The following notable changes were made to support the May 2026 Publication.

Work Request 25-000209 – Add in a 'Replacement Code' property in the GPC Delta JSON file

- This work request has been developed to include the replacement code as a separate property in the delta JSON and Excel files.

Work Request 25-000345 – Add a new brick under personal appliances for digital weighing scales

- This work request has been submitted to introduce a new class and corresponding bricks for personal body scales. The current GPC structure categorises these products under the healthcare segment as "home diagnostic monitors". However, personal body scales differ significantly from other types of home diagnostic monitoring devices, as they serve a broader range of purposes that are not exclusively health-related.
- 1 class, 2 bricks created, 2 attributes and their respective attribute values added.

Work Request 25-000428 – Split the existing brick Mobile Phones/Smartphones into two separate bricks

- This work request has been submitted to split Mobile Phones/Smartphones into two separate bricks: "Smartphones" and "Mobile Phones". There are mandatory regulations for smartphones but not for mobile phones. However, there is currently no solution to clearly distinguish between them.
- 1 brick created, 1 brick updated.

Work Request 25-000442 – Review of the schema and propose the creation of a new bricks and attributes dedicated to Beds products

- This work request has been developed to enhance and update the current schema within the Household Beds/Mattresses class, including the creation of new bricks and attributes specifically dedicated to bed products.

- 7 bricks created, 13 attributes and their respective attribute values added, 3 bricks and 2 attributes removed and 5 bricks and 2 attributes updated.

WR 25-442 - Review the schema and propose new bricks and attributes dedicated to Beds products
