BDT00000032			Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
BDT00000033			Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
				Definition:	The name of a communication channel expressed as text.
BDTG00000326			Tax registration information	GDD name:	communicationChannelName
				GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDT00000369			Tax authority name	Definition:	The information specifying details of a party registered for tax.
				GDD name:	dutyFeeTaxRegistration
BDTG00000585			Tax registration identification information	GDD definition:	The registration details of a party related to a particular duty, tax or fee.
				Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
BDT00000584			Tax registration identification content	GDD name:	dutyFeeTaxAgencyName
				GDD definition:	Agency responsible for the collection of this duty, fee or tax.
BDTG00000587			Identification scheme information	Definition:	The identity assigned to a party registered for tax according to a national tax register.
				GDD name:	dutyFeeTaxRegistrationID
BDT00000074			Identification scheme name	GDD comment:	Identifier of the party for this particular duty, fee or tax.
				Definition:	The identity assigned to a party registered for tax according to a national tax register.
BDT00000073			Identification scheme agency name	GDD name:	N/A
				GDD definition:	N/A
BDTG00000586			Identification scheme responsible agency code	Definition:	The information specifying details of the used identification scheme.
				GDD name:	N/A
BDT00000583			Identification scheme responsible agency code content	GDD definition:	N/A
				Definition:	The name of the identification scheme.
				GDD name:	identificationSchemeName
				GDD definition:	The name of the identification scheme.
				Definition:	The name of the agency responsible for a identification scheme.
				GDD name:	identificationSchemeAgencyName
				GDD definition:	The name of the agency that maintains the identification scheme.
				Definition:	The code specifying the agency responsible for the identification scheme.
				GDD name:	identificationSchemeAgencyCode
				GDD definition:	The identification of the agency that maintains the identification scheme.
				Definition:	The code specifying the agency responsible for the identification scheme.
				Used code list:	ResponsibleAgencyCode

				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
				Remark:	The link to the code list to use seems to be missing in GDD??!!
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000328			Tax type code	Definition:	The code specifying the type of tax.
				GDD name:	dutyFeeTaxTypeCode
				GDD comment:	Code specifying the type of duty, fee or tax.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DutyFeeTaxTypeCode
BDT00000576			Tax type code content	Definition:	The code specifying the type of tax.
				Used code list:	DutyFeeTaxTypeCode
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DutyFeeTaxTypeCode
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000322			Tax description	Definition:	The description of the tax expressed as text.
				GDD name:	dutyFeeTaxDescription
				GDD definition:	Textual description of this duty, fee or tax.
				GDD definition:	20190606 KD: definition at order level, order header
				GDD definition:	Textual description of this duty, fee or tax. For example, "Taxes sur les supports audio" or WEEE for "Waste Electrical and Electronic Equipment".
				GDD definition:	20190606 KD: definition at order line level, orderLineItem
BDT00000754			Tax description content	Definition:	The description of the tax expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000523			Language code	Definition:	The code specifying the language.
				GDD name:	N/A
				GDD comment:	N/A
BDT00000524			Language code content	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1code list can be acquired on the following website: www.iso.org

					Definition:	The version number of the code list.
BDT00000028				Code list version	GDD name:	codeListVersion

BDTG00000184				Currency of party code	GDD definition:	Identification of the applied version of the code list.
					Definition:	The code specifying the currency of a party.
					Example:	EUR
					Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
					GDD name:	currencyOfPartyCode
					GDD comment:	Code specifying the currency of an addressed party.
BDT00000710				Currency of party code content	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
					Definition:	The code specifying the currency of a party.
					Example:	EUR
					Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
					Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
					GDD name:	N/A
BDT00000028				Code list version	GDD definition:	N/A
					Definition:	The version number of the code list.
					GDD name:	codeListVersion
BDTG00000246				Official address	GDD definition:	Identification of the applied version of the code list.
					Definition:	The registered legal address of the organisation.
					GDD name:	officialAddress
BDT00000034				County code	GDD definition:	The address where the organisation is officially based.
					Definition:	The code indicating a geographical region in a country.
					GDD name:	countyCode
BDT00000020				City name	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
					Definition:	The name of the city, town or village.
					GDD name:	city
BDT00000019				City code	GDD definition:	Text specifying the name of the city.
					Definition:	The code specifying a city.
					Remark:	Should not be misunderstood as a postal code.
BDT00000035				Cross street	GDD name:	cityCode
					GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
					Definition:	The street crossing another street.
BDT00000113				Post office box number	GDD name:	crossStreet
					GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
					Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114				Postal code	Synonyms:	P.O. box, postal box
					GDD name:	pOBoxNumber
					GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
					Definition:	The code according to the relevant postal system or service to specify a geographical area.
					Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117				Province identity	GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
BDT00000127				State	Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
BDT00000128				Street address one	GDD definition:	Text specifying a province in abbreviated format.
					Definition:	The political unit that a country can be divided into.
BDT00000130				Street address two	Example:	California
					GDD name:	state
BDT00000129				Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
					Definition:	The first street address line of a structured address.
BDT00000179				Country code	Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774				Country code content	GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129				Street address three	GDD definition:	The second street address line of a structured address.
					Definition:	The third street address line of a structured address.
BDT00000179				Country code	Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000774				Country code content	GDD name:	streetAddressTwo
					GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129				Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
					Definition:	The third street address line of a structured address.
BDT00000179				Country code	Example:	Floor 4
					Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000774				Country code content	GDD name:	streetAddressThree
					GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDT00000179				Country code	Definition:	The code specifying a country.
					GDD name:	countryCode
BDT00000774				Country code content	GDD comment:	Code specifying the country for the address.
					GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

				Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028			Code list version	GDD name:	N/A
				GDD definition:	N/A
				Definition:	The version number of the code list.
				GDD name:	codeListVersion
BDTG00000214			Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085			Latitude	GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
				Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
BDT00000089			Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000590			Currency code	Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode
				GDD definition:	Code specifying the currency of the amount.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589			Currency code content	Definition:	The code specifying the currency of a monetary amount.
				Example:	EUR
				Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000231			Legal structure description	Definition:	The description of the legal structure expressed as text.

BDT00000659				Legal structure description content	GDD name:	legalStructure
					GDD definition:	Description of the type of legal structure of the organisation.
					Definition:	The description of the legal structure expressed as text.
BDTG00000523				Language code	GDD name:	N/A
					GDD definition:	N/A
					Definition:	The code specifying the language.
BDT00000524				Language code content	GDD name:	N/A
					GDD comment:	N/A
					Definition:	The code specifying the language.
BDTG00000524				Language code content	Example:	en
					Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
					GDD name:	languageCode
BDT00000028				Code list version	GDD definition:	A code representing the language used in the description.
					GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
					Definition:	The version number of the code list.
BDTG00000288				Registered legal information	GDD name:	codeListVersion
					GDD definition:	Identification of the applied version of the code list.
					Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDT00000087				Legal registration number	GDD name:	legalRegistration
					GDD definition:	The registration details of an organisation in a particular legal register.
					Definition:	The identification number of an organisation according to a legal register.
BDT00000086				Legal registration additional information	GDD name:	legalRegistrationNumber
					GDD definition:	Unique identifier of the organization in the legal register.
					Definition:	The additional information related to the legal registration expressed as text.
BDTG00000230				Legal registration type code	GDD name:	legalRegistrationAdditionalInformation
					GDD definition:	Additional information related to legal registration, e.g. CEO name.
					Definition:	The code specifying the type of legal registration.
BDTG00000230				Legal registration type code	GDD name:	legalRegistrationType
					GDD definition:	Code specifying the type of legal register.
					GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000658				Legal registration type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode

			GDD comment:	Code specifying the country for the address.
			GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000355	Ultimate consignee party information	Definition:	The information specifying the ultimate consignee responsible for the receipt of a shipment.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	ultimateConsignee
		GDD comment:	Identifies the final destination location to which goods will be shipped.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

GS1 SDD; 1.0; Published

BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
BDT00000127		State	Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128		Street address one	Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne

Business data term groups

GS1 SDD; 1.0; Published

BDT00000130			Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The second street address line of a structured address.
				Example:	Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129			Street address three	GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The third street address line of a structured address.
BDT00000128			Country code	Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code content	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Code list version	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Geographical coordinates information	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.

GDD name: dutyFeeTaxRegistrationType GDD definition: Specifies type of tax registration number assigned by national fiscal authorities. Allowed values come from DutyFeeTaxRegistrationTypeCode list.
BDTG00000624	Customs registration type code content	Definition: The code specifying the type of customs registration number assigned by a national authority. Used code list: DutyFeeTaxRegistrationTypeCode Link to code list: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DutyFeeTaxRegistrationTypeCode&release=1 GDD name: N/A GDD definition: N/A
BDTG00000028	Code list version	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000262	Organisation legal information	Definition: The information specifying details of a legal organisation. GDD name: organisationDetails GDD comment: Information about the legal organisation of the party involved in the business transaction.
BDTG00000102	Organisation name	Definition: The official and legal name of the organisation. GDD name: organisationName GDD definition: The official name of the organisation.
BDTG00000228	Language of the party code	Definition: The code specifying the language of a party.

BDT00000524			Language code content	GDD name:	languageOfThePartyCode
				GDD definition:	Code specifying the language of an addressed party.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028			Code list version	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000184			Currency of party code	GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000710			Currency of party code content	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDT00000028			Code list version	Definition:	The code specifying the currency of a party.
				Example:	EUR
				Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
BDTG00000246			Official address	GDD name:	currencyOfPartyCode
				GDD definition:	Code specifying the currency of an addressed party.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000034			County code	Definition:	The code specifying the currency of a party.
				Example:	EUR
				Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
BDT00000020			City name	Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
				GDD name:	N/A
				GDD definition:	N/A
BDT00000019			City code	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The registered legal address of the organisation.
				GDD name:	officialAddress
				GDD definition:	The address where the organisation is officially based.
				Definition:	The code indicating a geographical region in a country.
				GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
				Definition:	The name of the city, town or village.
				GDD name:	city
				GDD definition:	Text specifying the name of the city.
				Definition:	The code specifying a city.
				Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
				GDD definition:	Identifier for a city, expressed as a short code rather than the full name.

				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000590			Currency code	Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode

BDT00000589				Currency code content	GDD definition:	Code specifying the currency of the amount.
					GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
					GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
					Definition:	The code specifying the currency of a monetary amount.
BDT0000028				Code list version	Example:	EUR
					Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
					GDD name:	N/A
					GDD definition:	N/A
BDTG00000231				Legal structure description	Definition:	The version number of the code list.
					GDD name:	codeListVersion
					GDD definition:	Identification of the applied version of the code list.
					Definition:	The description of the legal structure expressed as text.
BDT00000659				Legal structure description content	GDD name:	legalStructure
					GDD definition:	Description of the type of legal structure of the organisation.
					Definition:	The description of the legal structure expressed as text.
					GDD name:	N/A
BDTG00000523				Language code	GDD definition:	N/A
					Definition:	The code specifying the language.
					GDD name:	N/A
					GDD comment:	N/A
BDT00000524				Language code content	Definition:	The code specifying the language.
					Example:	en
					Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
					GDD name:	languageCode
BDT00000028				Code list version	GDD definition:	A code representing the language used in the description.
					GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
					Definition:	The version number of the code list.
					GDD name:	codeListVersion
BDTG00000288				Registered legal information	GDD definition:	Identification of the applied version of the code list.
					Definition:	The information specifying the registered data on a legal entity in accordance with national law.
					GDD name:	legalRegistration
					GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000087				Legal registration number	Definition:	The identification number of an organisation according to a legal register.
					GDD name:	legalRegistrationNumber
					GDD definition:	Unique identifier of the organization in the legal register.
					Definition:	The additional information related to the legal registration expressed as text.
BDT00000086				Legal registration additional information	GDD name:	legalRegistrationAdditionalInformation
					GDD definition:	Additional information related to legal registration, e.g. CEO name.
					Definition:	The code specifying the type of legal registration.
					GDD name:	legalRegistrationType
BDTG00000230				Legal registration type code		

			GDD definition:	Code specifying the type of legal register.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDT00000106			Party name	<p>Definition: The name of the party expressed as text.</p> <p>GDD name: name</p> <p>GDD definition: The name of the party expressed in text.</p>
BDT00000113			Post office box number	<p>Definition: The number of a post office box located on the premises of a post office station or other postal service location.</p> <p>Synonyms: P.O. box, postal box</p> <p>GDD name: pOBoxNumber</p> <p>GDD definition: The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.</p>
BDT00000114			Postal code	<p>Definition: The code according to the relevant postal system or service to specify a geographical area.</p> <p>Example: SE 190 90</p> <p>Synonyms: postcode, post code, PIN Code, ZIP Code, Eircode</p> <p>GDD name: postalCode</p> <p>GDD definition: Text specifying the postal code for an address.</p>
BDT00000117			Province identity	<p>Definition: The identity of a province according to national codes assigned to provinces.</p> <p>GDD name: provinceCode</p> <p>GDD definition: Text specifying a province in abbreviated format.</p>
BDT00000127			State	<p>Definition: The political unit that a country can be divided into.</p> <p>Example: California</p> <p>GDD name: state</p> <p>GDD definition: One of the constituent units of a nation having a federal government.</p>
BDT00000128			Street address one	<p>Definition: The first street address line of a structured address.</p> <p>Example: Avenue Louise 326</p> <p>Remark: Can be the name of a street and house number or the name of a building.</p> <p>GDD name: streetAddressOne</p> <p>GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.</p>
BDT00000130			Street address two	<p>Definition: The second street address line of a structured address.</p> <p>Example: Blue Tower</p> <p>Remark: Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.</p> <p>GDD name: streetAddressTwo</p> <p>GDD definition: streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line</p>

				GDD definition:	below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129			Street address three	Definition: Example: Remark:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building. The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition: GDD name: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address.
BDT00000774			Country code content	GDD comment: Definition: Remark:	The ISO 3166 code list can be acquired on the following website: www.iso.org The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name: GDD definition:	N/A N/A
BDT00000028			Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDT00000085			Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition: Example: GDD name: GDD definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. 18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

					GDD name:	state
BDT00000129				Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
					Definition:	The first street address line of a structured address.
BDT00000179				Country code	Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774				Country code content	GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129				Street address three	GDD definition:	The second street address line of a structured address.
					Definition:	The third street address line of a structured address.
BDT00000179				Country code	Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000774				Country code content	GDD name:	streetAddressTwo
					GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000179				Country code	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
					Definition:	The third street address line of a structured address.
BDT00000774				Country code content	Example:	Floor 4
					Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000179				Country code	GDD name:	streetAddressThree
					GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDT00000774				Country code content	Definition:	The code specifying a country.
					GDD name:	countryCode
BDT00000179				Country code	GDD comment:	Code specifying the country for the address.
					GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774				Country code content	Definition:	The code specifying a country.

BDT00000028		Code list version	GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
BDT00000127		State	Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128		Street address one	Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne

Business data term groups

GS1 SDD; 1.0; Published

BDT00000130			Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The second street address line of a structured address.
				Example:	Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129			Street address three	GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The third street address line of a structured address.
BDT00000129			Street address three	Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
BDT00000089			Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
BDTG00000158			Business contact information	GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
				Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
BDT00000112			Person name	GDD name:	contact
				GDD comment:	Person or department that can be contacted regarding the business transaction.
				Definition:	The name of an individual person expressed as text.
BDT00000044			Department name	GDD name:	personName
				GDD definition:	The name of the individual that can be contacted to provide additional information.
				Definition:	The name of the department.
BDT00000083			Job title	GDD name:	departmentName
				GDD definition:	The name of the department that can be contacted to provide additional information.
				Definition:	The title of a position or the role of a person holding the position.
BDTG00000178			Contact type code	GDD name:	jobTitle
				GDD definition:	The job title of the person that can be contacted.
				Definition:	The code specifying the function or role of a contact person.
BDT00000571			Contact type code content	Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:add:cl:ContactTypeCode

BDT00000020		City name	GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
			Definition:	The name of the city, town or village.
			GDD name:	city
BDT00000019		City code	GDD definition:	Text specifying the name of the city.
			Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
BDT00000034		County code	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
			Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000106		Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
BDT00000113		Post office box number	GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000114		Postal code	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117		Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
BDT00000127		State	GDD definition:	Text specifying the postal code for an address.
			Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128		Street address one	GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
			Example:	California
BDT00000128		Street address one	GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
BDT00000128		Street address one	Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
BDT00000128		Street address one	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a

BDT00000130		Street address two	Definition:	building.
			Example:	The second street address line of a structured address. Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.

BDT00000089		Longitude	Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
			Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"
			GDD name:	longitude
BDTG00000158		Business contact information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
			Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
			GDD name:	contact
			GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000112		Person name	Definition:	The name of an individual person expressed as text.
			GDD name:	personName
			GDD definition:	The name of the individual that can be contacted to provide additional information.
			Definition:	The name of the department.
BDT00000044		Department name	GDD name:	departmentName
			GDD definition:	The name of the department that can be contacted to provide additional information.
			Definition:	The title of a position or the role of a person holding the position.
			GDD name:	jobTitle
BDT00000083		Job title	GDD definition:	The job title of the person that can be contacted.
			Definition:	The code specifying the function or role of a contact person.
			Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
			GDD name:	contactTypeCode
			GDD comment:	Code specifying the function or role of a contact.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDT00000571		Contact type code content	Definition:	The code specifying the function or role of a contact person.
			GDD name:	N/A
			GDD definition:	N/A
			Definition:	The version number of the code list.
BDT00000028		Code list version	GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
			Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
			GDD name:	responsibility
			GDD comment:	Text further specifying the area of responsibility of the trade contact.
			Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDT00000580		Business contact responsibility description content

			GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode

Business data term groups

GS1 SDD; 1.0; Published

			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000106		Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
			GDD name:	name
BDT00000113		Post office box number	GDD definition:	The name of the party expressed in text.
			Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
BDT00000127		State	Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128		Street address one	Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130		Street address two	Definition:	The second street address line of a structured address.
			Example:	Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.

BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
		Example: Remark:	Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDTG00000179	Country code	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
BDT00000085	Latitude	GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDT00000284	Referenced purchase conditions information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000284	Referenced purchase conditions information	Definition:	The information specifying the details of a reference to an agreement of purchase conditions for a trade item.

BDT00000056	Entity identification	GDD name:	purchaseConditions
		GDD comment:	A reference to the purchase conditions. The reference is associated with specific items in the order.
		Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
BDT00000047	Business document creation date time	GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000119	Revision number	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		Remark:	The time is optional to include in the business document transaction.
BDT00000049	Document line number	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The sequence number of a line within the business document.
		Remark:	The time is optional to include in the business document transaction.
BDT00000118	Referenced document external location	GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
		Definition:	Provides the line number associated to the Order Line Item.
		Remark:	The time is optional to include in the business document transaction.
BDTG00000196	Document content owner	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		Remark:	The time is optional to include in the business document transaction.
BDTG00000196	Document content owner	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The sequence number of a line within the business document.
		Remark:	The time is optional to include in the business document transaction.
BDT00000063	Global location number GLN	GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
		Definition:	Provides the line number associated to the Order Line Item.
		Remark:	The time is optional to include in the business document transaction.
BDTG00000577	Additional party identification information	GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The information specifying the party that is responsible for the content of a document.
		Remark:	The time is optional to include in the business document transaction.
BDT00000578	Additional party identification content	GDD name:	contentOwner
		GDD definition:	Information used to identify a party or location.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Remark:	The time is optional to include in the business document transaction.
BDTG00000577	Additional party identification information	GDD name:	additionalPartyIdentification
		GDD definition:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		Remark:	The time is optional to include in the business document transaction.

BDT00000022		Code description	Definition: GDD name: GDD definition:	The description of a code value expressed as text. codeDescription A description for the code value provided.
BDT00000023		Code list agency code	Definition: GDD name: GDD definition:	The code specifying the agency responsible for a code list. codeListAgencyCode A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024		Code list agency code list version	Definition: GDD name: GDD definition:	The version number of a code list issued by the responsible agency for the code list. codeListAgencyCodeListVersion The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025		Code list agency name	Definition: GDD name: GDD definition:	The name of the agency responsible for a code list. codeListAgencyName A name of the agency which manages the code list for example ISO.
BDT00000026		Code list name	Definition: GDD name: GDD definition:	The name of the code list expressed as text. codeListName The name of the code list which provides the code value.
BDT00000027		Code list URL	Definition: Remark: GDD name: GDD definition: GDD comment:	The character string that identifies the location of the code list in a network. Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list. codeListURI A string that refers to the location of the code list which provides the code value. URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028		Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000310		Ship from party information	Definition: Usage: GDD name: GDD definition:	The information specifying the location from which goods are shipped. To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both. shipFrom Identifies the origin location from which goods will be shipped.
BDT00000063		Global location number GLN	Definition: Remark: GDD name: GDD definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577		Additional party identification information	Definition: Usage: GDD name: GDD comment:	The information specifying the additional identification details of a party. The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN. additionalPartyIdentification A party identifier that is in addition to the GLN.

BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box

				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114			Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.
BDT00000117			Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
				GDD definition:	Text specifying a province in abbreviated format.
BDT00000127			State	Definition:	The political unit that a country can be divided into.
				Example:	California
				GDD name:	state
				GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128			Street address one	Definition:	The first street address line of a structured address.
				Example:	Avenue Louise 326
				Remark:	Can be the name of a street and house number or the name of a building.
				GDD name:	streetAddressOne
				GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130			Street address two	Definition:	The second street address line of a structured address.
				Example:	Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
					For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where

BDTG00000179	Country code	Definition:	necessary. The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDTG00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.

				Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
				GDD name:	contactTypeCode
				GDD comment:	Code specifying the function or role of a contact.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDT00000571			Contact type code content	Definition:	The code specifying the function or role of a contact person.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000159			Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
				GDD name:	responsibility
				GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580			Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000523			Language code	Definition:	The code specifying the language.
				GDD name:	N/A
				GDD comment:	N/A
BDT00000524			Language code content	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000176			Communication information	Definition:	The information specifying details of a contact person's communication channel.
				GDD name:	communicationChannel
				GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175			Communication channel code	Definition:	The code specifying the channel for communication.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
				GDD name:	communicationChannelCode

				GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032			Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
				GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033			Communication channel name	Definition:	The name of a communication channel expressed as text.
				GDD name:	communicationChannelName
				GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000145			After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
				GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
				GDD name:	afterHoursCommunicationChannel
BDTG00000175			Communication channel code	Definition:	The code specifying the channel for communication.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
				GDD name:	communicationChannelCode
				GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032			Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
				GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033			Communication channel name	Definition:	The name of a communication channel expressed as text.
				GDD name:	communicationChannelName
				GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000326			Tax registration information	Definition:	The information specifying details of a party registered for tax.
				GDD name:	dutyFeeTaxRegistration
				GDD definition:	The registration details of a party related to a particular duty, tax or fee.
BDT00000369			Tax authority name	Definition:	The name of the authority administrating the collection of taxes expressed as text.
				Remark:	There may be examples when a tax authority charges customs duties and other fees.
				GDD name:	dutyFeeTaxAgencyName

BDTG00000158		Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
			GDD name:	contact
			GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000112		Person name	Definition:	The name of an individual person expressed as text.
			GDD name:	personName
			GDD definition:	The name of the individual that can be contacted to provide additional information.
BDTG00000044		Department name	Definition:	The name of the department.
			GDD name:	departmentName
			GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000083		Job title	Definition:	The title of a position or the role of a person holding the position.
			GDD name:	jobTitle
			GDD definition:	The job title of the person that can be contacted.
BDTG00000178		Contact type code	Definition:	The code specifying the function or role of a contact person.
			Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
			GDD name:	contactTypeCode
			GDD comment:	Code specifying the function or role of a contact.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000571		Contact type code content	Definition:	The code specifying the function or role of a contact person.
			GDD name:	N/A
			GDD definition:	N/A
BDTG00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000159		Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
			GDD name:	responsibility
			GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDTG00000580		Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
			GDD name:	N/A
			GDD definition:	N/A
BDTG00000523		Language code	Definition:	The code specifying the language.
			GDD name:	N/A
			GDD comment:	N/A
BDTG00000524		Language code content	Definition:	The code specifying the language.
			Example:	en
			Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
			GDD name:	languageCode

BDT00000028				Code list version	GDD definition:	A code representing the language used in the description.
					GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
					Definition:	The version number of the code list.
					GDD name:	codeListVersion
BDTG00000176				Communication information	GDD definition:	Identification of the applied version of the code list.
					Definition:	The information specifying details of a contact person's communication channel.
					GDD name:	communicationChannel
					GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175				Communication channel code	Definition:	The code specifying the channel for communication.
					Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
					GDD name:	communicationChannelCode
					GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
					GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
					GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032				Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
					GDD name:	communicationValue
					GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033				Communication channel name	Definition:	The name of a communication channel expressed as text.
					GDD name:	communicationChannelName
BDTG00000145				After hours communication information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
					Definition:	The information specifying details of communication channels to use after regular business hours.
					GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175				Communication channel code	GDD name:	afterHoursCommunicationChannel
					Definition:	The code specifying the channel for communication.
					Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
					GDD name:	communicationChannelCode
					GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
					GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
					GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode

					Definition:	The version number of the code list.
					GDD name:	codeListVersion
BDTG00000246				Official address	GDD definition:	Identification of the applied version of the code list.
					Definition:	The registered legal address of the organisation.
					GDD name:	officialAddress
					GDD definition:	The address where the organisation is officially based.
BDT00000034				County code	Definition:	The code indicating a geographical region in a country.
					GDD name:	countyCode
					GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020				City name	Definition:	The name of the city, town or village.
					GDD name:	city
					GDD definition:	Text specifying the name of the city.
BDT00000019				City code	Definition:	The code specifying a city.
					Remark:	Should not be misunderstood as a postal code.
					GDD name:	cityCode
					GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035				Cross street	Definition:	The street crossing another street.
					GDD name:	crossStreet
					GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113				Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
					Synonyms:	P.O. box, postal box
					GDD name:	pOBoxNumber
					GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114				Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
					Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117				Province identity	GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
BDT00000127				State	Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
BDT00000128				Street address one	GDD definition:	Text specifying a province in abbreviated format.
					Definition:	The political unit that a country can be divided into.
BDT00000130				Street address two	Example:	California
					GDD name:	state
BDT00000129				Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
					Definition:	The first street address line of a structured address.
BDTG00000179				Country code	Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774				Country code content	GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.

				Definition:	The version number of the code list.

BDTG00000246				Official address	GDD name: codeListVersion GDD definition: Identification of the applied version of the code list. Definition: The registered legal address of the organisation. GDD name: officialAddress GDD definition: The address where the organisation is officially based.
BDT00000034				County code	Definition: The code indicating a geographical region in a country. GDD name: countyCode GDD definition: A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020				City name	Definition: The name of the city, town or village. GDD name: city GDD definition: Text specifying the name of the city.
BDT00000019				City code	Definition: The code specifying a city. Remark: Should not be misunderstood as a postal code. GDD name: cityCode GDD definition: Identifier for a city, expressed as a short code rather than the full name.
BDT00000035				Cross street	Definition: The street crossing another street. GDD name: crossStreet GDD definition: A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113				Post office box number	Definition: The number of a post office box located on the premises of a post office station or other postal service location. Synonyms: P.O. box, postal box GDD name: pOBoxNumber GDD definition: The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114				Postal code	Definition: The code according to the relevant postal system or service to specify a geographical area. Example: SE 190 90 Synonyms: postcode, post code, PIN Code, ZIP Code, Eircode GDD name: postalCode GDD definition: Text specifying the postal code for an address.
BDT00000117				Province identity	Definition: The identity of a province according to national codes assigned to provinces. GDD name: provinceCode GDD definition: Text specifying a province in abbreviated format.
BDT00000127				State	Definition: The political unit that a country can be divided into. Example: California GDD name: state GDD definition: One of the constituent units of a nation having a federal government.
BDT00000128				Street address one	Definition: The first street address line of a structured address. Example: Avenue Louise 326 Remark: Can be the name of a street and house number or the name of a building. GDD name: streetAddressOne GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a

BDT00000130				Street address two	Definition:	building.					
					Example:	Blue Tower					
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.					
					GDD name:	streetAddressTwo					
					GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.					
BDT00000129				Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.					
					Definition:	The third street address line of a structured address.					
					Example:	Floor 4					
					Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.					
					GDD name:	streetAddressThree					
BDTG00000179				Country code	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.					
					Definition:	The code specifying a country.					
					GDD name:	countryCode					
					GDD comment:	Code specifying the country for the address.					
					GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org					
BDT00000774				Country code content	Definition:	The code specifying a country.					
					Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.					
					GDD name:	N/A

BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
BDT00000127		State	Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128		Street address one	Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne

GS1 SDD; 1.0; Published

BDT00000130	Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000129	Street address three	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDTG00000179	Country code	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000774	Country code content	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214	Geographical coordinates information	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	23°26'12.2" S latitude Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000223		Logistics services provider party information	Definition:	The information specifying details of a party providing logistics services.
			Usage: Remark: GDD name: GDD definition:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both. The party can be an internal part of an organisation providing logistics services or an external company selling logistics services. intermediateDeliveryParty Identification of and additional information about a party involved in a business transaction, such as "order" or "invoice".
BDT00000063		Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
			Remark: GDD name: GDD definition:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577		Additional party identification information	Definition:	The information specifying the additional identification details of a party.
			Usage: GDD name: GDD comment:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN. additionalPartyIdentification A party identifier that is in addition to the GLN.
BDT00000578		Additional party identification content	Definition:	The additional identity of a party.
			GDD name: GDD definition:	N/A N/A
BDTG00000579		Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
			GDD name: GDD definition:	additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
BDT00000570		Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.

			Used code list:	AdditionalPartyIdentificationTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.

		GDD comment:	Contains the choices to select various types of dates or date ranges associated to the order.
BDTG00000295	Requested delivery time period	Definition:	The date (and time) of the period during which ordered trade items are requested to be delivered.
		Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
		GDD name:	requestedDeliveryDateRange
		GDD comment:	Provides the earliest and latest date ranges and the optional times on which the goods are requested to be delivered.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
		GDD definition:	Time specifying the start time for the date time range.
BDT00000009	Begin period date	Definition:	The first date of a date period.
		GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000054	End date period	Definition:	The last date of a date period.
		GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
		GDD definition:	Time specifying the end time for the date time range.
BDTG00000298	Requested ship date time period	Definition:	The date (and time) of the period during which ordered trade items are requested to be shipped.
		Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
		GDD name:	requestedShipDateRange
		GDD definition:	Provides the earliest and latest date ranges and the optional times on which the goods are requested to be shipped or despatched.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
		GDD definition:	Time specifying the start time for the date time range.
BDT00000009	Begin period date	Definition:	The first date of a date period.
		GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000054	End date period	Definition:	The last date of a date period.
		GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
		GDD definition:	Time specifying the end time for the date time range.
BDTG00000294	Requested delivery date time period at ultimate consignee	Definition:	The date (and time) of the period during which ordered trade items are requested to be delivered at ultimate consignee.

BDT00000010	—	Begin time period	Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
			GDD name:	requestedDeliveryDateRangeAtUltimateConsignee
			GDD definition:	Provides the date and optional time on which the goods are requested to be delivered.
			Definition:	The first point in time of a period of time or date period.
BDT00000009	—	Begin period date	GDD name:	beginTime
			GDD definition:	Time specifying the start time for the date time range.
			Definition:	The first date of a date period.
			GDD name:	beginDate
BDT00000054	—	End date period	GDD definition:	Date specifying the first day for the date time range.
			Definition:	The last date of a date period.
			GDD name:	endDate
			GDD definition:	Date specifying the last day for the date time range.
BDT00000055	—	End time period	Definition:	The end time of a period of time or date time period.
			GDD name:	endTime
			GDD definition:	Time specifying the end time for the date time range.
			Definition:	The date and optional time when the ordered trade items are requested to be delivered.
BDTG00000291	—	Requested delivery date time	Remark:	The indication of a point in time during a date can be given for when the delivery of ordered trade items are required.
			GDD name:	requestedDeliveryDateTime
			GDD definition:	Provides the date and optional time on which the goods are requested to be delivered.
			Definition:	The day of a year as a calendar date.
BDT00000040	—	Date	Example:	2020-06-15
			GDD name:	date
			GDD definition:	The specification of a day as calendar date.
			Definition:	The indication of a point in time.
BDT00000133	—	Time	Example:	08:01:15
			GDD name:	time
			GDD definition:	The specification of a point in time during the day.
			Definition:	The date (and time) when the ordered trade items are requested to be despatched.
BDTG00000297	—	Requested ship date time	Remark:	The indication of a point in time during a date can be given for when the ordered trade items are required to be despatched.
			GDD name:	requestedShipDateTime
			GDD comment:	Provides the date and optional time on which the goods are requested to be shipped or despatched by the supplier.
			Definition:	The day of a year as a calendar date.
BDT00000040	—	Date	Example:	2020-06-15
			GDD name:	date
			GDD definition:	The specification of a day as calendar date.
			Definition:	The indication of a point in time.
BDT00000133	—	Time	Example:	08:01:15
			GDD name:	time
			GDD definition:	The specification of a point in time during the day.
			Definition:	The indication of a point in time.

BDTG00000290	Requested date time for pick up	Definition:	The date (and time) when the ordered trade items are requested to be available for pick up.
		Remark:	The indication of a point in time during a date can be given for when ordered trade items are requested to be available for pick up.
		GDD name:	requestedPickUpDateTime
		GDD comment:	Provides the date and optional time on which the goods are requested to be available for pickup at the seller's location.
BDTG00000040	Date	Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
BDTG00000133	Time	Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
BDTG00000292	Requested delivery date time at ultimate consignee	Definition:	The date (and time) when the ordered trade items are requested to be delivered at ultimate consignee.
		Remark:	The indication of a point in time during a date can be given for when the delivery of ordered trade items are required.
		GDD name:	requestedDeliveryDateTimeAtUltimateConsignee
		GDD definition:	Provides the date and optional time on which the goods are requested to be delivered to the Ultimate Consignee.
BDTG00000040	Date	Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
BDTG00000133	Time	Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
BDTG00000312	Shipment transportation information	Definition:	The information specifying details about the transportation of goods.
		GDD name:	shipmentTransportationInformation
BDTG00000218	Handling instruction code	GDD comment:	Provides information on the means of transportation or carrier associated with the order.
		Definition:	The code specifying how the ordered trade items are to be handled and loaded.
		GDD name:	handlingInstructionCode
		GDD definition:	Code identifying handling instructions for this shipment, such as where or how specified packages or containers are to be loaded on a means of transport. Handling instructions can include haulage/pickup and or delivery instruction/ temperature/humidity instructions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

					GDD definition:	N/A
					Definition:	The version number of the code list.
BDTG00000159				Business contact responsibility description	GDD name:	codeListVersion
					GDD definition:	Identification of the applied version of the code list.
					Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDTG00000580				Business contact responsibility description content	GDD name:	responsibility
					GDD comment:	Text further specifying the area of responsibility of the trade contact.
					Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDTG00000523				Language code	GDD name:	N/A
					GDD definition:	N/A
					Definition:	The code specifying the language.
BDTG00000524				Language code content	GDD name:	N/A
					GDD definition:	N/A
					GDD comment:	N/A
					Definition:	The code specifying the language.
					Example:	en
BDTG00000028				Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
					GDD name:	languageCode
					GDD definition:	A code representing the language used in the description.
					GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
					Definition:	The version number of the code list.
BDTG00000176				Communication information	GDD name:	codeListVersion
					GDD definition:	Identification of the applied version of the code list.
					Definition:	The information specifying details of a contact person's communication channel.
					GDD name:	communicationChannel
					GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone

BDTG00000175			Communication channel code	Definition:	or email. The code specifying the channel for communication.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
				GDD name:	communicationChannelCode
				GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032			Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
BDTG00000033			Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
				Definition:	The name of a communication channel expressed as text.
BDTG00000145			After hours communication information	GDD name:	communicationChannelName
				GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000175			Communication channel code	Definition:	The information specifying details of communication channels to use after regular business hours.
				GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
				GDD name:	afterHoursCommunicationChannel
				Definition:	The code specifying the channel for communication.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032			Communication channel identification	GDD name:	communicationChannelCode
				GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
				Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
BDTG00000033			Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
				Definition:	The name of a communication channel expressed as text.
BDTG00000033			Communication channel name	GDD name:	communicationChannelName

BDTG00000326			Tax registration information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
				Definition:	The information specifying details of a party registered for tax.
				GDD name:	dutyFeeTaxRegistration
BDTG00000369			Tax authority name	GDD definition:	The registration details of a party related to a particular duty, tax or fee.
				Definition:	The name of the authority administrating the collection of taxes expressed as text.
				Remark:	There may be examples when a tax authority charges customs duties and other fees.
				GDD name:	dutyFeeTaxAgencyName
BDTG00000585			Tax registration identification information	GDD definition:	Agency responsible for the collection of this duty, fee or tax.
				Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
				GDD name:	dutyFeeTaxRegistrationID
BDTG00000584			Tax registration identification content	GDD comment:	Identifier of the party for this particular duty, fee or tax.
				Definition:	The identity assigned to a party registered for tax according to a national tax register.
				GDD name:	N/A
BDTG00000587			Identification scheme information	GDD definition:	N/A
				Definition:	The information specifying details of the used identification scheme.
				GDD name:	N/A
BDTG00000074			Identification scheme name	GDD definition:	N/A
				Definition:	The name of the identification scheme.
				GDD name:	identificationSchemeName
BDTG00000073			Identification scheme agency name	GDD definition:	The name of the identification scheme.
				Definition:	The name of the agency responsible for a identification scheme.
				GDD name:	identificationSchemeAgencyName
BDTG00000586			Identification scheme responsible agency code	GDD definition:	The name of the agency that maintains the identification scheme.
				Definition:	The code specifying the agency responsible for the identification scheme.
				GDD name:	identificationSchemeAgencyCode
BDTG00000583			Identification scheme responsible agency code content	GDD definition:	The identification of the agency that maintains the identification scheme.
				Definition:	The code specifying the agency responsible for the identification scheme.
				Used code list:	ResponsibleAgencyCode
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:ResponsibleAgencyCode&release=5
				Remark:	The link to the code list to use seems to be missing in GDD??!!
				GDD name:	N/A
BDTG00000028			Code list version	GDD definition:	N/A
				Definition:	The version number of the code list.
				GDD name:	codeListVersion

BDTG00000328			Tax type code	GDD definition:	Identification of the applied version of the code list.
				Definition:	The code specifying the type of tax.
BDTG00000576			Tax type code content	GDD name:	dutyFeeTaxTypeCode
				GDD comment:	Code specifying the type of duty, fee or tax.
BDTG00000028			Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

					GDD definition:	The address where the organisation is officially based.
BDT00000019				City code	Definition:	The code indicating a geographical region in a country.
					GDD name:	countyCode
BDT00000035				Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
					Definition:	The name of the city, town or village.
BDT00000113				Post office box number	GDD name:	city
					GDD definition:	Text specifying the name of the city.
BDT00000114				Postal code	Definition:	The code specifying a city.
					Remark:	Should not be misunderstood as a postal code.
BDT00000117				Province identity	GDD name:	cityCode
					GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000127				State	Definition:	The street crossing another street.
					GDD name:	crossStreet
BDT00000128				Street address one	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
					Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
					Synonyms:	P.O. box, postal box
					GDD name:	pOBoxNumber
					GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
					Definition:	The code according to the relevant postal system or service to specify a geographical area.
					Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
					GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
					Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
					GDD definition:	Text specifying a province in abbreviated format.
					Definition:	The political unit that a country can be divided into.
					Example:	California
					GDD name:	state
					GDD definition:	One of the constituent units of a nation having a federal government.
					Definition:	The first street address line of a structured address.
					Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.

					GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130				Street address two	Definition:	The second street address line of a structured address.
					Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
					GDD name:	streetAddressTwo
					GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
					GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129				Street address three	Definition:	The third street address line of a structured address.
					Example:	Floor 4
					Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
					GDD name:	streetAddressThree
					GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179				Country code	Definition:	The code specifying a country.
					GDD name:	countryCode
					GDD comment:	Code specifying the country for the address.
					GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774				Country code content	Definition:	The code specifying a country.
					Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
					GDD name:	N/A
					GDD definition:	N/A
BDT00000028				Code list version	Definition:	The version number of the code list.
					GDD name:	codeListVersion
					GDD definition:	Identification of the applied version of the code list.
BDTG00000214				Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
					GDD name:	geographicalCoordinates

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085			Latitude	GDD comment:	Geographical coordinates for the address.
				Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
BDT00000089			Longitude	GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000225			Issued capital	Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000590			Currency code	Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode
				GDD definition:	Code specifying the currency of the amount.
BDT00000589			Currency code content	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				Definition:	Use currency codes according to the alphanumeric values of ISO 4217.
				Example:	EUR
BDT00000028			Code list version	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000231			Legal structure description	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDT00000659			Legal structure description content	Definition:	The description of the legal structure expressed as text.
				GDD name:	legalStructure
				GDD definition:	Description of the type of legal structure of the organisation.
BDTG00000523			Language code	Definition:	The description of the legal structure expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000524			Language code content	Definition:	The code specifying the language.
				GDD name:	N/A
				GDD comment:	N/A

				Example: Used code list:	en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.

BDTG00000523			Language code	GDD comment:	N/A
				GDD comment:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000524			Language code content	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
BDT00000028			Code list version	GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000144			Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
				GDD name:	address
				GDD comment:	Address of the party involved in the business transaction.
BDT00000020			City name	Definition:	The name of the city, town or village.
				GDD name:	city
				GDD definition:	Text specifying the name of the city.
BDT00000019			City code	Definition:	The code specifying a city.
				Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
				GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034			County code	Definition:	The code indicating a geographical region in a country.
				GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035			Cross street	Definition:	The street crossing another street.
				GDD name:	crossStreet
				GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106			Party name	Definition:	The name of the party expressed as text.
				GDD name:	name
				GDD definition:	The name of the party expressed in text.
BDT00000113			Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114			Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.

GS1 SDD; 1.0; Published

BDT00000028			Code list version	GDD name:	UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1.
				GDD definition:	GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000214			Geographical coordinates information	GDD name:	N/A
				GDD definition:	N/A
BDT00000085			Latitude	Definition:	The version number of the code list.
				GDD name:	codeListVersion
BDT00000089			Longitude	GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000213			Freight forwarder party information	GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000063			Global location number GLN	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
BDTG00000577			Additional party identification information	GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
				Definition:	The information specifying details of the party that arranges carriage of goods including connected services such as preparing and processing customs documentation and performing activities pertaining to international shipments.
				Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
				GDD name:	freightForwarder
				GDD definition:	Party that arranges the carriage of goods including connected services and/or associated formalities on behalf of the shipper (consignor) or consignee.
				Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
				Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
				GDD name:	gln
				GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
				Definition:	The information specifying the additional identification details of a party.
				Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
				GDD name:	additionalPartyIdentification
				GDD comment:	A party identifier that is in addition to the GLN.

BDTG00000246			Official address	GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDT00000034			County code	Definition:	The registered legal address of the organisation.
				GDD name:	officialAddress
BDT00000020			City name	GDD definition:	The address where the organisation is officially based.
				Definition:	The code indicating a geographical region in a country.
BDT00000019			City code	GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035			Cross street	Definition:	The name of the city, town or village.
				GDD name:	city
BDT00000113			Post office box number	GDD definition:	Text specifying the name of the city.
				Definition:	The code specifying a city.
BDT00000114			Postal code	Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
BDT00000117			Province identity	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
				Definition:	The street crossing another street.
BDT00000127			State	GDD name:	crossStreet
				GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000128			Street address one	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
				Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.
				Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
				GDD definition:	Text specifying a province in abbreviated format.
				Definition:	The political unit that a country can be divided into.
				Example:	California
				GDD name:	state
				GDD definition:	One of the constituent units of a nation having a federal government.
				Definition:	The first street address line of a structured address.
				Example:	Avenue Louise 326
				Remark:	Can be the name of a street and house number or the name of a building.
				GDD name:	streetAddressOne
				GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a

BDT00000130			Street address two	Definition:	building.
				Example:	The second street address line of a structured address. Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. 				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
				Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000085			Latitude		

BDT00000089			Longitude	Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
				Definition:	The monetary amount representing the value of the issued capital of a company.
BDTG00000225			Issued capital	GDD name:	issuedCapital
			Issued capital content	GDD definition:	The amount of the issued capital.
				Definition:	The monetary amount representing the issued capital of a company.
BDT00000655				GDD name:	N/A
			Currency code	GDD definition:	N/A
				Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode
				GDD definition:	Code specifying the currency of the amount.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
			Currency code content	Definition:	The code specifying the currency of a monetary amount.
				Example:	EUR
				Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
				GDD definition:	N/A
				Definition:	The version number of the code list.
BDT00000028			Code list version	GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The description of the legal structure expressed as text.
			Legal structure description	GDD name:	legalStructure
				GDD definition:	Description of the type of legal structure of the organisation.
			Legal structure description content	Definition:	The description of the legal structure expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
				Definition:	The code specifying the language.
BDTG00000523			Language code	GDD name:	N/A
				GDD comment:	N/A
				Definition:	The code specifying the language.
			Language code content	Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .

BDT00000028			Code list version	GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
				Definition:	The version number of the code list.
BDTG00000288			Registered legal information	GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying the registered data on a legal entity in accordance with national law.
				GDD name:	legalRegistration
BDT00000087			Legal registration number	GDD definition:	The registration details of an organisation in a particular legal register.
				Definition:	The identification number of an organisation according to a legal register.
				GDD name:	legalRegistrationNumber
				GDD definition:	Unique identifier of the organization in the legal register.
BDT00000086			Legal registration additional information	Definition:	The additional information related to the legal registration expressed as text.
				GDD name:	legalRegistrationAdditionalInformation
				GDD definition:	Additional information related to legal registration, e.g. CEO name.
				Definition:	The code specifying the type of legal registration.
BDTG00000230			Legal registration type code	GDD name:	legalRegistrationType
				GDD definition:	Code specifying the type of legal register.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode

BDT00000686	Ordered trade item fulfillment source code content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000028	Code list version	Definition:	The code specifying a requirement of the source of the fulfillment of an ordered trade item.
		Usage:	The business data term is normally to be used internally in an IT business system processing customers orders from different customers. The information is used to determine whether the delivery of the ordered trade item must take into account another cross docking order, existing warehouse stock or must be fulfilled by either. A bilateral agreement is needed if the business data term is to be used in communication with an external party.
BDTG00000259	Ordered trade item logistical information	GDD name:	itemSourceCode
		GDD definition:	Specifies whether the item must be fulfilled by another crossdocking order, existing warehouse stock, or can be fulfilled by either.
BDT00000788	Logistic label customer information	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemSourceCode
BDTG00000396	Shipment split method code	Definition:	The code specifying a requirement of the source of the fulfillment of an ordered trade item.
		Used code list:	ItemSourceCode
BDT00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemSourceCode
		GDD name:	N/A
BDTG00000259	Ordered trade item logistical information	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000788	Logistic label customer information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000396	Shipment split method code	Definition:	The information specifying various requirements of logistical nature for ordered trade item.
		GDD name:	orderLogisticalInformation
BDT00000788	Logistic label customer information	GDD comment:	Provides identification of the locations of the parties dealing with the goods associated with the order, as well as the dates or date ranges associated with the order and the transportation of the shipment associated with the order.
		Definition:	The customer defined text to be printed on the logistics label(s) of the logistic unit(s)
BDTG00000396	Shipment split method code	GDD name:	logisticLabelCustomerText
		GDD definition:	The customer defined text on the logistic label(s).
BDTG00000396	Shipment split method code	Definition:	The code specifying the method by which a shipment of ordered trade items may be split.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000348	Transport cargo type code	GDD name:	shipmentSplitMethodCode
		GDD definition:	Specifies a method of splitting shipment of ordered goods.
BDT00000568	Transport cargo type code content	Definition:	The code specifying the type of transport cargo.
		GDD name:	commodityTypeCode
BDT00000022	Code description	GDD comment:	Specifies the type of commodity for transport purposes, according to the user-selected coding scheme.
		Definition:	The code specifying the type of transport cargo.
BDT00000023	Code list agency code	GDD name:	N/A
		GDD definition:	N/A
BDT00000024	Code list agency code list version	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
BDT00000025	Code list agency name	GDD definition:	A description for the code value provided.
		Definition:	The code specifying the agency responsible for a code list.
BDT00000026	Code list name	GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000027	Code list URL	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
BDT00000028	Code list version	GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		Definition:	The name of the agency responsible for a code list.
BDTG00000310	Ship from party information	GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000063	Global location number GLN	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
		Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the location from which goods are shipped.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	shipFrom
		GDD definition:	Identifies the origin location from which goods will be shipped.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.

BDT00000129	Street address three	Definition:	For example, the name of the street and the number in the street or the name of a building.
		Example:	The third street address line of a structured address.
BDTG00000179	Country code	Remark:	Floor 4
		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.	
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDT00000028	Code list version	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000089	Longitude	GDD name:	N/A
		GDD definition:	N/A
BDTG00000158	Business contact information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000112	Person name	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000158	Business contact information	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000112	Person name	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000158	Business contact information	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDT00000112	Person name	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDT00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.

		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
	Ship to party information	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000311	Ship to party information	Definition:	The information specifying the location to which goods are shipped.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
	Global location number GLN	GDD name:	shipTo
		GDD definition:	Identifies the destination location to which goods will be shipped.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000579	Additional party identification type code	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.

			Used code list:	AdditionalPartyIdentificationTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.

		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000035	Cross street	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117			Province identity	GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.
BDT00000127			State	Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
BDT00000128			Street address one	GDD definition:	Text specifying a province in abbreviated format.
				Definition:	The political unit that a country can be divided into.
BDT00000130			Street address two	Example:	California
				GDD name:	state
BDT00000129			Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
				Definition:	The first street address line of a structured address.
BDT00000179			Country code	Example:	Avenue Louise 326
				Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774			Country code content	GDD name:	streetAddressOne
				GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The second street address line of a structured address.
				Example:	Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
				Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
				Definition:	The code specifying a country.

			GDD definition:	N/A
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"
			GDD name:	longitude
			GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225		Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
			GDD name:	issuedCapital
			GDD definition:	The amount of the issued capital.
BDT00000655		Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
			GDD name:	N/A
			GDD definition:	N/A
BDTG00000590		Currency code	Definition:	The code specifying the currency of a monetary amount.
			GDD name:	currencyCode
			GDD definition:	Code specifying the currency of the amount.
			GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
			GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589		Currency code content	Definition:	The code specifying the currency of a monetary amount.
			Example:	EUR
			Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000231		Legal structure description	Definition:	The description of the legal structure expressed as text.

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.

			Example: Used code list:	en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
			GDD name:	languageCode
			GDD definition:	A code representing the language used in the description.
			GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000144		Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106		Party name	Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000117		Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode

BDT00000524		Language code content	Definition:	The code specifying the language.
			Example:	en
			Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
			GDD name:	languageCode
BDT00000028		Code list version	GDD definition:	A code representing the language used in the description.
			GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
BDTG00000144		Address information	GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
			Definition:	The code specifying a city.
BDT00000019		City code	Remark:	Should not be misunderstood as a postal code.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034		County code	GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035		Cross street	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
BDT00000106		Party name	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
			Definition:	The street crossing another street.
BDT00000113		Post office box number	GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000114		Postal code	Definition:	The name of the party expressed as text.
			GDD name:	name
BDT00000117		Province identity	GDD definition:	The name of the party expressed in text.
			Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000127		State	Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
BDT00000128		Street address one	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
			Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000130		Street address two	Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
			Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
			Definition:	The second street address line of a structured address.
			Example:	Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo

			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition: GDD name:	The code specifying a country. countryCode
			GDD comment:	Code specifying the country for the address.
BDT00000774		Country code content	GDD comment: Definition: Remark:	The ISO 3166 code list can be acquired on the following website: www.iso.org The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name: GDD definition:	N/A N/A
BDT00000028		Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDT00000085		Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Longitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. 18°3'59.0616" longitude

BDTG00000223	Logistics services provider party information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of a party providing logistics services.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		Remark:	The party can be an internal part of an organisation providing logistics services or an external company selling logistics services.
		GDD name:	intermediateDeliveryParty
BDT00000063	Global location number, GLN	GDD definition:	Identification of and additional information about a party involved in a business transaction, such as "order" or "invoice".
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
BDTG00000577	Additional party identification information	GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
BDT00000578	Additional party identification content	GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

BDTG00000175			Communication channel code	Definition:	The code specifying the channel for communication.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032			Communication channel identification	GDD name:	communicationChannelCode
				GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000032			Communication channel identification	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032			Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
				GDD name:	communicationValue
BDTG00000033			Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
				Definition:	The name of a communication channel expressed as text.
BDTG00000033			Communication channel name	GDD name:	communicationChannelName
				GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000145			After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
				GDD comment:	The channel or manner in which a communication can be made with the contact after regular office

BDTG00000175		Communication channel code	GDD name:	hours.
			Definition:	afterHoursCommunicationChannel The code specifying the channel for communication.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
			GDD name:	communicationChannelCode
BDT00000032		Communication channel identification	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
			GDD name:	communicationChannelCode
BDT00000033		Communication channel name	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
			GDD name:	communicationValue
			GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
			GDD name:	communicationChannelName
BDTG00000326		Tax registration information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
			Definition:	The information specifying details of a party registered for tax.
			GDD name:	dutyFeeTaxRegistration
			GDD definition:	The registration details of a party related to a particular duty, tax or fee.
BDT00000369		Tax authority name	Definition:	The name of the authority administrating the collection of taxes expressed as text.
			Remark:	There may be examples when a tax authority charges customs duties and other fees.
			GDD name:	dutyFeeTaxAgencyName
			GDD definition:	Agency responsible for the collection of this duty, fee or tax.
BDTG00000585		Tax registration identification information	Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
			GDD name:	dutyFeeTaxRegistrationID
			GDD comment:	Identifier of the party for this particular duty, fee or tax.
			Definition:	The identity assigned to a party registered for tax according to a national tax register.
BDT00000584		Tax registration identification content	GDD name:	N/A
			GDD definition:	N/A
			Definition:	The information specifying details of the used identification scheme.
			GDD name:	N/A
BDTG00000587		Identification scheme information	GDD definition:	N/A
			Definition:	The information specifying details of the used identification scheme.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000074		Identification scheme name	Definition:	The name of the identification scheme.
			GDD name:	identificationSchemeName
			GDD definition:	The name of the identification scheme.
			GDD name:	identificationSchemeName

GS1 SDD; 1.0; Published

BDT00000035		Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113		Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117		Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127		State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128		Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130		Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition: Example:	The third street address line of a structured address. Floor 4

				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000590			Currency code	Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode

BDT00000589			Currency code content	GDD definition:	Code specifying the currency of the amount.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
				Definition:	The code specifying the currency of a monetary amount.
BDT00000028			Code list version	Example:	EUR
				Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000231			Legal structure description	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The description of the legal structure expressed as text.
BDT00000659			Legal structure description content	GDD name:	legalStructure
				GDD definition:	Description of the type of legal structure of the organisation.
				Definition:	The description of the legal structure expressed as text.
				GDD name:	N/A
BDTG00000523			Language code	GDD definition:	N/A
				Definition:	The code specifying the language.
				GDD name:	N/A
				GDD comment:	N/A
BDT00000524			Language code content	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
BDT00000028			Code list version	GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
				Definition:	The version number of the code list.
				GDD name:	codeListVersion
BDTG00000288			Registered legal information	GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying the registered data on a legal entity in accordance with national law.
				GDD name:	legalRegistration
				GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000087			Legal registration number	Definition:	The identification number of an organisation according to a legal register.
				GDD name:	legalRegistrationNumber
				GDD definition:	Unique identifier of the organization in the legal register.
				Definition:	The additional information related to the legal registration expressed as text.
BDT00000086			Legal registration additional information	GDD name:	legalRegistrationAdditionalInformation
				GDD definition:	Additional information related to legal registration, e.g. CEO name.
				Definition:	The code specifying the type of legal registration.
				GDD name:	legalRegistrationType
BDTG00000230			Legal registration type code	GDD definition:	Code specifying the type of legal register.
				GDD definition:

BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en

BDT00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000163	Carrier party information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Usage:	The information specifying details of the party transporting shipments. To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDT00000063	Global location number, GLN	GDD name:	carrier
		GDD definition:	Uniquely identifies the entity that transports the shipment.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDT00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000128	Street address one	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.

			GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two		Definition:	The second street address line of a structured address.
			Example:	Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three		Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code		Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content		Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028	Code list version		Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information		Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates

BDTG00000085	—	Latitude	GDD comment:	Geographical coordinates for the address.
			Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
BDTG00000089	—	Longitude	GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
			Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000158	—	Business contact information	Example:	18°3'59.0616"
			GDD name:	longitude
			GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000112	—	Person name	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
			GDD name:	contact
			GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000044	—	Department name	Definition:	The name of an individual person expressed as text.
			GDD name:	personName
			GDD definition:	The name of the individual that can be contacted to provide additional information.
BDTG00000083	—	Job title	Definition:	The name of the department.
			GDD name:	departmentName
			GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000178	—	Contact type code	Definition:	The title of a position or the role of a person holding the position.
			GDD name:	jobTitle
			GDD definition:	The job title of the person that can be contacted.
BDTG00000571	—	Contact type code content	Definition:	The code specifying the function or role of a contact person.
			Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000028	—	Code list version	GDD name:	contactTypeCode
			GDD comment:	Code specifying the function or role of a contact.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000159	—	Business contact responsibility description	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
			Definition:	The code specifying the function or role of a contact person.
			GDD name:	N/A
BDTG00000028	—	Code list version	GDD definition:	N/A
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
BDTG00000159	—	Business contact responsibility description	GDD definition:	Identification of the applied version of the code list.
			Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
			GDD name:	responsibility
			GDD comment:	Text further specifying the area of responsibility of the trade contact.

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
BDTG00000207	Financial account information	GDD name:	N/A
		GDD definition:	N/A
BDTG00000209	Financial institution and financial account information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000061	Financial institution name	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a financial institution and financial account.
BDT00000060	Financial institution division name	GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDTG00000207	Financial account information	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionName
BDTG00000207	Financial account information	GDD definition:	The name of the account holder's financial institution.
		Definition:	The name of a division or branch within a financial institution expressed as text.
BDTG00000207	Financial account information	GDD name:	financialInstitutionBranchName
		GDD definition:	The name of a division or location of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The information specifying details of a financial account.
		GDD name:	financialAccount

BDT00000058	Financial account name	GDD comment:	Information identifying a client's financial account with a financial institution.
		Definition:	The name of a financial account expressed as text.
BDT00000059	Financial account number	Example:	John Doe
		GDD name:	financialAccountName
BDTG00000208	Financial account number type code	GDD definition:	Text specifying the name of the financial account.
		Definition:	The number of a financial account expressed as text.
BDTG00000208	Financial account number type code	GDD name:	financialAccountNumber
		GDD definition:	Text specifying the number of the financial account.
BDTG00000208	Financial account number type code	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
BDTG00000208	Financial account number type code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	financialAccountNumberTypeCode
BDTG00000208	Financial account number type code	GDD definition:	Identifies the type of financial account number.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000208	Financial account number type code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD comment:	FinancialAccountNumberTypeCode
BDTG00000645	Financial account number type code content	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
BDTG00000645	Financial account number type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	N/A
BDTG00000645	Financial account number type code content	GDD definition:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
		GDD definition:	Identification of the applied version of the code list.
BDTG00000210	Financial institution routing number information	Definition:	The information specifying details on a routing number of a financial institution.
		GDD name:	financialRoutingNumber
BDTG00000210	Financial institution routing number information	GDD comment:	Provides the Routing Number for the Financial Institution.
		GDD comment:	Provides the Routing Number for the Financial Institution.
BDTG00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
BDTG00000062	Financial routing number	GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Definition:	The code specifying the type of a financial routing number.
BDTG00000211	Financial routing number type code	Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode

BDT00000644	Financial routing number type code content	GDD name:	FinancialRoutingNumberTypeCode
		GDD definition:	financialRoutingNumberTypeCode
		GDD comment:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000028	Code list version	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
BDTG00000522	Additional financial institution description	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000521	Additional financial institution description content	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
		Definition:	The text value describing the additional financial institution.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000020	City name	Definition: GDD name: GDD definition:	The name of the city, town or village. city Text specifying the name of the city.
BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.

		Example: Remark:	Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name:	The code specifying a country. countryCode
		GDD comment: GDD comment:	Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDT00000085	Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude

BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000261	Organic certification information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying the certificate for a trade item which claims the product to be organic.
		GDD name:	organicCertification
		GDD comment:	Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition:	The certification value.
		Example:	need an reliable example
		GDD name:	itemCertificationValue
		GDD definition:	The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met.
		GDD name:	itemCertificationAgency
		GDD definition:	Name of the organization issuing the certification standard or other requirement being met.
		Definition:	The name of the certification standard expressed as text.
BDT00000016	Certification standard name	Example:	GlobalGAP
		GDD name:	itemCertificationStandard
		GDD definition:	Name of the certification standard. Free text. Example: Organic product.
		Definition:	The information specifying details of a legal organisation.
BDTG00000262	Organisation legal information	GDD name:	organisationDetails
		GDD comment:	Information about the legal organisation of the party involved in the business transaction.
		Definition:	The official and legal name of the organisation.
		GDD name:	organisationName
BDTG00000102	Organisation name	GDD definition:	The official name of the organisation.
		Definition:	The code specifying the language of a party.
		GDD name:	languageOfThePartyCode
		GDD definition:	Code specifying the language of an addressed party.
BDTG00000228	Language of the party code	GDD comment:	The ISO 639-1code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000524	Language code content	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000184	Currency of party code	Definition:	The code specifying the currency of a party.
		Example:	EUR
BDTG00000710	Currency of party code content	Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		GDD name:	currencyOfPartyCode
BDTG00000028	Code list version	GDD comment:	Code specifying the currency of an addressed party.
		GDD definition:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDTG00000246	Official address	Definition:	The code specifying the currency of a party.
		Example:	EUR
BDTG00000034	County code	Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
BDTG00000020	City name	GDD name:	N/A
		GDD definition:	N/A
BDTG00000019	City code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000035	Cross street	GDD definition:	Identification of the applied version of the code list.
		Definition:	The registered legal address of the organisation.
BDTG00000113	Post office box number	GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDTG00000114	Postal code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.

		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne

Business data term groups

GS1 SDD; 1.0; Published

BDT00000130	Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000129	Street address three	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214	Geographical coordinates information	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDT00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .

BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000288	Registered legal information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
		GDD name:	legalRegistration
BDT00000087	Legal registration number	GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
BDT00000086	Legal registration additional information	Definition:	The additional information related to the legal registration expressed as text.
		GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
BDT00000658	Legal registration type code content	Definition:	The code specifying the type of legal registration.
		Used code list:	LegalRegistrationCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
		Definition:	The name of a financial institution expressed as text.
BDT00000061	Financial institution name	GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
		Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
BDT00000060	Financial institution division name	GDD definition:	The name of a division or location of the account holder's financial institution.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000207	Financial account information	Definition:	The information specifying details of a financial account.
		GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
		GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDT00000059	Financial account number	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
		GDD definition:	Text specifying the number of the financial account.
BDTG00000208	Financial account number type code	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	financialAccountNumberTypeCode
		GDD definition:	Identifies the type of financial account number.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDT00000645	Financial account number type code content	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000210	Financial institution routing number information	Definition:	The information specifying details on a routing number of a financial institution.
		GDD name:	financialRoutingNumber
		GDD comment:	Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000035	Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000113	Post office box number	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000114	Postal code	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000127	State	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000128	Street address one	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower

		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000263	Over allocation quantity	Definition: GDD name: GDD comment:	The quantity that can be added to the ordered quantity of a trade item. overAllocationQuantity Acceptable quantity that can be over allocated for the given order.
BDTG00000415	Over allocation quantity content	Definition:	The quantity of the over allocation.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name: GDD comment: GDD name: GDD definition: GDD comment:	N/A N/A measurementUnitCode Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1. UN/ECE Recommendation 20 - Fully Adopted by GS1. 		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000817	Packaging condition code	Definition:	The code specifying the quality status of the returnable packaging.
		GDD name:	packagingConditionCode
		GDD definition:	Code specifying the quality status of the returnable packaging.
BDT00000818	Packaging condition code content	Definition:	The code specifying the quality status of the returnable packaging.
		Example:	DAMAGED
		Used code list:	PackagingConditionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingConditionCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000302	Returnable asset identification information	Definition:	The information specifying the identity of a returnable asset.
		Usage:	To identify a returnable asset, either of "BDT00000065 Global returnable asset identifier, GRAI" or "BDT00000743 Additional returnable asset identification content" is used, or both.
		GDD name:	returnableAssetIdentification
		GDD comment:	Information used to identify a returnable asset.
BDT00000065	Global returnable asset identifier, GRAI	Definition:	The identity according to the GS1 identification system for unique identification of returnable assets and including an optional serial number.
		Example:	GRAI: 07300015200154 GRAI including a serial number: 07300015200154000000000356
		Remark:	A returnable asset is a reusable package or transport equipment of a certain value such as a beer keg, a gas cylinder, a plastic pallet or a crate. The GS1 system identification of a returnable asset, the Global Returnable Asset Identifier (GRAI), enables tracking as well as recording of all relevant data. An optional serial number may be used to distinguish individual assets within a given asset type. The identification key is comprised of a GS1 Company Prefix, asset type, check digit, and optional serial number.
		GDD name:	grai
		GDD definition:	The GS1 Identification Key used to identify Returnable Assets. The key comprises a GS1 Company Prefix, Asset Type, Check Digit, and optional serial number.
		GDD comment:	More information about the Global Returnable Asset Identifier can be found here: http://www.gs1.org/grai

GS1 SDD; 1.0; Published

BDTG00000304	Additional returnnable asset identification information	Definition:	The information specifying the additional identification details of a returnnable asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnnable asset identifier GRAI. If used then one or more secondary identities of the returnnable asset can be given in addition to or instead of a GS1 Global returnnable asset identifier GRAI.
		GDD name: GDD definition:	additionalReturnnableAssetIdentification The additional identification Key used to identify returnnable assets.
BDT00000743	Additional returnnable asset identification content	Definition:	The additional identity of a returnnable asset.
		GDD name: GDD definition:	N/A N/A
BDTG00000363	Additional returnnable asset identification type code	Definition:	The code specifying the type of additional identifier for a returnnable asset.
		Example:	OWNER_ASSIGNED
		Used code list:	AdditionalReturnnableAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnnableAssetIdentificationTypeCode
		GDD name:	additionalReturnnableAssetIdentificationTypeCode
		GDD definition:	Code specifying the type of additional returnnable asset identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnnableAssetIdentificationTypeCode
BDTG00000819	Individual returnnable asset identification information	Definition:	The information specifying the identity of an individual piece of returnnable packaging.
		Usage:	To identify a returnnable asset, either of "BDT00000065 Global returnnable asset identifier, GRAI" or "BDT00000743 Additional returnnable asset identification content" is used, or both.
		GDD name:	individualReturnnableAssetIdentification
		GDD comment:	The returnnable asset identifier for an individual piece of returnnable packaging.
BDT00000065	Global returnnable asset identifier, GRAI	Definition:	The identity according to the GS1 identification system for unique identification of returnnable assets and including an optional serial number.
		Example:	GRAI: 07300015200154 GRAI including a serial number: 073000152001540000000000356
		Remark:	A returnnable asset is a reusable package or transport equipment of a certain value such as a beer keg, a gas cylinder, a plastic pallet or a crate. The GS1 system identification of a returnnable asset, the Global Returnnable Asset Identifier (GRAI), enables tracking as well as recording of all relevant data. An optional serial number may be used to distinguish individual assets within a given asset type. The identification key is comprised of a GS1 Company Prefix, asset type, check digit, and optional serial number.
		GDD name:	grai
		GDD definition:	The GS1 Identification Key used to identify Returnable Assets. The key comprises a GS1 Company Prefix, Asset Type, Check Digit, and optional serial number.
		GDD comment:	More information about the Global Returnnable Asset Identifier can be found here: http://www.gs1.org

BDTG00000304	Additional returnable asset identification information	Definition:	gs1.org/grai The information specifying the additional identification details of a returnable asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnable asset identifier GRAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global returnable asset identifier GRAI.
		GDD name: GDD definition:	additionalReturnableAssetIdentification The additional identification Key used to identify returnable assets.
BDTG00000743	Additional returnable asset identification content	Definition:	The additional identity of a returnable asset.
BDTG00000363	Additional returnable asset identification type code	GDD name: GDD definition:	N/A N/A
		Definition:	The code specifying the type of additional identifier for a returnable asset.
		Example:	OWNER_ASSIGNED
		Used code list:	AdditionalReturnableAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
		GDD name: GDD definition:	additionalReturnableAssetIdentificationTypeCode Code specifying the type of additional returnable asset identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000264	Package type code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
		Definition:	The code specifying the type of package used for the trade item.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
BDTG00000664	Package type code content	Remark:	Code list is based on UN/ECE Recommendation 21
		Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
		GDD name:	packageTypeCode
		GDD definition:	Code specifying a package type. Allowed code values are specified in UN/ECE Recommendation 21, extended by GS1
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Definition:	The code specifying the type of package used for the trade item.
BDTG00000664	Package type code content	Example:	200
		Used code list:	PackageTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
		GDD name: GDD definition:	N/A N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000817	Packaging condition code	Definition:	The code specifying the quality status of the returnable packaging.
		GDD name:	packagingConditionCode
		GDD definition:	Code specifying the quality status of the returnable packaging.
BDT00000818	Packaging condition code content	Definition:	The code specifying the quality status of the returnable packaging.
		Example:	DAMAGED
		Used code list:	PackagingConditionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingConditionCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000265	Packaging terms and conditions code	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name:	packagingTerms
		GDD comment:	Specifies packaging terms and conditions.
BDT00000663	Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		Used code list:	PackagingTermsAndConditionsCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000867	Parent logistic unit identification information	Definition:	The information specifying the identification details of the parent logistic unit.
		GDD name:	parentLogisticUnitId
		GDD comment:	The globally unique identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000854	Serial shipping container code, SSCC	Definition:	The identity according to the GS1 identification system for unique identification of logistic units.
		Example:	950110102081858960
		GDD name:	SSCC
		GDD definition:	The GS1 Identification Key used to identify logistics units. The key comprises an Extension digit, GS1 Company Prefix, Serial Reference, and Check Digit.
		GDD comment:	More information about the Serial Shipping Container Code can be found here: http://www.gs1.org/serial-shipping-container-code-sscc

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000858	Additional logistic unit identification information	Definition:	The information specifying the additional identification details of a logistic unit.
		GDD name: GDD comment:	additionalLogisticUnitIdentification Additional (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000855	Additional logistic unit identification content	Definition:	The additional identity of a logistic unit
		Example: GDD name: GDD definition:	ABD3571/98-7 N/A N/A
BDTG00000857	Additional logistic unit identification type code	Definition:	The code specifying the type of provided additional logistic unit identification.
		GDD name: GDD definition:	additionalLogisticUnitIdentificationTypeCode Code specifying the type of additional logistic unit identification being provided. (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000856	Additional logistic unit identification type code content	Definition:	The code of the additional logistic unit identification type.
		Example: Used code list: Link to code list: GDD name: GDD definition:	SHIPPER_ASSIGNED AdditionalLogisticUnitIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:AdditionalLogisticUnitIdentificationTypeCode N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000888	Party identification information	Definition: GDD name: GDD definition:	The information specifying the identification details of a party. partyIdentification Provides the location's Global Location Number and additional identifications.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark: GDD name: GDD definition:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification	Definition: Usage:	The information specifying the additional identification details of a party. The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name: GDD comment:	additionalPartyIdentification A party identifier that is in addition to the GLN.

		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000019	City code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000034	County code	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000035	Cross street	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000106	Party name	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000113	Post office box number	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000114	Postal code	GDD definition:	Text specifying the postal code for an address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000406	Payer party information	Definition:	The information specifying details of the party responsible for paying a monetary amount.
		Remark:	Used if the payer of the invoice is another party than the buyer party.
		GDD name:	payer
		GDD comment:	Party initiating payment.
BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations

BDT00000059	Financial account number	Definition: GDD name: GDD definition:	The number of a financial account expressed as text. financialAccountNumber Text specifying the number of the financial account.
BDTG00000208	Financial account number type code	Definition: Used code list: Link to code list: GDD name: GDD definition: GDD comment: GDD comment:	The code specifying the type of a financial account number. FinancialAccountNumberTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode financialAccountNumberTypeCode Identifies the type of financial account number. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDT00000645	Financial account number type code content	Definition: Used code list: Link to code list: GDD name: GDD definition:	The code specifying the type of a financial account number. FinancialAccountNumberTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000210	Financial institution routing number information	Definition: GDD name: GDD comment:	The information specifying details on a routing number of a financial institution. financialRoutingNumber Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition: Business rule: GDD name: GDD definition:	The routing number of a financial transaction according to the specified financial routing type. This business data term must be used in conjunction with the Financial routing number type code class. financialRoutingNumber Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT,ABA,CHIPS.
BDTG00000211	Financial routing number type code	Definition: Used code list: Link to code list: GDD name:	The code specifying the type of a financial routing number. FinancialRoutingNumberTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode financialRoutingNumberTypeCode

		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000035	Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDT00000114	Postal code	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000117	Province identity	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000128	Street address one	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000130	Street address two	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000130	Street address two	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000130	Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000130	Street address two	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"

		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000266	Payment due information	Definition:	The information specifying when payment is due.
		GDD name:	netPaymentDue
		GDD comment:	A time period specifying when the payment is due.
BDT00000109	Payment due date	Definition:	The date specifying when the payment is due.
		Example:	2021-04-19
		GDD name:	dateDue
		GDD definition:	Calendar date specifying when the payment is due.
BDT00000041	Day of month payment due	Definition:	The day of the month when payment is due.
		GDD name:	dayOfMonthDue
		GDD definition:	The time at which a payment is due, expressed as a day of the month.
BDTG00000330	Time period due code	Definition:	The code specifying a time period within which payment is to be made.
		GDD name:	timePeriodDue
		GDD definition:	Measurement specifying the duration of the period within which the payment is due, for example within 10 days.
BDTG00000267	Payment method code	Definition:	The code specifying the type of method used for paying a debt.
		GDD name:	paymentMethodCode
		GDD definition:	A predefined list that identifies a means of payment. For example cheque, bankers draft, credit card, etc.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PaymentMethodCode
BDT00000691	Payment method code content	Definition:	The code specifying the type of method used for paying a debt.
		Example:	CREDIT_CARD
		Used code list:	PaymentMethodCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PaymentMethodCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000268	Payment method information	Definition:	The information specifying the method for payment.
		GDD name:	paymentMethod
		GDD definition:	Provides information on the means of payment.
BDT00000110	Payment method identification	Definition:	The identity of a means of payment according to a payment method.
		Example:	234123467894
		Remark:	Can be the number of a credit card issued by a bank.
		GDD name:	paymentMethodIdentification
		GDD definition:	The identification of the payment method, e.g. credit or fuel card number.

BDT00000107	Payment discount description	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000108	Payment discount percentage	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying a discount when payment is made before a specified payment date.
BDTG00000195	Discount monetary amount	GDD name:	paymentTermsDiscount
		GDD definition:	Information on a discount specified in a payment term. Information on discounts that may be applied to the payment depending on the way the payment is being made for example "2 percent in 10 days, net 30".
BDT00000692	Discount monetary amount content	Definition:	The description of how discount is calculated expressed as text.
		Example:	2 percent discount if payment is made within 10 days, otherwise, the full balance is due within 30 days
BDTG00000590	Currency code	GDD name:	discountType
		GDD definition:	A string value that specifies the type of payment discount for example "2 percent in 10 days, net 30".
BDTG00000589	Currency code content	Definition:	The percentage used when calculating a payment including a monetary deduction.
		Example:	5.5
BDT00000028	Code list version	GDD name:	discountPercent
		GDD definition:	The deduction represented as a percentage.
BDTG00000273	Payment time period	Definition:	The deduction represented as a monetary amount.
		GDD name:	discountAmount
		GDD comment:	The deduction represented as an amount.
		GDD definition:	The deduction represented as a monetary amount.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A

BDT00000109	Payment due date	GDD name:	paymentTimePeriod
		GDD comment:	Provides the payment time period information for the installment.
BDT00000041	Day of month payment due	GDD definition:	Information on a payment time period determining the applicability of the discount.
		Definition:	The date specifying when the payment is due.
BDTG00000330	Time period due code	Example:	2021-04-19
		GDD name:	dateDue
BDT00000651	Time period due code content	GDD definition:	Calendar date specifying when the payment is due.
		Definition:	The day of the month when payment is due.
BDTG00000761	Time period measurement unit code	GDD name:	dayOfMonthDue
		GDD definition:	The time at which a payment is due, expressed as a day of the month.
BDT00000134	Time period measurement unit code content	Definition:	The code specifying a time period within which payment is to be made.
		GDD name:	timePeriodDue
BDT00000028	Code list version	GDD definition:	Measurement specifying the duration of the period within which the payment is due, for example within 10 days.
		Definition:	The code specifying a time period within which payment is to be made.

		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000275	Pick up from party information	Definition:	The information specifying the location for picking up goods.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	pickupFrom
		GDD comment:	Identifies location where goods will be pick up from.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000106	Party name	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000113	Post office box number	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000114	Postal code	Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000117	Province identity	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000127	State	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000128	Street address one	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000130	Street address two	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo

		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDTG00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name:	The code specifying a country. countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000774	Country code content	GDD comment: Definition: Remark:	The ISO 3166 code list can be acquired on the following website: www.iso.org The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDTG00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDTG00000085	Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. 18°3'59.0616" longitude

BDTG00000158	Business contact information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
BDTG00000112	Person name	GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000044	Department name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDTG00000083	Job title	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
BDTG00000178	Contact type code	GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000571	Contact type code content	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000028	Code list version	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
BDTG00000159	Business contact responsibility description	Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000580	Business contact responsibility description content	GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
BDTG00000523	Language code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000524	Language code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is

			GDD name:	available at www.iso.org .
			GDD definition:	languageCode
			GDD comment:	A code representing the language used in the description.
BDT00000028		Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000176		Communication information	Definition:	The information specifying details of a contact person's communication channel.
			GDD name:	communicationChannel
			GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175		Communication channel code	Definition:	The code specifying the channel for communication.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
			GDD name:	communicationChannelCode
			GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032		Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
			GDD name:	communicationValue
			GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033		Communication channel name	Definition:	The name of a communication channel expressed as text.
			GDD name:	communicationChannelName
			GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000145		After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
			GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
			GDD name:	afterHoursCommunicationChannel
BDTG00000175		Communication channel code	Definition:	The code specifying the channel for communication.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
			GDD name:	communicationChannelCode
			GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032		Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.

		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000326	Tax registration information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of a party registered for tax.
		GDD name:	dutyFeeTaxRegistration
BDT00000369	Tax authority name	GDD definition:	The registration details of a party related to a particular duty, tax or fee.
		Definition:	The name of the authority administrating the collection of taxes expressed as text.
		Remark:	There may be examples when a tax authority charges customs duties and other fees.
		GDD name:	dutyFeeTaxAgencyName
BDTG00000585	Tax registration identification information	GDD definition:	Agency responsible for the collection of this duty, fee or tax.
		Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
		GDD name:	dutyFeeTaxRegistrationID
BDT00000584	Tax registration identification content	GDD comment:	Identifier of the party for this particular duty, fee or tax.
		Definition:	The identity assigned to a party registered for tax according to a national tax register.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
BDT00000074	Identification scheme name	GDD definition:	N/A
		Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
BDT00000073	Identification scheme agency name	GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
BDTG00000586	Identification scheme responsible agency code	GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
BDT00000583	Identification scheme responsible agency code content	GDD definition:	The identification of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000034	County code	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDT00000020	City name	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000019	City code	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000035	Cross street	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000113	Post office box number	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000114	Postal code	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDT00000117	Province identity	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000127	State	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California

BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDTG00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000225	Issued capital	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000225	Issued capital content	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
BDTG00000655	Currency code	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code content	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000589	Code list version	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD definition:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG0000028	Legal structure description	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000231	Legal structure description content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000659	Language code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.

BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Registered legal information	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000087	Legal registration number	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDT00000086	Legal registration additional information	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDT00000658	Legal registration type code content	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDT00000028	Code list version	GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000209	Financial institution and financial account information	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.
		Used code list:	LegalRegistrationCode
BDT00000061	Financial institution name	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000209	Financial institution and financial account information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDTG00000209	Financial institution and financial account information	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000060	Financial institution division name	GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
BDTG00000207	Financial account information	GDD definition:	The name of a division or location of the account holder's financial institution.
		Definition:	The information specifying details of a financial account.
BDT00000058	Financial account name	GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
BDT00000059	Financial account number	GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDTG00000208	Financial account number type code	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
BDTG00000208	Financial account number type code	GDD definition:	Text specifying the number of the financial account.
		Definition:	The code specifying the type of a financial account number.
BDTG00000208	Financial account number type code	Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode

		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000210	Financial institution routing number information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a routing number of a financial institution.
BDTG00000210	Financial institution routing number information	GDD name:	financialRoutingNumber
		GDD comment:	Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.

BDTG00000211	Financial routing number type code	GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
		Definition:	The code specifying the type of a financial routing number.
BDTG00000644	Financial routing number type code content	Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
BDTG0000028	Code list version	GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDTG00000522	Additional financial institution description	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDTG00000521	Additional financial institution description content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000523	Language code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional description of a financial institution expressed as text.
BDTG00000524	Language code content	GDD name:	additionalFinancialInformation
		GDD definition:	A description used to provide any additional information about a financial institution.
		Definition:	The text value describing the additional financial institution.
BDTG0000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.
BDTG00000524	Language code content	GDD name:	N/A
		GDD definition:	N/A
		GDD comment:	N/A
BDTG0000028	Code list version	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG0000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG0000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000128	Street address one	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.

BDT00000130	Street address two	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000179	Country code	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000774	Country code content	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000028	Code list version	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
BDT00000028	Code list version	Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT000000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000276	Preferred manufacturer party information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying the preferred manufacturer of a product.
BDTG00000276	Preferred manufacturer party information	Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	preferredManufacturer
		GDD comment:	Allows to specify the preferred manufacturer of the item being ordered. Used for orders placed at third party suppliers that may supply items from various manufacturers.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
BDT00000063	Global location number GLN	Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
BDTG00000577	Additional party identification	Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDTG00000578	Additional party identification content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
BDTG00000579	Additional party identification type code	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:

		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:
		Definition:	The code specifying the additional identification type of the party.

		GDD name:	AdditionalPartyIdentificationTypeCode
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California

		GDD comment:	Code specifying the currency of an addressed party.
BDTG00000184	Currency of party code	GDD definition:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency of a party.
BDTG00000184	Currency of party code	Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
BDTG00000184	Currency of party code	Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
BDTG00000184	Currency of party code	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000184	Currency of party code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000246	Official address	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
BDTG00000246	Official address	GDD definition:	The address where the organisation is officially based.
		Definition:	The code indicating a geographical region in a country.
BDTG0000034	County code	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDTG0000034	County code	Definition:	The name of the city, town or village.
		GDD name:	city
BDTG0000034	County code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDTG0000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDTG0000034	County code	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
BDTG0000035	Cross street	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDTG0000035	Cross street	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDTG0000035	Cross street	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.

		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT,ABA,CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000144	Address information	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000020	City name	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000019	City code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000034	County code	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000035	Cross street	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000106	Party name	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000113	Post office box number	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000114	Postal code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000114	Postal code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000114	Postal code	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000114	Postal code	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000114	Postal code	Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000114	Postal code	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000114	Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000114	Postal code	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000114	Postal code	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.

BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD name:	UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1.
		GDD definition:	GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000214	Geographical coordinates information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000085	Latitude	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000089	Longitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000089	Longitude	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000277	Product quality value	Definition:	The quality of the product expressed as a quantity value.
BDTG00000695	Product quality value content	Usage:	The quality can be expressed as a grade, strength or other.
		GDD name:	productQualityIndication
BDTG00000608	Measurement unit code	GDD comment:	Value used to indicate the quality, such as grade or strength, of a specific batch of products.
		Definition:	The quality of the product expressed as a quantity value.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000608	Measurement unit code	GDD comment:	N/A
		GDD name:	measurementUnitCode
BDTG00000608	Measurement unit code	GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000247	Reason for status of business document code	Definition:	The code specifying the reason for the specified status of the received business document.
		GDD name:	orderChangeReasonCode
BDTG00000247	Reason for status of business document code	GDD definition:	Provides a reason for Order change or cancellation.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data

BDT00000696	Reason for status of business document code content	GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ErrorOrWarningCode&release=3
		Definition:	The code specifying the reason for the specified status of the received business document.
		Example: Used code list: Link to code list:	ITEM_TEMPORARILY_NOT_AVAILABLE ErrorOrWarningCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ErrorOrWarningCode&release=3
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000382	Reason for status of received order document code	Definition:	The code specifying the reason for the status of the received order document.
		GDD name:	orderResponseReasonCode
		GDD definition:	Order Response Reason Code is defined as the code identifying the reason for the order response rejection or modification.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ErrorOrWarningCode
		GDD comment:	Order Response Reason Code is defined as the code identifying the reason for the order response rejection or modification.
BDT00000697	Reason for status of received order document code content	Definition:	The code specifying the reason for the status of the received order document.
		Example: Used code list: Link to code list:	ITEM_TEMPORARILY_NOT_AVAILABLE ErrorOrWarningCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ErrorOrWarningCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000474	Receipt total monetary amounts information	Definition:	The information specifying the various total monetary amounts of the receipt.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000411	Prepayment date	Definition:	The date when the prepayment was made.
		GDD name:	prepaidAmountDate
		GDD definition:	Date on which the prepaid amount has been paid.
BDTG00000475	Tendered monetary amount	Definition:	The monetary amount tendered.

		Remark:	The monetary amount given by the buyer when paying with cash.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000703	Tendered monetary amount content	Definition:	The monetary amount tendered.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000476	Returned monetary amount	Definition:	The monetary amount returned.
		Remark:	The monetary amount returned to the buyer when paying with cash, when the tendered monetary amount is more than what should be payed.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000036	Currency code	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000409	Total invoice monetary amount	Definition:	The total monetary amount of the invoice.
		Remark:	The invoice total monetary amount includes all taxes, charges and allowances. The invoice total monetary amount excludes prepaid monetary amount, if any, see "BDTG00000410 Prepaid monetary amount".
		Synonyms:	BDTG00000331 "Total monetary amount"
		GDD name:	totalInvoiceAmount
		GDD definition:	Total sum charged in respect of a single Invoice in accordance with the terms of delivery.
BDT00000591	Total invoice monetary amount content	Definition:	The total monetary amount of the invoice.

		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000365	Tax accounting currency code	Definition:	The code specifying the currency used for tax accounting and reporting purposes as accepted or required in the country of the receiver of invoices.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000538	Tax accounting currency code content	GDD name:	dutyFeeTaxAccountingCurrency
		GDD definition:	The monetary unit used in the calculation of the duty, tax or fee.
BDT00000028	Code list version	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency used for tax accounting and reporting purposes as accepted or required in the country of the receiver of invoices.
BDTG00000329	Taxable monetary amount	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDT00000559	Taxable monetary amount content	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000590	Currency code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000589	Currency code content	Definition:	The monetary amount used for calculating the tax amount.
		Usage:	The taxable monetary amount is used for calculating the tax amount for a specific tax type, tax category and tax rate.
BDTG00000590	Currency code	GDD name:	dutyFeeTaxBasisAmount
		GDD comment:	The monetary amount on which the calculation of the charged amount is based.
BDT00000589	Currency code content	Definition:	The monetary amount used for calculating the tax amount.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
BDT00000589	Currency code content	GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
BDTG00000590	Currency code	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
BDTG00000590	Currency code	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000366	Taxable monetary amount in accounting currency	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000560	Taxable monetary amount in accounting currency content	Definition:	The taxable monetary amount expressed in the accounting currency.
		Usage:	The taxable monetary amount in accounting currency is used when the taxable monetary amount is expressed in another currency than the currency used for the accounting system. The taxable monetary amount in accounting currency is normally important only for the issuer of the business transaction.
BDTG00000560	Taxable monetary amount in accounting currency content	GDD name:	dutyFeeTaxBasisAmountInAccountingCurrency
		GDD comment:	The monetary amount on which the calculation of the charged amount is based, expressed in the accounting currency.
BDT00000560	Taxable monetary amount in accounting currency content	Definition:	The taxable monetary amount expressed in the accounting currency.

		GDD name:	N/A
		GDD definition:	N/A
		GDD comment:	N/A

BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000381	Received order document status code	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000698	Received order document status code content	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000832	Receiving organisation contact identification information	Definition:	The code specifying the status of the received order document.
		GDD name:	responseStatusCode
BDT00000112	Person name	GDD definition:	Code specifying the type of response. Example: Accepted.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponseStatusCode
BDT00000823	Date of birth	Definition:	The code specifying the status of the received order document.
		Used code list:	ResponseStatusCode
BDT00000824	Gender information	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponseStatusCode
		GDD name:	N/A
BDTG00000826	Nationality code	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000825	Nationality code content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000112	Person name	Definition:	The information specifying the identification details of on an individual acting as point of contact for an organisation.
		GDD name:	receiverID
BDT00000823	Date of birth	GDD definition:	Identification information about the person receiving the goods.
		Definition:	The name of an individual person expressed as text.
BDT00000824	Gender information	GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000826	Nationality code	Definition:	The calendar date on which the person was born.
		Example:	2020-06-15
BDT00000825	Nationality code content	GDD name:	dateOfBirth
		GDD definition:	Calendar date on which the person was born.
BDT00000825	Nationality code content	Definition:	The information specifying the sex of the person
		GDD name:	gender
BDT00000825	Nationality code content	GDD definition:	Code specifying the sex of the person.
		Definition:	The code specifying the nation the person belongs to by birth or naturalization.
BDT00000825	Nationality code content	GDD name:	nationality
		GDD comment:	Code specifying the nation the person belongs to by birth or naturalization.
BDT00000825	Nationality code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying the nationality of the person
BDT00000825	Nationality code content	Used code list:	ISO 3166-1 or equivalent representation in specific syntax.

BDT00000028	Code list version	Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDTG00000827	Identity document information	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000831	Identity document issuer	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000828	Identity document number	Definition:	The details of the identity document of a person
		GDD name:	identityDocument
BDTG00000829	Identity document type code	GDD definition:	An identity document is any document which may be used to verify aspects of a person's personal identity or of a person's relationship with an organisation. If issued in the form of a small, mostly standard-sized card, it is usually called an identity card (IC).
		Definition:	The issuer of the identity document
BDT00000830	Identity document type code content	Example:	Burgemeester Brussels Capital
		GDD name:	identityDocumentIssuer
BDTG00000830	Identity document type code content	GDD definition:	Text specifying the issuer of the identity document.
		Definition:	The unique identifier of the identity document, intended to identify a particular person.
BDT00000831	Identity document type code content	GDD name:	identityDocumentNumber
		GDD definition:	Unique identifier in this identity document, intended to identify a particular person.
BDTG00000832	Identity document type code content	Definition:	The code specifying the type of identity document.
		GDD name:	identityDocumentType
BDTG00000833	Identity document type code content	GDD comment:	Code specifying the type of identity document.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000834	Identity document type code content	Definition:	The code specifying the type of identity document.
		Example:	NATIONAL_IDENTITY_CARD
BDTG00000835	Identity document type code content	Used code list:	IdentityDocumentTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:IdentityDocumentTypeCode
BDTG00000836	Identity document type code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000837	Identity document type code content	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000838	Identity document type code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information on an individual or department acting as point of contact for an organisation.
BDTG00000839	Receiving organisation contact information	GDD name:	receiver
		GDD definition:	Information on an individual or department acting as point of contact for an organization.
BDTG00000840	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName

BDT00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDT00000083	Job title	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD definition:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000571	Contact type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000176	Communication information	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000175	Communication channel code	GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDT00000032	Communication channel identification	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	GDD comment:	20190627 KD: understandable when the "value" consists of an email address. Unsure how an "end point" for a Twitter account should be stated in the "value".
		Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
BDTG00000145	After hours communication information	GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDT00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
BDT00000033	Communication channel name	GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000141	Referenced additional information	Definition:	The information specifying details of an additional reference not already covered by a dedicated business data term.
		GDD name:	transactionalGenericReference
		GDD definition:	Reference to an associated information in support of related business processes. The type of references are defined in the TransactionalReferenceTypeCode list.
BDT00000047	Business document creation date time	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDTG00000135	Business document reference identification	Definition:	The identity of a referenced business document.
		GDD name:	transactionalReferenceValue
		GDD definition:	Contains the reference value.
BDTG00000347	Referenced document type code	Definition:	The code specifying the type of referenced business document.
		GDD name:	transactionalReferenceTypeCode
		GDD comment:	Code specifying the type of reference.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransactionalReferenceTypeCode
BDT00000699	Referenced document type code content	Definition:	The code specifying the type of referenced business document.
		Used code list:	TransactionalReferenceTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransactionalReferenceTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000800	Referenced bill of lading document information	Definition:	The information specifying the details of a referenced bill of lading document.
		Remark:	The bill of lading document evidences a contract of carriage and the taking over or loading of goods by the carrier, and by which the carrier undertakes to deliver the goods against surrender of the document.
		GDD name:	billOfLadingNumber
		GDD definition:	Reference to the number of the document which evidences a contract of carriage and the taking over or loading of goods by the carrier, and by which the carrier undertakes to deliver the goods against surrender of the document.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000047	Business document creation date time	GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDT00000119	Revision number	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000118	Referenced document external location	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000049	Document line number	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
BDTG00000196	Document content owner	GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDT00000063	Global location number GLN	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
BDTG00000577	Additional party identification information	GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The sequence number of a line within the business document.
BDT00000578	Additional party identification content	GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
BDTG00000579	Additional party identification type code	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The information specifying the party that is responsible for the content of a document.
BDT000000578	Additional party identification content	GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDTG00000579	Additional party identification type code	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000579	Additional party identification type code	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000579	Additional party identification type code	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000579	Additional party identification type code	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000579	Additional party identification type code	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000579	Additional party identification type code	GDD name:	additionalPartyIdentificationTypeCode

BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list: Link to code list:	AdditionalPartyIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000447	Referenced blanket order document information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of a reference to a blanket order document.
BDT00000056	Entity identification	Remark:	A blanket order includes agreements on volumes and fixed price agreements regarding trade items that have been agreed between the business partners and that are to apply for an agreed period of time. A delivery based on the blanket order is requested using a call-off order.
		GDD name:	blanketOrder
		GDD definition:	Reference to the blanket order, which is a document created for general order purposes with later split into quantities and delivery dates and maybe delivery locations.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
BDT00000047	Business document creation date time	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000119	Revision number	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
BDT00000118	Referenced document external location	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDT00000118	Referenced document external location	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
BDT00000049	Document line number	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.

BDTG00000196	Document content owner	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
BDTG00000063	Global location number GLN	GDD comment:	Information used to identify a party or location.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
BDTG00000578	Additional party identification content	GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDTG00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000441	Referenced cargo manifest specification information	Definition:	The information specifying the details of goods carried on a means of transport and aggregated data on the goods.
		GDD name:	manifest
		GDD definition:	Reference number assigned to a list of goods to be transferred (freight list).
BDTG00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.

BDT00000047	Business document creation date time	GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDT00000119	Revision number	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000049	Document line number	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000118	Referenced document external location	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
BDTG00000196	Document content owner	GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The sequence number of a line within the business document.
BDT00000063	Global location number GLN	GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
BDTG00000577	Additional party identification information	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDT00000578	Additional party identification content	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
BDTG00000579	Additional party identification type code	GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.

		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode

BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list: Link to code list:	AdditionalPartyIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000906	Referenced consignment information	Definition:	The information specifying the details of a consignment
		GDD name:	referencedConsignment
		GDD comment:	Reference to the identification of the consignment.
BDT00000493	Global identification number for consignment, GINC	Definition:	The identity according to the GS1 identification system for unique identification of a group of logistic units.
		Example:	7365566156191234567
		Remark:	GINC is the GS1 Identification Key used to identify a logical grouping of logistic units. The identification key is comprised of a GS1 Company Prefix and a reference to the group of logistic units.
			Logistic units in a particular shipment may be associated with different GINCs during various transport stages; for example, when the shipment gets consolidated with other shipments during its journey, and deconsolidated again before it reaches the consignee. The GINC allows freight forwarders and transport providers to keep track of the logistic units being transported together.
		GDD name:	ginc
		GDD definition:	Global Identification Number for Consignment (GINC), the GS1 key used for the identification of consignments.
		GDD comment:	More information about the Global Identification Number for Consignment can be found here: http://www.gs1.org/global-identification-number-consignment-ginc
BDTG00000495	Additional consignment identification information	Definition:	The information specifying the additional identification details of a group of logistic units.
		GDD name:	additionalConsignmentIdentification
		GDD comment:	Additional identification for a consignment.
BDT00000004	Additional consignment identification content	Definition:	The additional identity of a consignment.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000494	Additional consignment identification type code	Definition:	The code specifying the type of additional identifier for a group of logistic units.
		Example:	CARRIER_ASSIGNED
		Used code list:	AdditionalConsignmentIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:

BDT00000487	Additional consignment identification type code content	GDD name:	AdditionalConsignmentIdentificationTypeCode
		GDD definition:	additionalConsignmentIdentificationTypeCode
BDT00000482	Referenced consumption report information	GDD comment:	Code specifying the type of additional consignment identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
BDT00000028	Code list version	Definition:	The additional consignment identification type.
		GDD name:	N/A
BDTG00000482	Referenced consumption report information	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000056	Entity identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000047	Business document creation date time	Definition:	The information specifying the details of a reference to a consumption report.
		GDD name:	consumptionReport
BDT00000119	Revision number	GDD definition:	A reference number identifying a consumption report.
		Definition:	The identity of an entity such as a document or an object.
BDT00000049	Document line number	Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
BDT00000118	Referenced document external location	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
BDT00000049	Document line number	Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
BDT00000119	Revision number	GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
BDT00000049	Document line number	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000118	Referenced document external location	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
BDT00000118	Referenced document external location	GDD definition:	Number specifying a line in the referenced document.
		GDD definition:	Provides the line number associated to the Order Line Item.
BDT00000118	Referenced document external location	Definition:	The external location of the referenced document expressed as an uniform resource locator.
		Usage:	The external location can be an internet address to a document stored in a server on the internet.
BDT00000118	Referenced document external location	GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.

BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000797	Referenced delivery schedule information	Definition:	The reference to the Delivery Schedule document
		Usage:	Used for split deliveries of large quantities.

BDT00000056	Entity identification	GDD name:	deliverySchedule
		GDD definition:	A reference to the Delivery Schedule document. Used for split deliveries of large quantities.
BDT00000047	Business document creation date time	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
BDT00000047	Business document creation date time	GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDT00000047	Business document creation date time	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000119	Revision number	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000119	Revision number	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
BDT00000118	Referenced document external location	GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDT00000118	Referenced document external location	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
BDT00000049	Document line number	GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The sequence number of a line within the business document.
BDT00000049	Document line number	GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
BDTG00000196	Document content owner	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The information specifying the party that is responsible for the content of a document.
BDTG00000196	Document content owner	GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDT00000063	Global location number GLN	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000577	Additional party identification information	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.

BDTG00000756	Referenced logistics service document information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of a reference to a logistics service document.
		GDD name:	logisticServiceReference
BDT00000056	Entity identification	GDD definition:	References to GS1 messages related to logistic services
		Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
BDT00000047	Business document creation date time	GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
BDT00000047		Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000119	Revision number	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000118	Referenced document external location	Definition:	The external location of the referenced document expressed as an uniform resource locator.
		Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
BDT00000049	Document line number	GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
BDTG00000196	Document content owner	GDD definition:	Number specifying a line in the referenced document.
		GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The information specifying the party that is responsible for the content of a document.
BDTG00000196		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.

BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000757	Logistics service business document type code	Definition:	The code specifying the type of logistics service business document.
		GDD name:	logisticServiceReferenceTypeCode
		GDD comment:	List of GS1 messages related to logistic services. Allowed code values are specified in GS1 Code List.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LogisticServiceReferenceTypeCode
BDT00000758	Logistics service business document type code content	Definition:	The code specifying the type of logistics service business document.
		Used code list:	LogisticServiceReferenceTypeCode

BDT00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LogisticServiceReferenceTypeCode
		GDD name:	N/A
BDTG00000282	Referenced material specification information	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000056	Entity identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000056	Entity identification	Definition:	The information specifying the details of a reference to a material specification.
		GDD name:	materialSpecification
BDT00000056	Entity identification	GDD comment:	A reference to a material specification. The reference is associated with specific items in the order.
		Definition:	The identity of an entity such as a document or an object.
BDT00000047	Business document creation date time	Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
BDT00000047	Business document creation date time	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
BDT00000119	Revision number	Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
BDT00000119	Revision number	GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
BDT00000049	Document line number	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000049	Document line number	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
BDT00000118	Referenced document external location	GDD definition:	Number specifying a line in the referenced document.
		GDD definition:	Provides the line number associated to the Order Line Item.
BDTG00000196	Document content owner	Definition:	The external location of the referenced document expressed as an uniform resource locator.
		Usage:	The external location can be an internet address to a document stored in a server on the internet.
BDTG00000196	Document content owner	GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
BDT00000063	Global location number GLN	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
BDT00000063	Global location number GLN	GDD comment:	Information used to identify a party or location.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
BDT00000063	Global location number GLN	Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln

BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDT00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000579	Additional party identification type code	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

BDTG00000284	Referenced purchase conditions information	Definition:	The information specifying the details of a reference to an agreement of purchase conditions for a trade item.
		GDD name:	purchaseConditions
		GDD comment:	A reference to the purchase conditions. The reference is associated with specific items in the order.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDT00000047	Business document creation date time	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000119	Revision number	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000049	Document line number	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
BDT00000118	Referenced document external location	Definition:	The external location of the referenced document expressed as a uniform resource locator.
		Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.

BDT00000119	Revision number	Definition: GDD name: GDD definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions. revisionNumber Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000118	Referenced document external location	Definition: Usage: GDD name: GDD definition:	The external location of the referenced document expressed as an uniform resource locator. The external location can be an internet address to a document stored in a server on the internet. referencedDocumentUrl An URI pointing to the on-line location where the referenced document is stored.
BDT00000049	Document line number	Definition: GDD name: GDD definition: GDD definition:	The sequence number of a line within the business document. lineItemNumber Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.

BDT00000063	Global location number GLN	GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDTG00000577	Additional party identification information	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000578	Additional party identification content	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000579	Additional party identification type code	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000570	Additional party identification type code content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000579	Additional party identification type code	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000570	Additional party identification type code content	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDTG00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
BDTG00000570	Additional party identification type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDTG00000570	Additional party identification type code content	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000570	Additional party identification type code content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000385	Referenced sales order document information	Definition:	The information specifying the details of a reference to a sales order document.
		Remark:	The sales order is generated by the supplier as a result of a received buyers purchase order.
BDTG00000385	Referenced sales order document information	GDD name:	salesOrder
		GDD definition:	Reference number assigned by the supplier to a buyer's purchase order.
BDTG00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
BDTG00000056	Entity identification	GDD name:	entityIdentification

Business data term groups

GS1 SDD; 1.0; Published

BDT00000047	Business document creation date time	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
BDT00000119	Revision number	GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
BDT00000118	Referenced document external location	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDT00000049	Document line number	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
BDTG00000196	Document content owner	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
BDTG00000063	Global location number GLN	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
BDTG00000577	Additional party identification information	GDD comment:	Information used to identify a party or location.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.

		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000850	Referenced transport instruction information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000850	Referenced transport instruction information	Definition:	The information specifying the details of a reference to a transport Instruction document.
		GDD name:	transportInstruction
BDT00000056	Entity identification	GDD definition:	Reference to the Transport Instruction document.
		Definition:	The identity of an entity such as a document or an object.
BDT00000047	Business document creation date time	Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
BDT00000047	Business document creation date time	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The date and optional time when the business document was issued.
BDT00000119	Revision number	Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
BDT00000119	Revision number	GDD definition:	Date and time when the document was created.
		Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
BDT00000049	Document line number	GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000049	Document line number	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
BDT00000049	Document line number	GDD definition:	Number specifying a line in the referenced document.
		GDD definition:	Number specifying a line in the referenced document.

BDT00000118	Referenced document external location	GDD definition:	Provides the line number associated to the Order Line Item.
		Definition:	The external location of the referenced document expressed as an uniform resource locator.
BDTG00000196	Document content owner	Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
BDTG00000196	Document content owner	GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
		Definition:	The information specifying the party that is responsible for the content of a document.
BDT00000063	Global location number GLN	GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDT00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000579	Additional party identification type code	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode

		GDD definition:	Identification of the applied version of the code list.
BDTG00000289	Regular operating hours information	Definition:	The information specifying details of the regular operating hours.
		Usage:	Information specifying details of communication channels to use after regular business hours.
BDTG00000289	Regular operating hours information	GDD name:	regularOperatingHours
		GDD comment:	The period during which a business or facility is operational on a weekday.
BDTG00000042	Day of the week code	Definition:	The code specifying the day of the week.
		GDD name:	dayOfTheWeekCode
BDTG00000042	Day of the week code	GDD definition:	Code specifying the day of the week to which the operating hours apply.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DayOfTheWeekEnumeration
BDT000000078	Business operational indicator	Definition:	The code indicating if a business or facility is operational on a specific day.
		Example:	NO
BDT000000078	Business operational indicator	GDD name:	isOperational
		GDD definition:	Indicator specifying whether or not the business or facility is operational on the specified day
BDT000000021	Closing time	Definition:	The time at which a business or facility close.
		GDD name:	closingTime
BDT000000021	Closing time	GDD definition:	Time on which the business or facility will close on the specified day.
		Definition:	The time on which the business or facility will open on a specified day.
BDT000000098	Opening time	GDD name:	openingTime
		GDD definition:	Time on which the business or facility will open on a specified day.

		GDD definition:	Time on which the business or facility will open on the specified day.
BDTG00000929	Remaining quantity status code	Definition:	The code specifying the action that will be taken with respect to the goods that were not despatched.
		GDD name:	remainingQuantityStatusCode
		GDD comment:	Code specifying the action that will be taken with respect to the goods that were not despatched.
BDTG00000928	Remaining quantity status code content	Definition:	The code specifying the action taken for goods not dispatched
		Example:	CM
		Used code list:	RemainingQuantityStatusCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:RemainingQuantityStatusCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000425	Remit to party information	Definition:	The information specifying details of the party receiving payment for the invoice.
		Synonyms:	Payee party
		GDD name:	remitTo
		GDD definition:	The party (account owner) that receives a payment when such party is not the same as the seller.
BDTG00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.

		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000127	State	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000128	Street address one	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000128	Street address one	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000128	Street address one	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD definition:	The second street address line of a structured address.
BDT00000128	Street address one	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000128	Street address one	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000128	Street address one	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD definition:	The third street address line of a structured address.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000129	Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000129	Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The code specifying a country.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000179	Country code	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1.

Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000391	Replaced trade item information	Definition:	The information specifying the replaced trade item in a business document transaction.
		GDD name:	substituteItemInformation
		GDD definition:	The substitute trade item associated to the Order Response Line Item. This item replaces the item that was originally requested.
BDT00000066	Global trade item number, GTIN	Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192
		Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin

		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDTG00000115	Product variant identifier	Definition:	The product variant expressed as text.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade items with the same GTIN from each other.
		Example:	Christmas edition Book cover in blue Book cover in green
		GDD name:	productVariantIdentifier
BDTG0000013	Butter fat reference	GDD definition:	Text identifying a variant of the product, for example for promotional reasons.
		Definition:	The reference number assigned by customs authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
		GDD name:	butterFatReference
		GDD definition:	A reference number assigned by custom authorities to butter based fat products.
BDTG00000142	Additional trade item identification	GDD comment:	The reference number is used in customs declarations when importing or exporting goods.
		Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
BDTG00000516	Additional trade item identification content	GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		Definition:	The additional identity of a trade item.
		GDD name:	N/A
BDTG00000519	Additional trade item identification type code	GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a shipment.
BDTG00000518	Additional trade item identification type code content	Definition:	The code of the additional trade item identification type.
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000341	Trade item quantity	GDD definition:	Identification of the applied version of the code list.
		Definition:	The quantity of a trade item.
		GDD name:	tradeItemQuantity
		GDD definition:	Specification of the number of units of the trade item. To be applied when no other quantity information, such as the requested quantity or the billed quantity, is present.
BDTG00000678	Trade item quantity content	Definition:	The quantity value of the trade item
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed

		GDD comment:	code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1. UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
		Remark:	Code list based on UN/ECE Recommendation 20
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000335	Trade item description	Definition:	The description of the trade item expressed as text.
		GDD name:	tradeItemDescription
		GDD comment:	Textual description of the trade item.
BDT00000684	Trade item description content	Definition:	The description of the trade item expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000226	Item type code	Definition:	The code specifying the type of the trade item.
		Used code list:	ItemTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
		GDD name:	itemTypeCode
		GDD definition:	Code describing the trade item type. Allowed code values are specified in GS1 Code List ItemTypeCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode

BDT00000656	Item type code content	Definition: GDD name: GDD definition:	The code specifying the type of the trade item. N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000342	Trade item transactional data owner code	Definition: GDD name: GDD definition: GDD comment: GDD comment:	The code specifying the responsible party of the transactional data. tradeItemDataOwner Specifies who owns the set of trade item transactional data. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
BDT00000700	Trade item transactional data owner code content	Definition: Example: Used code list: Link to code list: GDD name: GDD definition:	The code specifying the responsible party of the transactional data. SELLER TradeItemDataOwnerCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000203	Dynamic trade item information	Definition: Example: GDD name: GDD comment:	The information specifying the details of dynamic characteristics of individual instances of a trade item. Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item. transactionalItemData Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
BDT00000007	Available for sale date	Definition: GDD name: GDD definition:	The date when a trade item is available for sale. availableForSaleDate Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
BDT00000008	Batch number	Definition: Remark: GDD name: GDD definition: GDD comment:	The identification number of the production batch that relates to a date and time for the production of a product. A combination of numbers and/or letters from which the production batch can be determined. batchNumber A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process. The identity of the production batch (lot), that can be related to the point of time for the production.

GS1 SDD; 1.0; Published

BDT00000011	Best before date	Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
BDTG00000180	Country of origin	GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
BDT00000057	Expiration date	GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDT00000057	Expiration date	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
BDT00000090	Lot number	GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDT00000090	Lot number	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
BDT00000104	Packaging date	GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
		Definition:	The date on which a product is placed in a container or package.
BDT00000104	Packaging date	GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.
BDT00000116	Production date	Definition:	The date the product was produced.
		GDD name:	productionDate
BDT00000120	Sell by date	GDD definition:	The date that the product was produced.
		Definition:	The date after which the product should not be sold.
BDT00000120	Sell by date	GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
BDT00000121	Serial number	GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
BDT00000122	Shelf life	GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function

Business data term groups

GS1 SDD; 1.0; Published

BDT00000082	Item in contact with food product indicator	Definition: Example: Used code list: GDD name: GDD definition:	The code indicating if the trade item can be in contact with food products. NO Available codes: "YES" and "NO" itemInContactWithFoodProduct States weather or not the trade item can come into contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Definition: GDD name: GDD comment:	The information specifying the packaging of the logistic unit. transactionalItemLogisticUnitInformation Specifies packaging parameters for transport and storage purposes.
BDT00000095	Number of layers	Definition: Example: Remark: GDD name: GDD definition:	The number of layers of packages in a package. 3 To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfLayers Number of layers of a product or products within a package, container, pallet, etc
BDT00000096	Number of units per layer	Definition: Remark: GDD name: GDD definition:	The number of packs per layer in a package. To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer Number of units of a product or package within one layer of a package, container, pallet, etc.
BDT00000097	Number of units per platform	Remark: GDD name:	To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerPallet

BDT00000091	Maximum stacking factor	GDD definition:	The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
		Definition:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product.
		Example:	3
		Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
BDTG00000265	Packaging terms and conditions code	GDD name:	maximumStackingFactor
		GDD definition:	A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDT00000663	Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name:	packagingTerms
		GDD comment:	Specifies packaging terms and conditions.
		Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
BDT00000028	Code list version	Used code list:	PackagingTermsAndConditionsCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000264	Package type code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the type of package used for the trade item.
BDT00000664	Package type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
		Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
		GDD name:	packageTypeCode
		GDD definition:	Code specifying a package type. Allowed code values are specified in UN/ECE Recommendation 21, extended by GS1
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Definition:	The code specifying the type of package used for the trade item.
		Example:	200
		Used code list:	PackageTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
		GDD name:	N/A
		GDD definition:	N/A

BDTG00000216		Global trade item number format and type of carrier information	Definition:	The information specifying details of the format and type of data carrier for a GS1 global trade item number, GTIN, of a trade item.
			Remark:	GTIN - GS1 global trade item number
			GDD name:	transactionalItemDataCarrierAndIdentification
			GDD definition:	Provides information about GS1 Identifier and Data Carriers associated with the trade item.
BDTG00000217		GS1 global trade item number format code	Definition:	The code specifying the format of a GS1 global trade item number.
			GDD name:	gs1TransactionalItemIdentificationKey
			GDD definition:	Specifies the type of GS1 Identification Key.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode
BDT00000646		GS1 global trade item number format code content	Definition:	The code specifying the format of a GS1 global trade item number.
			Example:	GTIN_13
			Used code list:	GS1TradeItemIdentificationKeyCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode&release=1
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion

BDTG00000185	Data carrier type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying a type of data carrier.
		Used code list:	DataCarrierTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDTG00000639	Data carrier type code content	GDD name:	dataCarrier
		GDD comment:	A means to represent data in a machine readable form.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDTG00000028	Code list version	Definition:	The code specifying a type of data carrier.
		GDD name:	N/A
		GDD definition:	N/A
		GDD definition:	Identification of the applied version of the code list.
BDTG00000345	Trade item waste information	Definition:	The information specifying details of the waste generated by the trade item.
		GDD name:	tradeItemWaste
		GDD definition:	Provides details of waste generated by the trade item.
		GDD definition:	Identification of the applied version of the code list.
BDTG00000138	Waste identification	Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
		Example:	04098765000119
		GDD name:	wasteIdentification
		GDD definition:	The number identifying the type of waste.
BDTG00000359	Waste type code	GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
		Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
		GDD comment:	Provides code and description of waste type according to required classification scheme.
BDTG00000702	Waste type code content	Definition:	The code specifying the type of waste.
		GDD name:	N/A
		GDD definition:	N/A
		GDD definition:	Identification of the applied version of the code list.
BDTG00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		GDD definition:	Identification of the applied version of the code list.
BDTG00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		GDD definition:	Identification of the applied version of the code list.
BDTG00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000025	Code list agency name	Definition: GDD name: GDD definition:	The name of the agency responsible for a code list. codeListAgencyName A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition: GDD name: GDD definition:	The name of the code list expressed as text. codeListName The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition: Remark: GDD name: GDD definition: GDD comment:	The character string that identifies the location of the code list in a network. Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list. codeListURI A string that refers to the location of the code list which provides the code value. URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000338	Trade item organic information	Definition: GDD name: GDD definition:	The information specifying organic data for a trade item. transactionalItemOrganicInformation Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator	Definition: Example: Used code list: GDD name: GDD definition:	The code indicating if the trade item is claimed to be organic. NO Available codes: "YES" and "NO" isTradeItemOrganic Information about whether or not the trade item is organic.
BDTG00000261	Organic certification information	Definition: GDD name: GDD comment:	The information specifying the certificate for a trade item which claims the product to be organic. organicCertification Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition: Example: GDD name: GDD definition:	The certification value. need an reliable example itemCertificationValue The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition: GDD name: GDD definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met. itemCertificationAgency Name of the organization issuing the certification standard or other requirement being met.
BDT00000016	Certification standard name	Definition: Example: GDD name: GDD definition:	The name of the certification standard expressed as text. GlobalGAP itemCertificationStandard Name of the certification standard. Free text. Example: Organic product.
BDTG00000174	Colour information	Definition: GDD name: GDD comment:	The information specifying the colour of a trade item. colour Information specifying the colour of the trade item.
BDTG00000172	Colour code	Definition:	The code specifying the colour of an object or a product according to a colour system.

		GDD name:	colourCode
		GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000029	Colour code system code	Definition:	The code specifying the colour coding system.
		Example:	10
		Used code list:	ColourCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
BDT00000030	Colour code system description	Definition:	The description of the colour code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
		GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000031	Colour code system version	Definition:	The version number of the colour code system.
		GDD name:	colourCodeListVersion
		GDD definition:	The version of the ColourCodeListCode code list.
BDTG00000173	Colour description	Definition:	Colour descriptionThe description of a colour expressed as text.
		Usage:	Only used if no coded value for the colour is available using the business data term Colour code.
		GDD name:	colourDescription
		GDD comment:	A description of a colour of an object.
BDT00000737	Colour description content	Definition:	The description of a colour expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.

BDT00000028	Code list version	GDD comment: Definition: GDD name: GDD definition:	The ISO 639-1 code list can be acquired on the following website: www.iso.org The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000316	Size information	Definition: GDD name: GDD definition:	The information specifying the size of a trade item. size The physical dimensions or proportions of the transactional trade item depicted as a code or a description.
BDTG00000315	Size description	Definition: GDD name: GDD definition:	The description of a size expressed as text. descriptiveSize A description of the size of an object.
BDT00000679	Size description content	Definition: GDD name: GDD definition:	The description of a size expressed as text. N/A N/A
BDTG00000523	Language code	Definition: GDD name: GDD comment:	The code specifying the language. N/A N/A
BDT00000524	Language code content	Definition: Example: Used code list: GDD name: GDD definition: GDD comment:	The code specifying the language. en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org . languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000313	Size code	Definition: GDD name: GDD comment:	The code specifying the size of an object or a product according to a size system. sizeCode Code specifying the size of an object and the size coding system being applied, for example L (buyer assigned).
BDT00000680	Size code content	Definition: GDD name: GDD definition:	The code specifying the size of an object or a product according to a size system. N/A N/A
BDTG00000314	Size code list code	Definition: GDD name: GDD definition: GDD comment: GDD comment:	The code specifying the system of size codes. sizeCodeListCode Code specifying a size code list. Allowed code values are specified in GS1 Code List SizeCodeListCode. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:SizeCodeListCode
BDT00000124	Size code list description	Definition: Example: GDD name:	The description of the size code system expressed as text. National Retail Federation – Standard Colour & Size Codes sizeCodeListDescription

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD definition:	A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
		Definition:	The version number of the code list.
BDT00000125	Size code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000334	Trade item classification information	Definition:	The version number of the code list of the size code system.
		GDD name:	sizeCodeListVersion
BDTG00000334	Trade item classification information	GDD definition:	The applied version of the SizeCodeListCode code list.
		Definition:	The information specifying the product classification of a trade item.
BDT00000070	GS1 global product classification GPC brick code	GDD name:	tradeItemClassification
		GDD comment:	Information specifying the product class to which a trade item belongs and the classification system being applied.
BDT00000070	GS1 global product classification GPC brick code	Definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
BDT00000071	GS1 global product classification GPC brick name	Example:	10000025
		GDD name:	gpcCategoryCode
BDT00000071	GS1 global product classification GPC brick name	GDD definition:	Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
		Definition:	The name of the product category of similar products according to GS1 global product classification standard GPC.
BDTG00000155	Alternative trade item product classification code	Business rule:	To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)
		Example:	Milk
BDTG00000155	Alternative trade item product classification code	GDD name:	gpcCategoryName
		GDD definition:	Name associated with the specified Global Product Classification (GPC) category code.
BDTG00000155	Alternative trade item product classification code	Definition:	The information specifying the details of the alternative trade item product classification code.
		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
BDT00000536	Alternative trade item product classification code content	GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
BDT00000536	Alternative trade item product classification code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
BDT00000002	Additional trade item classification scheme code	GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.

BDT00000003		Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD name:	additionalTradeItemClassificationCodeListCode
		GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT000000022	Additional trade item classification scheme version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT000000028	Code description	Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
BDT000000028	Code list version	GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
BDTG000000215	Global Product Classification attributes	GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT000000067	GS1 global product classification GPC attribute type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
BDT000000068	GS1 global product classification GPC attribute value code	GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
		Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
BDT000000068	GS1 global product classification GPC attribute value code	Example:	20000123
		GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
BDT000000068	GS1 global product classification GPC attribute value code	Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
		Example:	3001082

		GDD name:	transactionalTradeItem
		GDD definition:	The trade item associated to the Order Line Item.
BDT00000066	Global trade item number, GTIN	Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192
		Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin
		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDT00000115	Product variant identifier	Definition:	The product variant expressed as text.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade items with the same GTIN from each other.
		Example:	Christmas edition Book cover in blue Book cover in green
		GDD name:	productVariantIdentifier
BDT00000013	Butter fat reference	GDD definition:	Text identifying a variant of the product, for example for promotional reasons.
		Definition:	The reference number assigned by customs authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
		GDD name:	butterFatReference
BDTG00000142	Additional trade item identification	GDD definition:	A reference number assigned by custom authorities to butter based fat products.
		GDD comment:	The reference number is used in customs declarations when importing or exporting goods.
		Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
BDT00000516	Additional trade item identification content	GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		Definition:	The additional identity of a trade item.
BDTG00000519	Additional trade item identification type code	GDD name:	N/A
		GDD definition:	N/A
BDT00000518	Additional trade item identification type code content	Definition:	The code specifying the type of additional identifier for a shipment.
		GDD name:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000341	Trade item quantity	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000678	Trade item quantity content	Definition:	The quantity of a trade item.
		GDD name:	tradeItemQuantity
BDTG00000608	Measurement unit code	GDD definition:	Specification of the number of units of the trade item. To be applied when no other quantity information, such as the requested quantity or the billed quantity, is present.
		Definition:	The quantity value of the trade item
BDTG00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000607	Measurement unit code content	GDD comment:	N/A
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
BDTG00000607	Measurement unit code content	GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
		Definition:	The code specifying the unambiguous representation of a unit of measure.

BDTG00000684	Trade item description content	Definition:	The description of the trade item expressed as text.
		GDD name:	tradeItemDescription
BDTG00000523	Language code	GDD comment:	Textual description of the trade item.
		Definition:	The description of the trade item expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
BDTG00000524	Language code content	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000524	Language code content	GDD name:	languageCode

BDT00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000226	Item type code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the type of the trade item.
		Used code list:	ItemTypeCode
BDT00000656	Item type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
		GDD name:	itemTypeCode
		GDD definition:	Code describing the trade item type. Allowed code values are specified in GS1 Code List ItemTypeCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000342	Trade item transactional data owner code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the responsible party of the transactional data.
		GDD name:	tradeItemDataOwner
		GDD definition:	Specifies who owns the set of trade item transactional data.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000700	Trade item transactional data owner code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
		Definition:	The code specifying the responsible party of the transactional data.
		Example:	SELLER
		Used code list:	TradeItemDataOwnerCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000203	Dynamic trade item information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
		Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData

Business data term groups

GS1 SDD; 1.0; Published

BDT00000007	Available for sale date	GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The date when a trade item is available for sale.
		GDD name:	availableForSaleDate
BDT00000008	Batch number	GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
BDT00000011	Best before date	GDD name:	batchNumber
		GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
		GDD comment:	The identity of the production batch (lot), that can be related to the point of time for the production.
BDTG00000180	Country of origin	Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
		GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
BDT00000057	Expiration date	Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDT00000090	Lot number	GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
		GDD name:	itemExpirationDate
BDT00000104	Packaging date	GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
		Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
BDT00000116	Production date	GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
		Definition:	The date on which a product is placed in a container or package.
		GDD name:	packagingDate
BDT00000120	Sell by date	GDD definition:	The date on which the packaging of a product took place.
		Definition:	The date the product was produced.
		GDD name:	productionDate
		GDD definition:	The date that the product was produced.
		Definition:	The date after which the product should not be sold.
		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.

BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
		GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function
BDT00000082	Item in contact with food product indicator	Definition:	The code indicating if the trade item can be in contact with food products.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	itemInContactWithFoodProduct
		GDD definition:	States whether or not the trade item can come into contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Definition:	The information specifying the packaging of the logistic unit.
		GDD name:	transactionalItemLogisticUnitInformation
		GDD comment:	Specifies packaging parameters for transport and storage purposes.
BDT00000095	Number of layers	Definition:	The number of layers of packages in a package.
		Example:	3
		Remark:	To discuss:
			GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN?
			quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences.
			Should this Business data term be harmonised with GDSN?
			See TradeItemHierarchyModule in GDSN.
		GDD name:	numberOfLayers
		GDD definition:	Number of layers of a product or products within a package, container, pallet, etc
BDT00000096	Number of units per layer	Definition:	The number of packs per layer in a package.
		Remark:	To process:
			GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN?
			quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences.
			Should this Business data term be harmonised with GDSN?

BDT00000097	Number of units per platform	GDD name:	See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer
		GDD definition:	Number of units of a product or package within one layer of a package, container, pallet, etc.
BDT00000091	Maximum stacking factor	Remark:	To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN.
		GDD name:	numberOfUnitsPerPallet
BDT00000091	Maximum stacking factor	GDD definition:	The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
		Definition:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product.
BDT00000091	Maximum stacking factor	Example:	3
		Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
BDTG00000265	Packaging terms and conditions code	GDD name:	maximumStackingFactor
		GDD definition:	A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDTG00000265	Packaging terms and conditions code	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name:	packagingTerms
BDT00000663	Packaging terms and conditions code content	GDD comment:	Specifies packaging terms and conditions.
		Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
BDT00000663	Packaging terms and conditions code content	Used code list:	PackagingTermsAndConditionsCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:PackagingTermsAndConditionsCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000264	Package type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the type of package used for the trade item.
BDTG00000264	Package type code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
BDTG00000264	Package type code	Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.

		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of the waste generated by the trade item.
BDTG00000345	Trade item waste information	GDD name:	tradeItemWaste
		GDD definition:	Provides details of waste generated by the trade item.
		Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
		Example:	04098765000119
		GDD name:	wasteIdentification
BDT00000138	Waste identification	GDD definition:	The number identifying the type of waste.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
		Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
		GDD definition:	Provides details of waste generated by the trade item.
BDTG00000359	Waste type code	Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
		GDD definition:	Provides details of waste generated by the trade item.
		Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste

Business data term groups

GS1 SDD; 1.0; Published

BDT00000702	Waste type code content	GDD comment: Provides code and description of waste type according to required classification scheme. Definition: The code specifying the type of waste. GDD name: N/A GDD definition: N/A
BDT00000022	Code description	Definition: The description of a code value expressed as text. GDD name: codeDescription GDD definition: A description for the code value provided.
BDT00000023	Code list agency code	Definition: The code specifying the agency responsible for a code list. GDD name: codeListAgencyCode GDD definition: A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition: The version number of a code list issued by the responsible agency for the code list. GDD name: codeListAgencyCodeListVersion GDD definition: The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name	Definition: The name of the agency responsible for a code list. GDD name: codeListAgencyName GDD definition: A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition: The name of the code list expressed as text. GDD name: codeListName GDD definition: The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition: The character string that identifies the location of the code list in a network. Remark: Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list. GDD name: codeListURI GDD definition: A string that refers to the location of the code list which provides the code value.
BDT00000028	Code list version	GDD comment: URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet. Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000338	Trade item organic information	Definition: The information specifying organic data for a trade item. GDD name: transactionalItemOrganicInformation GDD definition: Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator	Definition: The code indicating if the trade item is claimed to be organic. Example: NO Used code list: Available codes: "YES" and "NO" GDD name: isTradeItemOrganic GDD definition: Information about whether or not the trade item is organic.
BDTG00000261	Organic certification information	Definition: The information specifying the certificate for a trade item which claims the product to be organic. GDD name: organicCertification GDD comment: Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition: The certification value. Example: need an reliable example

BDT00000015	Certification agency name	GDD name:	itemCertificationValue
		GDD definition:	The product's certification standard value. E.g. DE-OKO-006
		Definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met.
BDT00000016	Certification standard name	GDD name:	itemCertificationAgency
		GDD definition:	Name of the organization issuing the certification standard or other requirement being met.
		Definition:	The name of the certification standard expressed as text.
BDTG00000174	Trade item colour information	Example:	GlobalGAP
		GDD name:	itemCertificationStandard
		GDD definition:	Name of the certification standard. Free text. Example: Organic product.
BDTG00000172	Colour code	Definition:	The information specifying the colour of a trade item.
		GDD name:	colour
		GDD comment:	Information specifying the colour of the trade item.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	colourCode
		GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
BDT00000029	Colour code system code	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000030	Colour code system description	Definition:	The code specifying the colour coding system.
		Example:	10
		Used code list:	ColourCodeListCode
BDT00000031	Colour code system version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
BDTG00000173	Colour description	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		Definition:	The description of the colour code system expressed as text.
BDT00000028	Code list version	Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
		GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
BDT00000031	Colour code system version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000173	Colour description	Definition:	The version number of the colour code system.
		GDD name:	colourCodeListVersion
		GDD definition:	The version of the ColourCodeListCode code list.
BDTG00000173	Colour description	Definition:	Colour descriptionThe description of a colour expressed as text.
		Usage:	Only used if no coded value for the colour is available using the business data term Colour code.

BDT00000737	Colour description content	GDD name: colourDescription GDD comment: A description of a colour of an object. Definition: The description of a colour expressed as text. GDD name: N/A GDD definition: N/A
BDTG00000523	Language code	Definition: The code specifying the language. GDD name: N/A GDD comment: N/A
BDT00000524	Language code content	Definition: The code specifying the language. Example: en Used code list: ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name: languageCode GDD definition: A code representing the language used in the description. GDD comment: The ISO 639-1 code list can be acquired on the following website: www.iso.org Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000316	Trade item size information	Definition: The information specifying the size of a trade item. GDD name: size GDD definition: The physical dimensions or proportions of the transactional trade item depicted as a code or a description.
BDTG00000315	Size description	Definition: The description of a size expressed as text. GDD name: descriptiveSize GDD definition: A description of the size of an object.
BDT00000679	Size description content	Definition: The description of a size expressed as text. GDD name: N/A GDD definition: N/A
BDTG00000523	Language code	Definition: The code specifying the language. GDD name: N/A GDD comment: N/A
BDT00000524	Language code content	Definition: The code specifying the language. Example: en Used code list: ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name: languageCode GDD definition: A code representing the language used in the description. GDD comment: The ISO 639-1 code list can be acquired on the following website: www.iso.org Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000313	Size code	Definition: The code specifying the size of an object or a product according to a size system. GDD name: sizeCode GDD comment: Code specifying the size of an object and the size coding system being applied, for example L

		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	sizeCodeListDescription
		GDD definition:	A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000125	Size code list version	Definition:	The version number of the code list of the size code system.
		GDD name:	sizeCodeListVersion
		GDD definition:	The applied version of the SizeCodeListCode code list.
BDTG00000334	Trade item classification information	Definition:	The information specifying the product classification of a trade item.
		GDD name:	tradeItemClassification
		GDD comment:	Information specifying the product class to which a trade item belongs and the classification system being applied.
BDT00000070	GS1 global product classification GPC brick code	Definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
		Example:	10000025
		GDD name:	gpcCategoryCode
		GDD definition:	Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
BDT00000071	GS1 global product classification GPC brick name	Definition:	The name of the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)
		Example:	Milk
		GDD name:	gpcCategoryName
		GDD definition:	Name associated with the specified Global Product Classification (GPC) category code.
BDTG00000155	Alternative trade item product classification code	Definition:	The information specifying the details of the alternative trade item product classification code.

		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
		GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000536	Alternative trade item product classification code content	Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.
		Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD name:	additionalTradeItemClassificationCodeListCode
		GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000003	Additional trade item classification scheme version	Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000215	Global Product Classification attributes	Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
		GDD name:	gpcAttribute

Business data term groups

GS1 SDD; 1.0; Published

BDT00000067	GS1 global product classification GPC attribute type code	GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
		Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
BDT00000068	GS1 global product classification GPC attribute value code	Example:	20000123
		GDD name:	gpcAttributeTypeCode
BDT00000064	Global product classification GPC attribute type name	GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
		Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
BDT00000069	GS1 global product classification GPC attribute value name	Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
		Example:	3001082
BDTG00000393	Responded trade item information	GDD name:	gpcAttributeValueCode
		GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
BDT00000066	Global trade item number, GTIN	Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
		Example:	Level of Fat Claim
BDT00000115	Product variant identifier	GDD name:	gpcAttributeTypeName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
BDT00000066	Global trade item number, GTIN	Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
		Example:	FULL FAT
BDT00000066	Global trade item number, GTIN	GDD name:	gpcAttributeValueName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
BDTG00000393	Responded trade item information	Definition:	The information specifying the response to a requested trade item in a business document transaction.
		GDD name:	transactionalTradeItem
BDT00000066	Global trade item number, GTIN	GDD definition:	The trade item associated to the Order Response Line Item.
		Definition:	The identity according to the GS1 identification system for unique identification of products and services.
BDT00000066	Global trade item number, GTIN	Example:	07300015200192
		Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
BDT00000066	Global trade item number, GTIN	GDD name:	gtin
		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
BDT00000066	Global trade item number, GTIN	GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/
		GDD comment:	gtin
BDT00000115	Product variant identifier	Definition:	The product variant expressed as text.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade

		Example:	items with the same GTIN from each other. Christmas edition Book cover in blue Book cover in green productVariantIdentifier
BDT00000013	Butter fat reference	GDD name:	Text identifying a variant of the product, for example for promotional reasons.
		GDD definition:	The reference number assigned by customs authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
		GDD name:	butterFatReference
		GDD definition:	A reference number assigned by custom authorities to butter based fat products.
BDTG00000142	Additional trade item identification	GDD comment:	The reference number is used in customs declarations when importing or exporting goods.
		Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
BDT000000516	Additional trade item identification content	GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		Definition:	The additional identity of a trade item.
		GDD name:	N/A
BDTG000000519	Additional trade item identification type code	GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a shipment.
BDT000000518	Additional trade item identification type code content	Definition:	The code of the additional trade item identification type.
		GDD name:	N/A
BDT000000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG000000341	Trade item quantity	Definition:	The quantity of a trade item.
		GDD name:	tradeItemQuantity
		GDD definition:	Specification of the number of units of the trade item. To be applied when no other quantity information, such as the requested quantity or the billed quantity, is present.
BDT000000678	Trade item quantity content	Definition:	The quantity value of the trade item
BDTG000000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html

GS1 SDD; 1.0; Published

BDT00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
		Remark:	Code list based on UN/ECE Recommendation 20
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000335	Trade item description	GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the trade item expressed as text.
		GDD name:	tradeItemDescription
		GDD comment:	Textual description of the trade item.
BDT00000684	Trade item description content	Definition:	The description of the trade item expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
		GDD comment:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD definition:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		GDD comment:	N/A
BDTG00000226	Item type code	Definition:	The code specifying the type of the trade item.
		Used code list:	ItemTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
		GDD name:	itemTypeCode
		GDD definition:	Code describing the trade item type. Allowed code values are specified in GS1 Code List ItemTypeCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000656	Item type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
		Definition:	The code specifying the type of the trade item.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000342	Trade item transactional data owner code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the responsible party of the transactional data.
		GDD name:	tradeItemDataOwner
		GDD definition:	Specifies who owns the set of trade item transactional data.
BDT00000700	Trade item transactional data owner code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
		Definition:	The code specifying the responsible party of the transactional data.
		Example:	SELLER
BDT00000028	Code list version	Used code list:	TradeItemDataOwnerCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000023	Dynamic trade item information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
BDT00000007	Available for sale date	Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData
		GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The date when a trade item is available for sale.
BDT00000008	Batch number	GDD name:	availableForSaleDate
		GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
BDT00000011	Best before date	GDD name:	batchNumber
		GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
		GDD comment:	The identity of the production batch (lot), that can be related to the point of time for the production.
		Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
BDT00000011	Best before date	GDD name:	bestBeforeDate
		GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000180	Country of origin	Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000057	Expiration date	Definition:	The date after which the product should not be used or consumed.
		GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDT00000090	Lot number	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
		GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
BDT00000104	Packaging date	Definition:	The date on which a product is placed in a container or package.
		GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.
BDT00000116	Production date	Definition:	The date the product was produced.
		GDD name:	productionDate
		GDD definition:	The date that the product was produced.
BDT00000120	Sell by date	Definition:	The date after which the product should not be sold.
		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
		GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function
BDT00000082	Item in contact with food product indicator	Definition:	The code indicating if the trade item can be in contact with food products.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	itemInContactWithFoodProduct

BDTG00000235	Logistic unit packaging pattern information	GDD definition: States weather or not the trade item can come into contact with food products. Definition: The information specifying the packaging of the logistic unit.
BDT00000095		GDD name: transactionalItemLogisticUnitInformation GDD comment: Specifies packaging parameters for transport and storage purposes.
	Number of layers	Definition: The number of layers of packages in a package. Example: 3 Remark: To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfLayers
BDT00000096		GDD name: Number of layers of a product or products within a package, container, pallet, etc GDD definition: The number of packs per layer in a package. Remark: To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer
	Number of units per platform	GDD name: numberOfUnitsPerLayer GDD definition: Number of units of a product or package within one layer of a package, container, pallet, etc.
BDT00000097		Remark: To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerPallet
	Maximum stacking factor	GDD name: numberOfUnitsPerPallet GDD definition: The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
BDT00000091		Definition: The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product. Example: 3

Business data term groups

GS1 SDD; 1.0; Published

			Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
			GDD name:	maximumStackingFactor
			GDD definition:	A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDTG00000265		Packaging terms and conditions code	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
			GDD name:	packagingTerms
			GDD comment:	Specifies packaging terms and conditions.
BDT00000663		Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
			Used code list:	PackagingTermsAndConditionsCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000264		Package type code	Definition:	The code specifying the type of package used for the trade item.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
			Remark:	Code list is based on UN/ECE Recommendation 21
			Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
			GDD name:	packageTypeCode
			GDD definition:	Code specifying a package type. Allowed code values are specified in UN/ECE Recommendation 21, extended by GS1
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
BDT00000664		Package type code content	Definition:	The code specifying the type of package used for the trade item.
			Example:	200
			Used code list:	PackageTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
			Remark:	Code list is based on UN/ECE Recommendation 21
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000301		Returnable package return transport payment code	Definition:	The code specifying who is paying for the return of the empty returnable containers.

BDT00000665	Returnable package return transport payment code content	GDD name:	returnablePackageTransportCostPayment
		GDD definition:	Specifies who will pay transport cost.
BDT00000665	Returnable package return transport payment code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
BDT00000665	Returnable package return transport payment code content	Definition:	The code specifying who is paying for the return of the empty returnable containers.
		Used code list:	TransportChargesPaymentMethodCode
BDT00000665	Returnable package return transport payment code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000233	Logistic unit dimensions information	Definition:	The information specifying measurements of a logistic unit.
		GDD name:	dimensionsOfLogisticUnit
BDTG00000190	Depth measurement	GDD comment:	Information specifying the physical dimensions of a specific logistic unit.
		Definition:	The measure of an item from front to back.
BDT00000661	Depth measurement content	GDD name:	depth
		GDD comment:	Measurement of the distance between the front and the back.
BDTG00000608	Measurement unit code	Definition:	The measure of an item from front to back.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000608	Measurement unit code	GDD name:	N/A
		GDD comment:	N/A
BDTG00000608	Measurement unit code	GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
BDTG00000608	Measurement unit code	GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDT00000607	Measurement unit code content	Used code list:	MeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1

			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000307		Serial number range	Definition:	The range of serial numbers formed by a start number and an end number.
			GDD name:	serialNumberRange
			GDD definition:	The difference or interval between the minimum and maximum value of the serial numbers expressed as a string
BDT00000092		Maximum value	Definition:	The highest value in a number series.
			GDD name:	maximumValue
			GDD definition:	Specifies the upper limit of the string range.
BDT00000094		Minimum value	Definition:	The lowest value in a number series.
			GDD name:	minimumValue

BDTG00000336	Trade item measurements information	GDD definition:	Specifies the lower limit of the string range.
		Definition:	The information specifying the measurements of a trade item.
BDTG00000190	Depth measurement	GDD name:	transactionalItemDimensions
		GDD definition:	Dimensions of the transactional trade item: depth, height, width
BDTG00000661	Depth measurement content	Definition:	The measure of an item from front to back.
		GDD name:	depth
BDTG00000608	Measurement unit code	GDD comment:	Measurement of the distance between the front and the back.
		Definition:	The measure of an item from front to back.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
		Remark:	Code list based on UN/ECE Recommendation 20
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
BDTG00000220	Height measurement	GDD name:	height
		GDD definition:	The vertical dimension from the lowest extremity to the highest extremity.
BDTG00000650	Height measurement content	Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
		Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/

BDTG00000360	Width measurement	Definition:	list-of-trade-facilitation-recommendations-n-16-to-20.html
		GDD name:	The horizontal dimension from one side of the item to the other side.
BDTG00000662 BDTG00000608	Width measurement content Measurement unit code	GDD comment:	width
		Definition:	The measurement of the extent of something from side to side. Width is the measurement from left to right.
BDTG00000216	Global trade item number format and type of carrier information	Definition:	The horizontal dimension from one side of the item to the other side.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000217	GS1 global trade item number format code	GDD name:	N/A
		GDD comment:	N/A
BDTG00000646	GS1 global trade item number format code content	GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
BDTG00000028	Code list version	GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
		Definition:	The information specifying details of the format and type of data carrier for a GS1 global trade item number, GTIN, of a trade item.
BDTG00000185	Data carrier type code	Remark:	GTIN - GS1 global trade item number
		GDD name:	transactionalItemDataCarrierAndIdentification
		GDD definition:	Provides information about GS1 Identifier and Data Carriers associated with the trade item.
		Definition:	The code specifying the format of a GS1 global trade item number.
		GDD name:	gs1TransactionalItemIdentificationKey
		GDD definition:	Specifies the type of GS1 Identification Key.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode
		Definition:	The code specifying the format of a GS1 global trade item number.
		Example:	GTIN_13
		Used code list:	GS1TradeItemIdentificationKeyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyTypeCode&release=1
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying a type of data carrier.
		Used code list:	DataCarrierTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode

			GDD name:	dataCarrier
			GDD comment:	A means to represent data in a machine readable form.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDT00000639		Data carrier type code content	Definition:	The code specifying a type of data carrier.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000345		Trade item waste information	Definition:	The information specifying details of the waste generated by the trade item.
			GDD name:	tradeItemWaste
			GDD definition:	Provides details of waste generated by the trade item.
BDT00000138		Waste identification	Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
			Example:	04098765000119
			GDD name:	wasteIdentification
			GDD definition:	The number identifying the type of waste.
			GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDTG00000359		Waste type code	Definition:	The information specifying the details of the code specifying the type of waste.
			GDD name:	typeOfWaste
			GDD comment:	Provides code and description of waste type according to required classification scheme.
BDT00000702		Waste type code content	Definition:	The code specifying the type of waste.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000022		Code description	Definition:	The description of a code value expressed as text.
			GDD name:	codeDescription
			GDD definition:	A description for the code value provided.
BDT00000023		Code list agency code	Definition:	The code specifying the agency responsible for a code list.
			GDD name:	codeListAgencyCode
			GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024		Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
			GDD name:	codeListAgencyCodeListVersion
			GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025		Code list agency name	Definition:	The name of the agency responsible for a code list.
			GDD name:	codeListAgencyName
			GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026		Code list name	Definition:	The name of the code list expressed as text.
			GDD name:	codeListName

BDT00000027		Code list URL	GDD definition:	The name of the code list which provides the code value.
			Definition:	The character string that identifies the location of the code list in a network.
BDT00000028		Code list version	Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
			GDD name:	codeListURI
BDTG00000338		Trade item organic information	GDD definition:	A string that refers to the location of the code list which provides the code value.
			GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDTG00000338		Trade item organic information	Definition:	The version number of the code list.
			GDD name:	codeListVersion
BDTG00000338		Trade item organic information	GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying organic data for a trade item.
BDTG00000338		Trade item organic information	GDD name:	transactionalItemOrganicInformation
			GDD definition:	Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081		Trade item organic indicator	Definition:	The code indicating if the trade item is claimed to be organic.
			Example:	NO
BDT00000081		Trade item organic indicator	Used code list:	Available codes: "YES" and "NO"
			GDD name:	isTradeItemOrganic
BDTG00000261		Organic certification information	GDD definition:	Information about whether or not the trade item is organic.
			Definition:	The information specifying the certificate for a trade item which claims the product to be organic.
BDTG00000261		Organic certification information	GDD name:	organicCertification
			GDD comment:	Specifies information about the organic trade item certification.
BDT00000017		Certification value	Definition:	The certification value.
			Example:	need an reliable example
BDT00000017		Certification value	GDD name:	itemCertificationValue
			GDD definition:	The product's certification standard value. E.g. DE-OKO-006
BDT00000015		Certification agency name	Definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met.
			GDD name:	itemCertificationAgency
BDT00000016		Certification standard name	GDD definition:	Name of the organization issuing the certification standard or other requirement being met.
			Definition:	The name of the certification standard expressed as text.
BDT00000016		Certification standard name	Example:	GlobalGAP
			GDD name:	itemCertificationStandard
BDTG00000174		Colour information	GDD definition:	Name of the certification standard. Free text. Example: Organic product.
			Definition:	The information specifying the colour of a trade item.
BDTG00000174		Colour information	GDD name:	colour
			GDD comment:	Information specifying the colour of the trade item.
BDTG00000172		Colour code	Definition:	The code specifying the colour of an object or a product according to a colour system.
			GDD name:	colourCode
BDTG00000172		Colour code	GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
			Definition:	The code specifying the colour of an object or a product according to a colour system.
BDT00000736		Colour code content	GDD name:	N/A

BDT00000029	Colour code system code	GDD comment:	N/A
		Definition:	The code specifying the colour coding system.
BDT00000030	Colour code system description	Example:	10
		Used code list:	ColourCodeListCode
BDT00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
BDT00000031	Colour code system version	GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000173	Colour description	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		Definition:	The description of the colour code system expressed as text.
BDT00000737	Colour description content	Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
BDTG00000523	Language code	GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
		Definition:	The version number of the code list.
BDT00000524	Language code content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000028	Code list version	Definition:	The version number of the colour code system.
		GDD name:	colourCodeListVersion
BDTG00000316	Size Information	GDD definition:	The version of the ColourCodeListCode code list.
		Definition:	Colour descriptionThe description of a colour expressed as text.
BDT00000028	Code list version	Usage:	Only used if no coded value for the colour is available using the business data term Colour code.
		GDD name:	colourDescription
BDT00000028	Code list version	GDD comment:	A description of a colour of an object.
		Definition:	The description of a colour expressed as text.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000028	Code list version	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000028	Code list version	Definition:	The information specifying the size of a trade item.
		GDD name:	

		GDD name:	size
		GDD definition:	The physical dimensions or proportions of the transactional trade item depicted as a code or a description.
BDTG00000315	Size description	Definition:	The description of a size expressed as text.
		GDD name:	descriptiveSize
		GDD definition:	A description of the size of an object.
BDT00000679	Size description content	Definition:	The description of a size expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000313	Size code	Definition:	The code specifying the size of an object or a product according to a size system.
		GDD name:	sizeCode
		GDD comment:	Code specifying the size of an object and the size coding system being applied, for example L (buyer assigned).
BDT00000680	Size code content	Definition:	The code specifying the size of an object or a product according to a size system.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000314	Size code list code	Definition:	The code specifying the system of size codes.
		GDD name:	sizeCodeListCode
		GDD definition:	Code specifying a size code list. Allowed code values are specified in GS1 Code List SizeCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:SizeCodeListCode
BDT00000124	Size code list description	Definition:	The description of the size code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	sizeCodeListDescription
		GDD definition:	A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000125	Size code list version	Definition:	The version number of the code list of the size code system.
		GDD name:	sizeCodeListVersion
BDTG00000334	Trade item classification information	GDD definition:	The applied version of the SizeCodeListCode code list.
		Definition:	The information specifying the product classification of a trade item.
BDTG00000070	GS1 global product classification GPC brick code	GDD name:	tradeItemClassification
		GDD comment:	Information specifying the product class to which a trade item belongs and the classification system being applied.
BDT00000070	GS1 global product classification GPC brick code	Definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
BDT00000071	GS1 global product classification GPC brick name	Example:	10000025
		GDD name:	gpcCategoryCode
BDT00000071	GS1 global product classification GPC brick name	GDD definition:	Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
		Definition:	The name of the product category of similar products according to GS1 global product classification standard GPC.
BDTG00000155	Alternative trade item product classification code	Business rule:	To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)
		Example:	Milk
BDTG00000155	Alternative trade item product classification code	GDD name:	gpcCategoryName
		GDD definition:	Name associated with the specified Global Product Classification (GPC) category code.
BDTG00000155	Alternative trade item product classification code	Definition:	The information specifying the details of the alternative trade item product classification code.
		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
BDTG00000536	Alternative trade item product classification code content	GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
BDTG00000536	Alternative trade item product classification code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
BDTG00000536	Alternative trade item product classification code content	GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.
BDT00000002	Additional trade item classification scheme code	Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
BDT00000002	Additional trade item classification scheme code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD name:	additionalTradeItemClassificationCodeListCode

BDT00000003	Additional trade item classification scheme version	GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000022	Code description	Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000028	Code list version	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDTG00000215	Global Product Classification attributes	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
BDT00000067	GS1 global product classification GPC attribute type code	GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
		Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
BDT00000068	GS1 global product classification GPC attribute value code	GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
		Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
BDT00000064	Global product classification GPC attribute type name	Example:	3001082
		GDD name:	gpcAttributeValueCode
		GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
		Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
		Example:	Level of Fat Claim

Business data term groups

GS1 SDD; 1.0; Published

BDT00000069	GS1 global product classification GPC attribute value name	GDD name:	gpcAttributeName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
		Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
		Example:	FULL FAT
		GDD name:	gpcAttributeValueName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
BDTG00000299	Return of goods reason code	Definition:	The code specifying the reason why goods have been returned.
		Usage:	The business data term is normally to be used internally in an IT business system processing customers orders from different customers and possible returns of delivered goods. A bilateral agreement is needed if the business data term is to be used in communication with an external party.
		GDD name:	returnReasonCode
		GDD definition:	Code specifying the reason for goods return. To be used for Return Order.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PhysicalOrLogicalStateDescriptionCode
BDT00000739	Return of goods reason code content	Definition:	The code specifying the reason why goods have been returned.
		Used code list:	PhysicalOrLogicalStateDescriptionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PhysicalOrLogicalStateDescriptionCode
		Remark:	UN/ECE 7007 Physical Or Logical State Description Code
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000302	Returnable asset identification information	Definition:	The information specifying the identity of a returnable asset.
		Usage:	To identify a returnable asset, either of "BDT00000065 Global returnable asset identifier, GRAI" or "BDT00000743 Additional returnable asset identification content" is used, or both.
		GDD name:	returnableAssetIdentification
		GDD comment:	Information used to identify a returnable asset.
BDT00000065	Global returnable asset identifier, GRAI	Definition:	The identity according to the GS1 identification system for unique identification of returnable assets and including an optional serial number.
		Example:	GRAI: 07300015200154 GRAI including a serial number: 073000152001540000000000356
		Remark:	A returnable asset is a reusable package or transport equipment of a certain value such as a beer keg, a gas cylinder, a plastic pallet or a crate. The GS1 system identification of a returnable asset,

			<p>the Global Returnable Asset Identifier (GRAI), enables tracking as well as recording of all relevant data.</p> <p>An optional serial number may be used to distinguish individual assets within a given asset type. The identification key is comprised of a GS1 Company Prefix, asset type, check digit, and optional serial number.</p> <p>GDD name: grai</p> <p>GDD definition: The GS1 Identification Key used to identify Returnable Assets. The key comprises a GS1 Company Prefix, Asset Type, Check Digit, and optional serial number.</p> <p>GDD comment: More information about the Global Returnable Asset Identifier can be found here: http://www.gs1.org/grai</p>
BDTG00000304	Additional returnable asset identification information	<p>Definition: The information specifying the additional identification details of a returnable asset.</p> <p>Usage: The identity is specified by another identification system than the GS1 Global returnable asset identifier GRAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global returnable asset identifier GRAI.</p> <p>GDD name: additionalReturnableAssetIdentification</p> <p>GDD definition: The additional identification Key used to identify returnable assets.</p>	
BDT00000743	Additional returnable asset identification content	<p>Definition: The additional identity of a returnable asset.</p> <p>GDD name: N/A</p> <p>GDD definition: N/A</p>	
BDTG00000363	Additional returnable asset identification type code	<p>Definition: The code specifying the type of additional identifier for a returnable asset.</p> <p>Example: OWNER_ASSIGNED</p> <p>Used code list: AdditionalReturnableAssetIdentificationTypeCode</p> <p>Link to code list: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode</p> <p>GDD name: additionalReturnableAssetIdentificationTypeCode</p> <p>GDD definition: Code specifying the type of additional returnable asset identification being provided.</p> <p>GDD comment: Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary</p> <p>GDD comment: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode</p>	
BDTG00000301	Returnable package return transport payment code	<p>Definition: The code specifying who is paying for the return of the empty returnable containers.</p> <p>GDD name: returnablePackageTransportCostPayment</p> <p>GDD definition: Specifies who will pay transport cost.</p> <p>GDD comment: Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary</p> <p>GDD comment: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode</p>	
BDT00000665	Returnable package return transport payment code content	<p>Definition: The code specifying who is paying for the return of the empty returnable containers.</p>

		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000204	Sale of tobacco products information	GDD name:	N/A
		GDD definition:	N/A
BDTG00000204	Sale of tobacco products information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000204	Sale of tobacco products information	GDD definition:	Identification of the applied version of the code list.
BDTG00000204	Sale of tobacco products information	Definition:	Information specifying details on ordered and delivered tobacco and related products.
		Usage:	The business data term group must be used when the EU regulation 2018/574 is to be applied.
BDTG00000204	Sale of tobacco products information	GDD name:	EuUniqueID
		GDD definition:	Group of attributes related to the EU Unique IDs.
BDT00000005	Aggregated level of package unique identity	Definition:	The unique identifier of a group of trade items as a serialised GS1 global trade item number, SGTIN, or the unique identifier of a logistic unit as a serial shipping container code, SSCC, in accordance with EU regulation 2018/574.
		Business rule:	Mandatory to use if code "2" or "3" is entered for the business data term group "BDTG00000161 EU unique identifier type code".
BDT00000005	Aggregated level of package unique identity	Example:	Example SGTIN: 073324022659101234567890 (GTIN: 07332402265910 Serial number: 1234567890) Example SGTIN as data string in an EPC RFID chip: 2.73324022.6591.1234567890 Example SSCC: 173324022687654329
		GDD name:	aggregatedLevelUniqueIdentifier
BDT00000136	Unit pack unique identifier upUI	GDD definition:	List of aggregated level UIs covered by the message. Mandatory if euUniqueIDTypeCode = 2 or 3.
		Definition:	The unique trade item unit identifier as a serialised extension of Global Trade Item Number, GTIN.
BDT00000136	Unit pack unique identifier upUI	Remark:	The unit pack unique identifier is assigned by a third party.
		GDD name:	unitPacketLevelUniqueIdentifier
BDTG00000161	EU unique identifier type code	GDD definition:	List of unit packet level UIs covered by the message. Mandatory if euUniqueIDTypeCode = 1 or 3
		Definition:	The code specifying which type of EU unique identifier are used in a list of unique identified trade item units.
BDTG00000161	EU unique identifier type code	Usage:	A list can contain the EU unique identifier for trade item units either as a) unit pack unique identifiers, upUI, or b) aggregated level unique identifiers, aUI. A list can contain also both types of the EU unique identifiers.
		Synonyms:	EU unique identifier type code
BDTG00000161	EU unique identifier type code	GDD name:	euUniqueIDTypeCode
		GDD comment:	Identification of UI types covered by the purchase order (recorded at the highest level of available aggregation).
BDTG00000161	EU unique identifier type code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:EuUniqueIDTypeCode

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000034	County code	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.

		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.

BDT00000580	Business contact responsibility description content	GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDTG00000523	Language code	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
BDTG00000524	Language code content	GDD definition:	N/A
		Definition:	The code specifying the language.
BDT00000524	Code list version	GDD name:	N/A
		GDD comment:	N/A
BDTG00000028	Communication information	Definition:	The code specifying the language.
		Example:	en
BDTG00000176	Communication channel code	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000175	Communication channel identification	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000032	Communication channel name	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000033	After hours communication information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
BDTG00000145		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office

		Definition:	The official and legal name of the organisation.
BDT00000102	Organisation name	GDD name:	organisationName
		GDD definition:	The official name of the organisation.
BDTG00000228	Language of the party code	Definition:	The code specifying the language of a party.
		GDD name:	languageOfThePartyCode
BDTG00000228	Language of the party code	GDD definition:	Code specifying the language of an addressed party.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en

		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000184	Currency of party code	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		GDD name:	currencyOfPartyCode
		GDD comment:	Code specifying the currency of an addressed party.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000710	Currency of party code content	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000246	Official address	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box

BDT00000114	Postal code	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
BDT00000127	State	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000128	Street address one	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000130	Street address two	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000129	Street address three	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
		Definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Example:	The third street address line of a structured address.
		Remark:	Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where

BDTG00000179	Country code	Definition:	necessary. The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDTG00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .

		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDTG00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90

BDT00000117	Province identity	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000130	Street address two	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000129	Street address three	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDTG00000179	Country code	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
		GDD definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000129	Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000129	Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The code specifying a country.
BDTG00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

BDT00000578	Additional party identification content	Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
BDTG00000579	Additional party identification type code	GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDT00000570	Additional party identification type code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
BDTG00000028	Code list version	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG000000784	Electronic address information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT000000786	Electronic address identification scheme	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information about the electronic address of a party
BDTG000000785	Electronic address identification	Definition:	The identification scheme of of the electronic address
		GDD name:	N/A
BDT000000785	Electronic address identification	GDD definition:	N/A
		Definition:	The identifier of of the electronic address to which a business document should be delivered
BDTG00000144	Address information	GDD name:	N/A
		GDD definition:	N/A
BDT000000020	City name	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT000000019	City code	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDTG000000034	County code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT000000034	County code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT000000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT000000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT000000034	County code	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the

Business data term groups

			chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne:

BDTG00000129	Street address three	Definition:	The first free form line of an address, This first part is printed on paper as the first line below the name.
		Example:	For example, the name of the street and the number in the street or the name of a building.
BDTG00000179	Country code	Remark:	The third street address line of a structured address.
		GDD name:	Floor 4
BDTG00000774	Country code content	GDD definition:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDTG00000028	Code list version	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD name:	countryCode
BDTG00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000089	Longitude	GDD name:	N/A
		GDD definition:	N/A
BDTG00000158	Business contact information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000085	Latitude	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000089	Longitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000089	Longitude	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact

Business data term groups

GS1 SDD; 1.0; Published

BDT00000112	Person name	GDD comment: Definition: GDD name: GDD definition:	Person or department that can be contacted regarding the business transaction. The name of an individual person expressed as text. personName The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition: GDD name: GDD definition:	The name of the department. departmentName The name of the department that can be contacted to provide additional information.
BDT00000083	Job title	Definition: GDD name: GDD definition:	The title of a position or the role of a person holding the position. jobTitle The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition: Used code list: Link to code list: GDD name: GDD comment: GDD comment:	The code specifying the function or role of a contact person. ISO 3166-1 or equivalent representation in specific syntax. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode contactTypeCode Code specifying the function or role of a contact. BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition: GDD name: GDD comment:	The description of the responsibility of a business contact such as a person or a department expressed as text. responsibility Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition: GDD name: GDD definition:	The description of the responsibility of a business contact such as a person or a department expressed as text. N/A N/A
BDTG00000523	Language code	Definition: GDD name: GDD comment:	The code specifying the language. N/A N/A
BDT00000524	Language code content	Definition: Example: Used code list: GDD name: GDD definition: GDD comment:	The code specifying the language. en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org . languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.

BDTG00000176	Communication information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000175	Communication channel code	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
BDTG00000175	Communication channel code	GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000175	Communication channel code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD comment:	CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
BDTG00000145	After hours communication information	GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000326	Tax registration information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of a party registered for tax.
		GDD name:	dutyFeeTaxRegistration
BDTG00000369	Tax authority name	GDD definition:	The registration details of a party related to a particular duty, tax or fee.
		Definition:	The name of the authority administrating the collection of taxes expressed as text.
		Remark:	There may be examples when a tax authority charges customs duties and other fees.
		GDD name:	dutyFeeTaxAgencyName
BDTG00000585	Tax registration identification information	GDD definition:	Agency responsible for the collection of this duty, fee or tax.
		Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
		GDD name:	dutyFeeTaxRegistrationID
BDTG00000584	Tax registration identification content	GDD comment:	Identifier of the party for this particular duty, fee or tax.
		Definition:	The identity assigned to a party registered for tax according to a national tax register.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
BDTG00000074	Identification scheme name	GDD definition:	N/A
		Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
BDTG00000073	Identification scheme agency name	GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
BDTG00000586	Identification scheme responsible agency code	GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
BDTG00000583	Identification scheme responsible agency code content	GDD definition:	The identification of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000328	Tax type code	Definition:	The code specifying the type of tax.

		GDD name:	dutyFeeTaxTypeCode
		GDD comment:	Code specifying the type of duty, fee or tax.

		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000158	Business contact information	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDT00000083	Job title	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDT00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDT00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDT00000083	Contact type code	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code content	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
BDT00000571	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.

			GDD definition:	The address where the organisation is officially based.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber

Business data term groups

GS1 SDD; 1.0; Published

BDT00000114	Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
BDT00000128	Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000130	Street address two	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000129	Street address three	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.

BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000128	Street address one	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000130	Street address two	Example:	California
		GDD name:	state
BDT00000129	Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000179	Country code	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774	Country code content	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000179	Country code	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000129	Street address three	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000179	Country code	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000179	Country code	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
BDT00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.

		Definition:	The code specifying the additional identification type of the party.
BDTG00000570	Additional party identification type code content	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDTG00000570	Additional party identification type code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000020	City name	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000019	City code	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000034	County code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000035	Cross street	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000106	Party name	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000113	Post office box number	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000114	Postal code	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000117	Province Identity	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000127	State	Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000128	Street address one	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326

		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000158	Business contact information	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000112	Person name	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDT00000044	Department name	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDT00000083	Job title	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDTG00000178	Contact type code	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
BDT00000571	Contact type code content	GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000028	Code list version	Definition:	The name of the department.
		GDD name:	departmentName
BDTG00000159	Business contact responsibility description	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
		Used code list:	The code specifying the function or role of a contact person.
		Link to code list:	ISO 3166-1 or equivalent representation in specific syntax.
		GDD name:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD comment:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.

			GDD comment:	Code specifying the currency of an addressed party.
			GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000710		Currency of party code content	Definition:	The code specifying the currency of a party.
			Example:	EUR
			Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
			Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000246		Official address	Definition:	The registered legal address of the organisation.
			GDD name:	officialAddress
			GDD definition:	The address where the organisation is officially based.
BDT00000034		County code	Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
BDT00000019		City code	Definition:	The code specifying a city.
			Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035		Cross street	Definition:	The street crossing another street.
			GDD name:	crossStreet
			GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113		Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber

Business data term groups

GS1 SDD; 1.0; Published

BDT00000114		Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
			Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000117		Province identity	Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127		State	GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
BDT00000128		Street address one	Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
BDT00000130		Street address two	GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
BDT00000129		Street address three	Example:	California
			GDD name:	state
BDT00000125		Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
BDT00000126		Street address two	Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
BDT00000127		Street address three	GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000128		Street address one	Definition:	The second street address line of a structured address.
			Example:	Blue Tower
BDT00000129		Street address two	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo
BDT00000130		Street address three	GDD definition:	streetAddressTwo:
			GDD definition:	The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000131		Street address one	GDD definition:	Definition streetAddressOne:
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000132		Street address two	Definition:	The third street address line of a structured address.
			Example:	Floor 4
BDT00000133		Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
BDT00000134		Street address one	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.

		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000128	Street address one	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000130	Street address two	Example:	California
		GDD name:	state
BDT00000129	Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000179	Country code	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774	Country code content	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000179	Country code	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000129	Street address three	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000179	Country code	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000179	Country code	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
BDT00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.

		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line

			GDD definition:	below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition <code>streetAddressOne</code> : The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.	
		Example:	Floor 4	
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.	
		GDD name:	<code>streetAddressThree</code>	
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.	
BDTG00000179	Country code	Definition:	The code specifying a country.	
		GDD name:	<code>countryCode</code>	
		GDD comment:	Code specifying the country for the address.	
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org	
BDT00000774	Country code content	Definition:	The code specifying a country.	
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.	
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:	The version number of the code list.	
		GDD name:	<code>codeListVersion</code>	
		GDD definition:	Identification of the applied version of the code list.	
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.	
		GDD name:	<code>geographicalCoordinates</code>	
		GDD comment:	Geographical coordinates for the address.	
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.	
		Example:	23°26'12.2" S	
		GDD name:	<code>latitude</code>	
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.	
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.	
		Example:	18°3'59.0616"	
		GDD name:	<code>longitude</code>	
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDTG00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDTG00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000288	Registered legal information	Definition:	The information specifying the registered data on a legal entity in accordance with national law.
		GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
BDTG00000087	Legal registration number	Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber

BDT00000086	Legal registration additional information	GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
		GDD name:	legalRegistrationType
BDT00000658	Legal registration type code content	GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a

BDT00000035	Cross street	Definition: GDD name: GDD definition:	state. The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the

BDT00000129	Street address three	Definition:	name. For example, the name of the street and the number in the street or the name of a building.
		Example:	The third street address line of a structured address.
BDTG00000179	Country code	Remark:	Floor 4
		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.	
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000028	Code list version	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000089	Longitude	GDD name:	N/A
		GDD definition:	N/A
BDTG00000506	Shipment identification	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000506	Shipment identification	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000506	Shipment identification	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000506	Shipment identification	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000506	Shipment identification	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000506	Shipment identification	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000506	Shipment identification	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

Business data term groups

GS1 SDD; 1.0; Published

BDT00000500	Global shipment identification number, GSIN	Definition:	The identity according to the GS1 identification system for unique identification of a group of logistic units intended to be delivered together.
		GDD name:	gsin
		GDD definition:	The GS1 Identification Key used to identify a logical grouping of logistic or transport units that are assembled by the consignor (seller) for a transport Shipment from that consignor to one consignee (buyer) referencing a despatch advice and/or BOL. The key comprises a GS1 Company Prefix, Shipper Reference and Check Digit.
		GDD comment:	More information about the Global Shipment Identification Numbers can be found here: http://www.gs1.org/global-shipment-identification-number-gsin
BDTG00000504	Additional shipment identification information	Definition:	The information specifying the additional identification details of a shipment.
		GDD name:	additionalShipmentIdentification
		GDD comment:	Additional identification key used to identify a shipment.
BDT00000517	Additional shipment identification content	Definition:	The additional identity of a shipment.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000505	Additional shipment identification type code	Definition:	The code specifying the type of additional identifier for a shipment.
		Example:	SHIPPER_ASSIGNED
		Used code list:	AdditionalShipmentIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalShipmentIdentificationTypeCode

		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		Definition:	The code specifying the type of additional identifier for a shipment.
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000501	Shipper party identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The identity of the party shipping goods.
BDTG00000501	Shipper party identification	Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	shipper
		GDD definition:	A party who engages in shipping goods. In a commercial scenario this would be the supplier.

BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000502	Goods receiving party identification	Definition:	The identity of the party receiving goods.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	receiver
		GDD definition:	A party who engages in receiving goods. In a commercial scenario this would be the customer.
BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations

BDTG00000577	Additional party identification information	Definition:	or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name: GDD comment:	additionalPartyIdentification A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name: GDD definition:	N/A N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name: GDD definition:	additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list: Link to code list:	AdditionalPartyIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000396	Shipment split method code	Definition:	The code specifying the method by which a shipment of ordered trade items may be split.
		GDD name: GDD definition:	shipmentSplitMethodCode Specifies a method of splitting shipment of ordered goods.
BDT00000567	Shipment split method code content	Definition:	The code specifying the method by which a shipment of ordered trade items may be split.
		Used code list: Link to code list:	ShipmentSplitMethodCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ShipmentSplitMethodCode&release=1
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000312	Shipment transportation information	Definition:	The information specifying details about the transportation of goods.
		GDD name: GDD comment:	shipmentTransportationInformation Provides information on the means of transportation or carrier associated with the order.

BDTG00000218	Handling instruction code	Definition:	The code specifying how the ordered trade items are to be handled and loaded.
		GDD name:	handlingInstructionCode
		GDD definition:	Code identifying handling instructions for this shipment, such as where or how specified packages or containers are to be loaded on a means of transport. Handling instructions can include haulage/ pickup and or delivery instruction/ temperature/humidity instructions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000647	Handling instruction code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:HandlingInstructionCode
		Definition:	The code specifying how the ordered trade items are to be handled and loaded.
		Used code list:	HandlingInstructionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:HandlingInstructionCode
BDT00000628	Code list version	Remark:	Code list based on the UN/EDIFACT 4079.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000351	Transport means type code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the means for transporting goods.
		GDD name:	transportMeansType
BDT00000687	Transport means type code content	GDD definition:	Code identifying the means of transport: the type of vehicle, aircraft, vessel or other device used for the transport of goods. The means of transport has a means of locomotion.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportMeansTypeCode
		Definition:	The code specifying the means for transporting goods.
BDT00000687	Transport means type code content	Example:	31
		Used code list:	TransportMeansTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportMeansTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000350	Transport means identification	Definition:	The information specifying the details of the identification number according to a specified identification scheme assigned to a means of transportation such as a vehicle license plate of a truck or an aircraft registration number of a helicopter.
		GDD name:	transportMeansID
		GDD definition:	Vehicle license plate/Aircraft number identifying a means of transport.

BDT00000106	Party name	GDD definition: Definition: GDD name: GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it. The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.

			Example: Remark:	Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000774		Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name: GDD definition:	N/A N/A
BDTG00000028		Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDTG00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	23°26'12.2" S latitude Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158		Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
			GDD name: GDD comment:	contact Person or department that can be contacted regarding the business transaction.
BDTG00000112		Person name	Definition: GDD name: GDD definition:	The name of an individual person expressed as text. personName The name of the individual that can be contacted to provide additional information.

				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
				Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000085			Latitude		

BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
BDTG00000225	Issued capital	GDD name:	issuedCapital
BDT00000655	Issued capital content	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.

			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:		The third street address line of a structured address.
		Example:		Floor 4
		Remark:		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree	
		GDD definition:		The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:		The code specifying a country.
		GDD name:	countryCode	
		GDD comment:		Code specifying the country for the address.
		GDD comment:		The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:		The code specifying a country.
		Remark:		GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:		The version number of the code list.
		GDD name:	codeListVersion	
		GDD definition:		Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:		The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates	
		GDD comment:		Geographical coordinates for the address.
BDT00000085	Latitude	Definition:		The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:		23°26'12.2" S
		GDD name:	latitude	
		GDD definition:		Angular distance North or South from the earth's equator measured through 90 degrees.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000213	Freight forwarder party information	Definition:	The information specifying details of the party that arranges carriage of goods including connected services such as preparing and processing customs documentation and performing activities pertaining to international shipments.
		Usage: GDD name: GDD definition:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both. freightForwarder Party that arranges the carriage of goods including connected services and/or associated formalities on behalf of the shipper (consignor) or consignee.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark: GDD name: GDD definition:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage: GDD name: GDD comment:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN. additionalPartyIdentification A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name: GDD definition:	N/A N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name: GDD definition:	additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list: Link to code list: GDD name: GDD definition:	AdditionalPartyIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000020	City name	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000106	Party name	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000114	Postal code	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000117	Province identity	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
BDT00000127	State	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000128	Street address one	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326

BDT00000130	Street address two	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000179	Country code	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
			For example, the name of the street and the number in the street or the name of a building.
BDT00000774	Country code content	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000214	Geographical coordinates information	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000028	Code list version	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT000000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000158	Business contact information	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000159	Business contact responsibility description	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDT00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDT00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDT00000083	Job title	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.

		GDD definition:	N/A
BDT00000019	City code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000034	County code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000035	Cross street	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000106	Party name	Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000113	Post office box number	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000035	Cross street	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000106	Party name	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000113	Post office box number	Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000113	Post office box number	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDT00000113	Post office box number	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name:	The code specifying a country. countryCode

BDT00000774	Country code content	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000158	Business contact information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDT00000112	Person name	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000044	Department name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000178	Contact type code	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:odd:cl:ContactTypeCode
		GDD name:	contactTypeCode

BDT00000571	Contact type code content	GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDT00000028	Code list version	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000159	Business contact responsibility description	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDTG00000523	Language code	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000028	Code list version	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000176	Communication information	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000175	Communication channel code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000175	Communication channel code	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:

BDT00000032	Communication channel identification	Definition:	CommunicationChannelCode
		GDD name:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
BDT00000033	Communication channel name	GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG00000145	After hours communication information	Definition:	The name of a communication channel expressed as text.
		GDD name:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000175	Communication channel code	GDD definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode

		Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
BDT00000085	Latitude	GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000225	Issued capital	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital

BDT00000655	Issued capital content	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000288	Registered legal information	Definition:	The information specifying the registered data on a legal entity in accordance with national law.
		GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000087	Legal registration number	Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.

		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000114	Postal code	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000117	Province identity	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000127	State	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000128	Street address one	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000130	Street address two	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000130	Street address two	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000130	Street address two	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000130	Street address two	Example:	California
		GDD name:	state
BDT00000130	Street address two	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000130	Street address two	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000130	Street address two	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000130	Street address two	Remark:	Second street address line complements the first street adress line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000130	Street address two	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDTG00000179	Country code	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000774	Country code content	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD comment:	The code specifying a country.
BDT00000028	Code list version	GDD name:	countryCode
		GDD definition:	Code specifying the country for the address.
BDTG00000214	Geographical coordinates information	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		GDD name:	The code specifying a country.
BDT00000085	Latitude	Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDT00000089	Longitude	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000395	Structured notation identification information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000056	Entity identification	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying the identification details of the structured notation.
		GDD name:	structuredNoteIdentification
		GDD definition:	Unique identification of the structuredNote instance.
		Definition:	The identity of an entity such as a document or an object.

BDTG00000196	Document content owner	Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
BDTG0000063	Global location number GLN	GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
		Definition:	The information specifying the party that is responsible for the content of a document.
BDTG00000577	Additional party identification information	GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDTG00000578	Additional party identification content	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000579	Additional party identification type code	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000570	Additional party identification type code content	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000028	Code list version	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000192	Structured notation information	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG00000028	Code list version	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDTG00000028	Code list version	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
BDTG00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000192	Structured notation information	Definition:	The information specifying details of a structured note.
		GDD name:	structuredNote
BDTG00000192	Structured notation information	GDD comment:	Source is BMS Common Library: Free text used to convey information that is not processed by applications, used when there is a need to make references to specific note in other messages. In

		GDD definition:	other cases, the simple 'note' element should be used. Source is BMS Order: Free text used to convey information that is not processed by applications, used when there is a need to make references to specific note in other messages.
BDTG00000245	Structured notation type code	Definition: GDD name: GDD definition:	The code specifying the type of a notation defined according to a bilateral agreement. structuredNoteType The type of the structuredNote, to be defined by the user.
BDTG00000244	Notation	Definition: GDD name: GDD definition:	The descriptive information expressed as text to be read and not to be processed by a receiving IT application. note AND noteText note: Free text used to convey information that is not processed by applications. Only meant to present the information to a user as on a screen, in a browser, etc. noteText: The content of the structuredNote with mandatory 'language' attribute.
BDT00000670	Notation content	Definition:	The descriptive information expressed as text to be read and not to be processed by a receiving IT application.
		GDD name: GDD definition:	N/A N/A
BDTG00000523	Language code	Definition: GDD name: GDD comment:	The code specifying the language. N/A N/A
BDT00000524	Language code content	Definition: Example: Used code list:	The code specifying the language. en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name: GDD definition: GDD comment:	languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000395	Structured notation identification information	Definition:	The information specifying the identification details of the structured notation.
		GDD name: GDD definition:	structuredNoteIdentification Unique identification of the structuredNote instance.
BDT00000056	Entity identification	Definition: Remark:	The identity of an entity such as a document or an object. For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name: GDD definition:	entityIdentification The unique identifier of the piece of information, such as the object id or the document id.
BDTG00000196	Document content owner	Definition: GDD name: GDD comment:	The information specifying the party that is responsible for the content of a document. contentOwner Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition: Remark:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. GLN is the GS1 Identification Key used to identify physical locations or parties. The identification

		GDD name:	key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
BDT00000578	Additional party identification content	GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000245	Structured notation type code	Definition:	The code specifying the type of a notation defined according to a bilateral agreement.
		GDD name:	structuredNoteType
		GDD definition:	The type of the structuredNote, to be defined by the user.
BDT00000738	Structured notation type code content	Definition:	The code specifying the type of a notation defined according to a bilateral agreement.
		GDD name:	N/A
BDT00000022	Code description	GDD definition:	N/A
		Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.

BDT00000025	Code list agency name	GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000026	Code list name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
BDT00000027	Code list URL	GDD definition:	A name of the agency which manages the code list for example ISO.
		Definition:	The name of the code list expressed as text.
BDT00000028	Code list version	GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
BDTG00000320	structuredNoteText see Notation	Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
BDTG00000320	structuredNoteText see Notation	GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
BDTG00000320	structuredNoteText see Notation	GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
		Definition:	The version number of the code list.
BDTG00000320	structuredNoteText see Notation	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000320	structuredNoteText see Notation	Definition:	The descriptive information expressed as text to be read by a (human) person and not to be processed by a receiving IT application.
		GDD name:	structuredNoteText
BDTG00000320	structuredNoteText see Notation	GDD definition:	The content of the structuredNote with mandatory 'language' attribute.
		Definition:	The code specifying the language used for a textual description.
BDTG00000320	structuredNoteText see Notation	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000320	structuredNoteText see Notation	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000320	structuredNoteText see Notation	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000320	structuredNoteText see Notation	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000365	Tax accounting currency code	Definition:	The code specifying the currency used for tax accounting and reporting purposes as accepted or required in the country of the receiver of invoices.
		GDD name:	dutyFeeTaxAccountingCurrency
BDTG00000365	Tax accounting currency code	GDD definition:	The monetary unit used in the calculation of the duty, tax or fee.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDTG00000538	Tax accounting currency code content	Definition:	The code specifying the currency used for tax accounting and reporting purposes as accepted or required in the country of the receiver of invoices.
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000538	Tax accounting currency code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000321	Tax category code	Definition:	The code specifying the category of a tax.
		GDD name:	dutyFeeTaxCategoryCode
		GDD definition:	Code specifying the applicable charge category for this duty, fee or tax. For example low, high, exempt.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TaxCategoryCode
BDT00000537	Tax category code content	Definition:	The code specifying the category of a tax.
		Used code list:	TaxCategoryCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TaxCategoryCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000760	Tax currency conversion information	Definition:	The information specifying details of converting a tax monetary amount from a currency to a monetary amount in a different currency.
		GDD name:	taxCurrencyInformation
		GDD comment:	Contains the currency in which taxes will be paid, as well as the exchange rate against the invoice currency.
BDT00000037	Currency exchange rate	Definition:	The currency exchange rate for converting one unit of a currency to another currency.
		GDD name:	exchangeRate
		GDD definition:	The price of one currency in terms of another, that is, the number of units of one currency that may be exchanged for one unit of another currency.
BDT00000038	Currency exchange rate date	Definition:	The date and time for a specified currency exchange rate.
		GDD name:	exchangeRateDateTime
		GDD definition:	The date as of which the currency exchange rate is valid.
BDTG00000181	Currency conversion from code	Definition:	The code specifying the currency from which a monetary amount is converted.
		GDD name:	currencyConversionFromCode
		GDD comment:	ISO Code for the currency from which an amount is converted.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000708	Currency conversion from code content	Definition:	The code specifying the currency from which a monetary amount is converted.
		Example:	SEK
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000182	Currency conversion to code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the currency to which a monetary amount is converted.
BDTG00000709	Currency conversion to code content	GDD name:	currencyConversionToCode
		GDD comment:	ISO Code for the currency to which an amount is converted.
BDTG00000028	Code list version	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency to which a monetary amount is converted.
BDTG00000028	Code list version	Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
BDTG00000028	Code list version	Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000322	Tax description	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000322	Tax description	Definition:	The description of the tax expressed as text.
		GDD name:	dutyFeeTaxDescription
BDTG00000322	Tax description	GDD definition:	Textual description of this duty, fee or tax.
		GDD definition:	20190606 KD: definition at order level, order header
BDTG00000754	Tax description content	GDD definition:	Textual description of this duty, fee or tax. For example, "Taxes sur les supports audio" or WEEE for "Waste Electrical and Electronic Equipment".
		GDD definition:	20190606 KD: definition at order line level, orderLineItem
BDTG00000754	Tax description content	Definition:	The description of the tax expressed as text.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
BDTG00000523	Language code	GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
BDTG00000524	Language code content	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the reason for exemption of tax.
BDTG00000323	Tax exemption reason code	GDD name:	dutyFeeTaxExemptionReason
		GDD definition:	Specifies the reason for exemption of duty, fee or tax.
BDTG00000323	Tax exemption reason code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data
		GDD comment:

		GDD name:	currencyOfPartyCode
		GDD comment:	Code specifying the currency of an addressed party.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000710	Currency of party code content	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000246	Official address	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box

BDT00000114	Postal code	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
BDT00000127	State	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000128	Street address one	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000130	Street address two	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000129	Street address three	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street adress line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
		Definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Example:	The third street address line of a structured address.
		Remark:	Floor 4 Third street address line complements the first and the second street adress line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where

BDTG00000179	Country code	Definition:	necessary. The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDTG00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .

BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000231	Legal structure description	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000231	Legal structure description	GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the legal structure expressed as text.
BDT00000659	Legal structure description content	GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
BDTG00000523	Language code	GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
BDT00000524	Language code content	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000288	Registered legal information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDTG00000288	Registered legal information	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000087	Legal registration number	Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
BDT00000086	Legal registration additional information	GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
BDTG00000230	Legal registration type code	Definition:	The code specifying the type of legal registration.
		GDD name:	legalRegistrationType
BDTG00000230	Legal registration type code	GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000230	Legal registration type code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.
BDT00000658	Legal registration type code content	Definition:	The code specifying the type of legal registration.

		Used code list:	LegalRegistrationCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDT00000061	Financial institution name	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
BDT00000060	Financial institution division name	Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
		GDD definition:	The name of a division or location of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The information specifying details of a financial account.
		GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
		GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDT00000059	Financial account number	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
		GDD definition:	Text specifying the number of the financial account.
BDTG00000208	Financial account number type code	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	financialAccountNumberTypeCode
		GDD definition:	Identifies the type of financial account number.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDT00000645	Financial account number type code content	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode

		GDD name:	FinancialAccountNumberTypeCode
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000210	Financial institution routing number information	Definition:	The information specifying details on a routing number of a financial institution.
		GDD name:	financialRoutingNumber
		GDD comment:	Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT,ABA,CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode

BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90

BDT00000117	Province identity	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000130	Street address two	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000129	Street address three	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDTG00000179	Country code	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
		GDD definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000129	Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000129	Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The code specifying a country.
BDTG00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

Business data term groups

		GDD name:	codeListVersion
BDTG00000328	Tax type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The monetary amount used for calculating the tax amount.

BDT00000559	Taxable monetary amount content	Usage:	The taxable monetary amount is used for calculating the tax amount for a specific tax type, tax category and tax rate.
		GDD name:	dutyFeeTaxBasisAmount
		GDD comment:	The monetary amount on which the calculation of the charged amount is based.
		Definition:	The monetary amount used for calculating the tax amount.
BDTG00000590	Currency code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000590	Currency code	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
BDT00000589	Currency code content	Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000366	Taxable monetary amount in accounting currency	Definition:	The taxable monetary amount expressed in the accounting currency.
		Usage:	The taxable monetary amount in accounting currency is used when the taxable monetary amount is expressed in another currency than the currency used for the accounting system. The taxable monetary amount in accounting currency is normally important only for the issuer of the business transaction.
		GDD name:	dutyFeeTaxBasisAmountInAccountingCurrency
		GDD comment:	The monetary amount on which the calculation of the charged amount is based, expressed in the accounting currency.
BDT00000560	Taxable monetary amount in accounting currency content	Definition:	The taxable monetary amount expressed in the accounting currency.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000589	Currency code content	GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .

BDTG00000422	Total line item net monetary amount	Definition:	The total invoiced monetary amount of the trade item including any allowances or charges and excluding any taxes applicable to the sales transaction.
		Remark:	Total line item net monetary amount equals the invoiced quantity multiplied by the price for the trade item plus any specified charges and minus any specified allowances. The line item net monetary amount excludes any tax applicable to the sales transaction such as sales tax, goods and services tax (GST) and value added tax (VAT), but may include any other applicable taxes such as excise tax and environmental tax.
		GDD name:	amountInclusiveAllowancesCharges

BDT00000598	Total line item net monetary amount content	GDD definition:	The sum of the line item amount. Including Invoice line charges and allowances. The line amount = quantity * Price + Charges – Allowances.
		Definition:	The total invoiced monetary amount of the trade item including any allowances or charges and excluding any taxes applicable to the sales transaction.
		Remark:	Possible calculation options: 1. If the price type "BDTG00000421 Trade item net price" is used then the monetary amount calculation is: "BDTG00000421 Trade item net price" multiplied by "BDT00000417 Invoiced quantity content". This kind of calculation can also be called net calculation. "BDTG00000421 Trade item net price" is including allowance and/or charge monetary amounts and excluding taxes applicable to the sales transaction for the invoiced trade item. The details of allowances and/or charges may be provided by using separate business data terms. 2. If the price type "BDTG00000420 Trade item gross price" is used then the monetary amount calculation is: "BDTG00000420 Trade item gross price" multiplied by "BDT00000417 Invoiced quantity content" (equal to "BDT00000596 Total line item gross monetary amount content") plus the summation of "BDT00000619 Charge monetary amount content" minus the summation of "BDT00000528 Allowance monetary amount content".

		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
BDT00000003	Additional trade item classification scheme version	GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
BDT00000022	Code description	GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The description of a code value expressed as text.
BDT00000028	Code list version	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDTG00000215	Global Product Classification attributes	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the

BDT00000067	GS1 global product classification GPC attribute type code	GDD name:	Order instead.) gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
BDT00000068	GS1 global product classification GPC attribute value code	Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
BDT00000064	Global product classification GPC attribute type name	GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
BDT00000069	GS1 global product classification GPC attribute value name	Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
BDTG00000174	Trade item colour information	Example:	3001082
		GDD name:	gpcAttributeValueCode
BDTG00000172	Colour code	GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
		Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
BDT00000736	Colour code content	Example:	Level of Fat Claim
		GDD name:	gpcAttributeTypeName
BDT00000029	Colour code system code	GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
		Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
BDTG00000172	Colour code	Example:	FULL FAT
		GDD name:	gpcAttributeValueName
BDT00000736	Colour code content	GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
		Definition:	The information specifying the colour of a trade item.
BDT00000029	Colour code system code	GDD name:	colour
		GDD comment:	Information specifying the colour of the trade item.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	colourCode
BDT00000029	Colour code system code	GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
		Definition:	The code specifying the colour of an object or a product according to a colour system.
BDT00000029	Colour code system code	GDD name:	N/A
		GDD comment:	N/A
BDT00000029	Colour code system code	Definition:	The code specifying the colour coding system.
		Example:	10
BDT00000029	Colour code system code	Used code list:	ColourCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
BDT00000029	Colour code system code	GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.

		Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
BDT00000028	Code list version	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000028		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

		GDD definition:	Identification of the applied version of the code list.
BDTG00000316	Trade item size information	Definition: GDD name: GDD definition:	The information specifying the size of a trade item. size The physical dimensions or proportions of the transactional trade item depicted as a code or a description.
BDTG00000315	Size description	Definition: GDD name: GDD definition:	The description of a size expressed as text. descriptiveSize A description of the size of an object.
BDT00000679	Size description content	Definition: GDD name: GDD definition:	The description of a size expressed as text. N/A N/A
BDTG00000523	Language code	Definition: GDD name: GDD comment:	The code specifying the language. N/A N/A
BDT00000524	Language code content	Definition: Example: Used code list: GDD name: GDD definition: GDD comment:	The code specifying the language. en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org . languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000313	Size code	Definition: GDD name: GDD comment:	The code specifying the size of an object or a product according to a size system. sizeCode Code specifying the size of an object and the size coding system being applied, for example L (buyer assigned).
BDT00000680	Size code content	Definition: GDD name: GDD definition:	The code specifying the size of an object or a product according to a size system. N/A N/A
BDTG00000314	Size code list code	Definition: GDD name: GDD definition: GDD comment:	The code specifying the system of size codes. sizeCodeListCode Code specifying a size code list. Allowed code values are specified in GS1 Code List SizeCodeListCode. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000124	Size code list description	GDD comment: Definition: Example: GDD name: GDD definition:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:SizeCodeListCode The description of the size code system expressed as text. National Retail Federation – Standard Colour & Size Codes sizeCodeListDescription A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000345	Trade item waste information	Definition:	The information specifying details of the waste generated by the trade item.
		GDD name:	tradeItemWaste

BDT00000138	Waste identification	GDD definition:	Provides details of waste generated by the trade item.
		Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
		Example:	04098765000119
		GDD name:	wasteIdentification
BDTG00000359	Waste type code	GDD definition:	The number identifying the type of waste.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
		Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
BDT00000702	Waste type code content	GDD comment:	Provides code and description of waste type according to required classification scheme.
		Definition:	The code specifying the type of waste.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		GDD comment:	
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		GDD comment:	
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		GDD comment:	
BDT00000025	Code list agency name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
		GDD comment:	
BDT00000026	Code list name	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
		GDD comment:	
BDT00000027	Code list URL	Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
BDT00000028	Code list version	GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000346	Trade item weight information	Definition:	The information specifying the weight of a trade item.
		GDD name:	transactionalItemWeight
		GDD comment:	Weight is a measurement of the gravitational force acting on a transactional object.
		GDD definition:	
BDT00000728	Trade item weight content	Definition:	The weight of the trade item.
		GDD name:	
		GDD definition:	
		GDD comment:	

BDTG00000608	Measurement unit code	GDD name:	measurementValue
		GDD definition:	Value of the attribute measured.
BDTG00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000607	Measurement unit code content	GDD comment:	N/A
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
BDTG00000607	Measurement unit code content	GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
BDTG00000607	Measurement unit code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1

BDTG00000607	Measurement unit code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000607	Measurement unit code content	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000607	Measurement unit code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
BDTG00000607	Measurement unit code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
		GDD name:	measurementType
BDTG00000607	Measurement unit code content	GDD comment:	Code specifying the type of measurement, for example "Gross Weight".
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000607	Measurement unit code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
		GDD definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
BDTG00000607	Measurement unit code content	Used code list:	MeasurementTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDTG00000607	Measurement unit code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000607	Measurement unit code content	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000607	Measurement unit code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the conditions for the transfer of ownership of the invoiced trade item.
BDTG00000607	Measurement unit code content	GDD name:	ownershipPriorToPayment
		GDD definition:	Specifies who owns the goods before the invoice is paid and when the transfer of ownership can

		GDD comment:	take place.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:OwnershipTransferConditionCode
BDT00000717	Transfer of ownership condition code content	Definition:	The code specifying the conditions for the transfer of ownership of the invoiced trade item.
		Used code list:	OwnershipTransferConditionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:OwnershipTransferConditionCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000348	Transport cargo type code information	Definition:	The code specifying the type of transport cargo.
		GDD name:	commodityTypeCode
		GDD comment:	Specifies the type of commodity for transport purposes, according to the user-selected coding scheme.
BDT00000568	Transport cargo type code content	Definition:	The code specifying the type of transport cargo.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.

		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034	County code	GDD definition: Definition: GDD name: GDD definition:	Identifier for a city, expressed as a short code rather than the full name. The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo:

BDT00000129	Street address three	GDD definition:	The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDTG00000179	Country code	GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214	Geographical coordinates information	GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000085	Latitude	Example: GDD name:	23°26'12.2" S latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the

BDTG00000158	Business contact information	Definition:	prime meridian and expressed either in degrees or in time
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDTG00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode

BDT00000588	Tax registration type code content	GDD definition:	Specifies type of tax registration number assigned by national fiscal authorities. Allowed values come from DutyFeeTaxRegistrationTypeCode list.
		Definition:	The code specifying the type of tax registration number assigned by a national authority.
		Used code list:	DutyFeeTaxRegistrationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DutyFeeTaxRegistrationTypeCode&release=1
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000375	Customs duty registration information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a party registered for customs duty.
BDT00000370	Customs authority name	GDD name:	dutyFeeTaxRegistration
		GDD definition:	The registration details of a party related to a particular duty, tax or fee.
		Definition:	The name of the authority administering the collection of duties, taxes and fees at a country border expressed as text.
BDTG00000621	Customs registration identification information	GDD name:	dutyFeeTaxAgencyName
		GDD definition:	Agency responsible for the collection of this duty, fee or tax.
		Definition:	The information specifying details of the identity assigned to a party registered for customs duty according to a national customs register.
BDT00000622	Customs registration identification content	GDD name:	dutyFeeTaxRegistrationID
		GDD comment:	Identifier of the party for this particular duty, fee or tax.
		Definition:	The identity assigned to a party registered for customs duty according to a national customs register.
BDTG00000587	Identification scheme information	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
BDT00000074	Identification scheme name	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The name of the identification scheme.
BDTG00000073	Identification scheme agency name	GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
BDTG00000586	Identification scheme responsible agency code	GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.

GS1 SDD; 1.0; Published

BDT00000710	Currency of party code content	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000246	Official address	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The registered legal address of the organisation.
BDT00000034	County code	GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
		Definition:	The code indicating a geographical region in a country.
BDT00000020	City name	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000035	Cross street	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000113	Post office box number	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000114	Postal code	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000117	Province identity	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
BDT00000127	State	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California

Business data term groups

GS1 SDD; 1.0; Published

BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDTG00000179	Country code	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000774	Country code content	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000028	Code list version	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000179	Country code	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000774	Country code content	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000028	Code list version	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000774	Country code content	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.

BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDTG00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000225	Issued capital	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000225	Issued capital	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
BDTG00000655	Issued capital content	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000589	Currency code content	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD definition:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000231	Legal structure description	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the legal structure expressed as text.
BDTG00000659	Legal structure description content	GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.

BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Registered legal information	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000087	Legal registration number	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDT00000086	Legal registration additional information	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDT00000658	Legal registration type code content	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDT00000028	Code list version	GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000209	Financial institution and financial account information	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.
		Used code list:	LegalRegistrationCode
BDT00000061	Financial institution name	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000209	Financial institution and financial account information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDTG00000209	Financial institution and financial account information	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000060	Financial institution division name	GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
BDTG00000207	Financial account information	GDD definition:	The name of a division or location of the account holder's financial institution.
		Definition:	The information specifying details of a financial account.
BDT00000058	Financial account name	GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
BDT00000059	Financial account number	GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDTG00000208	Financial account number type code	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
BDTG00000208	Financial account number type code	GDD definition:	Text specifying the number of the financial account.
		Definition:	The code specifying the type of a financial account number.
BDTG00000208	Financial account number type code	Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDTG00000208	Financial account number type code	GDD name:	financialAccountNumberTypeCode
		GDD definition:	Identifies the type of financial account number.
BDTG00000208	Financial account number type code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDT00000645	Financial account number type code content	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode

		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000128	Street address one	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.

BDT00000130	Street address two	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000179	Country code	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000774	Country code content	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000028	Code list version	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
BDT00000028	Code list version	Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT000000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000356	Ultimate customer delivery information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000356	Ultimate customer delivery information	Definition:	The information specifying delivery details of the party that is the ultimate customer of ordered products or services.
BDTG00000762	Delivery method code	GDD name:	endCustomerRelatedDetails
		GDD comment:	Specifies detailed information related to ultimate customer, e.g. identification, delivery method, etc.
		Definition:	The code specifying the method of delivery.
		GDD name:	deliveryMethod
BDTG00000043	Delivery method code content	GDD definition:	Specifies method of delivery.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Definition:	The code specifying the method of delivery.
BDTG00000043	Delivery method code content	Used code list:	DeliveryMethodCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Remark:	Code specifying whether the goods should be delivered to the customer, or if the customer will pick up the delivery.
		GDD name:	deliveryMethod
BDTG00000028	Code list version	GDD definition:	Specifies method of delivery.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Definition:	The version number of the code list.
BDTG00000357	Ultimate customer party information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the ultimate customer.
		Usage:	to be discussed later: Used if the ultimate receiver of the goods is different from Ultimate consignee.
BDTG00000357	Ultimate customer party information		To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	ultimateCustomer

		GDD comment:	Allows to specify the final customer that may be different from Ultimate Consignee. E.g. in B2C scenarios, Ultimate Customer may pick up the shipment that had been delivered to the Ultimate Consignee.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000035	Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000113	Post office box number	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000114	Postal code	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000127	State	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000128	Street address one	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street adress line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo

			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three		Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDTG00000179			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code		Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
BDT00000774	Country code content		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
			Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028			GDD name:	N/A
			GDD definition:	N/A
BDT00000028	Code list version		Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information		Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
BDT00000089	Longitude		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
			Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"
			GDD name:	longitude

BDTG00000158	Business contact information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDTG00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDTG00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDTG00000083	Job title	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
BDTG00000571	Contact type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
BDTG00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
BDTG00000159	Business contact responsibility description	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000580	Business contact responsibility description content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDTG00000523	Language code	GDD comment:	Text further specifying the area of responsibility of the trade contact.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
BDTG00000524	Language code content	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is

BDT00000028	Code list version	GDD name:	available at www.iso.org .
		GDD definition:	languageCode
BDTG00000176	Communication information	GDD comment:	A code representing the language used in the description.
		Definition:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000175	Communication channel code	GDD name:	The version number of the code list.
		GDD definition:	codeListVersion
BDTG00000175	Communication channel code	GDD comment:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
BDTG00000175	Communication channel code	GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000033	Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
BDTG00000145	After hours communication information	GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000175	Communication channel code	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000175	Communication channel code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode

BDT00000032	Communication channel identification	Definition:	CommunicationChannelCode
		GDD name:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
BDT00000033	Communication channel name	GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG00000326	Tax registration information	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDT00000369	Tax authority name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of a party registered for tax.
BDTG00000585	Tax registration identification information	GDD name:	dutyFeeTaxRegistration
		GDD definition:	The registration details of a party related to a particular duty, tax or fee.
BDT00000584	Tax registration identification content	Definition:	The name of the authority administrating the collection of taxes expressed as text.
		Remark:	There may be examples when a tax authority charges customs duties and other fees.
BDTG00000587	Identification scheme information	GDD name:	dutyFeeTaxAgencyName
		GDD definition:	Agency responsible for the collection of this duty, fee or tax.
BDT00000074	Identification scheme name	Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
		GDD name:	dutyFeeTaxRegistrationID
BDT00000073	Identification scheme agency name	GDD comment:	Identifier of the party for this particular duty, fee or tax.
		Definition:	The identity assigned to a party registered for tax according to a national tax register.
BDTG00000586	Identification scheme responsible agency code	GDD name:	N/A
		GDD definition:	N/A
BDT00000583	Identification scheme responsible agency code content	Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.

GS1 SDD; 1.0; Published

BDT00000710	Currency of party code content	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000246	Official address	GDD definition:	Identification of the applied version of the code list.
		Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
BDT00000034	County code	GDD definition:	The address where the organisation is officially based.
		Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDT00000020	City name	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000035	Cross street	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
BDT00000113	Post office box number	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California

BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDTG00000179	Country code	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000774	Country code content	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000028	Code list version	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000074	Country code content	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDTG00000179	Country code	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000774	Country code content	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000179	Country code	Definition:	The version number of the code list.

BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDTG00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000225	Issued capital	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000225	Issued capital content	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
BDTG00000655	Currency code	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code content	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000589	Code list version	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD definition:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000231	Legal structure description	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000659	Legal structure description content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The description of the legal structure expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.

BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Registered legal information	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000288	Registered legal information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDT00000087	Legal registration number	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
BDT00000086	Legal registration additional information	GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDT00000658	Legal registration type code content	GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000658	Legal registration type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.
		Used code list:	LegalRegistrationCode
BDT00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000209	Financial institution and financial account information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000061	Financial institution name	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDT00000061	Financial institution name	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionInformation

Business data term groups

GS1 SDD; 1.0; Published

BDT00000060	Financial institution division name	GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
BDT00000058	Financial account name	GDD definition:	The name of a division or location of the account holder's financial institution.
		Definition:	The information specifying details of a financial account.
BDT00000059	Financial account number	GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDTG00000208	Financial account number type code	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
BDT000000645	Financial account number type code content	GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDT00000028	Code list version	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
BDTG00000210	Financial institution routing number information	GDD definition:	Text specifying the number of the financial account.
		Definition:	The code specifying the type of a financial account number.
BDT00000062	Financial routing number	Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	financialAccountNumberTypeCode

		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000114	Postal code	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000117	Province Identity	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
BDT00000127	State	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000128	Street address one	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326

BDT00000130	Street address two	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000179	Country code	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
			For example, the name of the street and the number in the street or the name of a building.
BDT00000774	Country code content	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000214	Geographical coordinates information	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000028	Code list version	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT000000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDT00000089	Longitude	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000357	Ultimate customer party information	Definition:	The information specifying the ultimate customer.
		Usage:	to be discussed later: Used if the ultimate receiver of the goods is different from Ultimate consignee.
			To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	ultimateCustomer
		GDD comment:	Allows to specify the final customer that may be different from Ultimate Consignee. E.g. in B2C scenarios, Ultimate Customer may pick up the shipment that had been delivered to the Ultimate Consignee.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.

		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.

		GDD name:	codeListVersion
BDT00000659	Legal structure description content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523	Language code	GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000524	Language code content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
BDTG00000288	Code list version	Definition:	The code specifying the language.
		Example:	en
BDT00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Registered legal information	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000087	Legal registration number	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000086	Legal registration additional information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDTG00000230	Legal registration type code	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000658	Legal registration type code content	Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
BDTG00000230	Legal registration type code	GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDT00000658	Legal registration type code content	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
BDTG00000230	Legal registration type code	Definition:	The code specifying the type of legal registration.
		GDD name:	legalRegistrationType
BDT00000658	Legal registration type code content	GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000230	Legal registration type code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		Definition:	The code specifying the type of legal registration.

		Used code list:	LegalRegistrationCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.
		GDD name:	financialInstitutionInformation
		GDD comment:	Information on the financial institution(s) where the party holds an account.
BDT00000061	Financial institution name	Definition:	The name of a financial institution expressed as text.
		GDD name:	financialInstitutionName
		GDD definition:	The name of the account holder's financial institution.
BDT00000060	Financial institution division name	Definition:	The name of a division or branch within a financial institution expressed as text.
		GDD name:	financialInstitutionBranchName
		GDD definition:	The name of a division or location of the account holder's financial institution.
BDTG00000207	Financial account information	Definition:	The information specifying details of a financial account.
		GDD name:	financialAccount
		GDD comment:	Information identifying a client's financial account with a financial institution.
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.
		Example:	John Doe
		GDD name:	financialAccountName
		GDD definition:	Text specifying the name of the financial account.
BDT00000059	Financial account number	Definition:	The number of a financial account expressed as text.
		GDD name:	financialAccountNumber
		GDD definition:	Text specifying the number of the financial account.
BDTG00000208	Financial account number type code	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		GDD name:	financialAccountNumberTypeCode
		GDD definition:	Identifies the type of financial account number.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
BDT00000645	Financial account number type code content	Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode

		GDD name:	FinancialAccountNumberTypeCode
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000210	Financial institution routing number information	Definition:	The information specifying details on a routing number of a financial institution.
		GDD name:	financialRoutingNumber
		GDD comment:	Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT,ABA,CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A

Business data term groups

BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
BDT00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000144	Address information	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDTG00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90

BDT00000117	Province identity	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000130	Street address two	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000129	Street address three	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDTG00000179	Country code	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDT00000129	Street address three	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
		GDD definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000129	Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000129	Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The code specifying a country.
BDTG00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

Business data term groups

GS1 SDD; 1.0; Published

BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000214	Geographical coordinates information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000085	Latitude	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000089	Longitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000358	United Nations location code, UN/LOCODE	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000358	United Nations location code, UN/LOCODE	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
BDTG00000358	United Nations location code, UN/LOCODE	Used code list:	UN/LOCODE Code List
		GDD name:	unLocationCode
BDTG00000358	United Nations location code, UN/LOCODE	GDD definition:	UN/LOCODE is a geographic coding scheme maintained by UN/ECE for locations used in trade and transport with functions such as seaports, rail and road terminals, airports, post offices and border crossing points.
		GDD comment:	Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000690	United Nations location code, UN/LOCODE content	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
BDT00000690	United Nations location code, UN/LOCODE content	Link to code list:	https://www.unece.org/cefact/locode/service/location.html
		GDD name:	N/A
BDT00000690	United Nations location code, UN/LOCODE content	GDD definition:	N/A

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000925	Variance quantity	GDD definition:	Identification of the applied version of the code list.
		Definition:	The quantitative difference between what was ordered and what is despatched.
BDT00000926	Variance quantity content	GDD name:	The quantitative difference between what was ordered and what is despatched.
		GDD comment:	The quantity which has been requested.
BDTG00000608	Measurement unit code	Definition:	The value of the difference between what was ordered and what is despatched.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000924	Variance reason type code	Definition:	The code specifying the reason for the change in the despatched quantity.
		GDD name:	varianceReasonCode
BDT00000923	Variance reason type code content	GDD definition:	Code specifying the reason for the change in the despatched quantity.
		Definition:	The code specifying the reason of the variance in the despatched quantity.
		Example:	ITEM_NOT_ORDERED
		Used code list:	VarianceReasonCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:VarianceReasonCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000359	Waste type code information	Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
BDT00000702	Waste type code content	GDD comment:	Provides code and description of waste type according to required classification scheme.
		Definition:	The code specifying the type of waste.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
BDT00000023	Code list agency code	GDD definition:	A description for the code value provided.
		Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
BDT00000025	Code list agency name	GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		Definition:	The name of the agency responsible for a code list.
BDT00000026	Code list name	GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000027	Code list URL	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName
BDT00000028	Code list version	GDD definition:	The name of the code list which provides the code value.
		Definition:	The character string that identifies the location of the code list in a network.
BDTG00000360	Width measurement	Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
BDTG00000608	Measurement unit code	GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDTG00000608	Measurement unit code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000608	Measurement unit code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The horizontal dimension from one side of the item to the other side.
BDTG00000608	Measurement unit code	GDD name:	width
		GDD comment:	The measurement of the extent of something from side to side. Width is the measurement from left to right.
BDTG00000608	Measurement unit code	Definition:	The horizontal dimension from one side of the item to the other side.
		GDD name:	width
BDTG00000608	Measurement unit code	GDD definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000608	Measurement unit code	GDD comment:	N/A
		GDD name:	measurementUnitCode
BDTG00000608	Measurement unit code	GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1.
