BDTG00000139	Accepted over allocation	Definition: GDD name: GDD definition:	The accepted additional quantity or percentage of the originally ordered quantity of a trade item. acceptableOverAllocation Quantity or percentage of items that can be rounded up (over allocated) for practical purpose, e.g. customer ordered 7 items, but receives the package of 8. Acceptable over allocation can be expressed as quantity or percentage of the originally ordered quantity.
BDT00000103	Over allocation percentage	Definition: Example: GDD name:	The percentage of the original ordered quantity for the trade item that can be added to the order. 7 overAllocationPercentage
BDTG00000263	Over allocation quantity	Definition: GDD name: GDD comment:	The quantity that can be added to the ordered quantity of a trade item. overAllocationQuantity Acceptable quantity that can be over allocated for the given order.
BDT00000415	Over allocation quantity content	Definition:	The quantity of the over allocation.
BDTG00000608	Measurement unit code	Definition: GDD name: GDD comment: GDD name: GDD definition: GDD comment:	The code specifying the unambiguous representation of a unit of measure. N/A N/A measurementUnitCode Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1. UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000884	Account holder identification information	Definition: Remark: GDD name: GDD definition:	The information specifying the identification of a physical person or a legal entity that is the account holder. If used for cash handling process, the account of the customer will not be credited if the suspect bank note is detected at the bank branch. customer Indicates a physical person or a legal entity that is the account holder. If used for cash handling process, the account of the customer will not be credited if the suspect bank note is detected at the bank branch.
BDT00000063	Global location number GLN	Definition: Remark: GDD name: GDD definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition: Usage: GDD name: GDD comment:	The information specifying the additional identification details of a party. The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN. additionalPartyIdentification A party identifier that is in addition to the GLN.

BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
BDTG00000579	Additional party identification type code	GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
BDTG00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG000000462	Actual delivery date time	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG000000462	Actual delivery date time	Definition:	The date and optional time when the goods were handed over to the goods recipient.
		GDD name:	actualDeliveryDate
BDTG000000462	Actual delivery date time	GDD definition:	The date when the goods were actually delivered to the Receiver.
		Definition:	The day of a year as a calendar date.
BDT00000040	Date	Example:	2020-06-15
		GDD name:	date
BDT00000133	Time	GDD definition:	The specification of a day as calendar date.
		Definition:	The indication of a point in time.
BDT00000133	Time	Example:	08:01:15
		GDD name:	time
BDTG00000133	Time	GDD definition:	The specification of a point in time during the day.
		Definition:	The actual quantity of variable measure goods (e.g. meat, fish, vegetable).
BDTG00000874	Actual processed quantity	Remark:	This quantity is not known until it is processed, at which point it is measured.
		GDD name:	actualProcessedQuantity
BDTG00000874	Actual processed quantity	GDD definition:	The actual quantity of variable measure goods (e.g. meat, fish, vegetable). This quantity is not known until it is processed, at which point it is measured.
		Definition:	The effective quantity of a variable measurement trade item, measured after being processed.
BDT00000875	Actual processed quantity content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000608	Measurement unit code	GDD comment:	N/A
		GDD name:	measurementUnitCode
BDTG00000608	Measurement unit code	GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values

			for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000495	Additional consignment identification information	Definition:	The information specifying the additional identification details of a group of logistic units.
		GDD name:	additionalConsignmentIdentification
		GDD comment:	Additional identification for a consignment.
BDTG00000004	Additional consignment identification content	Definition:	The additional identity of a consignment.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000494	Additional consignment identification type code	Definition:	The code specifying the type of additional identifier for a group of logistic units.
		Example:	CARRIER_ASSIGNED
		Used code list:	AdditionalConsignmentIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		GDD name:	additionalConsignmentIdentificationTypeCode
		GDD definition:	Code specifying the type of additional consignment identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
BDTG00000487	Additional consignment identification type code content	Definition:	The additional consignment identification type.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000494	Additional consignment identification type code	Definition:	The code specifying the type of additional identifier for a group of logistic units.
		Example:	CARRIER_ASSIGNED
		Used code list:	AdditionalConsignmentIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		GDD name:	additionalConsignmentIdentificationTypeCode
		GDD definition:	Code specifying the type of additional consignment identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode

Business data term groups

GS1 SDD; 1.0; Published

BDT00000487	Additional consignment identification type code content	Definition:	The additional consignment identification type.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name: GDD comment:	additionalFinancialInformation A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name: GDD definition:	N/A N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name: GDD comment:	N/A N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name: GDD definition: GDD comment:	languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000865	Additional individual asset identification information	Definition:	The information specifying the additional identification details of an individual asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnable asset identifier GIAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global individual asset identifier GIAI.
		GDD name: GDD definition:	additionalIndividualAssetIdentification Identifier of the asset, specified in addition to the GIAI.
BDT00000862	Additional individual asset identification content	Definition:	The additional identity of an individual asset.
		Example:	XYZ123
		GDD name: GDD definition:	N/A N/A
BDTG00000864	Additional individual asset identification type code	Definition:	The additional individual asset identification type.

BDT00000863	Additional individual asset identification type code content	GDD name:	additionalIndividualAssetIdentificationTypeCode
		GDD definition:	Code specifying an additional individual asset identification type.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalIndividualAssetIdentificationTypeCode
BDT00000028	Code list version	Definition:	The code specifying the type of additional identifier for an individual asset.
		Example:	INDUSTRY_ASSIGNED
		Used code list:	AdditionalIndividualAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalIndividualAssetIdentificationTypeCode
BDTG00000864	Additional individual asset identification type code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional individual asset identification type.
		GDD name:	additionalIndividualAssetIdentificationTypeCode
		GDD definition:	Code specifying an additional individual asset identification type.
BDT00000863	Additional individual asset identification type code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalIndividualAssetIdentificationTypeCode
		Definition:	The code specifying the type of additional identifier for an individual asset.
		Example:	INDUSTRY_ASSIGNED
BDT00000028	Code list version	Used code list:	AdditionalIndividualAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalIndividualAssetIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000858	Additional logistic unit identification information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the additional identification details of a logistic unit.
		GDD name:	additionalLogisticUnitIdentification
		GDD comment:	Additional (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000855	Additional logistic unit identification content	Definition:	The additional identity of a logistic unit
		Example: GDD name: GDD definition:	ABD3571/98-7 N/A N/A
BDTG00000857	Additional logistic unit identification type code	Definition:	The code specifying the type of provided additional logistic unit identification.
		GDD name: GDD definition:	additionalLogisticUnitIdentificationTypeCode Code specifying the type of additional logistic unit identification being provided. (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000856	Additional logistic unit identification type code content	Definition:	The code of the additional logistic unit identification type.
		Example: Used code list: Link to code list: GDD name: GDD definition:	SHIPPER_ASSIGNED AdditionalLogisticUnitIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalLogisticUnitIdentificationTypeCode N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000857	Additional logistic unit identification type code	Definition:	The code specifying the type of provided additional logistic unit identification.
		GDD name: GDD definition:	additionalLogisticUnitIdentificationTypeCode Code specifying the type of additional logistic unit identification being provided. (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000856	Additional logistic unit identification type code content	Definition:	The code of the additional logistic unit identification type.
		Example: Used code list: Link to code list: GDD name: GDD definition:	SHIPPER_ASSIGNED AdditionalLogisticUnitIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalLogisticUnitIdentificationTypeCode N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of

BDT00000578	Additional party identification content	GDD name:	the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD comment:	additionalPartyIdentification
BDTG00000579	Additional party identification type code	Definition:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDT00000570	Additional party identification type code content	GDD name:	N/A
		GDD definition:	N/A
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		Definition:	The version number of the code list.
BDTG00000579	Additional party identification type code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		Definition:	The version number of the code list.
BDTG00000274	Additional physical location identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000274	Additional physical location identification	Definition:	The additional identity of a physical location.
		Definition:	The additional identity of a physical location.
BDTG00000274	Additional physical location identification	Usage:	The identity is specified by another identification system than the GS1 Global Location Number, GLN. Only used if no GS1 Global Location Number, GLN, is available for the physical location.
		Usage:	The identity is specified by another identification system than the GS1 Global Location Number, GLN. Only used if no GS1 Global Location Number, GLN, is available for the physical location.
BDTG00000274	Additional physical location identification	GDD name:	additionalLocationIdentification
		GDD comment:	Identification of a location by use of a code other than the Global Location Number.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000627	Physical location identification content	Definition:	The value of the identity of a physical location.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000587	Identification scheme information	Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000074	Identification scheme name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000304	Additional returnable asset identification information	Definition:	The information specifying the additional identification details of a returnable asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnable asset identifier GRAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global returnable asset identifier GRAI.
		GDD name:	additionalReturnableAssetIdentification
		GDD definition:	The additional identification Key used to identify returnable assets.
BDT00000743	Additional returnable asset identification content	Definition:	The additional identity of a returnable asset.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000363	Additional returnable asset identification type code	Definition:	The code specifying the type of additional identifier for a returnable asset.

		Example:	OWNER_ASSIGNED
		Used code list:	AdditionalReturnableAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode

		GDD name:	additionalLabelText
		GDD definition:	Provides text information that should be printed on the item label.
BDTG00000520	Additional trade item label text content	Definition:	The additional text to be printed on the trade item label.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address

BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000117	Province identity	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
BDT00000128	Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.

BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S

Business data term groups

GS1 SDD; 1.0; Published

BDTG0000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000145	After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG0000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG0000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000146	Allowance basis monetary amount	Definition:	The basis monetary amount on which the allowance is calculated.
		GDD name:	baseAmount
		GDD comment:	The amount on which the calculation of the allowance or charge is based.
BDTG00000526	Allowance basis monetary amount content	Definition:	The basis monetary amount on which the allowance is calculated.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.

Business data term groups

		GDD name:	N/A
BDTG00000147	Allowance description	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000527	Allowance description content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000523	Language code	Definition:	The description of the allowance expressed as text.
		GDD name:	allowanceChargeDescription
BDT00000524	Language code content	GDD comment:	A text explanation of the allowance or charge.
		Definition:	The text describing the allowance.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000148	Allowance effective date type code	Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000530	Allowance effective date type code content	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000148	Allowance effective date type code	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000530	Allowance effective date type code content	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000148	Allowance effective date type code	Definition:	The code specifying the type of circumstance for when a discount should apply.
		Used code list:	EffectiveDateTypeCode
BDT00000530	Allowance effective date type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:EffectiveDateTypeCode
		GDD name:	effectiveDateType
BDTG00000148	Allowance effective date type code	GDD definition:	Code specifying the type of date that effectuates the allowance or charge.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000530	Allowance effective date type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:EffectiveDateTypeCode
		Definition:	The code for specifying the type of circumstance for when a discount should apply.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000148	Allowance effective date type code	Definition:	The version number of the code list.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000149	Allowance information	Definition:	The information specifying details of an allowance.
		GDD name:	allowanceCharge
		GDD definition:	Contains the information related with the allowance charge in the Order.
BDT00000006	Allowance percentage	Definition:	The percentage used when calculating the allowance.
		Example:	25
		GDD name:	allowanceChargePercentage
		GDD definition:	Allowance and charges can be expressed in different ways. By using percentage, they are expressed as a percentage of another amount, e.g. the base amount.
BDT00000012	Bracket criteria	Definition:	The minimum and optionally maximum value of a bracket tier.
		Usage:	Bracket criteria may be expressed in monetary amount or measurement tiers. Pricing for a product or service may be conditional on specified bracket criteria.
		Example:	500-1000 pieces 10-100 EUR
		GDD name:	bracketIdentifier
		GDD definition:	Identification of the conditions that apply to the allowance or charge.
BDT00000014	Calculation sequence number	Definition:	The sequence number used to indicate the order in which the allowance or charge is to be calculated.
		Remark:	Example: Sequence number "1" is considered to be the lowest sequence number of five sequence numbers from 1 to 5.
		GDD name:	sequenceNumber
		GDD definition:	A sequence number for a level within the business document.
		GDD definition:	Used in allowanceCharge: A unique number used to indicate the order in which the allowances or charges are to be calculated.
BDTG00000153	Allowance type code	Definition:	The code specifying the type of allowance.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AllowanceChargeTypeCode
		GDD name:	allowanceChargeType
		GDD comment:	The identification of an allowance charge selected from a predefined list.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AllowanceChargeTypeCode
BDT00000051	Allowance type code content	Definition:	The code specifying the type of allowance.
		Used code list:	AllowanceChargeTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AllowanceChargeTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000367	Tax monetary amount	Definition:	The monetary amount of the tax.
		GDD name:	dutyFeeTaxAmount
		GDD comment:	The monetary amount being charged for this duty, fee or tax.
BDT00000562	Tax monetary amount content	Definition:	The monetary amount of the tax.
		Remark:	Monetary amount calculation: "BDT00000559 Taxable monetary amount content" multiplied by "BDT00000371 Tax rate"
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000154	Alternative delivery terms code	Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
		GDD name:	alternateDeliveryTermsCode
		GDD comment:	Code specifying the delivery terms according to a system other than the Incoterms.
BDT00000535	Alternative delivery terms code content	Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000025	Code list agency name	GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000026	Code list name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
BDT00000027	Code list URL	GDD definition:	A name of the agency which manages the code list for example ISO.
		Definition:	The name of the code list expressed as text.
BDT00000028	Code list version	GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
BDTG00000155	Alternative trade item product classification code information	Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
BDT00000025	Code list agency name	GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
BDT00000026	Code list name	GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
		Definition:	The version number of the code list.
BDT00000027	Code list URL	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000155	Alternative trade item product classification code information	Definition:	The information specifying the details of the alternative trade item product classification code.
		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
BDT00000536	Alternative trade item product classification code content	GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
BDT00000002	Additional trade item classification scheme code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
BDT00000002	Additional trade item classification scheme code	GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.
BDT00000002	Additional trade item classification scheme code	Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode

		GDD name:	additionalTradeItemClassificationCodeListCode
BDT00000002	Additional trade item classification scheme code	GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000002	Additional trade item classification scheme code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:

BDT00000003	Additional trade item classification scheme version	GDD comment:	AdditionalTradeItemClassificationCodeListCode
		Definition:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode. The version number of the classification scheme used for additional trade item classification.
		Example:	9
BDT00000022	Code description	GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The description of a code value expressed as text.
BDT00000028	Code list version	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDTG00000379	Applicable customs duty information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of the applicable customs duty.
BDTG00000777	Duty regime type code	GDD name:	leviedDutyFeeTax
		GDD definition:	The tax applicable to the Order Line Item.
		Definition:	Code specifying a type of duty regime.
BDT00000370	Customs authority name	Used code list:	EDIFACT 9213 code list
		Link to code list:	http://apps.gs1.org/GDD/bms/EANCOM/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:9213DutyRegimeTypeCode&release=2
		Definition:	The name of the authority administrating the collection of duties, taxes and fees at a country border expressed as text.
BDTG00000321	Tax category code	GDD name:	dutyFeeTaxAgencyName
		GDD definition:	Agency responsible for the collection of this duty, fee or tax.
		Definition:	The code specifying the category of a tax.
BDT00000374	Customs duty rate	GDD name:	dutyFeeTaxCategoryCode
		GDD definition:	Code specifying the applicable charge category for this duty, fee or tax. For example low, high, exempt.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000377	Tax point date	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TaxCategoryCode
		Definition:	The rate of the customs duty.
		Usage:	The rate used when calculating the monetary amount of a duty.
BDTG00000365	Tax accounting currency code	GDD name:	dutyFeeTaxPercentage
		GDD definition:	Percentage allowing calculation of the amount being charged.
		Definition:	The date on which the tax applicable for the sales transaction is due or calculated.
BDTG00000365	Tax accounting currency code	GDD name:	dutyFeeTaxPointDate
		GDD definition:	Date at which a tax becomes applicable.
		Definition:	The code specifying the currency used for tax accounting and reporting purposes as accepted or required in the country of the receiver of invoices.
BDTG00000365	Tax accounting currency code	GDD name:	dutyFeeTaxAccountingCurrency
		GDD definition:	The monetary unit used in the calculation of the duty, tax or fee.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org

BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000156	Automated clearing house payment format code	Definition: GDD name: GDD comment: GDD comment:	The code specifying the format for a payment made through an automated clearing house for financial transactions. automatedClearingHousePaymentFormat A code specifying the format used when a payment is made through an automated clearing house. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDTG00000565	Automated clearing house payment format code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PaymentFormatCode
		Definition:	The code specifying the format for a payment made through an automated clearing house for financial transactions.
		Used code list:	PaymentFormatCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PaymentFormatCode
BDTG00000028	Code list version	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000389	Back order information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of requested trade items to be delivered at another date compared to requested delivery date of the order.
		GDD name:	backOrderInformation
		GDD definition:	Contains the information for units that are unable to be shipped at this time. These units will be shipped at a later time.
BDTG00000296	Total requested quantity	Definition:	The total ordered quantity of a trade item.
		GDD name:	requestedQuantity
		GDD comment:	The quantity which has been requested.
		Definition:	The total ordered quantity of a trade item.
BDTG00000566	Total requested quantity content	Example:	100
		GDD name:	itemPriceBaseQuantity
		GDD definition:	The base quantity in which the item price is expressed. Example: Price per 100 units.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000608	Measurement unit code	GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
BDTG00000259	Ordered trade item logistical information	GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
		Definition:	The information specifying various requirements of logistical nature for ordered trade item.
		GDD name:	orderLogisticalInformation
		GDD comment:	Provides identification of the locations of the parties dealing with the goods associated with the order, as well as the dates or date ranges associated with the order and the transportation of the shipment associated with the order.
BDTG00000788	Logistic label customer information	Definition:	The customer defined text to be printed on the logistics label(s) of the logistic unit(s)
		GDD name:	logisticLabelCustomerText
		GDD definition:	The customer defined text on the logistic label(s).
		Definition:	The code specifying the method by which a shipment of ordered trade items may be split.
BDTG00000396	Shipment split method code	Definition:	

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000348	Transport cargo type code	GDD name:	shipmentSplitMethodCode
		GDD definition:	Specifies a method of splitting shipment of ordered goods.
		Definition:	The code specifying the type of transport cargo.
		GDD name:	commodityTypeCode
BDT00000568	Transport cargo type code content	GDD comment:	Specifies the type of commodity for transport purposes, according to the user-selected coding scheme.
		Definition:	The code specifying the type of transport cargo.
BDT00000022	Code description	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The description of a code value expressed as text.
BDT00000023	Code list agency code	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The code specifying the agency responsible for a code list.
BDT00000024	Code list agency code list version	GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		Definition:	The version number of a code list issued by the responsible agency for the code list.
BDT00000025	Code list agency name	GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		Definition:	The name of the agency responsible for a code list.
BDT00000026	Code list name	GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
		Definition:	The name of the code list expressed as text.
BDT00000027	Code list URL	GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
		Definition:	The character string that identifies the location of the code list in a network.
BDT00000028	Code list version	Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDTG00000310	Ship from party information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000063	Global location number GLN	Definition:	The information specifying the location from which goods are shipped.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	shipFrom
		GDD definition:	Identifies the origin location from which goods will be shipped.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.

BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
BDT00000578	Additional party identification content	Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000579	Additional party identification type code	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDTG00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000020	City name	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDTG00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.

BDT00000129	Street address three	Definition:	For example, the name of the street and the number in the street or the name of a building.
		Example:	The third street address line of a structured address.
BDTG00000179	Country code	Remark:	Floor 4
		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.	
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000028	Code list version	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000089	Longitude	GDD name:	N/A
		GDD definition:	N/A
BDTG00000158	Business contact information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000112	Person name	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000158	Business contact information	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000112	Person name	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000158	Business contact information	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDTG00000158	Business contact information	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.

BDTG00000214		Geographical coordinates information	GDD definition: Identification of the applied version of the code list. Definition: The information specifying details on a location using geographical coordinates. GDD name: geographicalCoordinates GDD comment: Geographical coordinates for the address.
BDT00000085		Latitude	Definition: The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. Example: 23°26'12.2" S GDD name: latitude
BDT00000089		Longitude	GDD definition: Angular distance North or South from the earth's equator measured through 90 degrees. Definition: The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. Example: 18°3'59.0616" GDD name: longitude
BDTG00000311		Ship to party information	GDD definition: The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time Definition: The information specifying the location to which goods are shipped. Usage: To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDT00000063		Global location number GLN	GDD name: shipTo GDD definition: Identifies the destination location to which goods will be shipped. Definition: The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. Remark: GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit. GDD name: gln GDD definition: The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577		Additional party identification information	Definition: The information specifying the additional identification details of a party. Usage: The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN. GDD name: additionalPartyIdentification
BDT00000578		Additional party identification content	GDD comment: A party identifier that is in addition to the GLN. Definition: The additional identity of a party.
BDTG00000579		Additional party identification type code	GDD name: N/A GDD definition: N/A Definition: The code specifying the additional identification type of the party. GDD name: additionalPartyIdentificationTypeCode

Business data term groups

GS1 SDD; 1.0; Published

BDT00000570		Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
			Definition:	The code specifying the additional identification type of the party.
			Used code list:	AdditionalPartyIdentificationTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028		Code list version	GDD name:	N/A
			GDD definition:	N/A
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
BDTG00000144		Address information	GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
			GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000020		City name	Definition:	The name of the city, town or village.
			GDD name:	city
			GDD definition:	Text specifying the name of the city.
			Definition:	The code specifying a city.
BDT00000019		City code	Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
			Definition:	The code indicating a geographical region in a country.
BDT00000034		County code	GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
			Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000035		Cross street	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000106		Party name	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000113		Post office box number	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
BDT00000114		Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode

BDT00000117		Province identity	GDD definition: Text specifying the postal code for an address. Definition: The identity of a province according to national codes assigned to provinces. GDD name: provinceCode
BDT00000127		State	GDD definition: Text specifying a province in abbreviated format. Definition: The political unit that a country can be divided into. Example: California GDD name: state
BDT00000128		Street address one	GDD definition: One of the constituent units of a nation having a federal government. Definition: The first street address line of a structured address. Example: Avenue Louise 326 Remark: Can be the name of a street and house number or the name of a building. GDD name: streetAddressOne GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130		Street address two	Definition: The second street address line of a structured address. Example: Blue Tower Remark: Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. GDD name: streetAddressTwo GDD definition: streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. GDD definition: Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition: The third street address line of a structured address. Example: Floor 4 Remark: Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. GDD name: streetAddressThree GDD definition: The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition: The code specifying a country. GDD name: countryCode GDD comment: Code specifying the country for the address. GDD comment: The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition: The code specifying a country. Remark: GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1.

					GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158			Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
				GDD name:	contact
				GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000112			Person name	Definition:	The name of an individual person expressed as text.
				GDD name:	personName
				GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000044			Department name	Definition:	The name of the department.
				GDD name:	departmentName
				GDD definition:	The name of the department that can be contacted to provide additional information.
BDT00000083			Job title	Definition:	The title of a position or the role of a person holding the position.
				GDD name:	jobTitle
				GDD definition:	The job title of the person that can be contacted.
BDTG00000178			Contact type code	Definition:	The code specifying the function or role of a contact person.
				Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
				Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
				GDD name:	contactTypeCode
				GDD comment:	Code specifying the function or role of a contact.
				GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
				GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode

The code list is available at www.iso.org . GDD name: languageCode GDD definition: A code representing the language used in the description. GDD comment: The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028		Code list version	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000184		Currency of party code	Definition: The code specifying the currency of a party. Example: EUR Used code list: ISO 4217 three-letter codes or equivalent representation in specific syntax. GDD name: currencyOfPartyCode GDD comment: Code specifying the currency of an addressed party. GDD definition: The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000710		Currency of party code content	Definition: The code specifying the currency of a party. Example: EUR Used code list: ISO 4217 three-letter codes or equivalent representation in specific syntax. Link to code list: https://www.iso.org/iso-4217-currency-codes.html GDD name: N/A GDD definition: N/A
BDT00000028		Code list version	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000246		Official address	Definition: The registered legal address of the organisation. GDD name: officialAddress GDD definition: The address where the organisation is officially based.
BDT00000034		County code	Definition: The code indicating a geographical region in a country.

					GDD name:	countyCode
					GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020				City name	Definition:	The name of the city, town or village.
					GDD name:	city
					GDD definition:	Text specifying the name of the city.
BDT00000019				City code	Definition:	The code specifying a city.
					Remark:	Should not be misunderstood as a postal code.
					GDD name:	cityCode
					GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035				Cross street	Definition:	The street crossing another street.
					GDD name:	crossStreet
					GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113				Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
					Synonyms:	P.O. box, postal box
					GDD name:	pOBoxNumber
					GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114				Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
					Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
					GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
BDT00000117				Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
					GDD definition:	Text specifying a province in abbreviated format.
BDT00000127				State	Definition:	The political unit that a country can be divided into.
					Example:	California
					GDD name:	state
					GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128				Street address one	Definition:	The first street address line of a structured address.
					Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
					GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130				Street address two	Definition:	The second street address line of a structured address.
					Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"

				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000590			Currency code	Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode
				GDD definition:	Code specifying the currency of the amount.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589			Currency code content	Definition:	The code specifying the currency of a monetary amount.
				Example:	EUR
				Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000231			Legal structure description	Definition:	The description of the legal structure expressed as text.
				GDD name:	legalStructure
				GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659			Legal structure description content	Definition:	The description of the legal structure expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000523			Language code	Definition:	The code specifying the language.
				GDD name:	N/A
				GDD comment:	N/A
BDT00000524			Language code content	Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
				GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000288			Registered legal information	Definition:	The information specifying the registered data on a legal entity in accordance with national law.
				GDD name:	legalRegistration

Business data term groups

GS1 SDD; 1.0; Published

BDT00000087		Legal registration number	GDD definition: The registration details of an organisation in a particular legal register. Definition: The identification number of an organisation according to a legal register. GDD name: legalRegistrationNumber
BDT00000086		Legal registration additional information	GDD definition: Unique identifier of the organization in the legal register. Definition: The additional information related to the legal registration expressed as text. GDD name: legalRegistrationAdditionalInformation
BDTG00000230		Legal registration type code	GDD definition: Additional information related to legal registration, e.g. CEO name. Definition: The code specifying the type of legal registration. GDD name: legalRegistrationType GDD definition: Code specifying the type of legal register. GDD comment: Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary GDD comment: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode

BDT00000019			City code	GDD name:	address
				GDD comment:	Address of the party involved in the business transaction.
				Definition:	The name of the city, town or village.
BDT00000019			City code	GDD name:	city
				GDD definition:	Text specifying the name of the city.
				Definition:	The code specifying a city.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034		County code	Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
			GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
			Definition:	The code indicating a geographical region in a country.
			GDD name:	countyCode
BDT00000035		Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
			Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000106		Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
			GDD name:	name
BDT00000113		Post office box number	GDD definition:	The name of the party expressed in text.
			Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
BDT00000114		Postal code	GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
			Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000117		Province identity	Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
BDT00000127		State	GDD definition:	Text specifying the postal code for an address.
			Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
BDT00000128		Street address one	GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
			Example:	California
BDT00000130		Street address two	GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
BDT00000130		Street address two	Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
BDT00000130		Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
			Definition:	The second street address line of a structured address.
			Example:	Blue Tower
BDT00000130		Street address two	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"

Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130			Street address two	Definition: Example: Remark:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can

				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.

				GDD name:	officialAddress
				GDD definition:	The address where the organisation is officially based.
BDT00000034			County code	Definition:	The code indicating a geographical region in a country.
				GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020			City name	Definition:	The name of the city, town or village.
				GDD name:	city
				GDD definition:	Text specifying the name of the city.
BDT00000019			City code	Definition:	The code specifying a city.
				Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
BDT00000035			Cross street	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
				Definition:	The street crossing another street.
				GDD name:	crossStreet
BDT00000113			Post office box number	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
				Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber

BDT00000114				Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
					Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000117				Province identity	Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127				State	GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
BDT00000128				Street address one	Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
BDT00000130				Street address two	GDD definition:	Text specifying a province in abbreviated format.
					Definition:	The political unit that a country can be divided into.
BDT00000129				Street address three	Example:	California
					GDD name:	state
BDT00000129				Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
					Definition:	The first street address line of a structured address.
BDT00000129				Street address three	Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
BDT00000129				Street address three	GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129				Street address three	GDD definition:	The second street address line of a structured address.
					Definition:	The third street address line of a structured address.
BDT00000129				Street address three	Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129				Street address three	GDD name:	streetAddressTwo
					GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129				Street address three	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
					GDD definition:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129				Street address three	Definition:	The third street address line of a structured address.
					Example:	Floor 4
BDT00000129				Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
					GDD name:	streetAddressThree
BDT00000129				Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
					GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.

				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000246			Official address	Definition:	The registered legal address of the organisation.
				GDD name:	officialAddress
				GDD definition:	The address where the organisation is officially based.
BDT00000034			County code	Definition:	The code indicating a geographical region in a country.
				GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020			City name	Definition:	The name of the city, town or village.
				GDD name:	city
				GDD definition:	Text specifying the name of the city.
BDT00000019			City code	Definition:	The code specifying a city.
				Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
				GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035			Cross street	Definition:	The street crossing another street.
				GDD name:	crossStreet
				GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113			Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114			Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.
BDT00000117			Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
				GDD definition:	Text specifying a province in abbreviated format.
BDT00000127			State	Definition:	The political unit that a country can be divided into.
				Example:	California
				GDD name:	state
				GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128			Street address one	Definition:	The first street address line of a structured address.

					Example: Remark: GDD name: GDD definition:	Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130				Street address two	Definition: Example: Remark: GDD name: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129				Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179				Country code	Definition: GDD name: GDD comment: GDD definition:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774				Country code content	Definition: Remark: GDD name: GDD definition:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1. N/A N/A
BDT00000028				Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.

BDTG00000246		Official address	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDT00000034		County code	Definition: The registered legal address of the organisation. GDD name: officialAddress GDD definition: The address where the organisation is officially based.
			Definition: The code indicating a geographical region in a country.

					GDD name:	countyCode
					GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020				City name	Definition:	The name of the city, town or village.
					GDD name:	city
					GDD definition:	Text specifying the name of the city.
BDT00000019				City code	Definition:	The code specifying a city.
					Remark:	Should not be misunderstood as a postal code.
					GDD name:	cityCode
					GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000035				Cross street	Definition:	The street crossing another street.
					GDD name:	crossStreet
					GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113				Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
					Synonyms:	P.O. box, postal box
					GDD name:	pOBoxNumber
					GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114				Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
					Example:	SE 190 90
					Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
					GDD name:	postalCode
					GDD definition:	Text specifying the postal code for an address.
BDT00000117				Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
					GDD name:	provinceCode
					GDD definition:	Text specifying a province in abbreviated format.
BDT00000127				State	Definition:	The political unit that a country can be divided into.
					Example:	California
					GDD name:	state
					GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128				Street address one	Definition:	The first street address line of a structured address.
					Example:	Avenue Louise 326
					Remark:	Can be the name of a street and house number or the name of a building.
					GDD name:	streetAddressOne
					GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130				Street address two	Definition:	The second street address line of a structured address.
					Example:	Blue Tower
					Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
BDT00000085			Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
				Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089			Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"

Business data term groups

GS1 SDD; 1.0; Published

				GDD name:	longitude
				GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225			Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
				GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A

				Definition:	The text value describing the additional financial institution.
BDTG00000523			Language code	GDD name:	N/A
				GDD definition:	N/A
				Definition:	The code specifying the language.
BDT00000524			Language code content	GDD name:	N/A
				GDD comment:	N/A
				Definition:	The code specifying the language.
BDT00000028			Code list version	Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	languageCode
BDTG00000144			Address information	GDD definition:	A code representing the language used in the description.
				GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
				Definition:	The version number of the code list.
BDT00000020			City name	GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
				Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000019			City code	GDD name:	address
				GDD comment:	Address of the party involved in the business transaction.
				Definition:	The name of the city, town or village.
BDT00000019			City code	GDD name:	city
				GDD definition:	Text specifying the name of the city.
				Definition:	The code specifying a city.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000034		County code	Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
BDT00000035		Cross street	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
			Definition:	The code indicating a geographical region in a country.
BDT00000106		Party name	GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000113		Post office box number	Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000114		Postal code	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
BDT00000117		Province identity	GDD name:	name
			GDD definition:	The name of the party expressed in text.
BDT00000127		State	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
BDT00000128		Street address one	GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000130		Street address two	Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
			Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state
			GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
			Definition:	The second street address line of a structured address.
			Example:	Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129		Street address three	Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"

		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000293	Requested delivery date time information	Definition:	The information specifying when ordered trade items are requested to be delivered or be available for pick up.
		GDD name:	orderLogisticalDateInformation
		GDD comment:	Contains the choices to select various types of dates or date ranges associated to the order.
BDTG00000295	Requested delivery time period	Definition:	The date (and time) of the period during which ordered trade items are requested to be delivered.
		Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
		GDD name:	requestedDeliveryDateRange
		GDD comment:	Provides the earliest and latest date ranges and the optional times on which the goods are requested to be delivered.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
		GDD definition:	Time specifying the start time for the date time range.
BDT00000009	Begin period date	Definition:	The first date of a date period.
		GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000054	End date period	Definition:	The last date of a date period.
		GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
		GDD definition:	Time specifying the end time for the date time range.
BDTG00000298	Requested ship date time period	Definition:	The date (and time) of the period during which ordered trade items are requested to be shipped.
		Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
		GDD name:	requestedShipDateRange
		GDD definition:	Provides the earliest and latest date ranges and the optional times on which the goods are requested to be shipped or despatched.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
		GDD definition:	Time specifying the start time for the date time range.
BDT00000009	Begin period date	Definition:	The first date of a date period.
		GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000054	End date period	Definition:	The last date of a date period.
		GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000294	Requested delivery date time period at ultimate consignee	GDD definition:	Time specifying the end time for the date time range.
		Definition:	The date (and time) of the period during which ordered trade items are requested to be delivered at ultimate consignee.
		Remark:	The indication of a point in time for the start and end of the requested delivery period can be given.
		GDD name:	requestedDeliveryDateRangeAtUltimateConsignee
BDT00000010	Begin time period	GDD definition:	Provides the date and optional time on which the goods are requested to be delivered.
		Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
BDT00000009	Begin period date	GDD definition:	Time specifying the start time for the date time range.
		Definition:	The first date of a date period.

		GDD name:	endDate
BDT00000055	End time period	GDD definition:	Date specifying the last day for the date time range.
		Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
BDTG00000291	Requested delivery date time	GDD definition:	Time specifying the end time for the date time range.
		Definition:	The date and optional time when the ordered trade items are requested to be delivered.
		Remark:	The indication of a point in time during a date can be given for when the delivery of ordered trade items are required.
		GDD name:	requestedDeliveryDateTime
BDT00000040	Date	GDD definition:	Provides the date and optional time on which the goods are requested to be delivered.
		Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
BDT00000133	Time	GDD definition:	The specification of a day as calendar date.
		Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
BDTG00000297	Requested ship date time	GDD definition:	The specification of a point in time during the day.
		Definition:	The date (and time) when the ordered trade items are requested to be despatched.
		Remark:	The indication of a point in time during a date can be given for when the ordered trade items are required to be despatched.
		GDD name:	requestedShipDateTime
BDT00000040	Date	GDD comment:	Provides the date and optional time on which the goods are requested to be shipped or despatched by the supplier.
		Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
BDT00000133	Time	GDD definition:	The specification of a day as calendar date.
		Definition:	The indication of a point in time.
		Example:	08:01:15

BDTG00000290			Requested date time for pick up	GDD name:	time
				GDD definition:	The specification of a point in time during the day.
				Definition:	The date (and time) when the ordered trade items are requested to be available for pick up.
				Remark:	The indication of a point in time during a date can be given for when ordered trade items are requested to be available for pick up.
BDTG00000040			Date	GDD name:	requestedPickUpDateTime
				GDD comment:	Provides the date and optional time on which the goods are requested to be available for pickup at the seller's location.
				Definition:	The day of a year as a calendar date.
				Example:	2020-06-15
BDTG00000133			Time	GDD name:	date
				GDD definition:	The specification of a day as calendar date.
				Definition:	The indication of a point in time.
				Example:	08:01:15
BDTG00000292			Requested delivery date time at ultimate consignee	GDD name:	time
				GDD definition:	The specification of a point in time during the day.
				Definition:	The date (and time) when the ordered trade items are requested to be delivered at ultimate consignee.
				Remark:	The indication of a point in time during a date can be given for when the delivery of ordered trade items are required.
BDTG00000040			Date	GDD name:	requestedDeliveryDateTimeAtUltimateConsignee
				GDD definition:	Provides the date and optional time on which the goods are requested to be delivered to the Ultimate Consignee.
				Definition:	The day of a year as a calendar date.
				Example:	2020-06-15
BDTG00000133			Time	GDD name:	date
				GDD definition:	The specification of a day as calendar date.
				Definition:	The indication of a point in time.

BDT00000113		—	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114		—	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
BDT00000117		—	Province identity	GDD definition:	Text specifying the postal code for an address.
				Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
				GDD definition:	Text specifying a province in abbreviated format.
BDT00000127		—	State	Definition:	The political unit that a country can be divided into.
				Example:	California
				GDD name:	state
				GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128		—	Street address one	Definition:	The first street address line of a structured address.
				Example:	Avenue Louise 326
				Remark:	Can be the name of a street and house number or the name of a building.
				GDD name:	streetAddressOne
BDT00000128		—	Street address one	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
				Definition:	The second street address line of a structured address.
				Example:	Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000130		—	Street address two	GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
					For example, the name of the street and the number in the street or the name of a building.
BDT00000129		—	Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

BDTG00000246			Official address	GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDT00000034			County code	Definition:	The registered legal address of the organisation.
				GDD name:	officialAddress
BDT00000020			City name	GDD definition:	The address where the organisation is officially based.
				Definition:	The code indicating a geographical region in a country.
BDT00000019			City code	GDD name:	countyCode
				GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035			Cross street	Definition:	The name of the city, town or village.
				GDD name:	city
BDT00000113			Post office box number	GDD definition:	Text specifying the name of the city.
				Definition:	The code specifying a city.
BDT00000114			Postal code	Remark:	Should not be misunderstood as a postal code.
				GDD name:	cityCode
BDT00000117			Province identity	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
				Definition:	The street crossing another street.
BDT00000127			State	GDD name:	crossStreet
				GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000128			Street address one	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
				Synonyms:	P.O. box, postal box
				GDD name:	pOBoxNumber
				GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
				Definition:	The code according to the relevant postal system or service to specify a geographical area.
				Example:	SE 190 90
				Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
				GDD name:	postalCode
				GDD definition:	Text specifying the postal code for an address.
				Definition:	The identity of a province according to national codes assigned to provinces.
				GDD name:	provinceCode
				GDD definition:	Text specifying a province in abbreviated format.
				Definition:	The political unit that a country can be divided into.
				Example:	California
				GDD name:	state
				GDD definition:	One of the constituent units of a nation having a federal government.
				Definition:	The first street address line of a structured address.
				Example:	Avenue Louise 326
				Remark:	Can be the name of a street and house number or the name of a building.
				GDD name:	streetAddressOne
				GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a

BDT00000130			Street address two	Definition:	building.
				Example:	The second street address line of a structured address. Blue Tower
				Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressTwo
				GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
				GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129			Street address three	Definition:	The third street address line of a structured address.
				Example:	Floor 4
				Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
				GDD name:	streetAddressThree
				GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179			Country code	Definition:	The code specifying a country.
				GDD name:	countryCode
				GDD comment:	Code specifying the country for the address.
				GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774			Country code content	Definition:	The code specifying a country.
				Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
				GDD name:	N/A
				GDD definition:	N/A
BDT00000028			Code list version	Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000214			Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
				GDD name:	geographicalCoordinates
				GDD comment:	Geographical coordinates for the address.
				Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000085			Latitude		

BDT00000089			Longitude	Example:	23°26'12.2" S
				GDD name:	latitude
				GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
				Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
				Example:	18°3'59.0616"
				GDD name:	longitude
BDTG00000225			Issued capital	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
				Definition:	The monetary amount representing the value of the issued capital of a company.
BDTG00000225			Issued capital	GDD name:	issuedCapital
				GDD definition:	The amount of the issued capital.
BDT00000655			Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
				GDD name:	N/A
BDTG00000590			Currency code	GDD definition:	N/A
				Definition:	The code specifying the currency of a monetary amount.
				GDD name:	currencyCode
				GDD definition:	Code specifying the currency of the amount.
				GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
				GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589			Currency code content	Definition:	The code specifying the currency of a monetary amount.
				Example:	EUR
				Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
				GDD name:	N/A
BDT00000028			Code list version	GDD definition:	N/A
				Definition:	The version number of the code list.
				GDD name:	codeListVersion
				GDD definition:	Identification of the applied version of the code list.
BDTG00000231			Legal structure description	Definition:	The description of the legal structure expressed as text.
				GDD name:	legalStructure
BDT00000659			Legal structure description content	GDD definition:	Description of the type of legal structure of the organisation.
				Definition:	The description of the legal structure expressed as text.
				GDD name:	N/A
				GDD definition:	N/A
BDTG00000523			Language code	Definition:	The code specifying the language.
				GDD name:	N/A
BDT00000524			Language code content	GDD comment:	N/A
				Definition:	The code specifying the language.
				Example:	en
				Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .

		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.

Business data term groups

GS1 SDD; 1.0; Published

		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000114	Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000117	Province identity	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
BDT00000128	Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to

		GDD definition:	locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. 		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		GDD name:	currencyOfPartyCode
		GDD comment:	Code specifying the currency of an addressed party.

BDT00000710	Currency of party code content	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000246	Official address	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000034	County code	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDT00000020	City name	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000019	City code	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000035	Cross street	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000113	Post office box number	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000114	Postal code	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDT00000117	Province identity	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
BDT00000127	State	Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California

Business data term groups

GS1 SDD; 1.0; Published

BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDTG00000179	Country code	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000774	Country code content	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000028	Code list version	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDTG00000179	Country code	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000774	Country code content	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDTG00000179	Country code	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDT00000774	Country code content	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000179	Country code	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000179	Country code	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.

BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDTG00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000225	Issued capital	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000225	Issued capital	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
BDTG00000655	Issued capital content	GDD definition:	The amount of the issued capital.
		Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000589	Currency code content	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD definition:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000231	Legal structure description	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the legal structure expressed as text.
BDTG00000659	Legal structure description content	GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.

BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000288	Registered legal information	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000087	Legal registration number	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
BDT00000086	Legal registration additional information	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDT00000658	Legal registration type code content	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDT00000028	Code list version	GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.

		Definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed as text.
		Definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
BDT00000114	Postal code	Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000127	State	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000128	Street address one	Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.

BDT00000130	Street address two	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000129	Street address three	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000179	Country code	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000774	Country code content	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000028	Code list version	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
BDT00000028	Code list version	Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT000000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000158	Business contact information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
BDT00000112	Person name	GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000044	Department name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000178	Contact type code	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDT00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
BDT00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
BDTG00000159	Business contact responsibility description	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000159	Business contact responsibility description	GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000176	Communication information	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000145	After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.

		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000197	Business document effective date time	Definition:	The date and optional time from when the business document is valid from commercial or legal point of view.
		GDD name:	documentEffectiveDate
		GDD definition:	The date that the document becomes effective from commercial or legal point of view.
BDT00000040	Date	Definition:	The day of a year as a calendar date.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000133	Time	Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
		Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
BDTG00000480	Business document identification information	Definition:	The information specifying the identification details of the business document.
		GDD name:	orderIdentification + orderResponseIdentification + invoiceIdentification + despatchAdviceIdentification
		GDD definition:	The unique identification of the Order.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.

		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000784	Electronic address information	Definition:	The information about the electronic address of a party
BDT00000786	Electronic address identification scheme	Definition:	The identification scheme of of the electronic address
		GDD name:	N/A
		GDD definition:	N/A
BDT00000785	Electronic address identification	Definition:	The identifier of of the electronic address to which a business document should be delivered
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90

		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000522	Additional financial institution description	GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
BDT00000521	Additional financial institution description content	GDD comment:	A description used to provide any additional information about a financial institution.
		Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.

Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example:	The third street address line of a structured address. Floor 4

		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000163	Carrier party information	Definition:	The information specifying details of the party transporting shipments.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	carrier
		GDD definition:	Uniquely identifies the entity that transports the shipment.
BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.

		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode

BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a

BDT00000035	Cross street	Definition:	state. The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the

BDT00000129	Street address three	Definition:	name. For example, the name of the street and the number in the street or the name of a building.
		Example:	The third street address line of a structured address.
BDTG00000179	Country code	Remark:	Floor 4
		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.	
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000028	Code list version	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000214	Geographical coordinates information	GDD comment:	Code specifying the country for the address.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.

The code list is available at www.iso.org . languageCode A code representing the language used in the description. The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition: GDD name:	The version number of the code list. codeListVersion

BDTG00000176	Communication information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
BDTG00000175	Communication channel code	GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		GDD name:	communicationChannelName
BDTG00000145	After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000175	Communication channel code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD comment:	CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		GDD name:	communicationChannelName

BDT00000034	County code	GDD definition: Definition: GDD name: GDD definition:	The address where the organisation is officially based. The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020	City name	Definition: GDD name: GDD definition:	The name of the city, town or village. city Text specifying the name of the city.
BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can

			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:		The third street address line of a structured address.
		Example:		Floor 4
		Remark:		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree	
		GDD definition:		The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:		The code specifying a country.
		GDD name:	countryCode	
		GDD comment:		Code specifying the country for the address.
		GDD comment:		The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:		The code specifying a country.
		Remark:		GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:		The version number of the code list.
		GDD name:	codeListVersion	
		GDD definition:		Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:		The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates	
		GDD comment:		Geographical coordinates for the address.
BDT00000085	Latitude	Definition:		The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:		23°26'12.2" S
		GDD name:	latitude	
		GDD definition:		Angular distance North or South from the earth's equator measured through 90 degrees.

GS1 SDD; 1.0; Published

BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDT00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD definition:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDT00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD definition:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000288	Registered legal information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
		GDD name:	legalRegistration
BDT00000087	Legal registration number	GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
BDT00000086	Legal registration additional information	GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
		GDD name:	legalRegistrationAdditionalInformation
BDTG00000230	Legal registration type code	GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
		GDD name:	legalRegistrationType
		GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode

		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode

BDT00000034	County code	GDD definition: Definition: GDD name: GDD definition:	Identifier for a city, expressed as a short code rather than the full name. The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo:

BDT00000129	Street address three	GDD definition:	The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDTG00000179	Country code	GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214	Geographical coordinates information	GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000085	Latitude	Example: GDD name:	23°26'12.2" S latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the

			prime meridian and expressed either in degrees or in time
BDTG00000801	Carrier track and trace information	Definition: GDD name: GDD definition:	The tracking and tracing information about the package, provided by the carrier. carrierTrackAndTraceInformation Tracking and tracing information about the package, provided by the carrier.
BDT00000802	Carrier track and trace URL	Definition: GDD name: GDD definition: GDD comment:	The internet location where the carrier provides the tracking and tracing information about the package. carrierTrackAndTraceURL A URL where the carrier provides the tracking and tracing information about the package. URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000803	Package tracking number	Definition: Example: GDD name: GDD definition:	The unique package tracking number assigned by the carrier ABC28756-k packageTrackingNumber A unique package tracking number assigned by the carrier
BDTG00000164	Charge basis monetary amount	Definition: GDD name: GDD comment:	The basis monetary amount on which the charge is calculated. baseAmount The amount on which the calculation of the allowance or charge is based.
BDT00000614	Charge basis monetary amount content	Definition: GDD name: GDD definition:	The basis monetary amount on which the charge is calculated. N/A N/A
BDTG00000590	Currency code	Definition: GDD name: GDD definition: GDD comment: GDD comment:	The code specifying the currency of a monetary amount. currencyCode Code specifying the currency of the amount. The ISO 4217 code list can be acquired from the following website: www.iso.org Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition: Example: Used code list: GDD name: GDD definition:	The code specifying the currency of a monetary amount. EUR ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org . N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000165	Charge description	Definition: GDD name: GDD comment:	The description of the charge expressed as text. allowanceChargeDescription A text explanation of the allowance or charge.
BDT00000573	Charge description content	Definition: GDD name: GDD definition:	The description of the charge expressed as text. N/A N/A
BDTG00000523	Language code	Definition: GDD name:	The code specifying the language. N/A

		Definition:	The information specifying the confirmed for delivery trade item in a business document transaction.
		GDD name:	transactionalTradeItem
BDT00000066	Global trade item number, GTIN	GDD definition:	The trade item associated to the Order Response Line Item.
		Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192

BDT00000115	Product variant identifier	Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin
		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDT0000013	Butter fat reference	Definition:	The product variant expressed as text.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade items with the same GTIN from each other.
		Example:	Christmas edition Book cover in blue Book cover in green
		GDD name:	productVariantIdentifier
BDTG00000142	Additional trade item identification	GDD definition:	Text identifying a variant of the product, for example for promotional reasons.
		Definition:	The reference number assigned by customs authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
		GDD name:	butterFatReference
BDTG00000142	Additional trade item identification	GDD definition:	A reference number assigned by custom authorities to butter based fat products.
		GDD comment:	The reference number is used in customs declarations when importing or exporting goods.
BDT00000516	Additional trade item identification content	Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
		GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		Definition:	The additional identity of a trade item.
BDTG00000519	Additional trade item identification type code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a shipment.
		Definition:	The code of the additional trade item identification type.
BDTG00000518	Additional trade item identification type code content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
		Definition:	The quantity of a trade item.
		GDD name:	tradeItemQuantity
		GDD definition:	Specification of the number of units of the trade item. To be applied when no other quantity information, such as the requested quantity or the billed quantity, is present.
BDTG00000341	Trade item quantity	Definition:	The quantity value of the trade item
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD name:	N/A
BDTG00000678	Trade item quantity content	Definition:	The quantity value of the trade item
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD name:	N/A
BDTG00000608	Measurement unit code	Definition:	The quantity value of the trade item
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD name:	N/A

		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
		Remark:	Code list based on UN/ECE Recommendation 20
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000335	Trade item description	Definition:	The description of the trade item expressed as text.
		GDD name:	tradeItemDescription
		GDD comment:	Textual description of the trade item.
BDT00000684	Trade item description content	Definition:	The description of the trade item expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000226	Item type code	Definition:	The code specifying the type of the trade item.
		Used code list:	ItemTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
		GDD name:	itemTypeCode
		GDD definition:	Code describing the trade item type. Allowed code values are specified in GS1 Code List ItemTypeCode.

BDT00000656	Item type code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ItemTypeCode
BDT00000028	Code list version	Definition:	The code specifying the type of the trade item.
		GDD name:	N/A
BDTG00000342	Trade item transactional data owner code	GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000700	Trade item transactional data owner code content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000028	Code list version	Definition:	The code specifying the responsible party of the transactional data.
		GDD name:	tradeItemDataOwner
BDTG00000203	Dynamic trade item information	GDD definition:	Specifies who owns the set of trade item transactional data.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000007	Available for sale date	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
		Definition:	The code specifying the responsible party of the transactional data.
BDT00000008	Batch number	Example:	SELLER
		Used code list:	TradeItemDataOwnerCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
		Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData
		GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The date when a trade item is available for sale.
		GDD name:	availableForSaleDate
		GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
		GDD name:	batchNumber
		GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the

		GDD comment:	same transformation process, not necessarily a production process. The identity of the production batch (lot), that can be related to the point of time for the production.
BDT00000011	Best before date	Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
BDTG00000180	Country of origin	GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDT00000057	Expiration date	GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
		GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDT00000090	Lot number	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
		GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
BDT00000104	Packaging date	Definition:	The date on which a product is placed in a container or package.
		GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.
BDT00000116	Production date	Definition:	The date the product was produced.
		GDD name:	productionDate
		GDD definition:	The date that the product was produced.
BDT00000120	Sell by date	Definition:	The date after which the product should not be sold.
		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
		GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified

BDT00000082	Item in contact with food product indicator	Definition:	environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function The code indicating if the trade item can be in contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Example: Used code list: GDD name: GDD definition:	NO Available codes: "YES" and "NO" itemInContactWithFoodProduct States weather or not the trade item can come into contact with food products.
BDT00000095	Number of layers	Definition: Example: Remark:	The information specifying the packaging of the logistic unit. transactionalItemLogisticUnitInformation Specifies packaging parameters for transport and storage purposes. The number of layers of packages in a package. 3 To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfLayers
BDT00000096	Number of units per layer	GDD name: GDD definition: Definition: Remark:	Number of layers of a product or products within a package, container, pallet, etc The number of packs per layer in a package. To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer
BDT00000097	Number of units per platform	GDD name: GDD definition: Remark:	Number of units of a product or package within one layer of a package, container, pallet, etc. To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN?

BDT00000091	Maximum stacking factor	GDD name:	See TradeItemHierarchyModule in GDSN.
		GDD definition:	numberOfUnitsPerPallet The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
		Definition:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product.
BDTG00000265	Packaging terms and conditions code	Example:	3
		Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
		GDD name:	maximumStackingFactor
BDTG00000263	Packaging terms and conditions code content	GDD definition:	A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
		Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name:	packagingTerms
BDT00000663	Packaging terms and conditions code content	GDD comment:	Specifies packaging terms and conditions.
		Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		Used code list:	PackagingTermsAndConditionsCode
BDT00000028	Code list version	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000264	Package type code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000264	Package type code	Definition:	The code specifying the type of package used for the trade item.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
BDT00000664	Package type code content	Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
		GDD name:	packageTypeCode
		GDD definition:	Code specifying a package type. Allowed code values are specified in UN/ECE Recommendation 21, extended by GS1
BDT00000664	Package type code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Definition:	The code specifying the type of package used for the trade item.
BDT00000664	Package type code content	Example:	200
		Used code list:	PackageTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
BDT00000664	Package type code content	Remark:	Code list is based on UN/ECE Recommendation 21

BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000307	Serial number range	Definition:	The range of serial numbers formed by a start number and an end number.

Business data term groups

GS1 SDD; 1.0; Published

			GDD name:	serialNumberRange
			GDD definition:	The difference or interval between the minimum and maximum value of the serial numbers expressed as a string
BDT00000092		Maximum value	Definition:	The highest value in a number series.
			GDD name:	maximumValue
			GDD definition:	Specifies the upper limit of the string range.
BDT00000094		Minimum value	Definition:	The lowest value in a number series.
			GDD name:	minimumValue
			GDD definition:	Specifies the lower limit of the string range.
BDTG00000336		Trade item measurements information	Definition:	The information specifying the measurements of a trade item.
			GDD name:	transactionalItemDimensions
			GDD definition:	Dimensions of the transactional trade item: depth, height, width
BDTG00000190		Depth measurement	Definition:	The measure of an item from front to back.
			GDD name:	depth
			GDD comment:	Measurement of the distance between the front and the back.
BDT00000661		Depth measurement content	Definition:	The measure of an item from front to back.
BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
			GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000607		Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
			Used code list:	MeasurementUnitCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
			Remark:	Code list based on UN/ECE Recommendation 20
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000220		Height measurement	Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
			GDD name:	height
			GDD definition:	The vertical dimension from the lowest extremity to the highest extremity.
BDT00000650		Height measurement content	Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.

			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
			GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000360		Width measurement	Definition:	The horizontal dimension from one side of the item to the other side.
			GDD name:	width
			GDD comment:	The measurement of the extent of something from side to side. Width is the measurement from left to right.
BDTG00000662		Width measurement content	Definition:	The horizontal dimension from one side of the item to the other side.
BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.

BDTG00000216		Global trade item number format and type of carrier information	Definition:	The information specifying details of the format and type of data carrier for a GS1 global trade item number, GTIN, of a trade item.
			Remark:	GTIN - GS1 global trade item number
			GDD name:	transactionalItemDataCarrierAndIdentification
			GDD definition:	Provides information about GS1 Identifier and Data Carriers associated with the trade item.
BDTG00000217		GS1 global trade item number format code	Definition:	The code specifying the format of a GS1 global trade item number.
			GDD name:	gs1TransactionalItemIdentificationKey
			GDD definition:	Specifies the type of GS1 Identification Key.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode
BDTG00000646		GS1 global trade item number format code content	Definition:	The code specifying the format of a GS1 global trade item number.
			Example:	GTIN_13
			Used code list:	GS1TradeItemIdentificationKeyCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyTypeCode&release=1
			GDD name:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028		Code list version	GDD definition:	N/A
			Definition:	The version number of the code list.
BDTG00000185		Data carrier type code	GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
			Definition:	The code specifying a type of data carrier.
			Used code list:	DataCarrierTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
			GDD name:	dataCarrier
			GDD comment:	A means to represent data in a machine readable form.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
			GDD comment:	DataCarrierTypeCode
BDT00000639		Data carrier type code content	Definition:	The code specifying a type of data carrier.
BDT00000028		Code list version	GDD name:	N/A
			GDD definition:	N/A
BDTG00000345		Trade item waste information	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying details of the waste generated by the trade item.
			GDD name:	tradeItemWaste
			GDD definition:	Provides details of waste generated by the trade item.
BDT00000138		Waste identification	Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
			Example:	04098765000119
			GDD name:	wasteIdentification
			GDD definition:	The number identifying the type of waste.
			GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
			GDD comment:	
BDTG00000359		Waste type code	Definition:	The information specifying the details of the code specifying the type of waste.
			GDD name:	typeOfWaste
			GDD comment:	Provides code and description of waste type according to required classification scheme.
BDT00000702		Waste type code content	Definition:	The code specifying the type of waste.
			GDD name:	N/A
			GDD definition:	N/A
			Definition:	The description of a code value expressed as text.
BDT00000022		Code description	GDD name:	codeDescription
			GDD definition:	A description for the code value provided.
BDT00000023		Code list agency code	Definition:	The code specifying the agency responsible for a code list.
			GDD name:	codeListAgencyCode
			GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a webb address accessible over the Internet. The URL also identifies the resource, in this case the code list.
		GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000338	Trade item organic information	Definition:	The information specifying organic data for a trade item.
		GDD name:	transactionalItemOrganicInformation
		GDD definition:	Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator	Definition:	The code indicating if the trade item is claimed to be organic.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	isTradeItemOrganic
		GDD definition:	Information about whether or not the trade item is organic.
BDTG00000261	Organic certification information	Definition:	The information specifying the certificate for a trade item which claims the product to be organic.
		GDD name:	organicCertification
		GDD comment:	Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition:	The certification value.
		Example:	need an reliable example
		GDD name:	itemCertificationValue
		GDD definition:	The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met.
		GDD name:	itemCertificationAgency
		GDD definition:	Name of the organization issuing the certification standard or other requirement being met.
BDT00000016	Certification standard name	Definition:	The name of the certification standard expressed as text.
		Example:	GlobalGAP
		GDD name:	itemCertificationStandard
		GDD definition:	Name of the certification standard. Free text. Example: Organic product.

GS1 SDD; 1.0; Published

BDTG00000174	Colour information	Definition:	The information specifying the colour of a trade item.
		GDD name:	colour
		GDD comment:	Information specifying the colour of the trade item.
BDTG00000172	Colour code	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	colourCode
		GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000029	Colour code system code	Definition:	The code specifying the colour coding system.
		Example:	10
		Used code list:	ColourCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
BDT00000030	Colour code system description	Definition:	The description of the colour code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
		GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000031	Colour code system version	Definition:	The version number of the colour code system.
		GDD name:	colourCodeListVersion
		GDD definition:	The version of the ColourCodeListCode code list.
BDTG00000173	Colour description	Definition:	Colour descriptionThe description of a colour expressed as text.
		Usage:	Only used if no coded value for the colour is available using the business data term Colour code.
		GDD name:	colourDescription
		GDD comment:	A description of a colour of an object.
BDT00000737	Colour description content	Definition:	The description of a colour expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en

		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000316	Size information	Definition:	The information specifying the size of a trade item.
		GDD name:	size
		GDD definition:	The physical dimensions or proportions of the transactional trade item depicted as a code or a description.
BDTG00000315	Size description	Definition:	The description of a size expressed as text.
		GDD name:	descriptiveSize
		GDD definition:	A description of the size of an object.
BDT00000679	Size description content	Definition:	The description of a size expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000313	Size code	Definition:	The code specifying the size of an object or a product according to a size system.
		GDD name:	sizeCode
		GDD comment:	Code specifying the size of an object and the size coding system being applied, for example L (buyer assigned).
BDT00000680	Size code content	Definition:	The code specifying the size of an object or a product according to a size system.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000314	Size code list code	Definition:	The code specifying the system of size codes.
		GDD name:	sizeCodeListCode
		GDD definition:	Code specifying a size code list. Allowed code values are specified in GS1 Code List SizeCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

Business data term groups

GS1 SDD; 1.0; Published

BDT00000124	Size code list description	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:SizeCodeListCode
		Definition:	The description of the size code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	sizeCodeListDescription
BDT00000028	Code list version	GDD definition:	A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000125	Size code list version	Definition:	The version number of the code list of the size code system.
		GDD name:	sizeCodeListVersion
		GDD definition:	The applied version of the SizeCodeListCode code list.
		Definition:	The information specifying the product classification of a trade item.
BDTG00000334	Trade item classification information	GDD name:	tradeItemClassification
		GDD comment:	Information specifying the product class to which a trade item belongs and the classification system being applied.
		Definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
BDT00000070	GS1 global product classification GPC brick code	Example:	10000025
		GDD name:	gpcCategoryCode
		GDD definition:	Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
		Definition:	The name of the product category of similar products according to GS1 global product classification standard GPC.
BDT00000071	GS1 global product classification GPC brick name	Business rule:	To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)
		Example:	Milk
		GDD name:	gpcCategoryName
		GDD definition:	Name associated with the specified Global Product Classification (GPC) category code.
BDTG00000155	Alternative trade item product classification code	Definition:	The information specifying the details of the alternative trade item product classification code.
		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
		GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
BDT00000536	Alternative trade item product classification code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
		GDD name:	N/A

BDT00000002	Additional trade item classification scheme code	GDD definition:	N/A
		Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.
		Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
BDT00000003	Additional trade item classification scheme version	GDD name:	additionalTradeItemClassificationCodeListCode
		GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The version number of the classification scheme used for additional trade item classification.
BDT00000022	Code description	Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000028	Code list version	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDTG00000215	Global Product Classification attributes	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
BDT00000067	GS1 global product classification GPC attribute type code	Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
		GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
		Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
		GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000068	GS1 global product classification GPC attribute value code	Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
		Example: GDD name: GDD definition:	3001082 gpcAttributeValueCode The GS1 provided code which identifies the Global Product Classification Attribute Value.
BDT00000064	Global product classification GPC attribute type name	Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
		Example: GDD name: GDD definition:	Level of Fat Claim gpcAttributeTypeName The GS1 provided text equivalent of the Global Product Classification Attribute Code.
		Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
BDT00000069	GS1 global product classification GPC attribute value name	Example: GDD name: GDD definition:	FULL FAT gpcAttributeValueName The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
		Definition:	The information specifying the identification details of the party receiving the group of logistic units.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDTG00000499	Consignee party identification information	GDD name: GDD definition:	consignee The party receiving a consignment of goods.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDT00000063	Global location number, GLN	GDD name: GDD definition:	gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000577	Additional party identification information	GDD name: GDD comment:	additionalPartyIdentification A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
		GDD name: GDD definition:	N/A N/A
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name: GDD definition:	N/A N/A

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000570	Additional party identification type code content	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000714	Consignee party information	Definition:	The information specifying details of the party receiving a consignment of goods.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDTG00000714	Consignee party information	Remark:	A goods reception facility may be located at a different location (address) compared to the location of the official address of the Buyer company. According to national legal requirements, information can be required in the invoice to specify the address to which the goods have been delivered.
		GDD name:	consignee
BDT00000063	Global location number, GLN	GDD definition:	The party receiving a consignment of goods.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
BDT00000063	Global location number, GLN	Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
BDT00000063	Global location number, GLN	GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000577	Additional party identification information	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
BDT00000578	Additional party identification content	GDD definition:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode

Business data term groups

GS1 SDD; 1.0; Published

BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000144	Address information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000019	City code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000034	County code	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000035	Cross street	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000106	Party name	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000113	Post office box number	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000114	Postal code	GDD definition:	Text specifying the postal code for an address.

BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1.

			UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name: GDD definition: Definition: GDD name: GDD definition:	N/A N/A The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name: GDD comment: Definition:	geographicalCoordinates Geographical coordinates for the address. The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example: GDD name:	23°26'12.2" S latitude
BDT00000089	Longitude	GDD definition: Definition:	Angular distance North or South from the earth's equator measured through 90 degrees. The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name: GDD comment:	contact Person or department that can be contacted regarding the business transaction.
BDT00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name: GDD definition:	personName The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition:	The name of the department.
		GDD name: GDD definition:	departmentName The name of the department that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name: GDD definition:	jobTitle The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition: Used code list: Link to code list:	The code specifying the function or role of a contact person. ISO 3166-1 or equivalent representation in specific syntax. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name: GDD comment:	contactTypeCode Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000571	Contact type code content	GDD comment: Definition:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode The code specifying the function or role of a contact person.

		Definition:	The code specifying the language.
BDTG00000184	Currency of party code	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000710	Currency of party code content	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000246	Official address	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000034	County code	Definition:	The code specifying the currency of a party.
		Example:	EUR
BDTG00000020	City name	Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		GDD name:	currencyOfPartyCode
BDTG00000019	City code	GDD comment:	Code specifying the currency of an addressed party.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDTG00000020	City name	Definition:	The code specifying the currency of a party.
		Example:	EUR
BDTG00000019	City code	Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000246	Official address	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000034	County code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The registered legal address of the organisation.
BDTG00000020	City name	GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDTG00000019	City code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
BDTG00000020	City name	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
BDTG00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDTG00000020	City name	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDTG00000019	City code	GDD name:	cityCode

Business data term groups

BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000497	Consignment identification information	Definition:	The information specifying the identification details of a group of logistic units.
		GDD name:	consignmentIdentification
BDT00000493	Global identification number for consignment, GINC	GDD definition:	Information used to identify a consignment.
		Definition:	The identity according to the GS1 identification system for unique identification of a group of logistic units.
		Example:	7365566156191234567
		Remark:	GINC is the GS1 Identification Key used to identify a logical grouping of logistic units. The identification key is comprised of a GS1 Company Prefix and a reference to the group of logistic units.

			Logistic units in a particular shipment may be associated with different GINCs during various transport stages; for example, when the shipment gets consolidated with other shipments during its journey, and deconsolidated again before it reaches the consignee. The GINC allows freight forwarders and transport providers to keep track of the logistic units being transported together.
		GDD name:	ginc
		GDD definition:	Global Identification Number for Consignment (GINC), the GS1 key used for the identification of consignments.
		GDD comment:	More information about the Global Identification Number for Consignment can be found here: http://www.gs1.org/global-identification-number-consignment-ginc
BDTG00000495	Additional consignment identification information	Definition:	The information specifying the additional identification details of a group of logistic units.
		GDD name:	additionalConsignmentIdentification
		GDD comment:	Additional identification for a consignment.
BDTG00000004	Additional consignment identification content	Definition:	The additional identity of a consignment.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000494	Additional consignment identification type code	Definition:	The code specifying the type of additional identifier for a group of logistic units.
		Example:	CARRIER_ASSIGNED
		Used code list:	AdditionalConsignmentIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		GDD name:	additionalConsignmentIdentificationTypeCode
		GDD definition:	Code specifying the type of additional consignment identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
BDTG00000487	Additional consignment identification type code content	Definition:	The additional consignment identification type.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000496	Consignment information	Definition:	The information specifying details of the consignment.
		Usage:	To identify a consignment, either of "BDTG00000493 Global identification number for consignment, GINC" or "BDTG00000004 Additional consignment identification content" is used, or both.
		GDD name:	consignmentReference
		GDD definition:	Reference to consignment information

BDTG00000497	Consignment identification information	Definition:	The information specifying the identification details of a group of logistic units.
		GDD name: GDD definition:	consignmentIdentification Information used to identify a consignment.
BDTG00000493	Global identification number for consignment, GINC	Definition:	The identity according to the GS1 identification system for unique identification of a group of logistic units.
		Example:	7365566156191234567
		Remark:	GINC is the GS1 Identification Key used to identify a logical grouping of logistic units. The identification key is comprised of a GS1 Company Prefix and a reference to the group of logistic units. Logistic units in a particular shipment may be associated with different GINCs during various transport stages; for example, when the shipment gets consolidated with other shipments during its journey, and deconsolidated again before it reaches the consignee. The GINC allows freight forwarders and transport providers to keep track of the logistic units being transported together.
		GDD name: GDD definition:	ginc Global Identification Number for Consignment (GINC), the GS1 key used for the identification of consignments.
BDTG00000495	Additional consignment identification information	GDD comment:	More information about the Global Identification Number for Consignment can be found here: http://www.gs1.org/global-identification-number-consignment-ginc
		Definition:	The information specifying the additional identification details of a group of logistic units.
BDTG00000004	Additional consignment identification content	GDD name:	additionalConsignmentIdentification
		GDD comment:	Additional identification for a consignment.
BDTG00000494	Additional consignment identification type code	Definition:	The additional identity of a consignment.
		GDD name:	N/A
BDTG00000494	Additional consignment identification type code	GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a group of logistic units.
		Example:	CARRIER_ASSIGNED
		Used code list:	AdditionalConsignmentIdentificationTypeCode
BDTG00000487	Additional consignment identification type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		GDD name:	additionalConsignmentIdentificationTypeCode
		GDD definition:	Code specifying the type of additional consignment identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary.
BDTG00000487	Additional consignment identification type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		Definition:	The additional consignment identification type.
BDTG00000487	Additional consignment identification type code content	GDD name:	N/A
		GDD definition:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000498	Consignor party identification	Definition:	The information specifying the identification details of the party despatching the group of logistic units.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	consignor
		GDD definition:	The party despatching a consignment of goods.
BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode

		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000499	Consignee party identification	Definition:	The information specifying the identification details of the party receiving the group of logistic units.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or

BDT00000063	Global location number, GLN	GDD name:	"BDT000000578 Additional party identification content" is used, or both.
		GDD definition:	consignee
		Definition:	The party receiving a consignment of goods.
		Remark:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		Definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Usage:	The information specifying the additional identification details of a party.
BDT00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		Definition:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDTG00000579	Additional party identification type code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Definition:	The code specifying the additional identification type of the party.
BDT00000028	Code list version	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000498	Consignor party identification information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the identification details of the party despatching the group of logistic units.
BDT00000063	Global location number, GLN	Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	consignor
		GDD definition:	The party despatching a consignment of goods.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.

BDTG00000486	Contact for invoiced trade item information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000486	Contact for invoiced trade item information	Definition:	The information specifying details of the contact person or department who can provide information regarding an invoiced trade item.
		GDD name:	invoiceLineItemContact
		GDD definition:	Specifies a department name or reference corresponding to invoice line item.
BDT00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.

		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDT00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000176	Communication information	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data

		GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		GDD comment:	20190627 KD: understandable when the "value" consists of an email address. Unsure how an "end point" for a Twitter account should be stated in the "value".
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000145	After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000177	Contact for ordered trade item information	Definition:	The information specifying details of the contact person or department who can provide information regarding an ordered trade item.
		GDD name:	orderLineItemContact
		GDD definition:	Specifies a department name or reference corresponding to purchase order.
BDT00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition:	The name of the department.

BDT00000083	Job title	GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000178	Contact type code	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
BDTG00000178	Contact type code	Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000178	Contact type code	GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
BDTG00000178	Contact type code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDT00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000159	Business contact responsibility description	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000159	Business contact responsibility description	GDD definition:	Identification of the applied version of the code list.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDT00000580	Business contact responsibility description content	GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
BDTG00000523	Language code	GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
BDT00000524	Language code content	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000524	Language code content	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
BDTG00000176	Communication information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000176	Communication information	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
BDTG00000176	Communication information	GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne

Business data term groups

GS1 SDD; 1.0; Published

BDT00000130	Street address two	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000129	Street address three	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDT00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDTG00000158	Business contact information	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
BDT00000112	Person name	GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
BDT00000044	Department name	GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
BDT00000083	Job title	GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
BDTG00000178	Contact type code	GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
BDT00000571	Contact type code content	Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:add:cl:ContactTypeCode
		GDD name:	contactTypeCode
BDT00000028	Code list version	GDD comment:	Code specifying the function or role of a contact.

BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode

BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000128	Street address one	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000130	Street address two	Example:	California
		GDD name:	state
BDT00000129	Street address three	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000179	Country code	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000774	Country code content	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000179	Country code	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000129	Street address three	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000179	Country code	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000179	Country code	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
BDT00000179	Country code	GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDT00000179	Country code	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.

BDTG00000523	Language code	Definition:	The code specifying the language.

BDT00000524	Language code content	GDD name:	N/A
		GDD comment:	N/A
BDT00000028	Code list version	Definition:	The code specifying the language.
		Example:	en
BDTG00000176	Communication information	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000175	Communication channel code	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000175	Communication channel code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000175	Communication channel code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
BDTG00000175	Communication channel code	GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000033	Communication channel name	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
BDTG00000145	After hours communication information	GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDT00000032	Communication channel identification	GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name: GDD definition:	communicationValue Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
BDTG00000919	Dangerous goods regulation information	GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The hazardous instructions applicable to delivered goods according to a particular dangerous goods regulation.
BDT00000931	Dangerous goods regulation name	GDD name:	dangerousGoodsRegulationInformation
		GDD comment:	Hazardous instructions applicable to delivered goods according to a particular dangerous goods regulation.
		Definition:	The name of the classification system of dangerous goods and/or the Agency responsible for it.
BDT00000932	Dangerous goods hazard class	Example:	IATA – DGR
		GDD name:	dangerousGoodsRegulationName
		GDD definition:	The name of the classification system of dangerous goods and/or the Agency responsible for it.
BDT00000933	Dangerous goods packing group information	Definition:	The name of the class within the classification of hazardous materials.
		Example:	Class A
		GDD name:	dangerousGoodsRegulationName
BDT00000934	Dangerous goods regulation type code	GDD definition:	The name of the class within the classification of hazardous materials.
		Definition:	The identification of degree of risk these dangerous goods present during transport according to the specified regulation.
		Example:	II
BDTG00000920	Dangerous goods regulation type code content	GDD name:	dangerousGoodsPackingGroup
		GDD definition:	Identifies the degree of risk these dangerous goods present during transport according to the specified regulation.
		Definition:	The indication of the classification system of dangerous goods and/or the Agency responsible for it.
BDT00000921	Dangerous goods attribute information	GDD name:	dangerousGoodsRegulationCode
		GDD definition:	An indication of the classification system of dangerous goods and/or the Agency responsible for it.
		Definition:	The code specifying the dangerous goods regulation
BDTG00000934	Dangerous goods attribute information	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The hazardous instructions attribute details specific to a particular dangerous goods regulation.
BDTG00000934	Dangerous goods attribute information	GDD name:	dangerousGoodsAttribute
		GDD comment:	Hazardous instructions attribute details specific to a particular dangerous goods regulation.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000937	Dangerous goods attribute text	Definition:	The textual value of the dangerous goods attribute.
		Example:	Contains safety information
		GDD name:	dangerousGoodsAttributeText
BDT00000939	Dangerous goods attribute date time	GDD definition:	Textual value of the dangerous goods attribute.
		Definition:	The date (and time) of the dangerous goods attribute
		GDD name:	dangerousGoodsAttributeDateTime
BDT00000940	Dangerous goods attribute indicator	GDD definition:	Date time value of the dangerous goods attribute.
		Definition:	The indicator of the dangerous goods attribute.
		Example:	True
BDTG00000936	Dangerous goods attribute type code	GDD name:	dangerousGoodsAttributeIndicator
		GDD definition:	Boolean value of the dangerous goods attribute.
		Definition:	The code specifying the type of dangerous goods attribute.
BDTG00000938	Dangerous goods attribute type code content	GDD name:	dangerousGoodsAttributeTypeCode
		GDD definition:	Code specifying the type of dangerous goods attribute.
		Definition:	The code specifying the attribute type
BDT00000935	Dangerous goods attribute type code content	Example:	SAFETY_INFORMATION
		Used code list:	DangerousGoodsAttributeTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl: DangerousGoodsAttributeTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000938	Dangerous goods attribute measurement value	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The measurement value of the dangerous goods attribute.
BDTG00000938	Dangerous goods attribute measurement value	GDD name:	dangerousGoodsAttributeMeasurement
		GDD comment:	Measurement value of the dangerous goods attribute.
		Definition:	The measured value.
BDT00000746	Measurement value content	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000608	Measurement unit code	GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-

		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

		GDD definition:	Identification of the applied version of the code list.
BDTG00000909	Dangerous goods United Nations identification	Definition:	The number to identify hazardous substances or articles, as defined by United Nations Committee of Experts on the Transport of Dangerous Goods.
		GDD name:	dangerousGoodsUNIdentifier
		GDD comment:	Number to identify hazardous substances or articles, as defined by United Nations Committee of Experts on the Transport of Dangerous Goods.
BDT00000910	Dangerous goods United Nations identification content	Definition:	The identification of dangerous goods
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000587	Identification scheme information	Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000074	Identification scheme name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000185	Data carrier type code	Definition:	The code specifying a type of data carrier.
		Used code list:	DataCarrierTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
		GDD name:	dataCarrier
		GDD comment:	A means to represent data in a machine readable form.

		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDT00000639	Data carrier type code content	Definition:	The code specifying a type of data carrier.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000042	Day of the week code	Definition:	The code specifying the day of the week.
		GDD name:	dayOfTheWeekCode
		GDD definition:	Code specifying the day of the week to which the operating hours apply.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DayOfTheWeekEnumeration
BDT00000745	Day of the week code content	Definition:	The code specifying the day of the week.
		Example:	TUESDAY
		Used code list:	DayOfTheWeekEnumeration
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DayOfTheWeekEnumeration
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000463	Delivered quantity	Definition:	The delivered quantity of the trade item.
		GDD name:	deliveredQuantity
		GDD definition:	The actual quantity delivered.
BDT00000429	Delivered quantity value	Definition:	The quantity of the delivered trade item.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. BDTG00000186	Delivery date according to schedule	Definition:	The date of delivery corresponds to previously agreed delivery schedule.
		GDD name:	deliveryDateAccordingToSchedule

BDT00000040	Date	GDD comment:	Date of delivery corresponding to the previously agreed delivery schedule.
		Definition:	The day of a year as a calendar date.
BDT00000133	Time	Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
		Definition:	The indication of a point in time.
BDTG00000187	Delivery instructions description	Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
		Definition:	The description of the instructions on the final delivery of the goods expressed as text.
BDT00000641	Delivery instructions description content	GDD name:	deliveryInstructions
		GDD comment:	Instructions on the final delivery of the goods.
BDT00000523	Language code	Definition:	The description of the instructions on the final delivery of the goods expressed as text.
		GDD name:	N/A
BDT00000524	Language code content	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000028	Code list version	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000762	Delivery method code	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000043	Delivery method code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the method of delivery.
		GDD name:	deliveryMethod
		GDD definition:	Specifies method of delivery.
BDTG00000043	Delivery method code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Definition:	The code specifying the method of delivery.
		Used code list:	DeliveryMethodCode
BDTG00000043	Delivery method code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Remark:	Code specifying whether the goods should be delivered to the customer, or if the customer will pick up the delivery.
		GDD name:	deliveryMethod
		GDD definition:	Specifies method of delivery.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000188	Delivery terms for location information	Definition:	The information specifying details of the delivery location associated with the delivery terms.
		GDD name:	deliveryTermsLocation
		GDD comment:	Location that is applicable to these delivery terms, such as the Free On Board (FOB) destination location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDT00000132	Sub location identification	Definition:	The identity of a further specification of an exact location.
		Example:	Door 5
		GDD name:	sublocationIdentification
		GDD definition:	Text further specifying the exact logistic location. For example: dock door, department, building.
BDT00000088	Logistics location name	Definition:	The name of a logistics location.
		GDD name:	locationName
		GDD definition:	The name of this logistic location.
BDT00000137	Universal Time Coordinated UTC offset	Definition:	The amount of time subtracted from or added to coordinated universal time, UTC, to get the current local time, whether it is standard time or daylight saving time, DST.
		Example:	+01
		Remark:	If the time being described is one hour ahead of UTC (such as the time in Berlin during the winter), the UTC offset would be "+01".
		GDD name:	utcOffset
		GDD definition:	Numeric value specifying the time zone of the location as offset from the Coordinated Universal Time (UTC).
BDTG00000358	UN location code, UN/LOCODE	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
		Used code list:	UN/LOCODE Code List
		GDD name:	unLocationCode
		GDD definition:	UN/LOCODE is a geographic coding scheme maintained by UN/ECE for locations used in trade and transport with functions such as seaports, rail and road terminals, airports, post offices and border crossing points.
		GDD comment:	Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20 .

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000274	Additional physical location identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional identity of a physical location.
		Usage:	The identity is specified by another identification system than the GS1 Global Location Number, GLN. Only used if no GS1 Global Location Number, GLN, is available for the physical location.
BDT00000627	Physical location identification content	GDD name:	additionalLocationIdentification
		GDD comment:	Identification of a location by use of a code other than the Global Location Number.
		Definition:	The value of the identity of a physical location.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000074	Identification scheme name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A

		GDD name:	codeListVersion
BDT00000019	City code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000034	County code	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000035	Cross street	Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000106	Party name	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000113	Post office box number	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000114	Postal code	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000117	Province identity	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode

BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
BDT00000128	Street address one	Example:	California
		GDD name:	state
BDT00000128	Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
BDT00000128	Street address one	Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
BDT00000128	Street address one	GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
BDT00000130	Street address two	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
BDT00000130	Street address two	GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000129	Street address three	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDT00000129	Street address three	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
BDTG00000179	Country code	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.

BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG0000032	Communication channel identification	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
BDTG0000032	Communication channel identification	GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG0000033	Communication channel name	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000289	Regular operating hours information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of the regular operating hours.
BDTG0000042	Day of the week code	Usage:	Information specifying details of communication channels to use after regular business hours.
		GDD name:	regularOperatingHours
BDTG0000042	Day of the week code	GDD comment:	The period during which a business or facility is operational on a weekday.
		Definition:	The code specifying the day of the week.
BDTG0000042	Day of the week code	GDD name:	dayOfTheWeekCode
		GDD definition:	Code specifying the day of the week to which the operating hours apply.
BDTG0000078	Business operational indicator	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DayOfTheWeekEnumeration
		Definition:	The code indicating if a business or facility is operational on a specific day.
BDTG0000078	Business operational indicator	Example:	NO
		GDD name:	isOperational
BDTG0000021	Closing time	GDD definition:	Indicator specifying whether or not the business or facility is operational on the specified day
		Definition:	The time at which a business or facility close.
BDTG0000098	Opening time	GDD name:	closingTime
		GDD definition:	Time on which the business or facility will close on the specified day.
BDTG0000098	Opening time	Definition:	The time on which the business or facility will open on a specified day.
		GDD name:	openingTime
BDTG0000098	Opening time	GDD definition:	Time on which the business or facility will open on the specified day.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000317	Special operating hours information	Definition:	The information specifying the special operating hours.
		GDD name:	specialOperatingHours
		GDD definition:	The period during which the location is operational on special days, such as holidays.
BDTG00000078	Business operational indicator	Definition:	The code indicating if a business or facility is operational on a specific day.
		Example:	NO
		GDD name:	isOperational
		GDD definition:	Indicator specifying whether or not the business or facility is operational on the specified day
BDTG00000126	Special date	Definition:	The date for which extraordinary operating hours apply.
		Example:	2020-12-25
		GDD name:	specialDate
		GDD definition:	Date specifying the day to which the special operating hours apply.
BDTG00000021	Closing time	Definition:	The time at which a business or facility close.
		GDD name:	closingTime
		GDD definition:	Time on which the business or facility will close on the specified day.
BDTG00000098	Opening time	Definition:	The time on which the business or facility will open on a specified day.
		GDD name:	openingTime
		GDD definition:	Time on which the business or facility will open on the specified day.
BDTG00000241	Name of special day	Definition:	The name of a special day expressed as text.
		Usage:	Used for specifying operating hours for a special day such as a religious holiday.
		GDD name:	specialDateName
		GDD definition:	Text describing the day to which the special operating hours apply. Example: Christmas.
BDTG00000669	Name of special day content	Definition:	The name of a special day expressed as text.
		Example:	Christmas eve, Mawlid-al-nabi
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000189	Delivery terms information	Definition:	The information specifying details on terms for proof of delivery, foreign trade and cost for transportation.
		GDD name:	deliveryTerms
		GDD definition:	The applicable legal, customs, financial and insurance terms for the order.
BDTG00000080	Signature required indicator	Definition:	The code indicating if a signature on a proof of delivery of the ordered trade items is required.
		Usage:	The signature on the proof of delivery can be used in support of possible later

		Example:	claims issues. YES
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	isSignatureRequired
		GDD definition:	Specifies whether the Buyer has to sign the Proof Of Delivery document upon order delivery.
BDTG00000221	Incoterms code	Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
		GDD name:	incotermsCode
		GDD comment:	Code specifying the incoterms. Incoterms is an abbreviation for International Commercial Terms. The International Chamber of Commerce manages the Incoterms codes and their definitions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000649	Incoterms code content	Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
		Used code list:	UN/ECE Recommendation 5
		Link to code list:	http://tfiq.unece.org/contents/recommendation-5.htm
		GDD name:	N/A
		GDD comment:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000154	Alternative delivery terms code	Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
		GDD name:	alternateDeliveryTermsCode
		GDD comment:	Code specifying the delivery terms according to a system other than the Incoterms.
BDT00000535	Alternative delivery terms code content	Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition:	The name of the code list expressed as text.
		GDD name:	codeListName

BDT00000027	Code list URL	GDD definition:	The name of the code list which provides the code value.
		Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
BDT00000028	Code list version	GDD name:	codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDTG00000187	Delivery instructions description	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000641	Delivery instructions description content	Definition:	The description of the instructions on the final delivery of the goods expressed as text.
		GDD name:	deliveryInstructions
		GDD comment:	Instructions on the final delivery of the goods.
BDTG00000523	Language code	Definition:	The description of the instructions on the final delivery of the goods expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
BDT00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000349	Transport cost payment code	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000701	Transport cost payment code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the payer of expenses for transportation.
		GDD name:	deliveryCostPayment
		GDD comment:	Specifies who will pay transport cost.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
		Definition:	The code specifying the payer of expenses for transportation.
		Example:	WE
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
		GDD name:	N/A
		GDD definition:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000188	Delivery terms for location information	Definition:	The information specifying details of the delivery location associated with the delivery terms.
		GDD name:	deliveryTermsLocation
		GDD comment:	Location that is applicable to these delivery terms, such as the Free On Board (FOB) destination location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDT00000132	Sub location identification	Definition:	The identity of a further specification of an exact location.
		Example:	Door 5
		GDD name:	sublocationIdentification
		GDD definition:	Text further specifying the exact logistic location. For example: dock door, department, building.
BDT00000088	Logistics location name	Definition:	The name of a logistics location.
		GDD name:	locationName
		GDD definition:	The name of this logistic location.
BDT00000137	Universal Time Coordinated UTC offset	Definition:	The amount of time subtracted from or added to coordinated universal time, UTC, to get the current local time, whether it is standard time or daylight saving time, DST.
		Example:	+01
		Remark:	If the time being described is one hour ahead of UTC (such as the time in Berlin during the winter), the UTC offset would be "+01".
		GDD name:	utcOffset
		GDD definition:	Numeric value specifying the time zone of the location as offset from the Coordinated Universal Time (UTC).
BDTG00000358	UN location code, UN/LOCODE	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
		Used code list:	UN/LOCODE Code List
		GDD name:	unLocationCode
		GDD definition:	UN/LOCODE is a geographic coding scheme maintained by UN/ECE for locations used in trade and transport with functions such as seaports, rail and road terminals, airports, post offices and border crossing points.
		GDD comment:	Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000690	United Nations location code, UN/LOCODE content	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.

BDT00000028	Code list version	Example:	BE BRU
		Link to code list:	https://www.unece.org/cefact/locode/service/location.html
BDTG00000274	Additional physical location identification	GDD name:	N/A
		GDD definition:	N/A
BDT00000627	Physical location identification content	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000587	Identification scheme information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional identity of a physical location.
BDT00000074	Identification scheme name	Usage:	The identity is specified by another identification system than the GS1 Global Location Number, GLN. Only used if no GS1 Global Location Number, GLN, is available for the physical location.
		GDD name:	additionalLocationIdentification
BDTG00000586	Identification scheme responsible agency code	GDD comment:	Identification of a location by use of a code other than the Global Location Number.
		Definition:	The value of the identity of a physical location.
BDT00000073	Identification scheme agency name	GDD name:	N/A
		GDD definition:	N/A
BDT00000583	Identification scheme responsible agency code content	Definition:	The information specifying details of the used identification scheme.
		GDD name:	identificationSchemeName
BDTG00000028	Code list version	GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000319	Specific instructions location description	Definition:	The description of the instructions regarding the pick-up or drop-off of goods at a location expressed as text.
		GDD name:	locationSpecificInstructions
		GDD comment:	Instructions related to the pick-up or drop-off of goods at this location.
BDTG00000744	Specific instructions location description content	Definition:	The description of the instructions regarding the pick-up or drop-off of goods at a location expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000228	Language of the party code	Definition:	The code specifying the language of a party.
		GDD name:	languageOfThePartyCode
		GDD definition:	Code specifying the language of an addressed party.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000184	Currency of party code	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		GDD name:	currencyOfPartyCode
		GDD comment:	Code specifying the currency of an addressed party.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDTG00000710	Currency of party code content	Definition:	The code specifying the currency of a party.
		Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.

		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000127	State	Definition:	The political unit that a country can be divided into.
		Example:	California

BDT00000128	Street address one	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
BDT00000129	Street address three	Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
BDTG00000179	Country code	GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
BDT00000774	Country code content	Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000028	Code list version	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000128	Street address one	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDTG00000179	Country code	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000774	Country code content	GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
BDT00000774	Country code content	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000774	Country code content	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.

BDTG00000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000158	Business contact information	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000158	Business contact information	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDT00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDT00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDT00000083	Job title	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
BDTG00000178	Contact type code	GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
BDT00000571	Contact type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
BDT00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD definition:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDTG00000033	Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000289	Regular operating hours information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of the regular operating hours.
		Usage:	Information specifying details of communication channels to use after regular business hours.
BDTG00000042	Day of the week code	GDD name:	regularOperatingHours
		GDD comment:	The period during which a business or facility is operational on a weekday.
		Definition:	The code specifying the day of the week.
		GDD name:	dayOfTheWeekCode
BDTG00000078	Business operational indicator	GDD definition:	Code specifying the day of the week to which the operating hours apply.
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DayOfTheWeekEnumeration
		Definition:	The code indicating if a business or facility is operational on a specific day.
		Example:	NO
BDTG00000021	Closing time	GDD name:	isOperational
		GDD definition:	Indicator specifying whether or not the business or facility is operational on the specified day
		Definition:	The time at which a business or facility close.
BDTG00000098	Opening time	GDD name:	closingTime
		GDD definition:	Time on which the business or facility will close on the specified day.
		Definition:	The time on which the business or facility will open on a specified day.
		GDD name:	openingTime

BDTG00000317	Special operating hours information	GDD definition:	Time on which the business or facility will open on the specified day.
		Definition:	The information specifying the special operating hours.
BDT00000078	Business operational indicator	GDD name:	specialOperatingHours
		GDD definition:	The period during which the location is operational on special days, such as holidays.
BDT00000126	Special date	Definition:	The code indicating if a business or facility is operational on a specific day.
		Example:	NO
BDT00000021	Closing time	GDD name:	isOperational
		GDD definition:	Indicator specifying whether or not the business or facility is operational on the specified day
BDT00000098	Opening time	Definition:	The date for which extraordinary operating hours apply.
		Example:	2020-12-25
BDTG00000241	Name of special day	GDD name:	specialDate
		GDD definition:	Date specifying the day to which the special operating hours apply.
BDT00000669	Name of special day content	Definition:	The time at which a business or facility close.
		GDD name:	closingTime
BDTG00000523	Language code	GDD definition:	Time on which the business or facility will close on the specified day.
		Definition:	The time on which the business or facility will open on a specified day.
BDT00000524	Language code content	GDD name:	openingTime
		GDD definition:	Time on which the business or facility will open on the specified day.
BDT00000028	Code list version	Definition:	The name of a special day expressed as text.
		Usage:	Used for specifying operating hours for a special day such as a religious holiday.
BDTG00000795	Delivery type code	GDD name:	specialDateName
		GDD definition:	Text describing the day to which the special operating hours apply. Example: Christmas.
BDT00000028	Code list version	Definition:	The name of a special day expressed as text.
		Example:	Christmas eve, Mawlid-al-nabi
BDTG00000795	Delivery type code	Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000028	Code list version	GDD comment:	N/A
		Definition:	The code specifying the language.
BDTG00000795	Delivery type code	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000795	Delivery type code	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000795	Delivery type code	Definition:	Code specifying the type of completeness of delivery compared to the order instruction.
		GDD name:	deliveryTypeCode
BDT00000028	Code list version	GDD comment:	Code specifying the type of completeness of delivery compared to the order instruction.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDTG00000607	Measurement unit code content	Definition:	The measure of an item from front to back.
		GDD name:	depth
BDTG00000607	Measurement unit code content	GDD comment:	Measurement of the distance between the front and the back.
		Definition:	The measure of an item from front to back.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
BDTG00000607	Measurement unit code content	GDD comment:	N/A
		GDD name:	measurementUnitCode
BDTG00000607	Measurement unit code content	GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000607	Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
		Used code list:	MeasurementUnitCode
BDTG00000607	Measurement unit code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:MeasurementUnitCode&release=1
		Remark:	Code list based on UN/ECE Recommendation 20
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000191	Description	Definition:	The descriptive statement in text giving the characteristics of something.
		GDD name:	description
BDTG00000742	Description content	GDD comment:	Text content of the description.
		Definition:	The descriptive statement in text giving the characteristics of something.
BDTG00000742	Description content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000523	Language code	GDD comment:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
BDT00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDT00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000930	Despatch advice quantity variance information	Definition:	The information detailing any difference between what was ordered and what is ready for or has been despatched.
		GDD name:	despatchAdviceQuantityVariance
BDTG00000930	Despatch advice quantity variance information	GDD comment:	Information with regards to any difference between what was ordered and what is ready for or has been despatched.
		GDD definition:	Identification of the applied version of the code list.
BDT00000941	First available delivery date time	Definition:	The date (and time) of the earliest date time at which the supplier can deliver the product to the trading partner.
		GDD name:	firstDeliveryDateTime
BDT00000927	Delivery variance date	GDD definition:	The earliest date time at which the supplier can deliver the product to the trading partner.
		Definition:	The estimated delivery date for the goods that have been put on backorder.
BDT00000924	Variance reason type code	Example:	2020-06-15
		GDD name:	deliveryDateVariance
BDTG00000924	Variance reason type code	GDD definition:	The estimated delivery date for the goods that have been put on backorder.
		Definition:	The code specifying the reason for the change in the despatched quantity.
BDT00000923	Variance reason type code content	GDD name:	varianceReasonCode
		GDD definition:	Code specifying the reason for the change in the despatched quantity.
BDT00000923	Variance reason type code content	Definition:	The code specifying the reason of the variance in the despatched quantity.
		Example:	ITEM_NOT_ORDERED
BDT00000028	Code list version	Used code list:	VarianceReasonCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:VarianceReasonCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000925	Variance quantity	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000925	Variance quantity	GDD definition:	Identification of the applied version of the code list.
		Definition:	The quantitative difference between what was ordered and what is despatched.
BDT00000926	Variance quantity content	GDD name:	The quantitative difference between what was ordered and what is despatched.
		GDD comment:	The quantity which has been requested.
BDTG00000608	Measurement unit code	Definition:	The value of the difference between what was ordered and what is despatched.
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000608	Measurement unit code	GDD name:	N/A
		GDD comment:	N/A

		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncfact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000929	Remaining quantity status code	Definition:	The code specifying the action that will be taken with respect to the goods that were not despatched.
		GDD name:	remainingQuantityStatusCode
BDTG00000928	Remaining quantity status code content	GDD comment:	Code specifying the action that will be taken with respect to the goods that were not despatched.
		Definition:	The code specifying the action taken for goods not despatched
		Example:	CM
		Used code list:	RemainingQuantityStatusCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:RemainingQuantityStatusCode
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000805	Despatch advice total shipment information	Definition:	Aggregated shipment information (across logistic units) such as the total weight.
		GDD name:	despatchAdviceTotals
BDTG00000806	Despatch advice total trade item information	GDD comment:	Aggregated shipment information (across logistic units) such as the total weight.
		Definition:	Aggregated shipment information (across logistic units) specified per trade item, such as the total weight of a trade item.
		GDD name:	despatchAdviceItemTotals
		GDD comment:	Aggregated shipment information (across logistic units) specified per trade item, such as the total weight of a trade item.
BDTG00000820	Trade item identification information	Definition:	The information specifying the identification details of a trade item.
		GDD name:	tradeItemIdentification
		GDD comment:	The trade item associated to the despatch advice item total.
BDTG00000066	Global trade item number, GTIN	Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192
		Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin
		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.

BDTG00000142	Additional trade item identification information	GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
		Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
BDTG00000516	Additional trade item identification content	GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		Definition:	The additional identity of a trade item.
BDTG00000519	Additional trade item identification type code	GDD name:	N/A
		GDD definition:	N/A
BDTG00000518	Additional trade item identification type code content	Definition:	The code specifying the type of additional identifier for a shipment.
		Definition:	The code of the additional trade item identification type.
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000808	Physical measurement information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The measurement information associated to an item in a shipment, like a trade item or a logistic unit, or to an entire shipment
BDTG00000238	Measurement value	GDD name:	unitMeasurement
		GDD comment:	The measurement information associated to the despatch advice total.
		Definition:	The measured value.
BDTG00000746	Measurement value content	GDD name:	measurementValue
		GDD comment:	Value of the attribute measured.
		Definition:	The measured value.
BDTG00000608	Measurement unit code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the unambiguous representation of a unit of measure.
BDTG00000237	Measurement type code	GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. 		GDD name:	N/A
BDTG00000363	Additional return- able asset identification type code	GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a returnable asset.
BDTG00000363	Additional return- able asset identification type code	Example:	OWNER_ASSIGNED
		Used code list:	AdditionalReturnableAssetIdentificationTypeCode
BDTG00000363	Additional return- able asset identification type code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
		GDD name:	additionalReturnableAssetIdentificationTypeCode
BDTG00000363	Additional return- able asset identification type code	GDD definition:	Code specifying the type of additional returnable asset identification being provided.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000363	Additional return- able asset identification type code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
		Definition:	The information specifying the identity of an individual piece of returnable packaging.
BDTG00000819	Individual return- able asset identification information	Usage:	To identify a returnable asset, either of "BDT00000065 Global returnable asset identifier, GRAI" or "BDT00000743 Additional returnable asset identification content" is used, or both.
		GDD name:	individualReturnableAssetIdentification
BDTG00000819	Individual return- able asset identification information	GDD comment:	The returnable asset identifier for an individual piece of returnable packaging.
		Definition:	The identity according to the GS1 identification system for unique identification of returnable assets and including an optional serial number.
BDTG00000819	Individual return- able asset identification information	Example:	GRAI: 07300015200154
		Remark:	GRAI including a serial number: 07300015200154000000000356
BDTG00000819	Individual return- able asset identification information	Remark:	A returnable asset is a reusable package or transport equipment of a certain value such as a beer keg, a gas cylinder, a plastic pallet or a crate. The GS1 system identification of a returnable asset, the Global Returnable Asset Identifier (GRAI), enables tracking as well as recording of all relevant data.
		Remark:	An optional serial number may be used to distinguish individual assets within a given asset type. The identification key is comprised of a GS1 Company Prefix, asset type, check digit, and optional serial number.
BDTG00000819	Individual return- able asset identification information	GDD name:	grai
		GDD definition:	The GS1 Identification Key used to identify Returnable Assets. The key comprises a GS1 Company Prefix, Asset Type, Check Digit, and optional serial number.
BDTG00000819	Individual return- able asset identification information	GDD comment:	More information about the Global Returnable Asset Identifier can be found here: http://www.gs1.org/grai
		GDD comment:	More information about the Global Returnable Asset Identifier can be found here: http://www.gs1.org/grai

BDTG00000304	Additional return- able asset identification information	Definition:	The information specifying the additional identification details of a returnable asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnable asset identifier GRAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global returnable asset identifier GRAI.
		GDD name: GDD definition:	additionalReturnableAssetIdentification The additional identification Key used to identify returnable assets.
BDTG00000743	Additional return- able asset identification content	Definition:	The additional identity of a returnable asset.
		GDD name: GDD definition:	N/A N/A
BDTG00000363	Additional return- able asset identification type code	Definition:	The code specifying the type of additional identifier for a returnable asset.
		Example:	OWNER_ASSIGNED
		Used code list:	AdditionalReturnableAssetIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
		GDD name:	additionalReturnableAssetIdentificationTypeCode
		GDD definition: GDD comment:	Code specifying the type of additional returnable asset identification being provided. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalReturnableAssetIdentificationTypeCode
BDTG00000808	Physical measurement information	Definition:	The measurement information associated to an item in a shipment, like a trade item or a logistic unit, or to an entire shipment
		GDD name:	unitMeasurement
		GDD comment:	The measurement information associated to the despatch advice total.
BDTG00000238	Measurement value	Definition:	The measured value.
		GDD name:	measurementValue
		GDD comment:	Value of the attribute measured.
BDTG00000746	Measurement value content	Definition:	The measured value.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition: GDD comment:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1. UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/

BDTG00000237	Measurement type code	Definition:	list-of-trade-facilitation-recommendations-n-16-to-20.html
		Link to code list:	The code specifying the way in which a trade item or logistic unit has been measured or calculated. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDTG00000666	Measurement type code content	GDD name:	measurementType
		GDD comment:	Code specifying the type of measurement, for example "Gross Weight".
BDTG00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD definition:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDTG00000806	Despatch advice total trade item information	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
		Used code list:	MeasurementTypeCode
BDTG00000820	Trade item identification information	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
		GDD name:	N/A
BDTG00000066	Global trade item number, GTIN	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000142	Additional trade item identification information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000066	Global trade item number, GTIN	Definition:	Aggregated shipment information (across logistic units) specified per trade item, such as the total weight of a trade item.
		GDD name:	despatchAdviceItemTotals
BDTG00000066	Global trade item number, GTIN	GDD comment:	Aggregated shipment information (across logistic units) specified per trade item, such as the total weight of a trade item.
		Definition:	The information specifying the identification details of a trade item.
BDTG00000066	Global trade item number, GTIN	GDD name:	tradeItemIdentification
		GDD comment:	The trade item associated to the despatch advice item total.
BDTG00000066	Global trade item number, GTIN	Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192
BDTG00000066	Global trade item number, GTIN	Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin
BDTG00000066	Global trade item number, GTIN	GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDTG00000142	Additional trade item identification information	Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
BDTG00000142	Additional trade item identification information	GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000516	Additional trade item identification content	Definition:	The additional identity of a trade item.
		GDD name:	N/A
BDTG00000519	Additional trade item identification type code	GDD definition:	N/A
		Definition:	The code specifying the type of additional identifier for a shipment.
BDT00000518	Additional trade item identification type code content	Definition:	The code of the additional trade item identification type.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000808	Physical measurement information	Definition:	The measurement information associated to an item in a shipment, like a trade item or a logistic unit, or to an entire shipment
		GDD name:	unitMeasurement
		GDD comment:	The measurement information associated to the despatch advice total.
BDTG00000238	Measurement value	Definition:	The measured value.
		GDD name:	measurementValue
		GDD comment:	Value of the attribute measured.
BDT00000746	Measurement value content	Definition:	The measured value.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncfact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000237	Measurement type code	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000798	Despatch advice transport information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The set of information related to the transportation and delivery of the goods
		GDD name:	despatchAdviceTransportInformation
BDT00000799	Transport means name	GDD comment:	Information with regards to the transportation and delivery of the shipment.
		Definition:	The name, expressed as text, of a particular means of transport.
		Example:	Northern Star
		Remark:	E.g. the vessel name.
BDTG00000351	Transport means type code	GDD name:	transportMeansName
		GDD definition:	The name, expressed as text, of a particular means of transport. E.g. The vessel name.
		Definition:	The code specifying the means for transporting goods.
		GDD name:	transportMeansType
BDTG00000351	Transport means type code	GDD definition:	Code identifying the means of transport: the type of vehicle, aircraft, vessel or other device used for the transport of goods. The means of transport has a means of locomotion.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportMeansTypeCode
		GDD comment:	TransportMeansTypeCode
BDT00000687	Transport means type code content	Definition:	The code specifying the means for transporting goods.
		Example:	31
		Used code list:	TransportMeansTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportMeansTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000350	Transport means identification	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of the identification number according to a specified identification scheme assigned to a means of transportation such as a vehicle license plate of a truck or an aircraft registration number of a helicopter.
BDTG00000350	Transport means identification	GDD name:	transportMeansID
		GDD definition:	Vehicle license plate/Aircraft number identifying a means of transport.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000625	Transport means identification content	Definition:	The identification number according to a specified identification scheme assigned to a means of transportation such as a vehicle license plate of a truck or an aircraft registration number of a helicopter.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
BDT00000074	Identification scheme name	GDD name:	N/A
		GDD definition:	N/A
BDT00000073	Identification scheme agency name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
BDTG00000586	Identification scheme responsible agency code	GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
BDT00000583	Identification scheme responsible agency code content	GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDT00000028	Code list version	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode

		Definition:	Code specifying the mode of transport.
		GDD name:	transportServiceCategoryType
		GDD definition:	A code specifying a type of category for this transport service.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportServiceCategoryCode
		TransportServiceCategoryCode	
		Definition:	The code specifying the mode of transport.
		Example:	3
		Used code list:	TransportServiceCategoryCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportServiceCategoryCode

BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000353	Transport route identification	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of identification number assigned to a transport route according to a specified identification scheme.
		GDD name:	routeID
BDT00000626	Transport route identification content	GDD definition:	Unique identifier of the standard route that will be used for this transport movement
		Definition:	The identification number assigned to a transport route according to a specified identification scheme.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
BDT00000074	Identification scheme name	GDD definition:	N/A
		Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000800	Referenced bill of lading document information	Definition:	The information specifying the details of a referenced bill of lading document.
		Remark:	The bill of lading document evidences a contract of carriage and the taking over or loading of goods by the carrier, and by which the carrier undertakes to deliver the goods against surrender of

		GDD name:	the document.
		GDD definition:	billOfLadingNumber
			Reference to the number of the document which evidences a contract of carriage and the taking over or loading of goods by the carrier, and by which the carrier undertakes to deliver the goods against surrender of the document.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDT00000047	Business document creation date time	Definition:	The date and optional time when the business document was issued.
		Remark:	The time is optional to include in the business document transaction.
		GDD name:	creationDateTime
		GDD definition:	Date and time when the document was created.
BDT00000119	Revision number	Definition:	The number assigned to a specific release of a document to keep track of changes and updates between revisions.
		GDD name:	revisionNumber
		GDD definition:	Number to be used for identification and referencing of subsequent updates to a business document.
BDT00000118	Referenced document external location	Definition:	The external location of the referenced document expressed as an uniform resource locator.
		Usage:	The external location can be an internet address to a document stored in a server on the internet.
		GDD name:	referencedDocumentUrl
		GDD definition:	An URI pointing to the on-line location where the referenced document is stored.
BDT00000049	Document line number	Definition:	The sequence number of a line within the business document.
		GDD name:	lineItemNumber
		GDD definition:	Number specifying a line in the referenced document.
		GDD definition:	Provides the line number associated to the Order Line Item.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification

Business data term groups

GS1 SDD; 1.0; Published

BDT00000578	Additional party identification content	GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDTG00000579	Additional party identification type code	GDD name:	N/A
		GDD definition:	N/A
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000801	Carrier track and trace information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The tracking and tracing information about the package, provided by the carrier.
		GDD name:	carrierTrackAndTraceInformation
		GDD definition:	Tracking and tracing information about the package, provided by the carrier.
BDT00000802	Carrier track and trace URL	Definition:	The internet location where the carrier provides the tracking and tracing information about the package.
		GDD name:	carrierTrackAndTraceURL
		GDD definition:	A URL where the carrier provides the tracking and tracing information about the package.
		GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000803	Package tracking number	Definition:	The unique package tracking number assigned by the carrier
		Example:	ABC28756-k
		GDD name:	packageTrackingNumber
		GDD definition:	A unique package tracking number assigned by the carrier
BDTG00000497	Consignment identification information	Definition:	The information specifying the identification details of a group of logistic units.
		GDD name:	consignmentIdentification
BDT00000493	Global identification number for consignment, GINC	GDD definition:	Information used to identify a consignment.
		Definition:	The identity according to the GS1 identification system for unique identification of a group of logistic units.
		Example:	7365566156191234567
		Remark:	GINC is the GS1 Identification Key used to identify a logical grouping of logistic units. The identification key is comprised of a GS1 Company Prefix and a reference to the group of logistic units. Logistic units in a particular shipment may be associated with different GINCs during various transport stages; for example, when the shipment gets consolidated with other shipments during

			its journey, and deconsolidated again before it reaches the consignee. The GINC allows freight forwarders and transport providers to keep track of the logistic units being transported together. ginc Global Identification Number for Consignment (GINC), the GS1 key used for the identification of consignments. More information about the Global Identification Number for Consignment can be found here: http://www.gs1.org/global-identification-number-consignment-ginc
BDTG00000495	Additional consignment identification information	GDD name: GDD definition: GDD comment: Definition:	 The information specifying the additional identification details of a group of logistic units.
BDT00000004	Additional consignment identification content	GDD name: GDD comment: Definition:	 additionalConsignmentIdentification Additional identification for a consignment. The additional identity of a consignment.
BDTG00000494	Additional consignment identification type code	GDD name: GDD definition: Definition:	 N/A N/A The code specifying the type of additional identifier for a group of logistic units.
		Example: Used code list: Link to code list:	 CARRIER_ASSIGNED AdditionalConsignmentIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
		GDD name: GDD definition: GDD comment: GDD comment:	 additionalConsignmentIdentificationTypeCode Code specifying the type of additional consignment identification being provided. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalConsignmentIdentificationTypeCode
BDT00000487	Additional consignment identification type code content	Definition:	The additional consignment identification type.
		GDD name: GDD definition:	 N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	 The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000189	Delivery terms information	Definition:	The information specifying details on terms for proof of delivery, foreign trade and cost for transportation.
		GDD name: GDD definition:	 deliveryTerms The applicable legal, customs, financial and insurance terms for the order.
BDT00000080	Signature required indicator	Definition: Usage: Example: Used code list:	 The code indicating if a signature on a proof of delivery of the ordered trade items is required. The signature on the proof of delivery can be used in support of possible later claims issues. YES Available codes: "YES" and "NO"

BDTG00000221	Incoterms code	GDD name:	isSignatureRequired
		GDD definition:	Specifies whether the Buyer has to sign the Proof Of Delivery document upon order delivery.
		Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
BDTG00000649	Incoterms code content	GDD name:	incotermsCode
		GDD comment:	Code specifying the incoterms. Incoterms is an abbreviation for International Commercial Terms. The International Chamber of Commerce manages the Incoterms codes and their definitions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000649	Incoterms code content	Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
		Used code list:	UN/ECE Recommendation 5
		Link to code list:	http://tfq.unece.org/contents/recommendation-5.htm
BDTG0000028	Code list version	GDD name:	N/A
		GDD comment:	N/A
		Definition:	The version number of the code list.
BDTG00000154	Alternative delivery terms code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
BDTG00000535	Alternative delivery terms code content	GDD name:	alternateDeliveryTermsCode
		GDD comment:	Code specifying the delivery terms according to a system other than the Incoterms.
		Definition:	The code specifying the delivery terms according to an alternative system other than the Incoterms.
BDTG00000022	Code description	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The description of a code value expressed as text.
BDTG00000023	Code list agency code	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The code specifying the agency responsible for a code list.
BDTG00000024	Code list agency code list version	GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		Definition:	The version number of a code list issued by the responsible agency for the code list.
BDTG00000025	Code list agency name	GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		Definition:	The name of the agency responsible for a code list.
BDTG00000026	Code list name	GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
		Definition:	The name of the code list expressed as text.
BDTG00000027	Code list URL	GDD name:	codeListName
		GDD definition:	The name of the code list which provides the code value.
		Definition:	The character string that identifies the location of the code list in a network.
		Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The

BDT00000028	Code list version	GDD name:	URL also identifies the resource, in this case the code list. codeListURI
		GDD definition:	A string that refers to the location of the code list which provides the code value.
BDTG00000187	Delivery instructions description	GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
		Definition:	The version number of the code list.
BDT00000641	Delivery instructions description content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000523	Language code	Definition:	The description of the instructions on the final delivery of the goods expressed as text.
		GDD name:	deliveryInstructions
BDT00000524	Language code content	GDD comment:	Instructions on the final delivery of the goods.
		Definition:	The description of the instructions on the final delivery of the goods expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000349	Transport cost payment code	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000349	Transport cost payment code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000701	Transport cost payment code content	Definition:	The code specifying the payer of expenses for transportation.
		GDD name:	deliveryCostPayment
BDTG00000701	Transport cost payment code content	GDD comment:	Specifies who will pay transport cost.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000028	Code list version	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
		Definition:	The code specifying the payer of expenses for transportation.
BDTG00000701	Transport cost payment code content	Example:	WE
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportChargesPaymentMethodCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000028	Code list version	GDD definition:	Identification of the applied version of the code list.

GS1 SDD; 1.0; Published

BDTG00000188	Delivery terms for location information	Definition:	The information specifying details of the delivery location associated with the delivery terms.
		GDD name: GDD comment:	deliveryTermsLocation Location that is applicable to these delivery terms, such as the Free On Board (FOB) destination location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name: GDD definition:	gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDT00000132	Sub location identification	Definition:	The identity of a further specification of an exact location.
		Example: GDD name: GDD definition:	Door 5 sublocationIdentification Text further specifying the exact logistic location. For example: dock door, department, building.
BDT00000088	Logistics location name	Definition:	The name of a logistics location.
		GDD name: GDD definition:	locationName The name of this logistic location.
BDT00000137	Universal Time Coordinated UTC offset	Definition:	The amount of time subtracted from or added to coordinated universal time, UTC, to get the current local time, whether it is standard time or daylight saving time, DST.
		Example:	+01
		Remark:	If the time being described is one hour ahead of UTC (such as the time in Berlin during the winter), the UTC offset would be "+01".
		GDD name: GDD definition:	utcOffset Numeric value specifying the time zone of the location as offset from the Coordinated Universal Time (UTC).
BDTG00000358	UN location code, UN/LOCODE	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
		Used code list:	UN/LOCODE Code List
		GDD name: GDD definition:	unLocationCode UN/LOCODE is a geographic coding scheme maintained by UN/ECE for locations used in trade and transport with functions such as seaports, rail and road terminals, airports, post offices and border crossing points.
		GDD comment:	Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000690	United Nations location code, UN/LOCODE content	Definition:	The code specifying a location according to United Nations Code for Trade and Transport Locations, UN/LOCODE.
		Example:	BE BRU
		Link to code list: GDD name:	https://www.unece.org/cefact/locode/service/location.html N/A

			GDD name:	codeListVersion
BDT00000020		City name	GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000019		City code	GDD name:	address
			GDD comment:	Address of the party involved in the business transaction.
BDT00000034		County code	Definition:	The name of the city, town or village.
			GDD name:	city
BDT00000035		Cross street	GDD definition:	Text specifying the name of the city.
			Definition:	The code specifying a city.
BDT00000106		Party name	Remark:	Should not be misunderstood as a postal code.
			GDD name:	cityCode
BDT00000113		Post office box number	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
			Definition:	The code indicating a geographical region in a country.
BDT00000114		Postal code	GDD name:	countyCode
			GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000117		Province identity	Definition:	The street crossing another street.
			GDD name:	crossStreet
BDT00000127		State	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
			Definition:	The name of the party expressed as text.
			GDD name:	name
			GDD definition:	The name of the party expressed in text.
			Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
			Synonyms:	P.O. box, postal box
			GDD name:	pOBoxNumber
			GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
			Definition:	The code according to the relevant postal system or service to specify a geographical area.
			Example:	SE 190 90
			Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
			GDD name:	postalCode
			GDD definition:	Text specifying the postal code for an address.
			Definition:	The identity of a province according to national codes assigned to provinces.
			GDD name:	provinceCode
			GDD definition:	Text specifying a province in abbreviated format.
			Definition:	The political unit that a country can be divided into.
			Example:	California
			GDD name:	state

BDT00000128		Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
			Definition:	The first street address line of a structured address.
			Example:	Avenue Louise 326
			Remark:	Can be the name of a street and house number or the name of a building.
			GDD name:	streetAddressOne
			GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130		Street address two	Definition:	The second street address line of a structured address.
			Example:	Blue Tower
			Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressTwo
			GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name.
BDT00000129		Street address three	Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179		Country code	Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774		Country code content	Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion

BDTG00000214	Geographical coordinates information	GDD definition: Identification of the applied version of the code list. Definition: The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name: geographicalCoordinates GDD comment: Geographical coordinates for the address. Definition: The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. Example: 23°26'12.2" S GDD name: latitude
BDT00000089	Longitude	GDD definition: Angular distance North or South from the earth's equator measured through 90 degrees. Definition: The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. Example: 18°3'59.0616" GDD name: longitude
BDTG00000158	Business contact information	GDD definition: The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDT00000112	Person name	Definition: The information specifying details of the person or department who can give special assistance regarding a business transaction. GDD name: contact GDD comment: Person or department that can be contacted regarding the business transaction.
BDT00000044	Department name	Definition: The name of an individual person expressed as text. GDD name: personName GDD definition: The name of the individual that can be contacted to provide additional information.
BDT00000083	Job title	Definition: The name of the department. GDD name: departmentName GDD definition: The name of the department that can be contacted to provide additional information.
BDTG00000178	Contact type code	Definition: The title of a position or the role of a person holding the position. GDD name: jobTitle GDD definition: The job title of the person that can be contacted.
BDT00000571	Contact type code content	Definition: The code specifying the function or role of a contact person. Used code list: ISO 3166-1 or equivalent representation in specific syntax. Link to code list: http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode GDD name: contactTypeCode GDD comment: Code specifying the function or role of a contact. BDT00000791	Despatch advice type code content	Definition:	The code specifying the type of Despatch advice.
		Used code list:	DespatchAdviceTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DespatchAdviceTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000869	Despatched quantity	Definition:	The number of units shipped of the order unit or associated item.
		Usage:	The unit of measure for the quantity is assumed to be the same as for the associated item. Thus the quantity must be specified in the same unit of measure as the item, e.g. case, each, etc.
		GDD name:	despatchedQuantity
		GDD definition:	The unit of measure for the quantity is assumed to be the same as for the associated item. Thus the quantity must be specified in the same unit of measure as the item, e.g. case, each, etc.
BDT00000868	Despatched quantity content	Definition:	The number of units despatched

GS1 SDD; 1.0; Published

BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000908	Despatched trade item information	Definition:	The information specifying the despatched trade item in a business document transaction.
		GDD name:	transactionalTradeItem
		GDD definition:	The trade item identification of the goods that were delivered.
BDT00000066	Global trade item number, GTIN	Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		Example:	07300015200192
		Remark:	GTIN is the GS1 Identification Key used to identify products and services. The identification key is comprised of a GS1 Company Prefix, an item reference and a check digit.
		GDD name:	gtin
		GDD definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDT00000115	Product variant identifier	Definition:	The product variant expressed as text.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade items with the same GTIN from each other.
		Example:	Christmas edition Book cover in blue Book cover in green
		GDD name:	productVariantIdentifier
		GDD definition:	Text identifying a variant of the product, for example for promotional reasons.
		GDD comment:	The reference number assigned by customs authorities to butter based fat products.
BDT00000013	Butter fat reference	Definition:	The reference number assigned by customs authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
		GDD name:	butterFatReference
		GDD definition:	A reference number assigned by custom authorities to butter based fat products.
		GDD comment:	The reference number is used in customs declarations when importing or exporting goods.
BDTG00000142	Additional trade item identification	Definition:	The information specifying the additional identification details of a trade item.
		GDD name:	additionalTradeItemIdentification
		GDD comment:	Alternative means to the Global Trade Item Number to identify a trade item.
		GDD definition:	The additional identity of a trade item.
BDT000000516	Additional trade item identification content	GDD name:	N/A
		GDD definition:	N/A

		GDD definition:	N/A
BDTG00000342	Trade item transactional data owner code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000700	Trade item transactional data owner code content	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the responsible party of the transactional data.
BDT00000028	Code list version	GDD name:	tradeItemDataOwner
		GDD definition:	Specifies who owns the set of trade item transactional data.
BDTG00000342	Trade item transactional data owner code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
BDT00000700	Trade item transactional data owner code content	Definition:	The code specifying the responsible party of the transactional data.
		Example:	SELLER
BDT00000028	Code list version	Used code list:	TradeItemDataOwnerCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TradeItemDataOwnerCode
BDTG00000342	Trade item transactional data owner code	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000203	Dynamic trade item information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
		Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData
BDTG00000007	Available for sale date	GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The date when a trade item is available for sale.
		GDD name:	availableForSaleDate
BDTG00000008	Batch number	GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
		GDD name:	batchNumber
BDTG00000011	Best before date	GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
		GDD comment:	The identity of the production batch (lot), that can be related to the point of time for the production.
		Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
BDTG00000180	Country of origin	GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDTG00000057	Expiration date	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
		GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDTG00000090	Lot number	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
		GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
BDTG00000104	Packaging date	Definition:	The date on which a product is placed in a container or package.
		GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000116	Production date	Definition:	The date the product was produced.
		GDD name:	productionDate
		GDD definition:	The date that the product was produced.
BDT00000120	Sell by date	Definition:	The date after which the product should not be sold.
		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
		GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function
BDT00000082	Item in contact with food product indicator	Definition:	The code indicating if the trade item can be in contact with food products.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	itemInContactWithFoodProduct
		GDD definition:	States weather or not the trade item can come into contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Definition:	The information specifying the packaging of the logistic unit.
		GDD name:	transactionalItemLogisticUnitInformation
		GDD comment:	Specifies packaging parameters for transport and storage purposes.
BDT00000095	Number of layers	Definition:	The number of layers of packages in a package.
		Example:	3
		Remark:	To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN.
		GDD name:	numberOfLayers
		GDD definition:	Number of layers of a product or products within a package, container, pallet, etc
BDT00000096	Number of units per layer	Definition:	The number of packs per layer in a package.
		Remark:	To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not

				changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer GDD name: numberOfUnitsPerLayer GDD definition: Number of units of a product or package within one layer of a package, container, pallet, etc.
BDT00000097		Number of units per platform	Remark:	To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerPallet GDD name: numberOfUnitsPerPallet GDD definition: The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
BDT00000091		Maximum stacking factor	Definition:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product.
			Example:	3
			Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN? maximumStackingFactor GDD name: maximumStackingFactor GDD definition: A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDTG00000265		Packaging terms and conditions code	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
			GDD name:	packagingTerms
			GDD comment:	Specifies packaging terms and conditions.
BDT00000663		Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
			Used code list:	PackagingTermsAndConditionsCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion

BDTG00000264	Package type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the type of package used for the trade item.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Remark:	Code list is based on UN/ECE Recommendation 21
BDTG00000664	Package type code content	Version:	20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
		GDD name:	packageTypeCode
		GDD definition:	Code specifying a package type. Allowed code values are specified in UN/ECE Recommendation 21, extended by GS1
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000028	Code list version	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode
		Definition:	The code specifying the type of package used for the trade item.
		Example:	200
		Used code list:	PackageTypeCode
BDTG00000301	Returnable package return transport payment code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackageTypeCode

BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
			GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDT00000607		Measurement unit code content	Definition:	The code specifying the unambiguous representation of a unit of measure.
			Used code list:	MeasurementUnitCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementUnitCode&release=1
			Remark:	Code list based on UN/ECE Recommendation 20
BDT00000028		Code list version	GDD name:	N/A
			GDD definition:	N/A
			Definition:	The version number of the code list.
			GDD name:	codeListVersion
BDTG00000237		Measurement type code	GDD definition:	Identification of the applied version of the code list.
			Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
			GDD name:	measurementType
			GDD comment:	Code specifying the type of measurement, for example "Gross Weight".
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data

			GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDT00000666		Measurement type code content	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
			Used code list:	MeasurementTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000344		Trade item volume information	Definition:	The information specifying the volume of a trade item.
			GDD name:	transactionalItemVolume
			GDD comment:	Information on the volume of the specified items.
BDT00000752		Trade item volume content	Definition:	The volume of the trade item.
			GDD name:	measurementValue
			GDD definition:	Value of the attribute measured.
BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
			GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. 			Remark:	Code list based on UN/ECE Recommendation 20
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000237		Measurement type code	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
			GDD name:	measurementType

			GDD comment:	Code specifying the type of measurement, for example "Gross Weight".
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDT00000666		Measurement type code content	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
			Used code list:	MeasurementTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028		Code list version	Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000307		Serial number range	Definition:	The range of serial numbers formed by a start number and an end number.
			GDD name:	serialNumberRange
			GDD definition:	The difference or interval between the minimum and maximum value of the serial numbers expressed as a string
BDT00000092		Maximum value	Definition:	The highest value in a number series.
			GDD name:	maximumValue
			GDD definition:	Specifies the upper limit of the string range.
BDT00000094		Minimum value	Definition:	The lowest value in a number series.
			GDD name:	minimumValue
			GDD definition:	Specifies the lower limit of the string range.
BDTG00000336		Trade item measurements information	Definition:	The information specifying the measurements of a trade item.
			GDD name:	transactionalItemDimensions
			GDD definition:	Dimensions of the transactional trade item: depth, height, width
BDTG00000190		Depth measurement	Definition:	The measure of an item from front to back.
			GDD name:	depth
			GDD comment:	Measurement of the distance between the front and the back.
BDT00000661		Depth measurement content	Definition:	The measure of an item from front to back.
BDTG00000608		Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
			GDD name:	N/A
			GDD comment:	N/A
			GDD name:	measurementUnitCode
			GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
			GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. 		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000185	Data carrier type code	Definition:	The code specifying a type of data carrier.
		Used code list:	DataCarrierTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
		GDD name:	dataCarrier
BDT00000028	Code list version	GDD comment:	A means to represent data in a machine readable form.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
		Definition:	The code specifying a type of data carrier.
BDTG00000345	Trade item waste information	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000138	Waste identification	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of the waste generated by the trade item.
		GDD name:	tradeItemWaste
		GDD definition:	Provides details of waste generated by the trade item.
BDTG00000138	Waste identification	Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
		Example:	04098765000119

			GDD name:	wasteIdentification
			GDD definition:	The number identifying the type of waste.
			GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
BDTG00000359	Waste type code		Definition:	The information specifying the details of the code specifying the type of waste.
			GDD name:	typeOfWaste
			GDD comment:	Provides code and description of waste type according to required classification scheme.
BDT00000702	Waste type code content		Definition:	The code specifying the type of waste.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000022	Code description		Definition:	The description of a code value expressed as text.
			GDD name:	codeDescription
			GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code		Definition:	The code specifying the agency responsible for a code list.
			GDD name:	codeListAgencyCode
			GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version		Definition:	The version number of a code list issued by the responsible agency for the code list.
			GDD name:	codeListAgencyCodeListVersion
			GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name		Definition:	The name of the agency responsible for a code list.
			GDD name:	codeListAgencyName
			GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name		Definition:	The name of the code list expressed as text.
			GDD name:	codeListName
			GDD definition:	The name of the code list which provides the code value.
BDT00000027	Code list URL		Definition:	The character string that identifies the location of the code list in a network.
			Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
			GDD name:	codeListURI
			GDD definition:	A string that refers to the location of the code list which provides the code value.
			GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028	Code list version		Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000338	Trade item organic information		Definition:	The information specifying organic data for a trade item.
			GDD name:	transactionalItemOrganicInformation
			GDD definition:	Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator		Definition:	The code indicating if the trade item is claimed to be organic.
			Example:	NO
			Used code list:	Available codes: "YES" and "NO"
			GDD name:	isTradeItemOrganic
			GDD definition:	Information about whether or not the trade item is organic.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000261	Organic certification information	Definition:	The information specifying the certificate for a trade item which claims the product to be organic.
		GDD name:	organicCertification
		GDD comment:	Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition:	The certification value.
		Example:	need an reliable example
		GDD name:	itemCertificationValue
		GDD definition:	The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met.
		GDD name:	itemCertificationAgency
		GDD definition:	Name of the organization issuing the certification standard or other requirement being met.
BDT00000016	Certification standard name	Definition:	The name of the certification standard expressed as text.
		Example:	GlobalGAP
		GDD name:	itemCertificationStandard
		GDD definition:	Name of the certification standard. Free text. Example: Organic product.
BDTG00000174	Trade item colour information	Definition:	The information specifying the colour of a trade item.
		GDD name:	colour
		GDD comment:	Information specifying the colour of the trade item.
BDTG00000172	Colour code	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	colourCode
		GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000029	Colour code system code	Definition:	The code specifying the colour coding system.
		Example:	10
		Used code list:	ColourCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
BDT00000030	Colour code system description	Definition:	The description of the colour code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
		GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion

BDTG00000313	Size code	Definition: GDD name: GDD comment:	The code specifying the size of an object or a product according to a size system. sizeCode Code specifying the size of an object and the size coding system being applied, for example L (buyer assigned).
BDT00000680	Size code content	Definition: GDD name: GDD definition:	The code specifying the size of an object or a product according to a size system. N/A N/A
BDTG00000314	Size code list code	Definition: GDD name: GDD definition: GDD comment:	The code specifying the system of size codes. sizeCodeListCode Code specifying a size code list. Allowed code values are specified in GS1 Code List SizeCodeListCode. Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000124	Size code list description	Definition: Example: GDD name: GDD definition:	The description of the size code system expressed as text. National Retail Federation – Standard Colour & Size Codes sizeCodeListDescription A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDT00000125	Size code list version	Definition: GDD name: GDD definition:	The version number of the code list of the size code system. sizeCodeListVersion The applied version of the SizeCodeListCode code list.
BDTG00000334	Trade item classification information	Definition: GDD name: GDD comment:	The information specifying the product classification of a trade item. tradeItemClassification Information specifying the product class to which a trade item belongs and the classification system being applied.
BDT00000070	GS1 global product classification GPC brick code	Definition: Business rule: Example: GDD name: GDD definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC. According to GS1 global product classification standard a GTIN can be assigned to only one brick code. 10000025 gpcCategoryCode Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
BDT00000071	GS1 global product classification GPC brick name	Definition: Business rule:	The name of the product category of similar products according to GS1 global product classification standard GPC. To be used in conjunction with the business data term "GS1 global product classification brick

BDTG00000155	Alternative trade item product classification code	Example:	code". (Is this a Business rule or a Usage rule?)
		GDD name:	Milk
		GDD definition:	gpcCategoryName
		Definition:	Name associated with the specified Global Product Classification (GPC) category code.
		Usage:	The information specifying the details of the alternative trade item product classification code.
		GDD name:	The product classification system is an alternative to the GS1 Global Product Classification standard.
		GDD definition:	additionalTradeItemClassificationCode
		GDD comment:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
		GDD definition:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000536	Alternative trade item product classification code content	Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.
		Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD name:	AdditionalTradeItemClassificationCodeListCode
		GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
BDT00000003	Additional trade item classification scheme version	GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
		Definition:	The description of a code value expressed as text.
BDT00000022	Code description	GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		GDD definition:	

BDTG00000215	Global Product Classification attributes	Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
BDT00000067	GS1 global product classification GPC attribute type code	GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
BDT00000068	GS1 global product classification GPC attribute value code	Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
BDT00000064	Global product classification GPC attribute type name	GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
BDT00000069	GS1 global product classification GPC attribute value name	Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
BDT00000064	Global product classification GPC attribute type name	Example:	3001082
		GDD name:	gpcAttributeValueCode
BDT00000069	GS1 global product classification GPC attribute value name	GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
		Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
BDT00000069	GS1 global product classification GPC attribute value name	Example:	Level of Fat Claim
		GDD name:	gpcAttributeName
BDT00000069	GS1 global product classification GPC attribute value name	GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
		Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
BDT00000069	GS1 global product classification GPC attribute value name	Example:	FULL FAT
		GDD name:	gpcAttributeValueName
BDT00000069	GS1 global product classification GPC attribute value name	GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
		Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
BDTG00000785	Deviating quantity	Definition:	The difference between the ordered quantity and the confirmed quantity
		GDD name:	deviatingQuantity
BDTG00000785	Deviating quantity	GDD comment:	The difference between the ordered quantity and the confirmed quantity
		Definition:	The difference between the ordered quantity and the confirmed quantity
BDT00000789	Deviating amount content	Example:	100
		GDD name:	deviatingQuantity
BDT00000789	Deviating amount content	GDD definition:	The difference between the ordered quantity and the confirmed quantity Example: Price per 100 units.
		Definition:	The difference between the ordered quantity and the confirmed quantity
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.

		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000770	Direct debit information	Definition:	The set of information specifying a direct debit
BDT00000771	Mandate reference identification	Definition:	The unique identifier assigned by the Payee for referencing the direct debit mandate
		GDD name:	N/A
		GDD definition:	N/A
BDT00000772	Bank assigned creditor identification	Definition:	The unique banking reference identifier of the Payee or Seller assigned by the Payee or Seller bank
		GDD name:	N/A
		GDD definition:	N/A
BDT00000773	Debited account identification	Definition:	The account to be debited by the direct debit
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000402	Discount agreement type code	Definition:	The code specifying the type of applicable discount agreement.
		Used code list:	DiscountAgreementCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DiscountAgreementCode
		Remark:	The value of the invoice is included in the calculation of the discount or bonus that is credited at the end of the period specified in the contract.
		GDD name:	discountAgreementTerms
		GDD definition:	Contractually agreed discounts that will be subtracted at the end of a year.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DiscountAgreementCode
BDT00000642	Discount agreement type code content	Definition:	The code specifying the type of applicable discount agreement.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000194	Discount description	Definition:	The description of the discount expressed as text.
		GDD name:	discountDescription

Business data term groups

GS1 SDD; 1.0; Published

BDT00000640	Discount description content	GDD comment:	A text field describing the discount.
		Definition:	The description of the discount expressed as text.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000195	Discount monetary amount	Definition:	The deduction represented as a monetary amount.
		GDD name:	discountAmount
		GDD comment:	The deduction represented as an amount.
BDT00000692	Discount monetary amount content	Definition:	The deduction represented as a monetary amount.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.

		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000821	Driver contact information	Definition:	The contact information of the driver.
		GDD name:	driver
		GDD definition:	Information on an individual or department acting as point of contact for an organization.
BDT00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000571	Contact type code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDTG00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000176	Communication information	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDT00000032	Communication channel identification	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDT00000033	Communication channel name	GDD comment:	20190627 KD: understandable when the "value" consists of an email address. Unsure how an "end point" for a Twitter account should be stated in the "value".
		Definition:	The name of a communication channel expressed as text.
BDTG00000145	After hours communication information	GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000175	Communication channel code	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
BDT00000032	Communication channel identification	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000033	Communication channel name	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDT00000033	Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
BDTG00000822	Driver identification information	GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000822	Driver identification information	Definition:	The information specifying the identification details of the driver transporting the goods.
		GDD name:	driverID
BDT00000112	Person name	GDD definition:	Identification information about the driver of the transported goods.
		Definition:	The name of an individual person expressed as text.
BDT00000112	Person name	GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000823	Date of birth	Definition:	The name of the individual that can be contacted to provide additional information.
		Example:	The calendar date on which the person was born.
BDT00000823	Date of birth	GDD name:	2020-06-15
		GDD definition:	dateOfBirth

BDT00000824	Gender information	GDD definition:	Calendar date on which the person was born.
		Definition:	The information specifying the sex of the person
		GDD name:	gender
BDTG00000826	Nationality code	GDD definition:	Code specifying the sex of the person.
		Definition:	The code specifying the nation the person belongs to by birth or naturalization.
		GDD name:	nationality
		GDD comment:	Code specifying the nation the person belongs to by birth or naturalization.
BDT00000825	Nationality code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying the nationality of the person
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000827	Identity document information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The details of the identity document of a person
		GDD name:	identityDocument
		GDD definition:	An identity document is any document which may be used to verify aspects of a person's personal identity or of a person's relationship with an organisation. If issued in the form of a small, mostly standard-sized card, it is usually called an identity card (IC).
BDT00000831	Identity document issuer	Definition:	The issuer of the identity document
		Example:	Burgemeester Brussels Capital
		GDD name:	identityDocumentIssuer
		GDD definition:	Text specifying the issuer of the identity document.
BDT00000828	Identity document number	Definition:	The unique identifier of the identity document, intended to identify a particular person.
		GDD name:	identityDocumentNumber
		GDD definition:	Unique identifier in this identity document, intended to identify a particular person.
BDTG00000829	Identity document type code	Definition:	The code specifying the type of identity document.
		GDD name:	identityDocumentType
		GDD comment:	Code specifying the type of identity document.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000830	Identity document type code content	Definition:	The code specifying the type of identity document.
		Example:	NATIONAL_IDENTITY_CARD
		Used code list:	IdentityDocumentTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:IdentityDocumentTypeCode
		GDD name:	N/A
		GDD definition:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000876	Duty fee tax liability code	Definition:	The code indicating whether an item is subject to a particular duty, tax or fee.
		GDD name:	lineItemChangeIndicator
		GDD definition:	Indicates whether an item is a subject to a particular duty, tax or fee.
BDT00000877	Duty fee tax liability code content	Definition:	The code specifying the duty fee tax liability of the item
		Example:	CUSTOMS_BOND_REQUIRED
		Used code list:	DutyFeeTaxLiabilityCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DutyFeeTaxLiabilityCode&release=1
		GDD name:	N/A
		GDD comment:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000777	Duty regime type code	Definition:	Code specifying a type of duty regime.
		Used code list:	EDIFACT 9213 code list
		Link to code list:	http://apps.gs1.org/GDD/bms/EANCOM/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:9213DutyRegimeTypeCode&release=2
BDT00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000203	Dynamic trade item information	Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
		Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData
		GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
BDT00000007	Available for sale date	Definition:	The date when a trade item is available for sale.
		GDD name:	availableForSaleDate
		GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
BDT00000008	Batch number	Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
		GDD name:	batchNumber

Business data term groups

GS1 SDD; 1.0; Published

		GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
		GDD comment:	The identity of the production batch (lot), that can be related to the point of time for the production.
BDT00000011	Best before date	Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
BDTG00000180	Country of origin	GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDT00000057	Expiration date	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
		GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDT00000090	Lot number	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
		GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
BDT00000104	Packaging date	Definition:	The date on which a product is placed in a container or package.
		GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.
BDT00000116	Production date	Definition:	The date the product was produced.
		GDD name:	productionDate
		GDD definition:	The date that the product was produced.
BDT00000120	Sell by date	Definition:	The date after which the product should not be sold.
		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000121	Serial number	Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000122	Shelf life	Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
		GDD name:	shelfLife

		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function
BDT00000082	Item in contact with food product indicator	Definition:	The code indicating if the trade item can be in contact with food products.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
		GDD name:	itemInContactWithFoodProduct
		GDD definition:	States weather or not the trade item can come into contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Definition:	The information specifying the packaging of the logistic unit.
		GDD name:	transactionalItemLogisticUnitInformation
		GDD comment:	Specifies packaging parameters for transport and storage purposes.
BDT00000095	Number of layers	Definition:	The number of layers of packages in a package.
		Example:	3
		Remark:	To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN.
		GDD name:	numberOfLayers
BDT00000096	Number of units per layer	GDD definition:	Number of layers of a product or products within a package, container, pallet, etc
		Definition:	The number of packs per layer in a package.
		Remark:	To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN.
		GDD name:	numberOfUnitsPerLayer
BDT00000097	Number of units per platform	GDD definition:	Number of units of a product or package within one layer of a package, container, pallet, etc.
		Remark:	To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences.

			Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN.
		GDD name: GDD definition:	numberOfUnitsPerPallet The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
BDT00000091	Maximum stacking factor	Definition: Example: Remark:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product. 3 Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
		GDD name: GDD definition:	maximumStackingFactor A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDTG00000265	Packaging terms and conditions code	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name: GDD comment:	packagingTerms Specifies packaging terms and conditions.
BDT00000663	Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		Used code list: Link to code list:	PackagingTermsAndConditionsCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:PackagingTermsAndConditionsCode
		GDD name: GDD definition:	N/A N/A

		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		GDD comment:	
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		GDD comment:	

Business data term groups

GS1 SDD; 1.0; Published

BDT00000025	Code list agency name	Definition: GDD name: GDD definition:	The name of the agency responsible for a code list. codeListAgencyName A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition: GDD name: GDD definition:	The name of the code list expressed as text. codeListName The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition: Remark: GDD name: GDD definition: GDD comment:	The character string that identifies the location of the code list in a network. Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list. codeListURI A string that refers to the location of the code list which provides the code value. URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000338	Trade item organic information	Definition: GDD name: GDD definition:	The information specifying organic data for a trade item. transactionalItemOrganicInformation Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator	Definition: Example: Used code list: GDD name: GDD definition:	The code indicating if the trade item is claimed to be organic. NO Available codes: "YES" and "NO" isTradeItemOrganic Information about whether or not the trade item is organic.
BDTG00000261	Organic certification information	Definition: GDD name: GDD comment:	The information specifying the certificate for a trade item which claims the product to be organic. organicCertification Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition: Example: GDD name: GDD definition:	The certification value. need an reliable example itemCertificationValue The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition: GDD name: GDD definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met. itemCertificationAgency Name of the organization issuing the certification standard or other requirement being met.
BDT00000016	Certification standard name	Definition: Example: GDD name: GDD definition:	The name of the certification standard expressed as text. GlobalGAP itemCertificationStandard Name of the certification standard. Free text. Example: Organic product.
BDTG00000784	Electronic address information	Definition:	The information about the electronic address of a party
BDT00000786	Electronic address identification scheme	Definition: GDD name:	The identification scheme of of the electronic address N/A

Business data term groups

BDTG00000842	End customer related information	Definition:	The detailed information related to the ultimate customer, e.g. identification, delivery method, etc.
		GDD name:	endCustomerRelatedDetails
		GDD comment:	Specifies detailed information related to ultimate customer, e.g. identification, delivery method, etc.
BDTG00000762	Delivery method code	Definition:	The code specifying the method of delivery.
		GDD name:	deliveryMethod
		GDD definition:	Specifies method of delivery.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
BDT00000043	Delivery method code content	Definition:	The code specifying the method of delivery.
		Used code list:	DeliveryMethodCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
		Remark:	Code specifying whether the goods should be delivered to the customer, or if the customer will pick up the delivery.
		GDD name:	deliveryMethod
		GDD definition:	Specifies method of delivery.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DeliveryMethodCode
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000357	Ultimate customer party information	Definition:	The information specifying the ultimate customer.
		Usage:	to be discussed later: Used if the ultimate receiver of the goods is different from Ultimate consignee. To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	ultimateCustomer
		GDD comment:	Allows to specify the final customer that may be different from Ultimate Consignee. E.g. in B2C scenarios, Ultimate Customer may pick up the shipment that had been delivered to the Ultimate Consignee.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations

BDTG00000577	Additional party identification information	Definition:	or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name: GDD comment:	additionalPartyIdentification A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name: GDD definition:	N/A N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name: GDD definition:	additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list: Link to code list:	AdditionalPartyIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name: GDD comment:	address Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name: GDD definition:	city Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark: GDD name: GDD definition:	Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name: GDD definition:	countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet

GS1 SDD; 1.0; Published

BDT00000106	Party name	GDD definition: Definition: GDD name: GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it. The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.

		Example: Remark:	Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDTG00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDTG00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	23°26'12.2" S latitude Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name: GDD comment:	contact Person or department that can be contacted regarding the business transaction.
BDTG00000112	Person name	Definition: GDD name: GDD definition:	The name of an individual person expressed as text. personName The name of the individual that can be contacted to provide additional information.

BDT00000028	Code list version	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
BDTG00000214	Geographical coordinates information	GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		GDD definition:	The code specifying a country. countryCode
BDT00000085	Latitude	GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000085	Latitude	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000085	Latitude	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		GDD definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.

BDT00000089	Longitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
BDTG00000225	Issued capital	GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
		Definition:	The monetary amount representing the value of the issued capital of a company.
BDTG00000225		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDT00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
BDTG00000231		GDD definition:	Description of the type of legal structure of the organisation.
		Definition:	The description of the legal structure expressed as text.
BDT00000659	Legal structure description content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000523		GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000524	Language code content	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.

		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city

Business data term groups

GS1 SDD; 1.0; Published

BDT00000019	City code	GDD definition: Definition: Remark: GDD name: GDD definition:	Text specifying the name of the city. The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can

		GDD name:	be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD definition:	streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.

BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000511	Energy product price calculation information	Definition:	The information specifying the details for the price calculation of energy products.
		Remark: GDD name: GDD comment:	Examples of energy products is gas and other kind of fuels. energyQuantity Specifies additional information for price calculation of energy products, e.g. gas, fuel.
BDT00000508	Price calculating factor	Definition: Usage: Example: GDD name: GDD definition:	The factor for calculating a price. The factor is used for price calculation of energy products. 2 countedMeasureandFactor Factor for price calculation.
BDT00000509	Standard condition conversion	Definition: Example: GDD name: GDD definition:	The ratio of a volume in standard condition to the volume in the operating state. 1.2 standardConditionConversion The ratio of a product volume (e.g. gas) in standard conditions to the volume in the operating state
BDT00000510	Calorific value	Definition: Example: GDD name: GDD definition:	The amount of heat liberated by the complete combustion of a certain amount of a fuel. 25.5 calorificValue The ratio of a product volume (e.g. gas) in standard conditions to the volume in the operating state
BDTG00000454	Estimated delivery period	Definition: GDD name: GDD comment:	The date period within which the goods are expected to be delivered. estimatedDeliveryPeriod Date time range in which the goods are expected to be delivered.
BDT00000009	Begin period date	Definition: GDD name: GDD definition:	The first date of a date period. beginDate Date specifying the first day for the date time range.
BDT00000010	Begin time period	Definition: GDD name: GDD definition:	The first point in time of a period of time or date period. beginTime Time specifying the start time for the date time range.
BDT00000054	End date period	Definition: GDD name: GDD definition:	The last date of a date period. endDate Date specifying the last day for the date time range.
BDT00000055	End time period	Definition: GDD name: GDD definition:	The end time of a period of time or date time period. endTime Time specifying the end time for the date time range.

BDTG00000161	European Union unique identifier type code	Definition:	The code specifying which type of EU unique identifier are used in a list of unique identified trade item units.
		Usage:	A list can contain the EU unique identifier for trade item units either as a) unit pack unique identifiers, upUI, or b) aggregated level unique identifiers, aUI. A list can contain also both types of the EU unique identifiers.
		Synonyms:	EU unique identifier type code
		GDD name:	euUniqueIDTypeCode
		GDD comment:	Identification of UI types covered by the purchase order (recorded at the highest level of available aggregation).
BDTG00000643	European Union unique identifier type code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:EuUniqueIDTypeCode
		Definition:	The code specifying which type of EU unique identifier are used in a list of unique identified trade item units.
		Example:	3
		Used code list:	EuUniqueIDTypeCode

		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
BDTG00000211	Financial routing number type code	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode

		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
		GDD comment:	A description used to provide any additional information about a financial institution.
BDT00000521	Additional financial institution description content	Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
BDTG00000523	Language code	GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.

BDT00000019	City code	GDD name: city GDD definition: Text specifying the name of the city. Definition: The code specifying a city. Remark: Should not be misunderstood as a postal code.
BDT00000034	County code	GDD name: cityCode GDD definition: Identifier for a city, expressed as a short code rather than the full name. Definition: The code indicating a geographical region in a country. GDD name: countyCode GDD definition: A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: The street crossing another street. GDD name: crossStreet GDD definition: A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: The name of the party expressed as text. GDD name: name GDD definition: The name of the party expressed in text.
BDT00000113	Post office box number	Definition: The number of a post office box located on the premises of a post office station or other postal service location. Synonyms: P.O. box, postal box GDD name: pOBoxNumber GDD definition: The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: The code according to the relevant postal system or service to specify a geographical area. Example: SE 190 90 Synonyms: postcode, post code, PIN Code, ZIP Code, Eircode GDD name: postalCode GDD definition: Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: The identity of a province according to national codes assigned to provinces. GDD name: provinceCode GDD definition: Text specifying a province in abbreviated format.
BDT00000127	State	Definition: The political unit that a country can be divided into. Example: California GDD name: state GDD definition: One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: The first street address line of a structured address. Example: Avenue Louise 326 Remark: Can be the name of a street and house number or the name of a building. GDD name: streetAddressOne GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: The second street address line of a structured address. Example: Blue Tower

BDT00000129	Street address three	Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDTG00000179	Country code	GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
		Example:	Floor 4
BDT00000774	Country code content	Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000028	Code list version	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000214	Geographical coordinates information	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDT00000085	Latitude	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG000000214	Geographical coordinates information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG000000214	Geographical coordinates information	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
BDTG00000085	Latitude	Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.

		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000786	First delivery date and time	Definition:	The first possible delivery date and time of a trade item.
		GDD name:	firstDeliveryDate
		GDD definition:	The first possible delivery date and time of a trade item.
BDT00000040	Date	Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
BDT00000133	Time	Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
BDTG00000212	Free goods quantity	Definition:	The quantity of free goods according to contract.
		GDD name:	freeGoodsQuantity
		GDD comment:	The quantity of free (not charged) goods as stated in contract.
BDT00000711	Free goods quantity content	Definition:	The quantity of free goods according to contract.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000213	Freight forwarder party information	Definition:	The information specifying details of the party that arranges carriage of goods including connected services such as preparing and processing customs documentation and performing activities pertaining to international shipments.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	freightForwarder
		GDD definition:	Party that arranges the carriage of goods including connected services and/or associated formalities on behalf of the shipper (consignor) or consignee.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.

		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDT00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A

BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000176	Communication information	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000175	Communication channel code	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000175	Communication channel code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000175	Communication channel code	Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
BDTG00000175	Communication channel code	GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode
BDTG00000175	Communication channel code	GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000175	Communication channel code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
BDTG00000175	Communication channel code	GDD name:	communicationValue
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
BDTG00000175	Communication channel code	Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000175	Communication channel code	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of communication channels to use after regular business hours.
BDTG00000175	Communication channel code	GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
		GDD name:	afterHoursCommunicationChannel
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDT00000032	Communication channel identification	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDT00000033	Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
		GDD name:	communicationChannelName
BDTG00000326	Tax registration information	GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
		Definition:	The information specifying details of a party registered for tax.
		GDD name:	dutyFeeTaxRegistration
BDT00000369	Tax authority name	GDD definition:	The registration details of a party related to a particular duty, tax or fee.
		Definition:	The name of the authority administrating the collection of taxes expressed as text.
		Remark:	There may be examples when a tax authority charges customs duties and other fees.
BDTG00000585	Tax registration identification information	GDD name:	dutyFeeTaxAgencyName
		GDD definition:	Agency responsible for the collection of this duty, fee or tax.
		Definition:	The information specifying details of the identity assigned to a party registered for tax according to a national tax register.
BDT00000584	Tax registration identification content	GDD name:	dutyFeeTaxRegistrationID
		GDD comment:	Identifier of the party for this particular duty, fee or tax.
		Definition:	The identity assigned to a party registered for tax according to a national tax register.
BDTG00000587	Identification scheme information	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The information specifying details of the used identification scheme.
BDT00000074	Identification scheme name	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
		Definition:	The name of the agency responsible for a identification scheme.
BDTG00000586	Identification scheme responsible agency code	GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
BDT00000583	Identification scheme responsible agency code content	GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
		Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode

		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
BDT00000129	Street address three	GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
BDT00000129	Street address three	Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000214	Geographical coordinates information	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDT00000089		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
BDT00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.

BDT00000459	Goods loading date time	GDD definition:	The estimated date and time of delivery at the ultimate consignee.
		Definition:	The date and optional time when the goods are loaded for transport.
		GDD name:	loadingDateTime
BDT00000460	Goods pick up date time	GDD definition:	The date and time when the goods are loaded for transport.
		Definition:	The date (and time) when the goods are picked up.
		GDD name:	pickUpDateTime
BDT00000461	Seller released goods date time	GDD definition:	Date/time at which the cargo is picked up.
		Definition:	The date and optional time when the seller released the goods.
		GDD name:	releaseDateTimeOfSupplier
		GDD definition:	Date/Time when the supplier released the goods.
BDTG00000454	Estimated delivery period	Definition:	The date period within which the goods are expected to be delivered.
		GDD name:	estimatedDeliveryPeriod
		GDD comment:	Date time range in which the goods are expected to be delivered.
BDT00000009	Begin period date	Definition:	The first date of a date period.
		GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
		GDD definition:	Time specifying the start time for the date time range.
BDT00000054	End date period	Definition:	The last date of a date period.
		GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
		GDD definition:	Time specifying the end time for the date time range.
BDTG00000462	Actual delivery date time	Definition:	The date and optional time when the goods were handed over to the goods recipient.
		GDD name:	actualDeliveryDate
		GDD definition:	The date when the goods were actually delivered to the Receiver.
BDT00000040	Date	Definition:	The day of a year as a calendar date.
		Example:	2020-06-15
		GDD name:	date
		GDD definition:	The specification of a day as calendar date.
BDT00000133	Time	Definition:	The indication of a point in time.
		Example:	08:01:15
		GDD name:	time
		GDD definition:	The specification of a point in time during the day.
BDTG00000502	Goods receiving party identification	Definition:	The identity of the party receiving goods.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
		GDD name:	receiver
		GDD definition:	A party who engages in receiving goods. In a commercial scenario this would be the customer.
BDT00000063	Global location number, GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.

Business data term groups

GS1 SDD; 1.0; Published

BDTG00000577	Additional party identification information	Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name: GDD definition:	gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000578	Additional party identification content	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000579	Additional party identification type code	GDD name: GDD definition:	additionalPartyIdentification A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDTG00000570	Additional party identification type code content	GDD name: GDD definition:	N/A N/A
		Definition:	The code specifying the additional identification type of the party.
BDTG0000028	Code list version	GDD name: GDD definition:	additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.

BDTG00000144	Address information	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000020	City name	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000019	City code	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000034	County code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000035	Cross street	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000106	Party name	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000106	Party name	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000113	Post office box number	Definition: The number of a post office box located on the premises of a post office station or other postal service location. Synonyms: P.O. box, postal box GDD name: pOBoxNumber GDD definition: The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: The code according to the relevant postal system or service to specify a geographical area. Example: SE 190 90 Synonyms: postcode, post code, PIN Code, ZIP Code, Eircode GDD name: postalCode GDD definition: Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: The identity of a province according to national codes assigned to provinces. GDD name: provinceCode GDD definition: Text specifying a province in abbreviated format.
BDT00000127	State	Definition: The political unit that a country can be divided into. Example: California GDD name: state GDD definition: One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: The first street address line of a structured address. Example: Avenue Louise 326 Remark: Can be the name of a street and house number or the name of a building. GDD name: streetAddressOne GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: The second street address line of a structured address. Example: Blue Tower Remark: Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. GDD name: streetAddressTwo GDD definition: streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. GDD definition: Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: The third street address line of a structured address. Example: Floor 4 Remark: Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number,

			GDD name:	suite name.
			GDD definition:	streetAddressTwo The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:		The third street address line of a structured address.
		Example:		Floor 4
		Remark:		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree	
		GDD definition:		The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:		The code specifying a country.
		GDD name:	countryCode	
		GDD comment:		Code specifying the country for the address.
		GDD comment:		The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:		The code specifying a country.
		Remark:		GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:		The version number of the code list.
		GDD name:	codeListVersion	
		GDD definition:		Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:		The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates	
		GDD comment:		Geographical coordinates for the address.
BDT00000085	Latitude	Definition:		The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:		23°26'12.2" S
		GDD name:	latitude	
		GDD definition:		Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:		The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.

		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDTG00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDTG00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000288	Registered legal information	Definition:	The information specifying the registered data on a legal entity in accordance with national law.

		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000020	City name	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000019	City code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.

Business data term groups

GS1 SDD; 1.0; Published

		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000114	Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
BDT00000117	Province identity	GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000128	Street address one	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to

		GDD definition:	locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDT00000085	Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition: Example: GDD name: GDD definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. 18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

BDTG00000215	GS1 global product classification information	Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
		GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
BDT00000067	GS1 global product classification GPC attribute type code	Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
		GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
BDT00000068	GS1 global product classification GPC attribute value code	Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
		Example:	3001082
		GDD name:	gpcAttributeValueCode
		GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
BDT00000064	Global product classification GPC attribute type name	Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
		Example:	Level of Fat Claim
		GDD name:	gpcAttributeTypeName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
BDT00000069	GS1 global product classification GPC attribute value name	Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
		Example:	FULL FAT
		GDD name:	gpcAttributeValueName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
BDTG00000216	GS1 global trade item number format and type of carrier information	Definition:	The information specifying details of the format and type of data carrier for a GS1 global trade item number, GTIN, of a trade item.
		Remark:	GTIN - GS1 global trade item number
		GDD name:	transactionalItemDataCarrierAndIdentification
		GDD definition:	Provides information about GS1 Identifier and Data Carriers associated with the trade item.
BDTG00000217	GS1 global trade item number format code	Definition:	The code specifying the format of a GS1 global trade item number.
		GDD name:	gs1TransactionalItemIdentificationKey
		GDD definition:	Specifies the type of GS1 Identification Key.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl

BDT00000646	GS1 global trade item number format code content	Definition:	GS1TradeItemIdentificationKeyCode The code specifying the format of a GS1 global trade item number.
		Example: Used code list: Link to code list:	GTIN_13 GS1TradeItemIdentificationKeyCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode&release=1
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000185	Data carrier type code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000185	Data carrier type code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying a type of data carrier.
BDTG00000185	Data carrier type code	Used code list:	DataCarrierTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDTG00000639	Data carrier type code content	GDD name:	dataCarrier
		GDD comment:	A means to represent data in a machine readable form.
BDTG00000639	Data carrier type code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDT00000028	Code list version	Definition:	The code specifying a type of data carrier.
		GDD name:	N/A
BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000217	GS1 global trade item number format code	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000217	GS1 global trade item number format code	Definition:	The code specifying the format of a GS1 global trade item number.
		GDD name:	gs1TransactionalItemIdentificationKey
BDTG00000217	GS1 global trade item number format code	GDD definition:	Specifies the type of GS1 Identification Key.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000217	GS1 global trade item number format code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode
		GDD comment:	GS1TradeItemIdentificationKeyCode
BDT00000646	GS1 global trade item number format code content	Definition:	The code specifying the format of a GS1 global trade item number.
		Example: Used code list: Link to code list:	GTIN_13 GS1TradeItemIdentificationKeyCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:GS1TradeItemIdentificationKeyCode&release=1
BDT00000646	GS1 global trade item number format code content	GDD name:	N/A

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000218	Handling instruction code	Definition:	The code specifying how the ordered trade items are to be handled and loaded.
		GDD name:	handlingInstructionCode
		GDD definition:	Code identifying handling instructions for this shipment, such as where or how specified packages or containers are to be loaded on a means of transport. Handling instructions can include haulage/ pickup and or delivery instruction/ temperature/humidity instructions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000647	Handling instruction code content	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:HandlingInstructionCode
		Definition:	The code specifying how the ordered trade items are to be handled and loaded.
		Used code list:	HandlingInstructionCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:HandlingInstructionCode
BDT00000028	Code list version	Remark:	Code list based on the UN/EDIFACT 4079.
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000219	Handling instruction description	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The handling instruction expressed as text.
		GDD name:	additionalHandlingInstruction

		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDT00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion

		GDD definition:	Identification of the applied version of the code list.
BDTG00000220	Height measurement	Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
		GDD name:	height
		GDD definition:	The vertical dimension from the lowest extremity to the highest extremity.
BDT00000650	Height measurement content	Definition:	The vertical dimension of an item from the lowest extremity to the highest extremity.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000587	Identification scheme information	Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000074	Identification scheme name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
		GDD definition:	The name of the identification scheme.
BDT00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
		GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
		GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.
BDT00000583	Identification scheme responsible agency code content	Definition:	The code specifying the agency responsible for the identification scheme.
		Used code list:	ResponsibleAgencyCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ResponsibleAgencyCode&release=5
		Remark:	The link to the code list to use seems to be missing in GDD??!!
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000827	Identity document information	Definition:	The details of the identity document of a person
		GDD name:	identityDocument
		GDD definition:	An identity document is any document which may be used to verify aspects of a person's personal identity or of a person's relationship with an organisation. If issued in the form of a small, mostly standard-sized card, it is usually called an identity card (IC).
BDT00000831	Identity document issuer	Definition:	The issuer of the identity document
		Example:	Burgemeester Brussels Capital
		GDD name:	identityDocumentIssuer
		GDD definition:	Text specifying the issuer of the identity document.
BDT00000828	Identity document number	Definition:	The unique identifier of the identity document, intended to identify a particular person.
		GDD name:	identityDocumentNumber
		GDD definition:	Unique identifier in this identity document, intended to identify a particular person.
BDTG00000829	Identity document type code	Definition:	The code specifying the type of identity document.
		GDD name:	identityDocumentType
		GDD comment:	Code specifying the type of identity document.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000830	Identity document type code content	Definition:	The code specifying the type of identity document.
		Example:	NATIONAL_IDENTITY_CARD
		Used code list:	IdentityDocumentTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:IdentityDocumentTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000484	Incomming goods storage location information	Definition:	The information specifying details of a location for incomming goods such as a warehouse or a store.
		Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDTG00000484	Incomming goods storage location information	GDD name:	inventoryLocationTo
		GDD definition:	Identification of the location where the incoming goods will be or have been stored. Allow specification of charges for warehouse services such as storage, re-palletisation, etc.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDT00000063	Global location number GLN	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000577	Additional party identification information	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
BDT00000578	Additional party identification content	GDD definition:	N/A
		GDD name:	N/A

BDT00000570	Additional party identification type code content	GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
BDT00000020	City name	GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
BDT00000034	County code	Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The code indicating a geographical region in a country.
BDT00000035	Cross street	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The street crossing another street.
BDT00000106	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
BDT00000113	Post office box number	GDD name:	name
		GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
BDT00000114	Postal code	GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.

BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1.

BDT00000028	Code list version	GDD name:	UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1.
		GDD definition:	GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000214	Geographical coordinates information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDT00000085	Latitude	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDT00000089	Longitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDTG00000158	Business contact information	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDT00000112	Person name	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000044	Department name	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
BDT00000083	Job title	GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000178	Contact type code	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDT00000571	Contact type code content	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
		Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		Definition:	The code specifying the function or role of a contact person.

BDTG00000214		Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
			GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDTG00000085		Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	23°26'12.2" S latitude Angular distance North or South from the earth's equator measured through 90 degrees.
BDTG00000089		Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example: GDD name: GDD definition:	18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225		Issued capital	Definition: GDD name: GDD definition:	The monetary amount representing the value of the issued capital of a company. issuedCapital The amount of the issued capital.
BDTG00000655		Issued capital content	Definition: GDD name: GDD definition:	The monetary amount representing the issued capital of a company. N/A N/A
BDTG00000590		Currency code	Definition:	The code specifying the currency of a monetary amount.

BDTG00000589	Currency code content	GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG0000028	Code list version	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDTG00000231	Legal structure description	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
		Definition:	The description of the legal structure expressed as text.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000028	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
BDTG00000288	Registered legal information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying the registered data on a legal entity in accordance with national law.
		GDD name:	legalRegistration
BDTG00000087	Legal registration number	GDD definition:	The registration details of an organisation in a particular legal register.
		Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
		GDD definition:	Unique identifier of the organization in the legal register.
BDTG00000086	Legal registration additional information	Definition:	The additional information related to the legal registration expressed as text.
		GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
		Definition:	The code specifying the type of legal registration.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationType
		GDD definition:	

			GDD definition:	Code specifying the type of legal register.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode
BDT00000658	Legal registration type code content	Definition:	The code specifying the type of legal registration.	
		Used code list:	LegalRegistrationCode	
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:LegalRegistrationCode	
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:	The version number of the code list.	
		GDD name:	codeListVersion	
		GDD definition:	Identification of the applied version of the code list.	
BDTG00000209	Financial institution and financial account information	Definition:	The information specifying details of a financial institution and financial account.	
		GDD name:	financialInstitutionInformation	
		GDD comment:	Information on the financial institution(s) where the party holds an account.	
BDT00000061	Financial institution name	Definition:	The name of a financial institution expressed as text.	
		GDD name:	financialInstitutionName	
		GDD definition:	The name of the account holder's financial institution.	
BDT00000060	Financial institution division name	Definition:	The name of a division or branch within a financial institution expressed as text.	
		GDD name:	financialInstitutionBranchName	
		GDD definition:	The name of a division or location of the account holder's financial institution.	
BDTG00000207	Financial account information	Definition:	The information specifying details of a financial account.	
		GDD name:	financialAccount	
		GDD comment:	Information identifying a client's financial account with a financial institution.	
BDT00000058	Financial account name	Definition:	The name of a financial account expressed as text.	
		Example:	John Doe	
		GDD name:	financialAccountName	
		GDD definition:	Text specifying the name of the financial account.	
BDT00000059	Financial account number	Definition:	The number of a financial account expressed as text.	
		GDD name:	financialAccountNumber	
		GDD definition:	Text specifying the number of the financial account.	
BDTG00000208	Financial account number type code	Definition:	The code specifying the type of a financial account number.	
		Used code list:	FinancialAccountNumberTypeCode	
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode	
		GDD name:	financialAccountNumberTypeCode	
		GDD definition:	Identifies the type of financial account number.	
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data	

BDT00000645	Financial account number type code content	GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode
		Definition:	The code specifying the type of a financial account number.
		Used code list:	FinancialAccountNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialAccountNumberTypeCode

		GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000210	Financial institution routing number information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a routing number of a financial institution.
BDT00000062	Financial routing number	GDD name:	financialRoutingNumber
		GDD comment:	Provides the Routing Number for the Financial Institution.
		Definition:	The routing number of a financial transaction according to the specified financial routing type.
		Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
BDTG00000211	Financial routing number type code	GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
		Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
BDT00000644	Financial routing number type code content	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDT00000028	Code list version	GDD comment:	Dictionary http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000028	Code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.

GS1 SDD; 1.0; Published

BDTG00000522	Additional financial institution description	Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
BDT00000521	Additional financial institution description content	GDD comment:	A description used to provide any additional information about a financial institution.
		Definition:	The text value describing the additional financial institution.
	Language code	GDD name:	N/A
BDTG00000523		GDD definition:	N/A
	Language code content	Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
	Code list version	GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
	City name	GDD comment:	Address of the party involved in the business transaction.
BDT00000020		Definition:	The name of the city, town or village.
	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
	County code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
	Cross street	GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035		Definition:	The street crossing another street.
	Party name	GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.

GS1 SDD; 1.0; Published

BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
BDTG00000089	Longitude	GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000221	Incoterms code	Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
		GDD name:	incotermsCode
		GDD comment:	Code specifying the incoterms. Incoterms is an abbreviation for International Commercial Terms. The International Chamber of Commerce manages the Incoterms codes and their definitions.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000649	Incoterms code content	Definition:	The code specifying an international rule for the interpretation of a commonly used trade terms in foreign trade.
		Used code list:	UN/ECE Recommendation 5

BDT00000065	Global returnable asset identifier, GRAI	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000304	Additional returnable asset identification information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000743	Additional returnable asset identification content	Definition:	The information specifying the identity of an individual piece of returnable packaging.
		Usage:	To identify a returnable asset, either of "BDT00000065 Global returnable asset identifier, GRAI" or "BDT00000743 Additional returnable asset identification content" is used, or both.
BDT00000065	Global returnable asset identifier, GRAI	GDD name:	individualReturnableAssetIdentification
		GDD comment:	The returnable asset identifier for an individual piece of returnable packaging.
BDTG00000304	Additional returnable asset identification information	Definition:	The identity according to the GS1 identification system for unique identification of returnable assets and including an optional serial number.
		Example:	GRAI: 07300015200154 GRAI including a serial number: 07300015200154000000000356
BDT00000743	Additional returnable asset identification content	Remark:	A returnable asset is a reusable package or transport equipment of a certain value such as a beer keg, a gas cylinder, a plastic pallet or a crate. The GS1 system identification of a returnable asset, the Global Returnable Asset Identifier (GRAI), enables tracking as well as recording of all relevant data. An optional serial number may be used to distinguish individual assets within a given asset type. The identification key is comprised of a GS1 Company Prefix, asset type, check digit, and optional serial number.
		GDD name:	grai
BDTG00000304	Additional returnable asset identification information	GDD definition:	The GS1 Identification Key used to identify Returnable Assets. The key comprises a GS1 Company Prefix, Asset Type, Check Digit, and optional serial number.
		GDD comment:	More information about the Global Returnable Asset Identifier can be found here: http://www.gs1.org/grai
BDTG00000304	Additional returnable asset identification information	Definition:	The information specifying the additional identification details of a returnable asset.
		Usage:	The identity is specified by another identification system than the GS1 Global returnable asset identifier GRAI. If used then one or more secondary identities of the returnable asset can be given in addition to or instead of a GS1 Global returnable asset identifier GRAI.
BDTG00000304	Additional returnable asset identification information	GDD name:	additionalReturnableAssetIdentification
		GDD definition:	The additional identification Key used to identify returnable assets.
BDTG00000304	Additional returnable asset identification information	Definition:	The additional identity of a returnable asset.
		GDD name:	N/A
BDTG00000304	Additional returnable asset identification information	GDD definition:	N/A

BDTG00000222	Installment due information	Definition:	The information specifying details on how a debt can be divided into several installments.
		GDD name:	InstallmentDue
		GDD comment:	Information on how the amount to be paid will be split into multiple parts.
		GDD comment:	in paymentTerms: Specifies the percentage amount of the payment due for a Payment Time Period.
BDT00000111	Percent of payment due	Definition:	The percentage of a payment due to be paid within a specified payment period.
		GDD name:	percentOfPaymentDue
		GDD definition:	Specifies the exact amount of the payment due this payment period. The amount is expressed as a percent.
BDTG00000273	Payment time period	Definition:	The date period applicable for a payment.
		GDD name:	paymentTimePeriod
		GDD comment:	Provides the payment time period information for the installment.
		GDD definition:	Information on a payment time period determining the applicability of the discount.
BDT00000109	Payment due date	Definition:	The date specifying when the payment is due.
		Example:	2021-04-19
		GDD name:	dateDue
		GDD definition:	Calendar date specifying when the payment is due.
BDT00000041	Day of month payment due	Definition:	The day of the month when payment is due.
		GDD name:	dayOfMonthDue
		GDD definition:	The time at which a payment is due, expressed as a day of the month.
BDTG00000330	Time period due code	Definition:	The code specifying a time period within which payment is to be made.
		GDD name:	timePeriodDue
		GDD definition:	Measurement specifying the duration of the period within which the payment is due, for example within 10 days.
BDT00000651	Time period due code content	Definition:	The code specifying a time period within which payment is to be made.
		Example:	WEE
		Used code list:	TimeMeasurementUnitCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TimeMeasurementUnitCode

BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020	City name	Definition: GDD name: GDD definition:	The name of the city, town or village. city Text specifying the name of the city.
BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90

BDT00000117	Province identity	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000130	Street address two	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000129	Street address three	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDTG00000179	Country code	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

BDT00000028	Code list version	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000144	Address information	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000020	City name	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000117	Province identity	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode

BDT00000127	State	GDD definition: Definition: Example: GDD name: GDD definition:	Text specifying a province in abbreviated format. The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.

BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.

BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S

BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDT00000158	Business contact information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.

BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000020	City name	Definition: GDD name: GDD definition:	The name of the city, town or village. city Text specifying the name of the city.
BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90

BDT00000117	Province identity	Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000127	State	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
BDT00000128	Street address one	GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000130	Street address two	Definition:	The political unit that a country can be divided into.
		Example:	California
BDT00000129	Street address three	GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDTG00000179	Country code	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
		Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org

		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.

		Example: Used code list:	en ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
		GDD comment:	Address of the party involved in the business transaction.
BDT00000020	City name	Definition:	The name of the city, town or village.
		GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition:	The name of the party expressed as text.
		GDD name:	name
		GDD definition:	The name of the party expressed in text.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000117	Province identity	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode

BDT00000127	State	GDD definition: Definition: Example: GDD name:	Text specifying a province in abbreviated format. The political unit that a country can be divided into. California state
BDT00000128	Street address one	GDD definition: Definition: Example: Remark: GDD name: GDD definition:	One of the constituent units of a nation having a federal government. The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
BDT00000129	Street address three	Definition: Example: Remark: GDD name: GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building. The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.

		GDD name:	currencyCode
BDTG00000590	Currency code	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000589	Currency code content	GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
BDT00000589	Currency code content	Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000636	Total invoice retail monetary amount value	GDD definition:	Identification of the applied version of the code list.
		Definition:	The total retail value of invoiced trade items as a monetary amount.
BDTG00000636	Total invoice retail monetary amount value	Usage:	The total invoice retail monetary amount value is for information only and should not be included in any calculation of other monetary amounts. Relevant information in some markets for products, such as tobacco products and books, which has a regulated price.
		Remark:	The total invoice retail value monetary amount of the invoiced trade items is the monetary amount summation calculated using the price to be paid by the consumer for each trade item multiplied by the invoiced quantity for each invoiced trade item. The total invoice retail value monetary amount includes all applicable taxes such as excise tax and taxes applicable to the sales transaction, such as sales tax, goods and services tax (GST) and value added tax (VAT).
BDTG00000636	Total invoice retail monetary amount value	GDD name:	totalRetailValue
		GDD definition:	Total amount calculated as sales price x invoiced quantity. Required for products with regulated price, such as cigarettes or books.
BDT00000637	Total invoice retail monetary amount value content	Definition:	The total retail value of invoiced trade items as a monetary amount.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
BDTG00000590	Currency code	GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
BDTG00000590	Currency code	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.

		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000724	Rounding monetary amount	Definition:	The amount to be added to the invoice total to round the amount to be paid
		Usage:	To be used when the issuer of the invoice can only handle "BDTG00000418 Invoice monetary amount payable" which is rounded off.
		GDD name:	roundingAmount
		GDD definition:	The rounding monetary amount.
BDT00000749	Rounding monetary amount content	Definition:	The rounding monetary amount.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000440	Invoiced tax information	Definition:	The information specifying the tax details regarding the invoiced trade items and charges and allowances.
		Remark:	The business data term group is repeated for each invoiced tax rate if more than one tax rate is applicable to the invoiced trade item or any charge or allowance at document level.
		GDD name:	taxSubtotal
		GDD definition:	The Tax sub total specifies the total tax amounts for each tax rate.
BDT00000369	Tax authority name	Definition:	The name of the authority administrating the collection of taxes expressed as text.
		Remark:	There may be examples when a tax authority charges customs duties and other fees.
		GDD name:	dutyFeeTaxAgencyName
		GDD definition:	Agency responsible for the collection of this duty, fee or tax.
BDT00000377	Tax point date	Definition:	The date on which the tax applicable for the sales transaction is due or calculated.
		GDD name:	dutyFeeTaxPointDate
		GDD definition:	Date at which a tax becomes applicable.
BDT00000371	Tax rate	Definition:	The rate of the tax expressed in percentages.
		Usage:	The tax rate is used to calculate the tax monetary amount.

BDTG00000768 BDT00000766	Tax point date type code Tax point date type code content	GDD name:	dutyFeeTaxPercentage
		GDD definition:	Percentage allowing calculation of the amount being charged.
BDT00000028	Code list version	Definition:	The code representing the tax point date type
		Definition:	The type of the date on which the tax applicable for the sales transaction is due or calculated.
BDTG00000328	Tax type code	Example:	3 = Invoice date/time
		Used code list:	Date Or Time Or Period Function Code Qualifier

BDTG00000203	Dynamic trade item information	Definition:	The information specifying the details of dynamic characteristics of individual instances of a trade item.
		Example:	Best before date, batch number and serial number are examples of dynamic characteristics of an individual instance of a trade item.
		GDD name:	transactionalItemData
		GDD comment:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The date when a trade item is available for sale.
BDT00000007	Available for sale date	GDD name:	availableForSaleDate
		GDD definition:	Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
		Definition:	The identification number of the production batch that relates to a date and time for the production of a product.
		Remark:	A combination of numbers and/or letters from which the production batch can be determined.
		GDD name:	batchNumber
		GDD definition:	A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
		GDD comment:	The identity of the production batch (lot), that can be related to the point of time for the production.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000011	Best before date	Definition:	The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer.
		GDD name:	bestBeforeDate
BDTG00000180	Country of origin	GDD definition:	The date before which the product is best used or consumed. It is a statement about quality.
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
BDT00000057	Expiration date	GDD name:	countryOfOrigin
		GDD comment:	Country from which the goods are supplied.
BDT00000090	Lot number	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The date after which the product should not be used or consumed.
BDT00000104	Packaging date	GDD name:	itemExpirationDate
		GDD definition:	The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
BDT00000116	Production date	Definition:	The identification number for a lot consisting of products produced within different production batches.
		GDD name:	lotNumber
BDT00000120	Sell by date	GDD definition:	A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
		Definition:	The date on which a product is placed in a container or package.
BDT00000121	Serial number	GDD name:	packagingDate
		GDD definition:	The date on which the packaging of a product took place.
BDT00000122	Shelf life	Definition:	The date the product was produced.
		GDD name:	productionDate
BDT00000123		GDD definition:	The date that the product was produced.
		Definition:	The date after which the product should not be sold.
BDT00000124		GDD name:	sellByDate
		GDD definition:	The date before or on which, the product should be sold.
BDT00000125		Definition:	The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique.
		Usage:	The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
BDT00000126		GDD name:	serialNumber
		GDD definition:	A unique identifier assigned to a specific trade item.
BDT00000127		Definition:	The length of time a product can be stored and remain suitable for its intended function expressed as text.
		Example:	1 year
BDT00000128		GDD name:	shelfLife
		GDD definition:	The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function

Business data term groups

GS1 SDD; 1.0; Published

BDT00000082	Item in contact with food product indicator	Definition: Example: Used code list: GDD name: GDD definition:	The code indicating if the trade item can be in contact with food products. NO Available codes: "YES" and "NO" itemInContactWithFoodProduct States weather or not the trade item can come into contact with food products.
BDTG00000235	Logistic unit packaging pattern information	Definition: GDD name: GDD comment:	The information specifying the packaging of the logistic unit. transactionalItemLogisticUnitInformation Specifies packaging parameters for transport and storage purposes.
BDT00000095	Number of layers	Definition: Example: Remark: GDD name: GDD definition:	The number of layers of packages in a package. 3 To discuss: GDSN has been changed. Is numberOfLayers to be understood as the attribute quantityOfLayersPerPallet in GDSN? quantityOfLayersPerPallet = The number of layers that a pallet contains. Only used if the pallet has no GTIN. It indicates the number of layers that a pallet contains, according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfLayers Number of layers of a product or products within a package, container, pallet, etc
BDT00000096	Number of units per layer	Definition: Remark: GDD name: GDD definition:	The number of packs per layer in a package. To process: GDSN has been changed regarding this kind of informatio, but the EDI messages have not changed. Is numberOfUnitsPerLayer to be understood as the attribute quantityOfTradeItemsPerPalletLayer in GDSN? quantityOfTradeItemsPerPalletLayer = The number of trade items contained on a single layer of a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet layer according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerLayer Number of units of a product or package within one layer of a package, container, pallet, etc.
BDT00000097	Number of units per platform	Remark: GDD name:	To process: GDSN has been changed. "Pallet" have sometimes been replaced by "platform". Is numberOfUnitsPerPallet to be understood as the attribute quantityOfTradeItemsPerPallet in GDSN? quantityOfTradeItemsPerPallet = The number of trade items contained in a pallet. Only used if the pallet has no GTIN. It indicates the number of trade items placed on a pallet according to supplier or retailer preferences. Should this Business data term be harmonised with GDSN? See TradeItemHierarchyModule in GDSN. numberOfUnitsPerPallet

BDT00000091	Maximum stacking factor	GDD definition:	The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
		Definition:	The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product.
		Example:	3
		Remark:	Please give a comment: GDSN have changed "stackning information" and is not longer using maximumStackingFactor . stackingFactor in class TradeItemStacking is used instead. Should this Business data term be harmonised with GDSN?
BDTG00000265	Packaging terms and conditions code	GDD name:	maximumStackingFactor
		GDD definition:	A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
BDT00000663	Packaging terms and conditions code content	Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
		GDD name:	packagingTerms
		GDD comment:	Specifies packaging terms and conditions.
		Definition:	The code specifying the terms and conditions that apply to the packaging of the logistic unit.
BDT00000028	Code list version	Used code list:	PackagingTermsAndConditionsCode

BDTG00000639	Data carrier type code content	GDD name:	dataCarrier
		GDD comment:	A means to represent data in a machine readable form.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:DataCarrierTypeCode
BDTG00000028	Code list version	Definition:	The code specifying a type of data carrier.
		GDD name:	N/A
		GDD definition:	N/A
		GDD definition:	Identification of the applied version of the code list.
BDTG00000345	Trade item waste information	Definition:	The information specifying details of the waste generated by the trade item.
		GDD name:	tradeItemWaste
		GDD definition:	Provides details of waste generated by the trade item.
		GDD definition:	Provides details of waste generated by the trade item.
BDTG00000138	Waste identification	Definition:	The identity for a type of waste according to the GS1 identification system for unique identification of products and services.
		Example:	04098765000119
		GDD name:	wasteIdentification
		GDD definition:	The number identifying the type of waste.
BDTG00000359	Waste type code	GDD comment:	More information about the Global Trade Item Number can be found here: http://www.gs1.org/gtin
		Definition:	The information specifying the details of the code specifying the type of waste.
		GDD name:	typeOfWaste
		GDD comment:	Provides code and description of waste type according to required classification scheme.
BDTG00000702	Waste type code content	Definition:	The code specifying the type of waste.
		GDD name:	N/A
		GDD definition:	N/A
		GDD definition:	N/A
BDTG00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		GDD definition:	A description for the code value provided.
BDTG00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDTG00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000025	Code list agency name	Definition: GDD name: GDD definition:	The name of the agency responsible for a code list. codeListAgencyName A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition: GDD name: GDD definition:	The name of the code list expressed as text. codeListName The name of the code list which provides the code value.
BDT00000027	Code list URL	Definition: Remark: GDD name: GDD definition: GDD comment:	The character string that identifies the location of the code list in a network. Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list. codeListURI A string that refers to the location of the code list which provides the code value. URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000338	Trade item organic information	Definition: GDD name: GDD definition:	The information specifying organic data for a trade item. transactionalItemOrganicInformation Provides information about whether or not the trade item is organic, with optional organic certification information.
BDT00000081	Trade item organic indicator	Definition: Example: Used code list: GDD name: GDD definition:	The code indicating if the trade item is claimed to be organic. NO Available codes: "YES" and "NO" isTradeItemOrganic Information about whether or not the trade item is organic.
BDTG00000261	Organic certification information	Definition: GDD name: GDD comment:	The information specifying the certificate for a trade item which claims the product to be organic. organicCertification Specifies information about the organic trade item certification.
BDT00000017	Certification value	Definition: Example: GDD name: GDD definition:	The certification value. need an reliable example itemCertificationValue The product's certification standard value. E.g. DE-OKO-006
BDT00000015	Certification agency name	Definition: GDD name: GDD definition:	The name of the organization issuing a certification as a confirmation that certain requirements have been met. itemCertificationAgency Name of the organization issuing the certification standard or other requirement being met.
BDT00000016	Certification standard name	Definition: Example: GDD name: GDD definition:	The name of the certification standard expressed as text. GlobalGAP itemCertificationStandard Name of the certification standard. Free text. Example: Organic product.
BDTG00000174	Colour information	Definition: GDD name: GDD comment:	The information specifying the colour of a trade item. colour Information specifying the colour of the trade item.
BDTG00000172	Colour code	Definition:	The code specifying the colour of an object or a product according to a colour system.

		GDD name:	colourCode
		GDD definition:	A code depicting the colour of an object according to a specified list of code lists. Each industry needs to determine which code agency is will use.
BDT00000736	Colour code content	Definition:	The code specifying the colour of an object or a product according to a colour system.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000029	Colour code system code	Definition:	The code specifying the colour coding system.
		Example:	10
		Used code list:	ColourCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
		GDD name:	colourCodeListCode
		GDD definition:	Code specifying a colour code list. Allowed code values are specified in GS1 Code List ColourCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ColourCodeListCode
BDT00000030	Colour code system description	Definition:	The description of the colour code system expressed as text.
		Example:	National Retail Federation – Standard Colour & Size Codes
		GDD name:	colourCodeListDescription
		GDD definition:	A description of the colour code list used to populate the colour code, for example National Retail Federation – Standard Colour & Size Codes.
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000031	Colour code system version	Definition:	The version number of the colour code system.
		GDD name:	colourCodeListVersion
		GDD definition:	The version of the ColourCodeListCode code list.
BDTG00000173	Colour description	Definition:	Colour descriptionThe description of a colour expressed as text.
		Usage:	Only used if no coded value for the colour is available using the business data term Colour code.
		GDD name:	colourDescription
		GDD comment:	A description of a colour of an object.
BDT00000737	Colour description content	Definition:	The description of a colour expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000028	Code list version	GDD definition:	A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
		Definition:	The version number of the code list.
BDT00000125	Size code list version	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000334	Trade item classification information	Definition:	The version number of the code list of the size code system.
		GDD name:	sizeCodeListVersion
BDTG00000334	Trade item classification information	GDD definition:	The applied version of the SizeCodeListCode code list.
		Definition:	The information specifying the product classification of a trade item.
BDT00000070	GS1 global product classification GPC brick code	GDD name:	tradeItemClassification
		GDD comment:	Information specifying the product class to which a trade item belongs and the classification system being applied.
BDT00000070	GS1 global product classification GPC brick code	Definition:	The code specifying the product category of similar products according to GS1 global product classification standard GPC.
		Business rule:	According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
BDT00000071	GS1 global product classification GPC brick name	Example:	10000025
		GDD name:	gpcCategoryCode
BDT00000071	GS1 global product classification GPC brick name	GDD definition:	Code specifying a product category according to the GS1 Global Product Classification (GPC) standard.
		Definition:	The name of the product category of similar products according to GS1 global product classification standard GPC.
BDTG00000155	Alternative trade item product classification code	Business rule:	To be used in conjunction with the business data term "GS1 global product classification brick code". (Is this a Business rule or a Usage rule?)
		Example:	Milk
BDTG00000155	Alternative trade item product classification code	GDD name:	gpcCategoryName
		GDD definition:	Name associated with the specified Global Product Classification (GPC) category code.
BDTG00000155	Alternative trade item product classification code	Definition:	The information specifying the details of the alternative trade item product classification code.
		Usage:	The product classification system is an alternative to the GS1 Global Product Classification standard.
BDT00000536	Alternative trade item product classification code content	GDD name:	additionalTradeItemClassificationCode
		GDD definition:	Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC).
BDT00000536	Alternative trade item product classification code content	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		Definition:	The code specifying the product classification of a trade item according to an alternative product classification system.
BDT00000002	Additional trade item classification scheme code	GDD name:	N/A
		GDD definition:	N/A
BDT00000002	Additional trade item classification scheme code	Definition:	The code specifying the classification scheme used for an additional classification of a trade item.
		Usage:	Meant to be used in addition to GS1 Global Product Classification standard.

BDT00000003		Example:	5
		Used code list:	AdditionalTradeItemClassificationCodeListCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD name:	additionalTradeItemClassificationCodeListCode
BDT00000022	Additional trade item classification scheme version	GDD definition:	Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalTradeItemClassificationCodeListCode
		GDD comment:	Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000028	Code description	Definition:	The version number of the classification scheme used for additional trade item classification.
		Example:	9
		GDD name:	additionalTradeItemClassificationCodeListVersion
		GDD definition:	The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
BDT00000028	Code list version	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
		Definition:	The version number of the code list.
BDTG00000215	Global Product Classification attributes	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC.
		Usage:	The class is optional to use. The class can be repeated for a trade item if the trade item has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
BDT00000067	GS1 global product classification GPC attribute type code	GDD name:	gpcAttribute
		GDD definition:	Contains information which identifies the GPC classification attribute for a trade item.
		Definition:	The code specifying the type of attribute according to GS1 global product classification standard GPC.
		Example:	20000123
BDT00000068	GS1 global product classification GPC attribute value code	GDD name:	gpcAttributeTypeCode
		GDD definition:	Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.
		Definition:	The code specifying the attribute value according to GS1 global product classification standard GPC.
		Usage:	Used in conjunction with the attribute type to further characterise the product specified by the brick.
		Example:	3001082

BDT00000064	Global product classification GPC attribute type name	GDD name:	gpcAttributeValueCode
		GDD definition:	The GS1 provided code which identifies the Global Product Classification Attribute Value.
BDT00000069	GS1 global product classification GPC attribute value name	Definition:	The name of the attribute type according to GS1 global product classification standard GPC.
		Example:	Level of Fat Claim
BDT00000069	GS1 global product classification GPC attribute value name	GDD name:	gpcAttributeTypeName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Code.
BDT00000069	GS1 global product classification GPC attribute value name	Definition:	The name of the attribute value according to GS1 global product classification standard GPC.
		Example:	FULL FAT
BDTG00000452	Invoicing period	GDD name:	gpcAttributeValueName
		GDD definition:	The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.
BDTG00000452	Invoicing period	Definition:	The period over which the supply of trade items are debited.
		GDD name:	invoicingPeriod
BDT00000009	Begin period date	GDD comment:	Period for which an invoice is issued.
		Definition:	The first date of a date period.
BDT00000010	Begin time period	GDD name:	beginDate
		GDD definition:	Date specifying the first day for the date time range.
BDT00000010	Begin time period	Definition:	The first point in time of a period of time or date period.
		GDD name:	beginTime
BDT00000054	End date period	GDD definition:	Time specifying the start time for the date time range.
		Definition:	The last date of a date period.
BDT00000054	End date period	GDD name:	endDate
		GDD definition:	Date specifying the last day for the date time range.
BDT00000055	End time period	Definition:	The end time of a period of time or date time period.
		GDD name:	endTime
BDTG00000225	Issued capital	GDD definition:	Time specifying the end time for the date time range.
		Definition:	The monetary amount representing the value of the issued capital of a company.
BDTG00000225	Issued capital	GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDT00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
BDTG00000590	Currency code	GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
BDTG00000590	Currency code	GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
BDTG00000590	Currency code	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
BDT00000589	Currency code content	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .

BDT00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000886	Item owner identification information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000886	Item owner identification information	GDD definition:	Identification of the applied version of the code list.
BDT00000063	Global location number GLN	Definition:	The information specifying the identification of the owner of the item
		GDD name:	itemOwner
BDT00000063	Global location number GLN	GDD definition:	Indicates who is the owner of the Trade Item.
BDTG00000577	Additional party identification information	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000577	Additional party identification information	GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDTG00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDTG00000578	Additional party identification content	Definition:	The additional identity of a party.
BDTG00000579	Additional party identification type code	GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
BDTG00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDTG00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
BDTG00000570	Additional party identification type code content	Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000256	Item packaging instructions information	Definition:	The information specifying instructions for the packaging of a trade item.
		GDD name:	orderPackagingInstructions

BDT00000077	Surveillance equipment request indicator	GDD definition:	Instructions for the packaging of the item ordered.
		Definition:	The code indicating if electronic article surveillance equipment is requested to be attached to the trade item.
		Example:	NO
		Used code list:	Available codes: "YES" and "NO"
BDTG00000340	Trade item price for labelling	GDD name:	isArticleSurveillanceEquipmentRequired
		GDD definition:	Specifies whether article surveillance (e.g. security tag) should be placed on the packaging.
		Definition:	The price which should be marked on each unit of the trade item.
		Example:	13.50
BDT00000677	Trade item price for labelling content	GDD name:	itemPriceForLabelling
		GDD definition:	Identifies the price of the item that needs to be labelled on a packaging item.
		Definition:	The price which should be marked on each unit of the trade item.
BDTG00000590	Currency code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDT00000589	Currency code content	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
BDT00000028	Code list version	Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000143	Additional trade item label text	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional text to be printed on the label of the trade item.
BDT00000520	Additional trade item label text content	GDD name:	additionalLabelText
		GDD definition:	Provides text information that should be printed on the item label.
		Definition:	The additional text to be printed on the trade item label.
BDTG00000523	Language code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the language.
		GDD name:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.

BDTG00000028	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000242	Line item net monetary amount	Definition:	The line item net monetary amount of the trade item.
		Remark:	The line item net monetary amount is calculated by multiplying the requested quantity by the net price of the trade item. "BDTG00000296 Requested quantity" x "BDTG00000243 Net price" = "BDTG00000242 Line item net monetary amount"
BDTG00000242	Line item net monetary amount	GDD name:	netAmount
		GDD comment:	The line item net monetary amount is exclusive of all taxes.
BDTG00000660	Line item net monetary amount content	GDD definition:	Identifies the total net amount of the line item.
		Definition:	The line item net monetary amount of the trade item.
BDTG00000660	Line item net monetary amount content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
BDTG00000590	Currency code	GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org

BDT00000589	Currency code content	GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
		Definition:	The code specifying the currency of a monetary amount.
BDT00000028	Code list version	Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000887	Location of last processing information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000887	Location of last processing information	Definition:	The information of the location in which the trade item was processed or transformed.
		GDD name:	locationOfLastProcessing
		GDD definition:	The name and address of the last processing location in which the trade item was processed or transformed.
BDTG00000888	Party identification information	Definition:	The information specifying the identification details of a party.
		GDD name:	partyIdentification
BDT00000063	Global location number GLN	GDD definition:	Provides the location's Global Location Number and additional identifications.
		Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
BDTG00000577	Additional party identification	GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
		Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDT00000578	Additional party identification content	GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
		Definition:	The additional identity of a party.
BDTG00000579	Additional party identification type code	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The code specifying the additional identification type of the party.
BDT00000570	Additional party identification type code content	GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
		Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:qdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A

BDT00000028	Code list version	GDD definition: N/A Definition: The version number of the code list. GDD name: codeListVersion
BDTG00000184	Currency of party code	GDD definition: Identification of the applied version of the code list. Definition: The code specifying the currency of a party. Example: EUR Used code list: ISO 4217 three-letter codes or equivalent representation in specific syntax. GDD name: currencyOfPartyCode GDD comment: Code specifying the currency of an addressed party. GDD comment: The ISO 4217 code list can be acquired from the following website: www.iso.org
BDT00000710	Currency of party code content	Definition: The code specifying the currency of a party. Example: EUR Used code list: ISO 4217 three-letter codes or equivalent representation in specific syntax. Link to code list: https://www.iso.org/iso-4217-currency-codes.html GDD name: N/A GDD definition: N/A
BDT00000028	Code list version	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000228	Language of the party code	Definition: The code specifying the language of a party. GDD name: languageOfThePartyCode GDD definition: Code specifying the language of an addressed party. GDD comment: The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000524	Language code content	Definition: The code specifying the language. Example: en Used code list: ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org . GDD name: languageCode GDD definition: A code representing the language used in the description. GDD comment: The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDT00000028	Code list version	Definition: The version number of the code list. GDD name: codeListVersion GDD definition: Identification of the applied version of the code list.
BDTG00000144	Address information	Definition: The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail. GDD name: address GDD comment: Address of the party involved in the business transaction.
BDT00000020	City name	Definition: The name of the city, town or village. GDD name: city GDD definition: Text specifying the name of the city.
BDT00000019	City code	Definition: The code specifying a city. Remark: Should not be misunderstood as a postal code. GDD name: cityCode GDD definition: Identifier for a city, expressed as a short code rather than the full name.

BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: Example: Remark: GDD name: GDD definition:	The second street address line of a structured address. Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line

			GDD definition:	below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			Definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three		Definition:	The third street address line of a structured address.
			Example:	Floor 4
			Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
			GDD name:	streetAddressThree
			GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code		Definition:	The code specifying a country.
			GDD name:	countryCode
			GDD comment:	Code specifying the country for the address.
			GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content		Definition:	The code specifying a country.
			Remark:	GS1 XML EDI transaccional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
			GDD name:	N/A
			GDD definition:	N/A
BDT00000028	Code list version		Definition:	The version number of the code list.
			GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information		Definition:	The information specifying details on a location using geographical coordinates.
			GDD name:	geographicalCoordinates
			GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
			Example:	23°26'12.2" S
			GDD name:	latitude
			GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
			Example:	18°3'59.0616"
			GDD name:	longitude
			GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDTG00000112	Person name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDTG00000044	Department name	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000083	Job title	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000178	Contact type code	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
		GDD name:	contactTypeCode
		GDD comment:	Code specifying the function or role of a contact.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:ContactTypeCode
BDTG00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000159	Business contact responsibility description	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
		GDD comment:	Text further specifying the area of responsibility of the trade contact.
BDTG00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode

BDT00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000176	Communication information	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000175	Communication channel code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
BDTG00000175	Communication channel code	GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDTG00000175	Communication channel code	GDD name:	communicationChannelCode
		GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
BDTG00000175	Communication channel code	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDT00000033	Communication channel name	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.
		Definition:	The name of a communication channel expressed as text.
BDTG00000145	After hours communication information	GDD name:	communicationChannelName
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000175	Communication channel code	Definition:	The information specifying details of communication channels to use after regular business hours.
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.
BDTG00000175	Communication channel code	GDD name:	afterHoursCommunicationChannel
		Definition:	The code specifying the channel for communication.
BDTG00000175	Communication channel code	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD name:	communicationChannelCode

		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
BDTG00000175	Communication channel code	GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
		GDD comment:	CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.
		GDD name:	communicationValue
BDT00000032	Communication channel identification	GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or

BDT00000033	Communication channel name	Definition:	an e-mail address.
		GDD name:	The name of a communication channel expressed as text.
		GDD definition:	communicationChannelName
			The name of a specific communication channel for example Facebook, Twitter, etc
BDTG00000889	Location of origin information	Definition:	The information of the location of origin in which the goods have been produced or manufactured
		Remark:	The name and address of location of origin in which the goods have been produced or manufactured, according to criteria laid down for the purposes of application of the Customs tariff, of quantitative restrictions, or of any other measure related to trade.
		GDD name:	locationOfOrigin
		GDD definition:	The name and address of location of origin in which the goods have been produced or manufactured, according to criteria laid down for the purposes of application of the Customs tariff, of quantitative restrictions, or of any other measure related to trade.
BDTG00000888	Party identification information	Definition:	The information specifying the identification details of a party.
		GDD name:	partyIdentification
		GDD definition:	Provides the location's Global Location Number and additional identifications.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570	Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
		Used code list:	AdditionalPartyIdentificationTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
		GDD name:	N/A
		GDD definition:	N/A

BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: Example: Remark: GDD name: GDD definition:	The first street address line of a structured address. Avenue Louise 326 Can be the name of a street and house number or the name of a building. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.

BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S

BDT00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
BDTG00000158	Business contact information	Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDT00000112	Person name	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
		GDD comment:	Person or department that can be contacted regarding the business transaction.
BDT00000044	Department name	Definition:	The name of an individual person expressed as text.
		GDD name:	personName
		GDD definition:	The name of the individual that can be contacted to provide additional information.
BDT00000083	Job title	Definition:	The name of the department.
		GDD name:	departmentName
		GDD definition:	The name of the department that can be contacted to provide additional information.
BDTG00000178	Contact type code	Definition:	The title of a position or the role of a person holding the position.
		GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDT00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.

BDTG00000102	Organisation name	Definition:	The information specifying details of a legal organisation.
		GDD name:	organisationDetails
		GDD comment:	Information about the legal organisation of the party involved in the business transaction.
BDTG00000228	Language of the party code	Definition:	The official and legal name of the organisation.
		GDD name:	organisationName
		GDD definition:	The official name of the organisation.
BDTG00000524	Language code content	Definition:	The code specifying the language of a party.
		GDD name:	languageOfThePartyCode
		GDD definition:	Code specifying the language of an addressed party.
BDT00000524	Language code content	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying the language.
		Example:	en
BDTG00000028	Code list version	Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDTG00000184	Currency of party code	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000184	Currency of party code	GDD definition:	Identification of the applied version of the code list.
		Definition:	The code specifying the currency of a party.
		Example:	EUR
BDTG00000184	Currency of party code	Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.

BDT00000710	Currency of party code content	GDD name:	currencyOfPartyCode
		GDD comment:	Code specifying the currency of an addressed party.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		Definition:	The code specifying the currency of a party.
BDT00000028	Code list version	Example:	EUR
		Used code list:	ISO 4217 three-letter codes or equivalent representation in specific syntax.
		Link to code list:	https://www.iso.org/iso-4217-currency-codes.html
		GDD name:	N/A
BDTG00000246	Official address	GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDT00000034	County code	Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
		Definition:	The code indicating a geographical region in a country.
BDT00000020	City name	GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
		Definition:	The name of the city, town or village.
		GDD name:	city
BDT00000019	City code	GDD definition:	Text specifying the name of the city.
		Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
BDT00000035	Cross street	GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
		Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000113	Post office box number	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000117	Province identity	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.

BDTG00000210	Financial institution routing number information	Definition: GDD name: GDD comment:	The information specifying details on a routing number of a financial institution. financialRoutingNumber Provides the Routing Number for the Financial Institution.
BDT00000062	Financial routing number	Definition:	The routing number of a financial transaction according to the specified financial routing type.

BDTG00000211	Financial routing number type code	Business rule:	This business data term must be used in conjunction with the Financial routing number type code class.
		GDD name:	financialRoutingNumber
		GDD definition:	Number assigned to a transaction in financial routing between parties. The number is determined by and used in conjunction with the type of routing, e.g. SWIFT, ABA, CHIPS.
		Definition:	The code specifying the type of a financial routing number.
BDT00000644	Financial routing number type code content	Used code list:	FinancialRoutingNumberTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	financialRoutingNumberTypeCode
		GDD definition:	Code specifying the type of financial routing, e.g. SWIFT.
BDT00000028	Code list version	GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		Definition:	The code specifying the type of a financial routing number.
		Used code list:	FinancialRoutingNumberTypeCode
BDTG00000522	Additional financial institution description	Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:FinancialRoutingNumberTypeCode
		GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
BDT00000521	Additional financial institution description content	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The additional description of a financial institution expressed as text.
		GDD name:	additionalFinancialInformation
BDTG00000523	Language code	GDD comment:	A description used to provide any additional information about a financial institution.
		Definition:	The text value describing the additional financial institution.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org

BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000144	Address information	Definition: GDD name: GDD comment:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail. address Address of the party involved in the business transaction.
BDT00000020	City name	Definition: GDD name: GDD definition:	The name of the city, town or village. city Text specifying the name of the city.
BDT00000019	City code	Definition: Remark: GDD name: GDD definition:	The code specifying a city. Should not be misunderstood as a postal code. cityCode Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition: GDD name: GDD definition:	The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition: GDD name: GDD definition:	The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000106	Party name	Definition: GDD name: GDD definition:	The name of the party expressed as text. name The name of the party expressed in text.
BDT00000113	Post office box number	Definition: Synonyms: GDD name: GDD definition:	The number of a post office box located on the premises of a post office station or other postal service location. P.O. box, postal box pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: Example: Synonyms: GDD name: GDD definition:	The code according to the relevant postal system or service to specify a geographical area. SE 190 90 postcode, post code, PIN Code, ZIP Code, Eircode postalCode Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: GDD name: GDD definition:	The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
BDT00000127	State	Definition: Example: GDD name: GDD definition:	The political unit that a country can be divided into. California state One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition:	The first street address line of a structured address.

		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
		GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. BDTG00000808	Physical measurement information	Definition:	The measurement information associated to an item in a shipment, like a trade item or a logistic unit, or to an entire shipment
		GDD name:	unitMeasurement
		GDD comment:	The measurement information associated to the despatch advice total.
BDTG00000238	Measurement value	Definition:	The measured value.
		GDD name:	measurementValue
		GDD comment:	Value of the attribute measured.
BDT00000746	Measurement value content	Definition:	The measured value.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.

		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000237	Measurement type code	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
		GDD name:	measurementType
		GDD comment:	Code specifying the type of measurement, for example "Gross Weight".
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
		GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
BDT00000666	Measurement type code content	Definition:	The code specifying the way in which a trade item or logistic unit has been measured or calculated.
		Used code list:	MeasurementTypeCode
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:MeasurementTypeCode
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000859	Logistic unit identification information	Definition:	The information specifying the identification details of a logistic unit.
		GDD name:	logisticUnitIdentification
		GDD comment:	The globally unique identification attached to the logistic unit, used for logistical and traceability purposes.
BDT00000854	Serial shipping container code, SSCC	Definition:	The identity according to the GS1 identification system for unique identification of logistic units.
		Example:	950110102081858960
		GDD name:	SSCC
		GDD definition:	The GS1 Identification Key used to identify logistics units. The key comprises an Extension digit, GS1 Company Prefix, Serial Reference, and Check Digit.
		GDD comment:	More information about the Serial Shipping Container Code can be found here: http://www.gs1.org/serial-shipping-container-code-sscc
BDTG00000858	Additional logistic unit identification information	Definition:	The information specifying the additional identification details of a logistic unit.
		GDD name:	additionalLogisticUnitIdentification

Business data term groups

GS1 SDD; 1.0; Published

BDT00000855	Additional logistic unit identification content	GDD comment:	Additional (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
		Definition:	The additional identity of a logistic unit
		Example: GDD name: GDD definition:	ABD3571/98-7 N/A N/A
BDTG00000857	Additional logistic unit identification type code	Definition:	The code specifying the type of provided additional logistic unit identification.
		GDD name: GDD definition:	additionalLogisticUnitIdentificationTypeCode Code specifying the type of additional logistic unit identification being provided. (non-SSCC) identification attached to a shipping container or shipping package and used for logistical and traceability purposes.
BDT00000856	Additional logistic unit identification type code content	Definition:	The code of the additional logistic unit identification type.
		Example: Used code list: Link to code list:	SHIPPER_ASSIGNED AdditionalLogisticUnitIdentificationTypeCode http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalLogisticUnitIdentificationTypeCode
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name: GDD definition:	codeListVersion Identification of the applied version of the code list.
BDTG00000233	Logistic unit measurements information	Definition:	The information specifying measurements of a logistic unit.
		GDD name:	dimensionsOfLogisticUnit
BDTG00000190	Depth measurement	GDD comment: Definition:	Information specifying the physical dimensions of a specific logistic unit. The measure of an item from front to back.
		GDD name:	depth
		GDD comment:	Measurement of the distance between the front and the back.
BDT00000661	Depth measurement content	Definition:	The measure of an item from front to back.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.

BDT00000113	Post office box number	Definition: The number of a post office box located on the premises of a post office station or other postal service location. Synonyms: P.O. box, postal box GDD name: pOBoxNumber GDD definition: The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000114	Postal code	Definition: The code according to the relevant postal system or service to specify a geographical area. Example: SE 190 90 Synonyms: postcode, post code, PIN Code, ZIP Code, Eircode GDD name: postalCode GDD definition: Text specifying the postal code for an address.
BDT00000117	Province identity	Definition: The identity of a province according to national codes assigned to provinces. GDD name: provinceCode GDD definition: Text specifying a province in abbreviated format.
BDT00000127	State	Definition: The political unit that a country can be divided into. Example: California GDD name: state GDD definition: One of the constituent units of a nation having a federal government.
BDT00000128	Street address one	Definition: The first street address line of a structured address. Example: Avenue Louise 326 Remark: Can be the name of a street and house number or the name of a building. GDD name: streetAddressOne GDD definition: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition: The second street address line of a structured address. Example: Blue Tower Remark: Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name. GDD name: streetAddressTwo GDD definition: streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. GDD definition: Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: The third street address line of a structured address. Example: Floor 4 Remark: Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.

		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
BDTG00000774	Country code content	GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
		Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000028	Code list version	GDD name:	N/A
		GDD definition:	N/A
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000214	Geographical coordinates information	GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details on a location using geographical coordinates.
BDTG00000085	Latitude	GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
		Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
BDTG00000089	Longitude	GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
		Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000158	Business contact information	Definition:	The information specifying details of the person or department who can give special assistance regarding a business transaction.
		GDD name:	contact
BDTG00000112	Person name	GDD comment:	Person or department that can be contacted regarding the business transaction.
		Definition:	The name of an individual person expressed as text.
		GDD name:	personName
BDTG00000044	Department name	GDD definition:	The name of the individual that can be contacted to provide additional information.
		Definition:	The name of the department.
		GDD name:	departmentName
BDTG00000083	Job title	GDD definition:	The name of the department that can be contacted to provide additional information.
		Definition:	The title of a position or the role of a person holding the position.

BDTG00000178	Contact type code	GDD name:	jobTitle
		GDD definition:	The job title of the person that can be contacted.
BDTG00000571	Contact type code content	Definition:	The code specifying the function or role of a contact person.
		GDD name:	N/A
BDTG00000028	Code list version	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG00000159	Business contact responsibility description	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000580	Business contact responsibility description content	Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
		GDD name:	responsibility
BDTG00000523	Language code	GDD comment:	Text further specifying the area of responsibility of the trade contact.
		Definition:	The description of the responsibility of a business contact such as a person or a department expressed as text.
BDTG00000524	Language code content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000176	Communication information	GDD comment:	N/A
		Definition:	The code specifying the language.
BDTG00000175	Communication channel code	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
		Definition:	The information specifying details of a contact person's communication channel.
		GDD name:	communicationChannel
		GDD comment:	The channel or manner in which a communication can be made with the contact, such as telephone or email.
		Definition:	The code specifying the channel for communication.
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:

			GDD name:	CommunicationChannelCode
			GDD comment:	communicationChannelCode
			GDD comment:	Code specifying the type of communication channel, for example TELEPHONE.
			GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary
			GDD comment:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode
BDT00000032	Communication channel identification	Definition:	The identification of a communication channel, such as a telephone number or an e-mail address, expressed as text.	
		GDD name:	communicationValue	
		GDD definition:	Text identifying the endpoint for the communication channel, for example a telephone number or an e-mail address.	
BDT00000033	Communication channel name	Definition:	The name of a communication channel expressed as text.	
		GDD name:	communicationChannelName	
		GDD definition:	The name of a specific communication channel for example Facebook, Twitter, etc	
BDTG00000145	After hours communication information	Definition:	The information specifying details of communication channels to use after regular business hours.	
		GDD comment:	The channel or manner in which a communication can be made with the contact after regular office hours.	
		GDD name:	afterHoursCommunicationChannel	
BDTG00000175	Communication channel code	Definition:	The code specifying the channel for communication.	
		Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CommunicationChannelCode	
		GDD name:	communicationChannelCode

Blue Tower Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number,

			GDD name:	suite name.
			GDD definition:	streetAddressTwo The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number.
			GDD definition:	Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:		The third street address line of a structured address.
		Example:		Floor 4
		Remark:		Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree	
		GDD definition:		The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:		The code specifying a country.
		GDD name:	countryCode	
		GDD comment:		Code specifying the country for the address.
		GDD comment:		The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:		The code specifying a country.
		Remark:		GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A	
		GDD definition:	N/A	
BDT00000028	Code list version	Definition:		The version number of the code list.
		GDD name:	codeListVersion	
		GDD definition:		Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:		The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates	
		GDD comment:		Geographical coordinates for the address.
BDT00000085	Latitude	Definition:		The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:		23°26'12.2" S
		GDD name:	latitude	
		GDD definition:		Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:		The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.

		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time
BDTG00000225	Issued capital	Definition:	The monetary amount representing the value of the issued capital of a company.
		GDD name:	issuedCapital
		GDD definition:	The amount of the issued capital.
BDTG00000655	Issued capital content	Definition:	The monetary amount representing the issued capital of a company.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000590	Currency code	Definition:	The code specifying the currency of a monetary amount.
		GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
		GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDTG00000589	Currency code content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000231	Legal structure description	Definition:	The description of the legal structure expressed as text.
		GDD name:	legalStructure
		GDD definition:	Description of the type of legal structure of the organisation.
BDTG00000659	Legal structure description content	Definition:	The description of the legal structure expressed as text.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000523	Language code	Definition:	The code specifying the language.
		GDD name:	N/A
		GDD comment:	N/A
BDTG00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000288	Registered legal information	Definition:	The information specifying the registered data on a legal entity in accordance with national law.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000087	Legal registration number	GDD name:	legalRegistration
		GDD definition:	The registration details of an organisation in a particular legal register.
BDT00000086	Legal registration additional information	Definition:	The identification number of an organisation according to a legal register.
		GDD name:	legalRegistrationNumber
BDTG00000230	Legal registration type code	GDD definition:	Unique identifier of the organization in the legal register.
		Definition:	The additional information related to the legal registration expressed as text.
BDTG00000230	Legal registration type code	GDD name:	legalRegistrationAdditionalInformation
		GDD definition:	Additional information related to legal registration, e.g. CEO name.
BDT00000658	Legal registration type code content	Definition:	The code specifying the type of legal registration.
		GDD name:	legalRegistrationType
BDT00000658	Legal registration type code content	GDD definition:	Code specifying the type of legal register.
		GDD comment:	Information about the allowed code values for this code can be found in the GS1 Global Data Dictionary

BDTG00000144	Address information	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000144	Address information	Definition:	The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail.
		GDD name:	address
BDT00000020	City name	GDD comment:	Address of the party involved in the business transaction.
		Definition:	The name of the city, town or village.
BDT00000020	City name	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000019	City code	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
BDT00000019	City code	GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.

Business data term groups

GS1 SDD; 1.0; Published

		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
BDT00000035	Cross street	Definition:	The street crossing another street.
		GDD name:	crossStreet
BDT00000106	Party name	GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
		Definition:	The name of the party expressed as text.
		GDD name:	name
BDT00000113	Post office box number	GDD definition:	The name of the party expressed in text.
		Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
BDT00000114	Postal code	GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
		Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
BDT00000117	Province identity	GDD definition:	Text specifying the postal code for an address.
		Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
BDT00000127	State	GDD definition:	Text specifying a province in abbreviated format.
		Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
BDT00000128	Street address one	GDD definition:	One of the constituent units of a nation having a federal government.
		Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000130	Street address two	Definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to

		GDD definition:	locate the party e.g. floor number, name of a building, suite number.
		Definition:	Definition streetAddressOne:
		Example:	The first free form line of an address, This first part is printed on paper as the first line below the name.
		Remark:	For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition:	The third street address line of a structured address.
		Example:	Floor 4
		Remark:	Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressThree
		GDD definition:	The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition:	The code specifying a country.
		GDD name:	countryCode
		GDD comment:	Code specifying the country for the address.
		GDD comment:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition:	The code specifying a country.
		Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name:	geographicalCoordinates
		GDD comment:	Geographical coordinates for the address.
BDT00000085	Latitude	Definition:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface.
		Example:	23°26'12.2" S
		GDD name:	latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface.
		Example:	18°3'59.0616"
		GDD name:	longitude
		GDD definition:	The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

		Definition:	The code specifying the currency of a monetary amount.
BDT00000524	Language code content	GDD name:	currencyCode
		GDD definition:	Code specifying the currency of the amount.
BDTG000000241	Name of special day	GDD comment:	The ISO 4217 code list can be acquired from the following website: www.iso.org
		GDD comment:	Use currency codes according to the alphanumeric values of ISO 4217.
BDT00000669	Name of special day content	Definition:	The code specifying the currency of a monetary amount.
		Example:	EUR
BDTG00000523	Language code	Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
BDT00000524	Language code content	GDD definition:	N/A
		Definition:	The version number of the code list.
BDTG000000241	Name of special day	GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000523	Language code	Definition:	The name of a special day expressed as text.
		Usage:	Used for specifying operating hours for a special day such as a religious holiday.
BDT00000524	Language code content	GDD name:	specialDateName
		GDD definition:	Text describing the day to which the special operating hours apply. Example: Christmas.
BDTG00000523	Language code	Definition:	The name of a special day expressed as text.
		Example:	Christmas eve, Mawlid-al-nabi
BDT00000524	Language code content	Definition:	The code specifying the language.
		GDD name:	N/A
BDTG00000523	Language code	GDD comment:	N/A
		Definition:	The code specifying the language.
BDT00000524	Language code content	Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
BDTG00000523	Language code	GDD name:	languageCode

BDT00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
BDTG00000826	Nationality code	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000826	Nationality code	GDD definition:	Identification of the applied version of the code list.
BDTG00000826	Nationality code content	Definition:	The code specifying the nation the person belongs to by birth or naturalization.
		GDD name:	nationality
BDTG00000826	Nationality code content	GDD comment:	Code specifying the nation the person belongs to by birth or naturalization.
		GDD definition:	The ISO 3166 code list can be acquired on the following website: www.iso.org
BDTG00000826	Nationality code content	Definition:	The code specifying the nationality of the person
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
BDTG00000826	Nationality code content	Remark:	GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1.
			GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1.
BDTG00000826	Nationality code content		UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1.
			GDSN applies three-digit numeric codes of ISO 3166-1.
BDTG00000826	Code list version	GDD name:	N/A
		GDD definition:	N/A
BDTG00000826	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000826	Code list version	GDD definition:	Identification of the applied version of the code list.
BDTG00000816	New holder registration information	Definition:	The identification of the party the returnable packaging is being transferred to.
		GDD name:	newHolderRegistration
BDTG00000816	New holder registration information	GDD comment:	Identification of the party the returnable packaging is being transferred to.
BDTG00000584	Tax registration identification content	Definition:	The identity assigned to a party registered for tax according to a national tax register.
BDTG00000584	Tax registration identification content	GDD name:	N/A
		GDD definition:	N/A
BDTG00000587	Identification scheme information	Definition:	The information specifying details of the used identification scheme.
		GDD name:	N/A
BDTG00000587	Identification scheme information	GDD definition:	N/A
BDTG00000074	Identification scheme name	Definition:	The name of the identification scheme.
		GDD name:	identificationSchemeName
BDTG00000074	Identification scheme name	GDD definition:	The name of the identification scheme.
BDTG00000073	Identification scheme agency name	Definition:	The name of the agency responsible for a identification scheme.
BDTG00000073	Identification scheme agency name	GDD name:	identificationSchemeAgencyName
		GDD definition:	The name of the agency that maintains the identification scheme.
BDTG00000586	Identification scheme responsible agency code	Definition:	The code specifying the agency responsible for the identification scheme.
BDTG00000586	Identification scheme responsible agency code	GDD name:	identificationSchemeAgencyCode
		GDD definition:	The identification of the agency that maintains the identification scheme.

		GDD name:	N/A
		GDD comment:	N/A
		GDD definition:	N/A
BDT00000524	Language code content	Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
BDTG00000028	Code list version	GDD definition:	A code representing the language used in the description.
		GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
BDTG00000246	Official address	GDD definition:	Identification of the applied version of the code list.
		Definition:	The registered legal address of the organisation.
		GDD name:	officialAddress
		GDD definition:	The address where the organisation is officially based.
BDT00000034	County code	Definition:	The code indicating a geographical region in a country.
		GDD name:	countyCode
		GDD definition:	A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a
		GDD definition:	

BDT00000020	City name	Definition:	state. The name of the city, town or village.
BDT00000019	City code	GDD name:	city
		GDD definition:	Text specifying the name of the city.
BDT00000035	Cross street	Definition:	The code specifying a city.
		Remark:	Should not be misunderstood as a postal code.
		GDD name:	cityCode
		GDD definition:	Identifier for a city, expressed as a short code rather than the full name.
BDT00000113	Post office box number	Definition:	The street crossing another street.
		GDD name:	crossStreet
		GDD definition:	A street intersecting a main street (usually at right angles) and continuing on both sides of it.
BDT00000114	Postal code	Definition:	The number of a post office box located on the premises of a post office station or other postal service location.
		Synonyms:	P.O. box, postal box
		GDD name:	pOBoxNumber
		GDD definition:	The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept.
BDT00000117	Province identity	Definition:	The code according to the relevant postal system or service to specify a geographical area.
		Example:	SE 190 90
		Synonyms:	postcode, post code, PIN Code, ZIP Code, Eircode
		GDD name:	postalCode
		GDD definition:	Text specifying the postal code for an address.
BDT00000127	State	Definition:	The identity of a province according to national codes assigned to provinces.
		GDD name:	provinceCode
		GDD definition:	Text specifying a province in abbreviated format.
BDT00000128	Street address one	Definition:	The political unit that a country can be divided into.
		Example:	California
		GDD name:	state
		GDD definition:	One of the constituent units of a nation having a federal government.
BDT00000130	Street address two	Definition:	The first street address line of a structured address.
		Example:	Avenue Louise 326
		Remark:	Can be the name of a street and house number or the name of a building.
		GDD name:	streetAddressOne
		GDD definition:	The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
		GDD name:	streetAddressTwo
		GDD definition:	The second street address line of a structured address.
		Example:	Blue Tower
		Remark:	Second street address line complements the first street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name:	streetAddressTwo
		GDD definition:	streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line

			below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
BDT00000129	Street address three	Definition: Example: Remark:	The third street address line of a structured address. Floor 4 Third street address line complements the first and the second street address line and is used when needed. Can be the name of a building or can be information to locate the party in a house e.g. floor number, suite name.
		GDD name: GDD definition:	streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
BDTG00000179	Country code	Definition: GDD name: GDD comment: GDD comment:	The code specifying a country. countryCode Code specifying the country for the address. The ISO 3166 code list can be acquired on the following website: www.iso.org
BDT00000774	Country code content	Definition: Remark:	The code specifying a country. GS1 XML EDI transactional messages applies two-letter alpha numeric codes of ISO 3166-1. GS1 EANCOM messages applies two-letter alpha numeric codes of ISO 3166-1. UN/CEFACT XML messages applies two-letter alpha numeric codes of ISO 3166-1. GDSN applies three-digit numeric codes of ISO 3166-1.
		GDD name: GDD definition:	N/A N/A
BDT00000028	Code list version	Definition: GDD name: GDD definition:	The version number of the code list. codeListVersion Identification of the applied version of the code list.
BDTG00000214	Geographical coordinates information	Definition:	The information specifying details on a location using geographical coordinates.
		GDD name: GDD comment:	geographicalCoordinates Geographical coordinates for the address.
BDT00000085	Latitude	Definition: Example: GDD name:	The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. 23°26'12.2" S latitude
		GDD definition:	Angular distance North or South from the earth's equator measured through 90 degrees.
BDT00000089	Longitude	Definition: Example: GDD name: GDD definition:	The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. 18°3'59.0616" longitude The arc or portion of the earth's equator intersected between the meridian of a given place and the prime meridian and expressed either in degrees or in time

BDTG00000481	Order currency code	Definition:	The code specifying the currency used for the order.
		GDD name:	Not in GDD
		GDD definition:	NA
BDT00000671	Order currency code content	Definition:	The code specifying the currency used for the order.
		Used code list:	ISO 4217 or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	N/A
		GDD definition:	N/A
BDT00000028	Code list version	Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000255	Order document identification information	Definition:	The information specifying the identification details of the order document.
		GDD name:	orderIdentification
		GDD definition:	The unique identification of the Order.
BDT00000056	Entity identification	Definition:	The identity of an entity such as a document or an object.
		Remark:	For global unique identification of documents GS1 Global Document Type Identifier (GDTI) is available.
		GDD name:	entityIdentification
		GDD definition:	The unique identifier of the piece of information, such as the object id or the document id.
BDTG00000196	Document content owner	Definition:	The information specifying the party that is responsible for the content of a document.
		GDD name:	contentOwner
		GDD comment:	Information used to identify a party or location.
BDT00000063	Global location number GLN	Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
		Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
		GDD name:	gln
		GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
BDTG00000577	Additional party identification information	Definition:	The information specifying the additional identification details of a party.
		Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
		GDD name:	additionalPartyIdentification
		GDD comment:	A party identifier that is in addition to the GLN.
BDT00000578	Additional party identification content	Definition:	The additional identity of a party.
		GDD name:	N/A
		GDD definition:	N/A
BDTG00000579	Additional party identification type code	Definition:	The code specifying the additional identification type of the party.
		GDD name:	additionalPartyIdentificationTypeCode
		GDD definition:	Code specifying the type of additional party identification being provided.

Business data term groups

GS1 SDD; 1.0; Published

BDT00000524	Language code content	GDD comment:	N/A
		Definition:	The code specifying the language.
		Example:	en
		Used code list:	ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
		GDD name:	languageCode
		GDD definition:	A code representing the language used in the description.
BDT00000028	Code list version	GDD comment:	The ISO 639-1 code list can be acquired on the following website: www.iso.org
		Definition:	The version number of the code list.
		GDD name:	codeListVersion
		GDD definition:	Identification of the applied version of the code list.
BDTG00000252	Order line item shipping details information	Definition:	The information specifying shipping details of the ordered trade item.
		GDD name:	orderLineItemDetail
		GDD comment:	Allows the identification of various shipping details by line item.
BDTG00000296	Total requested quantity	Definition:	The total ordered quantity of a trade item.
		GDD name:	requestedQuantity
		GDD comment:	The quantity which has been requested.
BDT00000566	Total requested quantity content	Definition:	The total ordered quantity of a trade item.
		Example:	100
		GDD name:	itemPriceBaseQuantity
		GDD definition:	The base quantity in which the item price is expressed. Example: Price per 100 units.
BDTG00000608	Measurement unit code	Definition:	The code specifying the unambiguous representation of a unit of measure.

		GDD name:	N/A
		GDD comment:	N/A
		GDD name:	measurementUnitCode
		GDD definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
		GDD comment:	UN/ECE Recommendation 20 - Fully Adopted by GS1. Information about the allowed code values for this code can be found at the UN/ECE website: http://www.unece.org/tradewelcome/un-centre-for-trade-facilitation-and-e-business-uncefact/outputs/cefactrecommendationsrec-index/list-of-trade-facilitation-recommendations-n-16-to-20.html
BDTG00000259	Ordered trade item logistical information	Definition:	The information specifying various requirements of logistical nature for ordered trade item.
		GDD name:	orderLogisticalInformation
		GDD comment:	Provides identification of the locations of the parties dealing with the goods associated with the order, as well as the dates or date ranges associated with the order and the transportation of the shipment associated with the order.
BDT00000788	Logistic label customer information	Definition:	The customer defined text to be printed on the logistics label(s) of the logistic unit(s)
		GDD name:	logisticLabelCustomerText
		GDD definition:	The customer defined text on the logistic label(s).
BDTG00000396	Shipment split method code	Definition:	The code specifying the method by which a shipment of ordered trade items may be split.
		GDD name:	shipmentSplitMethodCode
		GDD definition:	Specifies a method of splitting shipment of ordered goods.
BDTG00000348	Transport cargo type code	Definition:	The code specifying the type of transport cargo.
		GDD name:	commodityTypeCode
		GDD comment:	Specifies the type of commodity for transport purposes, according to the user-selected coding scheme.
BDT00000568	Transport cargo type code content	Definition:	The code specifying the type of transport cargo.
		GDD name:	N/A
		GDD definition:	N/A
BDT00000022	Code description	Definition:	The description of a code value expressed as text.
		GDD name:	codeDescription
		GDD definition:	A description for the code value provided.
BDT00000023	Code list agency code	Definition:	The code specifying the agency responsible for a code list.
		GDD name:	codeListAgencyCode
		GDD definition:	A code representing the agency which manages the code list for example 5 for ISO.
BDT00000024	Code list agency code list version	Definition:	The version number of a code list issued by the responsible agency for the code list.
		GDD name:	codeListAgencyCodeListVersion
		GDD definition:	The snapshot of the Code List Agency code list at a certain point in time.
BDT00000025	Code list agency name	Definition:	The name of the agency responsible for a code list.
		GDD name:	codeListAgencyName
		GDD definition:	A name of the agency which manages the code list for example ISO.
BDT00000026	Code list name	Definition:	The name of the code list expressed as text.

BDT00000027		Code list URL	GDD name:	codeListName
			GDD definition:	The name of the code list which provides the code value.
			Definition:	The character string that identifies the location of the code list in a network.
			Remark:	Uniform resource locator, URL, is used to specify a web address accessible over the Internet. The URL also identifies the resource, in this case the code list.
BDT00000028		Code list version	GDD name:	codeListURI
			GDD definition:	A string that refers to the location of the code list which provides the code value.
			GDD comment:	URI, Uniform Resource Identifier, is used to form a web address accessible over the Internet.
			Definition:	The version number of the code list.
BDTG00000310		Ship from party information	GDD name:	codeListVersion
			GDD definition:	Identification of the applied version of the code list.
			Definition:	The information specifying the location from which goods are shipped.
			Usage:	To identify a party or a location, either of "BDT00000063 Global location number, GLN" or "BDT00000578 Additional party identification content" is used, or both.
BDT00000063		Global location number GLN	GDD name:	shipFrom
			GDD definition:	Identifies the origin location from which goods will be shipped.
			Definition:	The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations.
			Remark:	GLN is the GS1 Identification Key used to identify physical locations or parties. The identification key is comprised of a GS1 Company Prefix, a location reference and a check digit.
BDTG00000577		Additional party identification information	GDD name:	gln
			GDD definition:	The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit.
			Definition:	The information specifying the additional identification details of a party.
			Usage:	The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
BDT00000578		Additional party identification content	GDD name:	additionalPartyIdentification
			GDD comment:	A party identifier that is in addition to the GLN.
			Definition:	The additional identity of a party.
			GDD name:	N/A
BDTG00000579		Additional party identification type code	GDD definition:	N/A
			Definition:	The code specifying the additional identification type of the party.
			GDD name:	additionalPartyIdentificationTypeCode
			GDD definition:	Code specifying the type of additional party identification being provided.
BDT00000570		Additional party identification type code content	Definition:	The code specifying the additional identification type of the party.
			Used code list:	AdditionalPartyIdentificationTypeCode
			Link to code list:	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:AdditionalPartyIdentificationTypeCode
			GDD name:	N/A
