The following notable changes were made to support the November 2025 Publication.

Work Request 25-000153 – Add new brick for Medicine Cabinets

- This work request has been developed to create a new brick for medicine cabinets, aimed at clarifying the classification of this type of products.
- 1 brick created.

Work Request 25-000173 – Add new class and corresponding bricks for hemp-based consumables

- This work request has been submitted to introduce a new Class and corresponding bricks for hemp-based consumables. The current GPC structure does not adequately classify hemp-based consumables, leading to potential misclassification and regulatory issues for products that are legal under the 2018 Hemp Farm Bill.
- 1 class and 2 bricks created.

Work Request 25-000183 – Create new brick for noticeboards

- This work request has been submitted to create a new brick for noticeboards. Noticeboards are distinctly different from other products such as presentation boards, both in terms of how they are used and in how they function and look.
- 1 brick created.

Work Request 25-000204 – Create a new brick for personal object locators and trackers

- This work request has been developed to create a new dedicated brick specifically for personal object locators and trackers, as this is a growing category with distinct attributes.
- 1 brick created.

Work Request 25-000288 – Delete the duplicate brick in the Drinkware (Non-disposable) class

- This Work request has been submitted to remove the existing duplication of variety packs brick in the Drinkware disposable class.
- 1 brick removed.

Work Request 25-000324 – Add and associate existing GPC attribute values with SNAP-relevant thresholds and applicable Bricks to enable regulatory filtering

- This work request has been submitted to associate existing GPC attribute values with SNAP-relevant thresholds and applicable Bricks to enable regulatory filtering. These values are already used to support sugar and sweetener classification. Additionally, a new Brick-level attribute, “Added Sugar Amount Per Serving,” is proposed to capture the manufacturer-stated sugar content per serving as displayed on product branding, labelling, or packaging.
- 2 Attributes created.

WR 25-324 – Add and Associate existing GPC attribute values with SNAP-relevant thresholds
