

Business data terms and groups	Usage	Business data terms and groups description			
Invoice		Comment:	This business document specification is used when invoicing delivered trade items and/or services rendered. The business document specification is also used when crediting one or more previously sent invoices. Revisit later: If one and the same order has resulted in split deliveries, one invoice can be raised for each split delivery or one invoice can be raised to include all the split deliveries. One invoice can be used to debit delivered trade items and/or services rendered by more than one order. When preparing the invoice it is recommended that all descriptive content such as names, addresses and item descriptions are aligned using master data.		
Process control specification identifier	0..1	SDD-ID: Definition:	BDT00000774 An identification of specification of compliance or conformance to this document and all its extension		
CEN Mapping:					
		BT-ID: BT-24	Business term: Specification identifier	BT-Desc: An identification of the specification containing the totla set of rules regarding semantic content, cardinalities and business rules to wich the data contained in the instance document conforms	Usage note: This identifies compliance or conformance to this document. Compliant invoices specify :urn:cen:eu:en16931:2017. Invoices compliant to a user specification may identify that user specification here. No identification scheme is to be used
