**BDT00000459**      **Goods loading date time**

Definition: The date and optional time when the goods are loaded for transport.  
GDD Name: loadingDateTime  
GDD Definition: The date and time when the goods are loaded for transport.

**BDT00000460**      **Goods pick up date time**

Definition: The date (and time) when the goods are picked up.  
GDD Name: pickUpDateTime  
GDD Definition: Date/time at which the cargo is picked up.

**BDT00000067**      **GS1 global product classification GPC attribute type code**

Definition: The code specifying the type of attribute according to GS1 global product classification standard GPC.  
Example: 20000123  
GDD Name: gpcAttributeTypeCode  
GDD Definition: Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.

**BDT00000068**      **GS1 global product classification GPC attribute value code**

Definition: The code specifying the attribute value according to GS1 global product classification standard GPC.  
Usage: Used in conjunction with the attribute type to further characterise the product specified by the brick.  
Example: 3001082  
GDD Name: gpcAttributeValueCode  
GDD Definition: The GS1 provided code which identifies the Global Product Classification Attribute Value.

**BDT00000069**      **GS1 global product classification GPC attribute value name**

Definition: The name of the attribute value according to GS1 global product classification standard GPC.  
Example: FULL FAT  
GDD Name: gpcAttributeValueName  
GDD Definition: The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.

**BDT00000070**      **GS1 global product classification GPC brick code**

Definition: The code specifying the product category of similar products according to GS1 global product classification standard GPC.  
Business rule: According to GS1 global product classification standard a GTIN can be assigned to only one brick code.  
Example: 10000025

GDD Name: gpcCategoryCode

GDD Definition: Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.

**BDT00000071** **GS1 global product classification GPC brick name**

Definition: The name of the product category of similar products according to GS1 global product classification standard GPC.

Business rule: To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)

Example: Milk

GDD Name: gpcCategoryName

GDD Definition: Name associated with the specified Global Product Classification (GPC) category code.

**BDT00000646** **GS1 global trade item number format code content**

Definition: The code specifying the format of a GS1 global trade item number.

Example: GTIN\_13
