Disclaimer

GS1®, under its IP Policy, seeks to avoid uncertainty regarding intellectual property claims by requiring the participants in the Work Group that developed this **Warehouse Outbound Instruction and Notification Business Message Standard (BMS)** to agree to grant to GS1 members a royalty-free licence or a RAND licence to Necessary Claims, as that term is defined in the GS1 IP Policy. Furthermore, attention is drawn to the possibility that an implementation of one or more features of this Specification may be the subject of a patent or other intellectual property right that does not involve a Necessary Claim. Any such patent or other intellectual property right is not subject to the licencing obligations of GS1. Moreover, the agreement to grant licences provided under the GS1 IP Policy does not include IP rights and any claims of third parties who were not participants in the Work Group.

Accordingly, GS1 recommends that any organization developing an implementation designed to be in conformance with this Specification should determine whether there are any patents that may encompass a specific implementation that the organisation is developing in compliance with the Specification and whether a licence under a patent or other intellectual property right is needed. Such a determination of a need for licencing should be made in view of the details of the specific system designed by the organisation in consultation with their own patent counsel.

1.1 Introduction

Message Definition

Warehousing Outbound Instruction Message Definition

The Warehousing Outbound Instruction message enables a Logistic Services Client (LSC) to inform his Logistic Services Provider (LSP) that goods need to be shipped.

Warehousing Outbound Notification Message Definition

The Warehousing Outbound Notification message enables a Logistic Services Provider (LSP) to inform his Logistic Services Client (LSC) on the status of goods shipped on behalf of the client.

Principles

These messages support the warehouse outbound process.

5.3 Example 3

This is a **complex example** of the Warehousing Outbound Instruction message. Logistic Services Buyer 2222222 instructs his Logistic Services Seller (3333333, the warehouse service provider) that goods need to be shipped and transported as follows:

- By a LSB designated carrier (5555555) to an LSB designated freight forwarder (6666666).
- Freight forwarder (6666666) will transport the goods overseas to a de-consolidation centre (4444444001104) controlled by the customer (4444444).
- From there the customer will arrange transport to the final customer location (4444444002224).

7 Summary of Changes

Any change in the GS1 standards is done based on the Work Request (WR) submitted by the GS1 User Companies or Member Organisations. All Work Requests are documented in the Work Request system available on the GS1 website: <http://wr.gs1.org>. The system is accessible to registered users. New visitors need to register first, to be able to access it. WRs can be searched by the number referenced in tables below, see: Search Work Requests. The number starts with the two last digits of the year when it was submitted, followed by the consecutive number within that year.

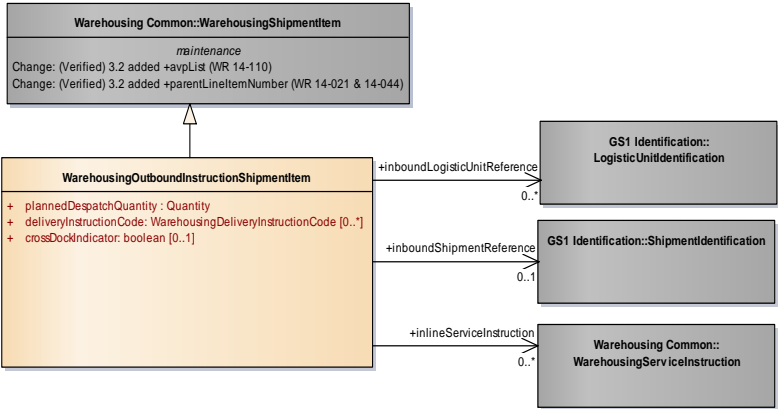

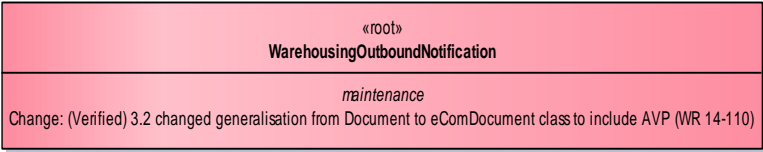

Note: WRs submitted earlier than February 2012 should be searched in Old Change Requests.
