Additional party identification type code content Storage location information/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: BDT00000570 Definition: The code specifying the additional identification type of the party. GDD Name: N/A GDD Definition: N/A Used code list: AdditionalPartyIdentificationTypeCode
Code list version Storage location information/Additional party identification information/Additional party identification type code/Code list version	0..1	SDD-ID: BDT00000028 Definition: The version number of the code list. GDD Name: codeListVersion GDD Definition: Identification of the applied version of the code list.
Address information Storage location information/Address information	0..1	SDD-ID: BDTG00000144 Definition: The information specifying the name and location of a company or an individual person, a building, apartment or other structure, including codes such as a postal code to aid in the routing of mail. GDD Name: address
City name Storage location information/Address information/City name	0..1	SDD-ID: BDT00000020 Definition: The name of the city, town or village. GDD Name: city GDD Definition: Text specifying the name of the city.
City code Storage location information/Address information/City code	0..1	SDD-ID: BDT00000019 Definition: The code specifying a city. GDD Name: cityCode GDD Definition: Identifier for a city, expressed as a short code rather than the full name.

County code Storage location information/Address information/County code	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000034 The code indicating a geographical region in a country. countyCode A code that identifies a county. A county is a territorial division in some countries, forming the chief unit of local administration. In the US, a county is a political and administrative division of a state.
Cross street Storage location information/Address information/Cross street	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000035 The street crossing another street. crossStreet A street intersecting a main street (usually at right angles) and continuing on both sides of it.
Party name Storage location information/Address information/Party name	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT000000106 The name of the party expressed as text. name The name of the party expressed in text.
Post office box number Storage location information/Address information/Post office box number	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Synonyms:	BDT000000113 The number of a post office box located on the premises of a post office station or other postal service location. pOBoxNumber The number that identifies a PO box. A PO box is a box in a post office or other postal service location assigned to an organization where postal items may be kept. P.O. box, postal box
Postal code Storage location information/Address information/Postal code	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Synonyms:	BDT000000114 The code according to the relevant postal system or service to specify a geographical area. postalCode Text specifying the postal code for an address. postcode, post code, PIN Code, ZIP Code, Eircode
Province identity Storage location information/Address information/Province identity	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT000000117 The identity of a province according to national codes assigned to provinces. provinceCode Text specifying a province in abbreviated format.
State Storage location information/Address information/State	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT000000127 The political unit that a country can be divided into. state One of the constituent units of a nation having a federal government.
Street address one Storage location information/Address information/Street address one	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT000000128 The first street address line of a structured address. streetAddressOne The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
Street address two	0..1	SDD-ID:	BDT000000130

	Storage location information/Address information/Street address two		Definition: GDD Name: GDD Definition:	The second street address line of a structured address. streetAddressTwo streetAddressTwo: The second free form line of an address, This second part is printed on paper as the second line below the name. The second free form line complements the first free form line to locate the party e.g. floor number, name of a building, suite number. Definition streetAddressOne: The first free form line of an address, This first part is printed on paper as the first line below the name. For example, the name of the street and the number in the street or the name of a building.
	Street address three Storage location information/Address information/Street address three	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000129 The third street address line of a structured address. streetAddressThree The third free form line of an address. This third part is printed on paper as the third line below the name. The third free form line complements the first and second free form lines where necessary.
	Country code Storage location information/Address information/Country code	0..1	SDD-ID: Definition: GDD Name:	BDTG00000179 The code specifying a country. countryCode
	Country code content Storage location information/Address information/Country code/Country code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000774 The code specifying a country. N/A N/A
	Code list version Storage location information/Address information/Country code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
	Geographical coordinates information Storage location information/Address information/Geographical coordinates information	0..1	SDD-ID: Definition: GDD Name:	BDTG00000214 The information specifying details on a location using geographical coordinates. geographicalCoordinates
	Latitude Storage location information/Address information/Geographical coordinates information/Latitude	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000085 The geographic coordinate which run as a circle parallel to the equator and specifies the north-south position of a point on the Earth's surface. latitude Angular distance North or South from the earth's equator measured through 90 degrees.
	Longitude Storage location information/Address information/Geographical coordinates information/Longitude	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000089 The geographic coordinate which run as a circle parallel to the Prime Meridian and specifies the east-west position of a point on the Earth's surface. longitude The arc or portion of the earth's equator intersected between the meridian of a given

				place and the prime meridian and expressed either in degrees or in time
	Business contact information Storage location information/Business contact information	0..unbounde	SDD-ID: Definition:	BDTG00000158 The information specifying details of the person or department who can give special assistance regarding a business transaction.
			GDD Name:	contact
	Person name Storage location information/Business contact information/ Person name	0..1	SDD-ID: Definition:	BDT00000112 The name of an individual person expressed as text.
			GDD Name:	personName
			GDD Definition:	The name of the individual that can be contacted to provide additional information.
	Department name Storage location information/Business contact information/ Department name	0..1	SDD-ID: Definition:	BDT00000044 The name of the department.
			GDD Name:	departmentName
			GDD Definition:	The name of the department that can be contacted to provide additional information.
	Job title Storage location information/Business contact information/Job title	0..1	SDD-ID: Definition:	BDT00000083 The title of a position or the role of a person holding the position.
			GDD Name:	jobTitle
			GDD Definition:	The job title of the person that can be contacted.
	Contact type code Storage location information/Business contact information/ Contact type code	0..1	SDD-ID: Definition:	BDTG00000178 The code specifying the function or role of a contact person.
			GDD Name:	contactTypeCode
			Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
	Contact type code content Storage location information/Business contact information/ Contact type code/Contact type code content	1..1	SDD-ID: Definition:	BDT00000571 The code specifying the function or role of a contact person.
			GDD Name:	N/A

		Ref. definition:	physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. GS1 General Specifications: The GS1 identification key used to identify physical locations or parties. The key comprises a GS1 Company Prefix, location reference, and check digit.
Additional party identification information Referenced price list information/Document content owner/ Additional party identification information	0..unbounded	SDD-ID: Definition: GDD Name: Usage:	BDTG00000577 The information specifying the additional identification details of a party. additionalPartyIdentification The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
Additional party identification content Referenced price list information/Document content owner/ Additional party identification information/Additional party identification content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000578 The additional identity of a party. N/A N/A
Additional party identification type code Referenced price list information/Document content owner/ Additional party identification information/Additional party identification type code	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000579 The code specifying the additional identification type of the party. additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
Additional party identification type code content Referenced price list information/Document content owner/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000570 The code specifying the additional identification type of the party. N/A N/A AdditionalPartyIdentificationTypeCode
Code list version Referenced price list information/Document content owner/Additional party identification information/Additional party identification type code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
Referenced contract information Referenced contract information	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000279 The information specifying the details of a reference to a contract. contract Reference to the contractual agreement under which the goods are ordered. Reference to the contractual agreement under which the goods are ordered. The reference is associated with specific items in the order. 20190606 KD: Definition at order line level, orderLineItem
Entity identification Referenced contract information/Entity identification	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000056 The identity of an entity such as a document or an object. entityIdentification The unique identifier of the piece of information, such as the object id or the document id.
Business document creation date time Referenced contract information/Business document creation date time	0..1	SDD-ID: Definition: GDD Name:	BDT00000047 The date and optional time when the business document was issued. creationDateTime

		GDD Definition:	Date and time when the document was created.
Revision number Referenced contract information/Revision number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000119 The number assigned to a specific release of a document to keep track of changes and updates between revisions. revisionNumber Number to be used for identification and referencing of subsequent updates to a business document.
Referenced document external location Referenced contract information/Referenced document external location	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Usage:	BDT00000118 The external location of the referenced document expressed as an uniform resource locator. referencedDocumentUrl An URI pointing to the on-line location where the referenced document is stored. The external location can be an internet address to a document stored in a server on the internet.
Document line number Referenced contract information/Document line number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000049 The sequence number of a line within the business document. lineItemNumber Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
Document content owner Referenced contract information/Document content owner	0..1	SDD-ID: Definition: GDD Name:	BDTG00000196 The information specifying the party that is responsible for the content of a document. contentOwner
Global location number GLN Referenced contract information/Document content owner/ Global location number GLN	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Ref. definition:	BDT00000063 The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. GS1 General Specifications: The GS1 identification key used to identify physical locations or parties. The key comprises a GS1 Company Prefix, location reference, and check digit.
Additional party identification information Referenced contract information/Document content owner/ Additional party identification information	0..unbounde	SDD-ID: Definition: GDD Name: Usage:	BDTG00000577 The information specifying the additional identification details of a party. additionalPartyIdentification The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
Additional party identification content Referenced contract information/Document content owner/ Additional party identification information/Additional party identification content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000578 The additional identity of a party. N/A N/A
Additional party identification type code	1..1	SDD-ID:	BDTG00000579

	Referenced contract information/Document content owner/Additional party identification information/Additional party identification type code		Definition: GDD Name: GDD Definition:	The code specifying the additional identification type of the party. additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
	Additional party identification type code content Referenced contract information/Document content owner/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000570 The code specifying the additional identification type of the party. N/A N/A AdditionalPartyIdentificationTypeCode
	Code list version Referenced contract information/Document content owner/Additional party identification information/Additional party identification type code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
	Referenced trade agreement information Referenced trade agreement information	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000287 The information specifying the details of a reference to a trade agreement. tradeAgreement Specifies the trade agreement that the order is referring to.
	Entity identification Referenced trade agreement information/Entity identification	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000056 The identity of an entity such as a document or an object. entityIdentification The unique identifier of the piece of information, such as the object id or the document id.
	Business document creation date time Referenced trade agreement information/Business document creation date time	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000047 The date and optional time when the business document was issued. creationDateTime Date and time when the document was created.
	Revision number Referenced trade agreement information/Revision number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000119 The number assigned to a specific release of a document to keep track of changes and updates between revisions. revisionNumber Number to be used for identification and referencing of subsequent updates to a business document.
	Document line number Referenced trade agreement information/Document line number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000049 The sequence number of a line within the business document. lineItemNumber Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
	Referenced document external location Referenced trade agreement information/Referenced document external location	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Usage:	BDT00000118 The external location of the referenced document expressed as an uniform resource locator. referencedDocumentUrl An URI pointing to the on-line location where the referenced document is stored. The external location can be an internet address to a document stored in a server on the internet.

Document content owner Referenced trade agreement information/Document content owner	0..1	SDD-ID: Definition: GDD Name:	BDTG00000196 The information specifying the party that is responsible for the content of a document. contentOwner
Global location number GLN Referenced trade agreement information/Document content owner/Global location number GLN	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Ref. definition:	BDT00000063 The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. GS1 General Specifications: The GS1 identification key used to identify physical locations or parties. The key comprises a GS1 Company Prefix, location reference, and check digit.
Additional party identification information Referenced trade agreement information/Document content owner/Additional party identification information	0..unbounded	SDD-ID: Definition: GDD Name: Usage:	BDTG00000577 The information specifying the additional identification details of a party. additionalPartyIdentification The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
Additional party identification content Referenced trade agreement information/Document content owner/Additional party identification information/Additional party identification content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000578 The additional identity of a party. N/A N/A
Additional party identification type code Referenced trade agreement information/Document content owner/Additional party identification information/Additional party identification type code	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000579 The code specifying the additional identification type of the party. additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
Additional party identification type code content Referenced trade agreement information/Document content owner/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000570 The code specifying the additional identification type of the party. N/A N/A AdditionalPartyIdentificationTypeCode
Code list version Referenced trade agreement information/Document content owner/Additional party identification information/Additional party identification type code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
Referenced blanket order document information Referenced blanket order document information	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000447 The information specifying the details of a reference to a blanket order document. blanketOrder Reference to the blanket order, which is a document created for general order purposes with later split into quantities and delivery dates and maybe delivery locations.
Entity identification	1..1	SDD-ID:	BDT00000056

Referenced blanket order document information/Entity identification		Definition: GDD Name: GDD Definition:	The identity of an entity such as a document or an object. entityIdentification The unique identifier of the piece of information, such as the object id or the document id.
Business document creation date time Referenced blanket order document information/Business document creation date time	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000047 The date and optional time when the business document was issued. creationDateTime Date and time when the document was created.
Revision number Referenced blanket order document information/Revision number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000119 The number assigned to a specific release of a document to keep track of changes and updates between revisions. revisionNumber Number to be used for identification and referencing of subsequent updates to a business document.
Referenced document external location Referenced blanket order document information/Referenced document external location	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Usage:	BDT00000118 The external location of the referenced document expressed as an uniform resource locator. referencedDocumentUrl An URI pointing to the on-line location where the referenced document is stored. The external location can be an internet address to a document stored in a server on the internet.
Document line number Referenced blanket order document information/Document line number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000049 The sequence number of a line within the business document. lineItemNumber Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
Document content owner Referenced blanket order document information/Document content owner	0..1	SDD-ID: Definition: GDD Name:	BDTG00000196 The information specifying the party that is responsible for the content of a document. contentOwner
Global location number GLN Referenced blanket order document information/Document content owner/Global location number GLN	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Ref. definition:	BDT00000063 The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. GS1 General Specifications: The GS1 identification key used to identify physical locations or parties. The key comprises a GS1 Company Prefix, location reference, and check digit.
Additional party identification information Referenced blanket order document information/Document content owner/Additional party identification information	0..unbounded	SDD-ID: Definition: GDD Name: Usage:	BDTG00000577 The information specifying the additional identification details of a party. additionalPartyIdentification The business data term group is optional to use. If used then one or more additional

				identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
	Additional party identification content Referenced blanket order document information/Document content owner/Additional party identification information/Additional party identification content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000578 The additional identity of a party. N/A N/A
	Additional party identification type code Referenced blanket order document information/Document content owner/Additional party identification information/Additional party identification type code	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000579 The code specifying the additional identification type of the party. additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
	Additional party identification type code content Referenced blanket order document information/Document content owner/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000570 The code specifying the additional identification type of the party. N/A N/A AdditionalPartyIdentificationTypeCode
	Code list version Referenced blanket order document information/Document content owner/Additional party identification information/Additional party identification type code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
	Referenced dispute notice document information Referenced dispute notice document information	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000448 The information specifying the details of a reference to a notice of dispute document. disputeNotice Reference to the notice of commercial dispute.
	Entity identification Referenced dispute notice document information/Entity identification	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000056 The identity of an entity such as a document or an object. entityIdentification The unique identifier of the piece of information, such as the object id or the document id.
	Business document creation date time Referenced dispute notice document information/Business document creation date time	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000047 The date and optional time when the business document was issued. creationDateTime Date and time when the document was created.
	Revision number Referenced dispute notice document information/Revision number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000119 The number assigned to a specific release of a document to keep track of changes and updates between revisions. revisionNumber Number to be used for identification and referencing of subsequent updates to a business document.
	Referenced document external location Referenced dispute notice document information/Referenced document external location	0..1	SDD-ID: Definition: GDD Name:	BDT00000118 The external location of the referenced document expressed as an uniform resource locator. referencedDocumentUrl

		GDD Definition: Usage:	An URI pointing to the on-line location where the referenced document is stored. The external location can be an internet address to a document stored in a server on the internet.
Document line number Referenced dispute notice document information/Document line number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000049 The sequence number of a line within the business document. lineItemNumber Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
Document content owner Referenced dispute notice document information/Document content owner	0..1	SDD-ID: Definition: GDD Name:	BDTG00000196 The information specifying the party that is responsible for the content of a document. contentOwner
Global location number GLN Referenced dispute notice document information/Document content owner/Global location number GLN	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Ref. definition:	BDT00000063 The identity according to the GS1 identification system for unique identification of legal entities, roles and functions, physical and digital locations. gln The Global Location Number (GLN) is the GS1 Identification Key used to identify physical locations or parties. The key is comprised of a GS1 Company Prefix, Location Reference, and Check Digit. GS1 General Specifications: The GS1 identification key used to identify physical locations or parties. The key comprises a GS1 Company Prefix, location reference, and check digit.
Additional party identification information Referenced dispute notice document information/Document content owner/Additional party identification information	0..unbounded	SDD-ID: Definition: GDD Name: Usage:	BDTG00000577 The information specifying the additional identification details of a party. additionalPartyIdentification The business data term group is optional to use. If used then one or more additional identities of the party can be given in addition to or instead of a GS1 Global Location Number, GLN.
Additional party identification content Referenced dispute notice document information/Document content owner/Additional party identification information/Additional party identification content	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000578 The additional identity of a party. N/A N/A
Additional party identification type code Referenced dispute notice document information/Document content owner/Additional party identification information/Additional party identification type code	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000579 The code specifying the additional identification type of the party. additionalPartyIdentificationTypeCode Code specifying the type of additional party identification being provided.
Additional party identification type code content Referenced dispute notice document information/Document content owner/Additional party identification information/Additional party identification type code/Additional party identification type code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000570 The code specifying the additional identification type of the party. Opening time Delivery terms information/Delivery terms for location information/Special operating hours information/Opening time	0..1	SDD-ID: BDT00000098 Definition: The time on which the business or facility will open on a specified day. GDD Name: openingTime GDD Definition: Time on which the business or facility will open on the specified day.
Name of special day Delivery terms information/Delivery terms for location information/Special operating hours information/Name of special day	0..1	SDD-ID: BDTG00000241 Definition: The name of a special day expressed as text. GDD Name: specialDateName GDD Definition: Text describing the day to which the special operating hours apply. Example: Christmas. Usage: Used for specifying operating hours for a special day such as a religious holiday.
Name of special day content Delivery terms information/Delivery terms for location information/Special operating hours information/Name of special day/Name of special day content	1..1	SDD-ID: BDT00000669 Definition: The name of a special day expressed as text.
Language code Delivery terms information/Delivery terms for location information/Special operating hours information/Name of special day/Language code	0..1	SDD-ID: BDTG00000523 Definition: The code specifying the language. GDD Name: N/A
Language code content Delivery terms information/Delivery terms for location information/Special operating hours information/Name of special day/Language code/Language code content	1..1	SDD-ID: BDT00000524 Definition: The code specifying the language. GDD Name: languageCode GDD Definition: A code representing the language used in the description. Used code list: ISO 639-1 two-letter codes or equivalent representation in specific syntax. The code list is available at www.iso.org .
Code list version Delivery terms information/Delivery terms for location information/Special operating hours information/Name of special day/Language code/Code list version	0..1	SDD-ID: BDT00000028 Definition: The version number of the code list. GDD Name: codeListVersion GDD Definition: Identification of the applied version of the code list.
Referenced additional information Referenced additional information	0..unbounded	SDD-ID: BDTG00000141 Definition: The information specifying details of an additional reference not already covered by a dedicated business data term. GDD Name: transactionalGenericReference GDD Definition: Reference to an associated information in support of related business processes. The type of references are defined in the TransactionalReferenceTypeCode list.
Business document creation date time Referenced additional information/Business document creation date time	0..1	SDD-ID: BDT00000047 Definition: The date and optional time when the business document was issued. GDD Name: creationDateTime GDD Definition: Date and time when the document was created.
Business document reference identification Referenced additional information/Business document reference	1..1	SDD-ID: BDT00000135 Definition: The identity of a referenced business document.

identification		GDD Name:	transactionalReferenceValue
		GDD Definition:	Contains the reference value.
Referenced document type code Referenced additional information/Referenced document type code	1..1	SDD-ID:	BDTG00000347
		Definition:	The code specifying the type of referenced business document.
		GDD Name:	transactionalReferenceTypeCode
Referenced document type code content Referenced additional information/Referenced document type code/Referenced document type code content	1..1	SDD-ID:	BDT00000699
		Definition:	The code specifying the type of referenced business document.
		GDD Name:	N/A
		GDD Definition:	N/A
		Used code list:	TransactionalReferenceTypeCode
Code list version Referenced additional information/Referenced document type code/Code list version	0..1	SDD-ID:	BDT00000028
		Definition:	The version number of the code list.
		GDD Name:	codeListVersion
		GDD Definition:	Identification of the applied version of the code list.
Invoice line Invoice line	1..unbounded	GDD Definition:	Specifies the information related to each line item. Each invoice will contain one or more line items.
		Comment:	The invoice line is used to specify information which is specific for an invoiced trade item. The invoice line is repeated for each invoiced trade item.
Business document line item number Invoice line/Business document line item number	1..1	SDD-ID:	BDT00000049
		Definition:	The sequence number of a line within the business document.
		GDD Name:	lineItemNumber
		GDD Definition:	Number specifying a line in the referenced document. Provides the line number associated to the Order Line Item.
Actual delivery date Invoice line/Actual delivery date	0..1		
Parent line item number Invoice line/Parent line item number	0..1	SDD-ID:	BDT00000105
		Definition:	The line item number of the line item containing information at the higher level pertaining to the current line item.
		GDD Name:	parentLineItemNumber
		GDD Definition:	The number of line item containing information about the parent of the current item. It allows establishing hierarchical link between the two items.
Excluded from payment discount indicator Invoice line/Excluded from payment discount indicator	0..1	SDD-ID:	BDT00000464
		Definition:	The code indicating if the invoice line is excluded from payment discount.
		GDD Name:	excludedFromPaymentDiscountIndicator
		GDD Definition:	Indicator specifying whether or not the Invoice Line Item is to be included in payment discount calculations.
		Used code list:	Available codes: "YES" and "NO"
		Applicable types:	
		NO	
		YES	
Transfer of ownership date Invoice line/Transfer of ownership date	0..1	SDD-ID:	BDT00000466
		Definition:	The date when the ownership of goods was transferred.

		GDD Name:	transferOfOwnershipDate
		GDD Definition:	The date on which the economic transfer of the goods took place. The tax authorities stipulate the specification of this date in invoices for goods and services.
Credit line indicator Invoice line/Credit line indicator	0..1	SDD-ID:	BDT00000483
		Definition:	The code indicating if the invoice line is a credit line.
		GDD Name:	creditLineIndicator
		GDD Definition:	An indicator that allows users to interpret a standard invoice line as being a credit line.
		Used code list:	Available codes: "YES" and "NO"
		Applicable types:	
		NO	
		YES	
Country of origin code Invoice line/Country of origin code	0..1	SDD-ID:	BDTG00000180
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD Name:	countryOfOrigin
Country of origin code content Invoice line/Country of origin code/Country of origin code content	1..1	SDD-ID:	BDT00000572
		Definition:	The code specifying the country of manufacture, production, or growth where a trade item or product comes from.
		GDD Name:	N/A
		GDD Definition:	N/A
		Used code list:	ISO 3166-1 or equivalent representation in specific syntax.
Code list version Invoice line/Country of origin code/Code list version	0..1	SDD-ID:	BDT00000028
		Definition:	The version number of the code list.
		GDD Name:	codeListVersion
		GDD Definition:	Identification of the applied version of the code list.
Crediting reason code Invoice line/Crediting reason code	0..1	SDD-ID:	BDTG00000400
		Definition:	The code specifying the reason for crediting.
		GDD Name:	creditReasonCode
		GDD Definition:	Code specifying the reason why the credit was issued.
		Comment:	The business data term is used in an invoice to specify the reason for crediting an invoice line of a previous issued invoice. "BDTG00000442 Referenced invoice document information" is used to reference the credited invoice line of an invoice.
		Used code list:	CreditReasonCode Crediting reason codeThe code specifying the reason for crediting. http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CreditReasonCode
Crediting reason code content Invoice line/Crediting reason code/Crediting reason code content	1..1	SDD-ID:	BDT00000741
		Definition:	The code specifying the reason for crediting.
		GDD Name:	N/A
		GDD Definition:	N/A
		Used code list:	CreditReasonCode
Code list version Invoice line/Crediting reason code/Code list version	0..1	SDD-ID:	BDT00000028
		Definition:	The version number of the code list.

		GDD Name:	codeListVersion
		GDD Definition:	Identification of the applied version of the code list.
Invoiced trade item information Invoice line/Invoiced trade item information	1..1	SDD-ID:	BDTG00000469
		Definition:	The information specifying the details of the invoiced trade item in a business document transaction.
		GDD Name:	transactionalTradeItem
		GDD Definition:	The identification of any item (product or service) upon which there is a need to retrieve pre-defined information and that may be priced, ordered, or invoiced at any point in any supply chain.
Global trade item number, GTIN Invoice line/Invoiced trade item information/Global trade item number, GTIN	0..1	SDD-ID:	BDT00000066
		Definition:	The identity according to the GS1 identification system for unique identification of products and services.
		GDD Name:	gtin
		GDD Definition:	The GS1 Identification Key used to identify trade items. The key comprises a GS1 Company Prefix, an Item Reference and Check Digit.
		Ref. definition:	GS1 General Specifications: The GS1 identification key used to identify trade items. The key comprises a GS1 Company Prefix, an item reference and check digit.
Product variant Invoice line/Invoiced trade item information/Product variant	0..1	SDD-ID:	BDT00000115
		Definition:	The product variant expressed as text.
		GDD Name:	productVariantIdentifier
		GDD Definition:	Text identifying a variant of the product, for example for promotional reasons.
		Usage:	Used when there are multiple variants of one and the same GTIN. Used to distinguishing trade items with the same GTIN from each other.
Butter fat reference Invoice line/Invoiced trade item information/Butter fat reference	0..1	SDD-ID:	BDT00000013
		Definition:	The reference number assigned by customs authorities to butter based fat products.
		GDD Name:	butterFatReference
		GDD Definition:	A reference number assigned by custom authorities to butter based fat products.
		Usage:	Used for customs declarations when importing or exporting goods.
Additional trade item identification information Invoice line/Invoiced trade item information/Additional trade item identification information	0..1	SDD-ID:	BDTG00000142
		Definition:	The information specifying the additional identification details of a trade item.
		GDD Name:	additionalTradeItemIdentification
Additional trade item identification content Invoice line/Invoiced trade item information/Additional trade item identification information/Additional trade item identification content	1..1	SDD-ID:	BDT00000516
		Definition:	The additional identity of a trade item.
		GDD Name:	N/A
		GDD Definition:	N/A
Additional trade item identification type code Invoice line/Invoiced trade item information/Additional trade item identification information/Additional trade item identification type code	0..unbounde	SDD-ID:	BDTG00000519
		Definition:	The code specifying the type of additional identifier for a shipment.
Additional trade item identification type code content Invoice line/Invoiced trade item information/Additional trade item identification information/Additional trade item	1..1	SDD-ID:	BDT00000518
		Definition:	The code of the additional trade item identification type.
		GDD Name:	N/A
		GDD Definition:	N/A

	identification type code/Additional trade item identification type code content			
	Code list version Invoice line/Invoiced trade item information/Additional trade item identification information/Additional trade item identification type code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
	Trade item quantity Invoice line/Invoiced trade item information/Trade item quantity	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Usage rule:	BDTG00000341 The quantity of a trade item. tradeItemQuantity Specification of the number of units of the trade item. To be applied when no other quantity information, such as the requested quantity or the billed quantity, is present. To be applied when no other quantity information, such as the requested quantity or the invoiced quantity, is present.
	Trade item quantity content Invoice line/Invoiced trade item information/Trade item quantity/Trade item quantity content	1..1	SDD-ID: Definition:	BDT00000678 The quantity value of the over allocation.
	Measurement unit code Invoice line/Invoiced trade item information/Trade item quantity/Measurement unit code	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000608 The code specifying the unambiguous representation of a unit of measure. N/A measurementUnitCode Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
	Measurement unit code content Invoice line/Invoiced trade item information/Trade item quantity/Measurement unit code/Measurement unit code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000607 The code specifying the unambiguous representation of a unit of measure. Dynamic trade item information Invoice line/Invoiced trade item information/Dynamic trade item information	0..1	SDD-ID: Definition:	BDTG00000203 The information specifying the details of dynamic characteristics of individual instances of a trade item.
Available for sale date Invoice line/Invoiced trade item information/Dynamic trade item information/Available for sale date	0..1	GDD Name: SDD-ID: Definition: GDD Name: GDD Definition:	transactionalItemData BDT00000007 The date when a trade item is available for sale. availableForSaleDate Dynamic characteristics used to specify individual instances of a trade item, such as the best before date, batch number or serial number.
Batch number Invoice line/Invoiced trade item information/Dynamic trade item information/Batch number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000008 The identification number of the production batch that relates to a date and time for the production of a product. batchNumber A batch unites products or items that have undergone or are grouped together to undergo the same transformation process, not necessarily a production process.
Best before date Invoice line/Invoiced trade item information/Dynamic trade item information/Best before date	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000011 The date indicating when the product characteristics and quality are no longer guaranteed by the manufacturer. bestBeforeDate The date before which the product is best used or consumed. It is a statement about quality.
Country of origin Invoice line/Invoiced trade item information/Dynamic trade item information/Country of origin	0..1	SDD-ID: Definition: GDD Name:	BDTG00000180 The code specifying the country of manufacture, production, or growth where a trade item or product comes from. countryOfOrigin
Expiration date Invoice line/Invoiced trade item information/Dynamic trade item information/Expiration date	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000057 The date after which the product should not be used or consumed. itemExpirationDate The date after which the product should not be used or consumed. Its meaning is determined based on the trade item context (e.g., for food, the date will indicate the

				possibility of a direct health risk resulting from use of the product after the date, for pharmaceutical products, it will indicate the possibility of an indirect health risk resulting from the ineffectiveness of the product after the date). It is often referred to as "use by date" or "maximum durability date."
	Lot number Invoice line/Invoiced trade item information/Dynamic trade item information/Lot number	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000090 The identification number for a lot consisting of products produced within different production batches. lotNumber A distinctive combination of numbers and/or letters from which the complete history of the manufacture, processing, packaging, coding and distribution of a batch can be determined.
	Packaging date Invoice line/Invoiced trade item information/Dynamic trade item information/Packaging date	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000104 The date on which a product is placed in a container or package. packagingDate The date on which the packaging of a product took place.
	Production date Invoice line/Invoiced trade item information/Dynamic trade item information/Production date	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000116 The date the product was produced. productionDate The date that the product was produced.
	Sell by date Invoice line/Invoiced trade item information/Dynamic trade item information/Sell by date	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000120 The date after which the product should not be sold. sellByDate The date before or on which, the product should be sold.
	Serial number Invoice line/Invoiced trade item information/Dynamic trade item information/Serial number	0..unbounde	SDD-ID: Definition: GDD Name: GDD Definition: Usage:	BDT00000121 The serial number assigned to an individual instance of a specific identified product or trade item to make an instance of a product or trade item unique. serialNumber A unique identifier assigned to a specific trade item. The code need not be strictly numerical and can contain letters and other typographical symbols or may consist entirely of a character string.
	Shelf life Invoice line/Invoiced trade item information/Dynamic trade item information/Shelf life	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000122 The length of time a product can be stored and remain suitable for its intended function expressed as text. shelfLife The length of time a material, substance, product, or reagent can be stored under specified environmental conditions and continue to meet all applicable specification requirements and/or remain suitable for its intended function
	Item in contact with food product indicator Invoice line/Invoiced trade item information/Dynamic trade item information/Item in contact with food product indicator	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000082 The code indicating if the trade item can be in contact with food products. itemInContactWithFoodProduct States weather or not the trade item can come into contact with food products. Available codes: "YES" and "NO"

			Applicable types:	
			NO	YES
	Logistic unit packaging pattern information Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information	0..1	SDD-ID: Definition: GDD Name:	BDTG00000235 The information specifying the packaging of the logistic unit. transactionalItemLogisticUnitInformation
	Number of layers Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Number of layers	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000095 The number of layers of packages in a package. numberOfLayers Number of layers of a product or products within a package, container, pallet, etc
	Number of units per layer Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Number of units per layer	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000096 The number of packs per layer in a package. numberOfUnitsPerLayer Number of units of a product or package within one layer of a package, container, pallet, etc.
	Number of units per platform Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Number of units per platform	0..1	SDD-ID: GDD Name: GDD Definition:	BDT00000097 numberOfUnitsPerPallet The number of units contained on a pallet calculated by multiplying the number of units per layer by the number of layers on a pallet.
	Maximum stacking factor Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Maximum stacking factor	1..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000091 The maximum number of levels for a specific unit that can exist in a stack without impacting the quality of the product. maximumStackingFactor A factor that determines the maximum stacking for the product. Indicates the number of levels the product may be stacked.
	Packaging terms and conditions code Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Packaging terms and conditions code	0..1	SDD-ID: Definition: GDD Name:	BDTG00000265 The code specifying the terms and conditions that apply to the packaging of the logistic unit. packagingTerms
	Packaging terms and conditions code content Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Packaging terms and conditions code/ Packaging terms and conditions code content	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Used code list:	BDT00000663 The code specifying the terms and conditions that apply to the packaging of the logistic unit. N/A N/A PackagingTermsAndConditionsCode
	Code list version Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Packaging terms and conditions code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
	Package type code Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Package type code	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDTG00000264 The code specifying the type of package used for the trade item. packageTypeCode Code specifying a package type. Allowed code values are specified in UN/ECE

				Version:	Recommendation 21, extended by GS1 20191004 KD: To be semantic I think the version of a code list should be specified in a separate business data term.
			Package type code content Invoice line/Invoiced trade item information/Dynamic trade item information/Logistic unit packaging pattern information/Package type code/Package type code content	1..1	SDD-ID: BDT00000664 Definition: The code specifying the type of package used for the trade item. Allowed code values are specified in GS1 Code List SizeCodeListCode.
Size code list description Invoice line/Invoiced trade item information/Size information/Size code/Size code list description	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000124 The description of the size code system expressed as text. sizeCodeListDescription A description of the size code list used to populate the size code for example National Retail Federation – Standard Colour & Size Codes.
Code list version Invoice line/Invoiced trade item information/Size information/Size code/Code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000028 The version number of the code list. codeListVersion Identification of the applied version of the code list.
Size code list version Invoice line/Invoiced trade item information/Size information/Size code/Size code list version	0..1	SDD-ID: Definition: GDD Name: GDD Definition:	BDT00000125 The version number of the code list of the size code system. sizeCodeListVersion The applied version of the SizeCodeListCode code list.
Trade item classification information Invoice line/Invoiced trade item information/Trade item classification information	0..1	SDD-ID: Definition: GDD Name:	BDTG00000334 The information specifying the product classification of a trade item. tradeItemClassification
GS1 global product classification GPC brick code Invoice line/Invoiced trade item information/Trade item classification information/GS1 global product classification GPC brick code	1..1	SDD-ID: Definition: GDD Name: GDD Definition: Business rule:	BDT00000070 The code specifying the product category of similar products according to GS1 global product classification standard GPC. gpcCategoryCode Code specifying a product category according to the GS1 Global Product Classification (GPC) standard. According to GS1 global product classification standard a GTIN can be assigned to only one brick code.
GS1 global product classification GPC brick name Invoice line/Invoiced trade item information/Trade item classification information/GS1 global product classification GPC brick name	0..1	SDD-ID: Definition: GDD Name: GDD Definition: Business rule:	BDT00000071 The name of the product category of similar products according to GS1 global product classification standard GPC. gpcCategoryName Name associated with the specified Global Product Classification (GPC) category code. To be used in conjunction with the business data term "GS1 global product classification

			brick code". (Is this a Business rule or a Usage rule?)
	Alternative trade item product classification code Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code	0..unbounded	SDD-ID: BDTG00000155 Definition: The information specifying the details of the alternative trade item product classification code. GDD Name: additionalTradeItemClassificationCode GDD Definition: Category code based on alternate classification schema chosen in addition to the Global Product Classification (GPC). Usage: The product classification system is an alternative to the GS1 Global Product Classification standard.
	Alternative trade item product classification code content Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code/Alternative trade item product classification code content	1..1	SDD-ID: BDT00000536 Definition: The code specifying the product classification of a trade item according to an alternative product classification system. GDD Name: N/A GDD Definition: N/A
	Additional trade item classification scheme code Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code/Additional trade item classification scheme code	0..1	SDD-ID: BDT00000002 Definition: The code specifying the classification scheme used for an additional classification of a trade item. GDD Name: additionalTradeItemClassificationCodeListCode GDD Definition: Code specifying the applied additional trade item classification scheme. Allowed values are specified in GS1 code list AdditionalTradeItemClassificationCodeListCode. Usage: Meant to be used in addition to GS1 Global Product Classification standard. Used code list: AdditionalTradeItemClassificationCodeListCode
	Additional trade item classification scheme version Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code/Additional trade item classification scheme version	0..1	SDD-ID: BDT00000003 Definition: The version number of the classification scheme used for additional trade item classification. GDD Name: additionalTradeItemClassificationCodeListVersion GDD Definition: The version number of the GS1 code list AdditionalTradeItemClassificationCodeListCode.
	Code description Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code/Code description	0..1	SDD-ID: BDT00000022 Definition: The description of a code value expressed as text. GDD Name: codeDescription GDD Definition: A description for the code value provided.
	Code list version Invoice line/Invoiced trade item information/Trade item classification information/Alternative trade item product classification code/Code list version	0..1	SDD-ID: BDT00000028 Definition: The version number of the code list. GDD Name: codeListVersion GDD Definition: Identification of the applied version of the code list.
	Global Product Classification attributes Invoice line/Invoiced trade item information/Trade item classification information/Global Product Classification attributes	0..unbounded	SDD-ID: BDTG00000215 Definition: The information specifying details to identify classification properties and their property values for a trade item according to the GS1 Global Product Classification standard, GPC. GDD Name: gpcAttribute GDD Definition: Contains information which identifies the GPC classification attribute for a trade item. Usage: The class is optional to use. The class can be repeated for a trade item if the trade item

				has different classification properties (attribute types) and these, together with their respective property value (attribute value), are to be specified. (This text is to be inserted in the model of the Order instead.)
	GS1 global product classification GPC attribute type code Invoice line/Invoiced trade item information/Trade item classification information/Global Product Classification attributes/GS1 global product classification GPC attribute type code	1..1	SDD-ID: BDT00000067 Definition: The code specifying the type of attribute according to GS1 global product classification standard GPC. GDD Name: gpcAttributeTypeCode GDD Definition: Code specifying the type of the Global Product Classification (GPC) attribute, for example 20000081 - Grape Variety.	
	GS1 global product classification GPC attribute value code Invoice line/Invoiced trade item information/Trade item classification information/Global Product Classification attributes/GS1 global product classification GPC attribute value code	1..1	SDD-ID: BDT00000068 Definition: The code specifying the attribute value according to GS1 global product classification standard GPC. GDD Name: gpcAttributeValueCode GDD Definition: The GS1 provided code which identifies the Global Product Classification Attribute Value. Usage: Used in conjunction with the attribute type to further characterise the product specified by the brick.	
	Global product classification GPC attribute type name Invoice line/Invoiced trade item information/Trade item classification information/Global Product Classification attributes/Global product classification GPC attribute type name	0..1	SDD-ID: BDT00000064 Definition: The name of the attribute type according to GS1 global product classification standard GPC. GDD Name: gpcAttributeTypeName GDD Definition: The GS1 provided text equivalent of the Global Product Classification Attribute Code.	
	GS1 global product classification GPC attribute value name Invoice line/Invoiced trade item information/Trade item classification information/Global Product Classification attributes/GS1 global product classification GPC attribute value name	0..1	SDD-ID: BDT00000069 Definition: The name of the attribute value according to GS1 global product classification standard GPC. GDD Name: gpcAttributeValueName GDD Definition: The GS1 provided text equivalent of the Global Product Classification Attribute Value Code.	
	Invoiced quantity Invoice line/Invoiced quantity	1..1	SDD-ID: BDTG00000416 Definition: The invoiced quantity of the trade item. GDD Name: invoicedQuantity GDD Definition: The quantity of items that is being charged for in the Invoice Line Item.	
	Invoiced quantity content Invoice line/Invoiced quantity/Invoiced quantity content	1..1	SDD-ID: BDT00000417 Definition: The quantity of the invoiced trade item.	
	Measurement unit code Invoice line/Invoiced quantity/Measurement unit code	0..1	SDD-ID: BDTG00000608 Definition: The code specifying the unambiguous representation of a unit of measure. GDD Name: N/A measurementUnitCode GDD Definition: Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.	
	Delivered quantity Invoice line/Delivered quantity	0..1	SDD-ID: BDTG00000463 Definition: The delivered quantity of the trade item.	

		GDD Name:	deliveredQuantity
		GDD Definition:	The actual quantity delivered.
Delivered quantity value Invoice line/Delivered quantity/Delivered quantity value	1..1	SDD-ID:	BDT00000429
		Definition:	The quantity of the delivered trade item.
Measurement unit code Invoice line/Delivered quantity/Measurement unit code	0..1	SDD-ID:	BDTG00000608
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD Name:	N/A
		GDD Definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
Total requested quantity Invoice line/Total requested quantity	0..1	SDD-ID:	BDTG00000296
		Definition:	The total ordered quantity of a trade item.
		GDD Name:	requestedQuantity
		Comment:	The original requested quantity of the trade item according to the original order document.
Total requested quantity content Invoice line/Total requested quantity/Total requested quantity content	1..1	SDD-ID:	BDT00000566
		Definition:	The total ordered quantity of a trade item.
		GDD Name:	itemPriceBaseQuantity
		GDD Definition:	The base quantity in which the item price is expressed. Example: Price per 100 units.
Measurement unit code Invoice line/Total requested quantity/Measurement unit code	0..1	SDD-ID:	BDTG00000608
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD Name:	N/A
		GDD Definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
Free goods quantity Invoice line/Free goods quantity	0..1	SDD-ID:	BDTG00000212
		Definition:	The quantity of free goods according to contract.
		GDD Name:	freeGoodsQuantity
Free goods quantity content Invoice line/Free goods quantity/Free goods quantity content	1..1	SDD-ID:	BDT00000711
		Definition:	The quantity of free goods according to contract.
Measurement unit code Invoice line/Free goods quantity/Measurement unit code	0..1	SDD-ID:	BDTG00000608
		Definition:	The code specifying the unambiguous representation of a unit of measure.
		GDD Name:	N/A
		GDD Definition:	Any standardized, reproducible unit that can be used to measure any physical property. Allowed code values are specified in UN/ECE Recommendation 20 - Fully Adopted by GS1.
Total line item gross monetary amount Invoice line/Total line item gross monetary amount	0..1	SDD-ID:	BDTG00000419
		Definition:	The total invoiced monetary amount of the trade item excluding any allowances or charges and excluding any taxes applicable to the sales transaction.
		GDD Name:	amountExclusiveAllowancesCharges

		GDD Definition:	The sum of the line item amount. Excluding Invoice line charges and allowances. The line amount = quantity * Price.
