMENT IDENTIFICATION	C	O		
8260 Equipment identifier	C an..17	A		
1131 Code list identification code	C an..17	O		
3055 Code list responsible agency code	C an..3	D		87 = Assigned by carrier This data element must be used if DE8260 is used.
3207 Country name code	C an..3	O		
C224 EQUIPMENT SIZE AND TYPE	C	O		
8155 Equipment size and type description code	C an..10	O		
1131 Code list identification code	C an..17	O		
3055 Code list responsible agency code	C an..3	D		This data element must be used if no UN/EDIFACT code is used in DE 8155.
8154 Equipment size and type description	C an..35	O		
8077 Equipment supplier code	C an..3	O		
8249 Equipment status code	C an..3	O		
8169 Full or empty indicator code	C an..3	O		
Segment Notes: This segment is used to provide information on equipment which has been used in the despatch of the products ordered. Example: EQD+TE+93219::87'				

5. Segments Layout

10 - Physical or logical state

Function:

To describe a physical or logical state.

	EDIFACT	GS1	*	Description
7001 Physical or logical state type code qualifier	M an..3	M	*	1 = Upon receipt
C564 PHYSICAL OR LOGICAL STATE INFORMATION	M	M		
7007 Physical or logical state description code	C an..3	R		4 = Damaged
1131 Code list identification code	C an..17	O		
3055 Code list responsible agency code	C an..3	D		9 = GS1 This data element must be used if no UN/EDIFACT code is used in DE 7007.
7006 Physical or logical state description	C an..70	O		

Segment Notes:

This segment is used to specify the physical state of the seal number.

Example:

CDI+1+4'

5. Segments Layout

Segment number: 18

SG16 - C 9999 - CPS-SG17-SG22				
CPS - M 1 - Consignment packing sequence				
<p>Function:</p> <p>To identify the sequence in which physical packing is presented in the consignment, and optionally to identify the hierarchical relationship between packing layers.</p>				
		EDIFACT	GS1	* Description
7164	Hierarchical structure level identifier	M an..35	M	Sequential numbering recommended. When not identifying different shipment hierarchical levels within the Receiving Advice, it is recommended to use a default value of 1.
7166	Hierarchical structure parent identifier	C an..35	A	
7075	Packaging level code	C an..3	N	
<p>Segment Notes:</p> <p>This segment is used to provide a detailed description of the packaging of the goods.</p> <p>Example: CPS+1'</p>				

5. Segments Layout

Segment number: 19

SG16	- C	9999 - CPS-SG17-SG22
SG17	- C	9999 - PAC-QVR-SG18
PAC	- M	1 - Package

Function:

To describe the number and type of packages/physical units.

		EDIFACT	GS1	*	Description
7224	Package quantity	C n..8	D		In the "advice discrepancies" scenario this data element should be used when quantity variances at the package level have to be reported and carry the number of packages that were actually received. In the "confirmation of receipt of goods" scenario, this data element may carry the number of packages that were received.
C531	PACKAGING DETAILS	C	C		
7075	Packaging level code	C an..3	N		
7233	Packaging related description code	C an..3	O		50 = Package barcoded EAN-13 or EAN-8 51 = Package barcoded ITF-14 52 = Package barcoded UCC or EAN-128
7073	Packaging terms and conditions code	C an..3	O		1 = Packaging cost paid by supplier 2 = Packaging cost paid by recipient 3 = Packaging cost not charged (returnable)
C202	PACKAGE TYPE	C	O		
7065	Package type description code	C an..17	A		09 = Returnable pallet (GS1 Temporary Code) 201 = Pallet ISO 1 - 1/1 EURO Pallet (GS1 Temporary Code)
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	D		9 = GS1
7064	Type of packages	C an..35	O		
C402	PACKAGE TYPE IDENTIFICATION	C	N		
7077	Description format code	M an..3			
7064	Type of packages	M an..35			
7143	Item type identification code	C an..3			
7064	Type of packages	C an..35			
7143	Item type identification code	C an..3			
C532	RETURNABLE PACKAGE DETAILS	C	D		Composite C532 is only used where the packaging being described is returnable. This composite identifies who is responsible for payment of its return.
8395	Returnable package freight payment responsibility code	C an..3	O		1 = Paid by customer 2 = Free 3 = Paid by supplier
8393	Returnable package load contents code	C an..3	N		

Segment Notes:

This segment is used to identify the total number of packages and package types for the hierarchical level

5. Segments Layout

Segment number: 19

identified in the CPS segment.

Please refer to the 'Structure of the Receiving Advice Message' section in the introduction for details on the use of the PAC segment.

Example:

PAC+10++201::9'

5. Segments Layout

Segment number: 20

SG16	- C	9999 - CPS-SG17-SG22
SG17	- C	9999 - PAC-QVR-SG18
QVR	- C	1 - Quantity variances
Function:		
To specify item details relating to quantity variances.		
	EDIFACT	GS1 * Description
C279 QUANTITY DIFFERENCE INFORMATION	C	R
6064 Quantity variance value	M n..15	M Specify the actual variance amount here.
6063 Quantity type code qualifier	C an..3	R 124 = Damaged goods
4221 Discrepancy nature identification code	C an..3	O
C960 REASON FOR CHANGE	C	O
4295 Change reason description code	C an..3	O BH = Batch number difference BI = Expiry date difference BJ = Item identification code unknown BN = Temperature outside agreed range PC = Pack difference
1131 Code list identification code	C an..17	O
3055 Code list responsible agency code	C an..3	D 9 = GS1
4294 Change reason description	C an..35	O
Segment Notes:		
This segment is used to indicate quantity variances related to the currently identified package.		
For negative values (e.g. damaged goods not accepted) the variance must be expressed as negative.		
Example:		
QVR+-40:124++BN::9'		

5. Segments Layout

Segment number: 21

SG16	- C	9999 - CPS-SG17-SG22
SG17	- C	9999 - PAC-QVR-SG18
SG18	- C	999 - PCI-SG20
PCI	- M	1 - Package identification
Function:		
To specify markings and labels on individual packages or physical units.		
	EDIFACT	GS1 * Description
4233 Marking instructions code	C an..3	R 17 = Supplier's instructions 39 = Marked with Serial Shipping Container Code (SSCC)
C210 MARKS & LABELS	C	O

C208	IDENTITY NUMBER RANGE	C	O		
7402	Object identifier	M an..35	M		
7402	Object identifier	C an..35	O		
C208	IDENTITY NUMBER RANGE	C	O		
7402	Object identifier	M an..35	M		
7402	Object identifier	C an..35	O		
C208	IDENTITY NUMBER RANGE	C	O		
7402	Object identifier	M an..35	M		
7402	Object identifier	C an..35	O		

Segment Notes:
This segment is used to provide identification numbers relevant to the packaging unit identified in the PAC segment.
DE C208: If a sequential series of identity numbers is provided (e.g., 1 up to and including 10) only one repetition of the C208 composite is needed with the first repetition of 7402 specifying the numerically smaller identity number (e.g., 1) and the second repetition the larger identity number (e.g., 10). If identity numbers are not sequential and part of a series (e.g., 1, 3, and 10) then a separate C208 and DE 7402 must be used for each identity number.
In EANCOM it is recommended to use the Serial Shipping Container Code (SSCC) for unique identification of individual transport packages.

Example:
GIN+AW+354123450000000014'

Segment number: 23

SG16	- C	9999 - CPS-SG17-SG22
SG22	- C	9999 - LIN-PIA-IMD-QTY-QVR-DTM-FTX-SG28-SG29
LIN	- M	1 - Line item

Function:
To identify a line item and configuration.

		EDIFACT	GS1	*	Description
1082	Line item identifier	C an..6	R		Application generated number of the line item within the Receiving Advice.
1229	Action request/notification description code	C an..3	N		
C212	ITEM NUMBER IDENTIFICATION	C	D		This composite will only be used for the identification of GS1 codes. If another coding structure is required, e.g. HIBC, this composite will not be used and the code will be detailed in the PIA segment.
7140	Item identifier	C an..35	R		Format n..14 GTIN - this is the number of the article which has been received.
7143	Item type identification code	C an..3	R	*	SRV = GS1 Global Trade Item Number
1131	Code list identification code	C an..17	N		
3055	Code list responsible agency code	C an..3	N		
C829	SUB-LINE INFORMATION	C	D		
5495	Sub-line indicator code	C an..3	R	*	1 = Sub-line information
1082	Line item identifier	C an..6	R		
1222	Configuration level number	C n..2	N		
7083	Configuration operation code	C an..3	N		

Segment Notes:
This segment is used to identify the product received.
If Global Trade Item Numbers are available it is mandatory to use GTIN within the LIN segment.
If a product has been delivered but not accepted it must be identified using a separate line item. In these cases the received and accepted quantities are zero. Such products might include unknown or not ordered products, excess deliveries, damaged goods, unacceptable product variants or batch numbers, different pack size, etc..
Reasons for the action is detailed in the QTY-QVR-DTM segments.

Example:
LIN+1++5412345123453:SRV'

Dependency Notes:
C829 is only used when sub-lines are required.
FOR A COMPLETE DESCRIPTION ON THE USAGE OF SUB-LINES PLEASE REFER TO PART I, SECTION 4.10.

6. Examples

Example 2 - Receiving Advice Message Informing of Damaged Goods

EXAMPLE	ORDERED/ CONFIRMED ORDERS/ORDRSP – LIN	DESPATCHED DESADV - LIN Despatch note	RECEIVED AND ACCEPTED RECADV - LIN	VARIANCES/REASONS/ACTIONS RECADV - QVR
2	100	100	95	- 100 delivered, shipment damaged, quantity difference 5

The following is an example of a Receiving Advice message providing the receiving details for a shipment. The Receiving Advice is sent by the buyer of goods identified by GLN 5412345000013 to the supplier identified by GLN 5410738100005. The Receiving Advice with reference REC5490 is sent the 11 March 2002. The goods were received 10 March 2002 in reference to the buyer's Purchase Order number PO12345 dated 1 March 2002 and the supplier's Despatch Advice number DA45601 dated 10 March 2002.

The trading partners have specified beforehand within the Interchange Agreement what actions will be taken with respect to common occurring discrepancies between received and accepted quantities and quantities ordered/despatched. Both trading partners have agreed and know what actions should be taken in such circumstances. In this scenario, the Receiving Advice message is used as a status report, with the required actions being agreed outside the EDI environment.

The Receiving Advice confirms the receipt and acceptance of 95 units of product 5410738000169 and informs that 100 units were delivered and that 5 units were delivered damaged (The trading partners have agreed that in such a case, the units will be destroyed. This action is agreed beforehand and is not indicated within the Receiving Advice.)
