Business Message Standard
Introduction document

This Business Message Standard (BMS) publication package provides the necessary information to implement this message as part of the GS1 System.
This package has been developed by the Standard Maintenance Groups within the GS1 Global Standards Management Process (GSMP).

The content of this package provides the necessary basics to understand and implement this GS1 Business Message Standard (BMS).

The following elements are available:

1. BMS Document:
   Defines the business solution of the BMS (Requires Adobe Acrobat Reader)

2. Schemas
   Contains the XSD files defining the business message structure and content

3. Instance File
   Contains the XML instance sample messages that can be validated by the XSD schema from the Schemas folder

4. HTML Sample
   Contains HTML representation of the XML instance sample messages

More information about the message structure, detailed definitions and additional information can be found in the Functional User Guide: http://www.gs1.org/docs/ecom/xml/3/index.html
