Transport Status Request and Notification Business Message Standard (BMS)

Release 3.4, Ratified, Feb 2019

Document Summary

Document Item	Current Value
Document Name	Transport Status Request and Notification Business Message Standard (BMS)
Document Date	Feb 2019
Document Version	3.4
Document Issue	1
Document Status	Ratified

Work Request Reference

Date of WR Submission to GSMP:	WR Submitter(s):	Refer to Work Request (WR) Number(s):
02-Jul-2012	GS1 Germany	12-000193

Disclaimer

GS1®, under its IP Policy, seeks to avoid uncertainty regarding intellectual property claims by requiring the participants in the Work Group that developed this **Transport Status Request and Notification Business Message Standard (BMS)** to agree to grant to GS1 members a royalty-free licence or a RAND licence to Necessary Claims, as that term is defined in the GS1 IP Policy. Furthermore, attention is drawn to the possibility that an implementation of one or more features of this Specification may be the subject of a patent or other intellectual property right that does not involve a Necessary Claim. Any such patent or other intellectual property right is not subject to the licencing obligations of GS1. Moreover, the agreement to grant licences provided under the GS1 IP Policy does not include IP rights and any claims of third parties who were not participants in the Work Group.

Accordingly, GS1 recommends that any organization developing an implementation designed to be in conformance with this Specification should determine whether there are any patents that may encompass a specific implementation that the organisation is developing in compliance with the Specification and whether a licence under a patent or other intellectual property right is needed. Such a determination of a need for licencing should be made in view of the details of the specific system designed by the organisation in consultation with their own patent counsel.

THIS DOCUMENT IS PROVIDED "AS IS" WITH NO WARRANTIES WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY, NONINFRINGEMENT, FITNESS FOR PARTICULAR PURPOSE, OR ANY WARRANTY OTHERWISE ARISING OUT OF THIS SPECIFICATION. GS1 disclaims all liability for any damages arising from use or misuse of this Standard, whether special, indirect, consequential, or compensatory damages, and including liability for infringement of any intellectual property rights, relating to use of information in or reliance upon this document.

GS1 retains the right to make changes to this document at any time, without notice. GS1 makes no warranty for the use of this document and assumes no responsibility for any errors which may appear in the document, nor does it make a commitment to update the information contained herein.

1 Business Domain View

1.1 Introduction

Message Definition

Transport Status Request Message Definition

Message requesting information on the transport status and movements of a transport related object.

Transport Status Notification Message Definition

This scenario allows for the exchange of information regarding the status of transport execution progress at any point (in time or place) within the full transport chain.

Principles

A status message may be sent:

- as the result of a request or requests for information (through the Transport Status Request message) regarding a consignment or consignments;
- on a scheduled basis at predetermined times;
- on the occurrence of a selected event or events;
- on the occurrence of an exceptional event as agreed by the partners involved.

The status message can relate to a status (or statuses) that has (or have) been reached in a transport chain. Additionally, the message may report an exceptional status and the reason for that exceptional status.

In general the exchange of Transport Status Request and Transport Status Notification messages is optional and to be agreed between the LSC and LSP. However, normally at least one Transport Status message is provided by the LSP to the LSC and/or any other agreed party to inform those parties on the final delivery of the goods.

Current technology of IT devices installed on transport means or transport equipment (usually known as vehicle or assets track devices) allows to measure and communicate a set of parameters, such as:

- Temperature
- Position (GPS latitude and longitude)
- Speed
- Engine on/off
- Door status: open/closed
- Refrigeration system on/off
- Etc.

The Transport Status Notification message supports the inclusion of this kind of information.

3 Business Transaction View

3.1 Business Transaction – Request Transport Status

Use Case Diagram

Use Case Description

Use Case ID	UC-1									
Use Case Name	Request transport status									
Use Case Description	To request information regarding the status of transport execution progress.									
Actors (Goal)	Transport Status Requestor Transport Status Provider									
Performance Goals	Not applicable									
Preconditions	Interoperation agreement is in place.									
Post conditions	Transport status request has been received by the LSS									
Scenario	<div>Begins when the transport status requestor determines a transport status update is needed. Continues with...</div> <table><tr><th>Step #</th><th>Actor</th><th>Activity Step</th></tr><tr><td>1</td><td>Requestor</td><td>Issues a transport status request</td></tr><tr><td>2</td><td>Provider</td><td>Receives the transport status request</td></tr></table> <div>Ends when the LSS has processed the transport status request in the transport management system.</div>	Step #	Actor	Activity Step	1	Requestor	Issues a transport status request	2	Provider	Receives the transport status request
Step #	Actor	Activity Step								
1	Requestor	Issues a transport status request								
2	Provider	Receives the transport status request								

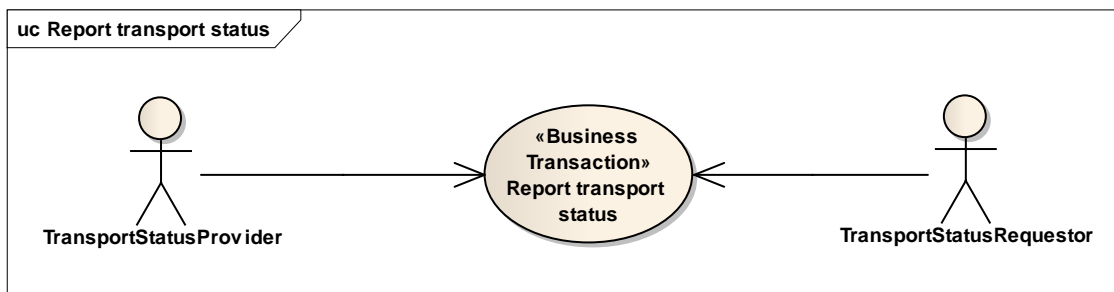

Alternative Scenario	Not applicable
Related Requirements	Not applicable
Related Rules	Not applicable

3.2 Report Transport Status

Use Case Diagram

Use Case Description

Use Case ID	UC-2
Use Case Name	Report transport status
Use Case Description	<p>Transport Status: The main objective is to report the transport status between the transport status requestor and the transport status provider.</p> <p>Information on Delivery: The main objective is for the logistics services seller to inform the logistics services buyer on the final execution status of deliveries specified in a transport instruction.</p>
Actors (Goal)	<p>Transport Status Requestor</p> <p>Transport Status Provider</p>
Performance Goals	Not applicable
Preconditions	<p>Either:</p> <p>The transport status provider did receive a transport status request;</p> <p>Or</p> <p>A pre-agreed event type or time interval determines when a transport status notification needs to be sent.</p> <p>Furthermore:</p> <p>The requesting party is indeed entitled to the transport status information.</p>
Post conditions	Transport status notification has been received by the transport status requestor.

Scenario	Begins when the transport status provider receives a request. Continues with...		
	Step #	Actor	Activity Step
	1	Provider	Issues a transport status notification
	2	Requestor	Receives the transport status notification
	Ends when the requestor has processed the transport status notification.		
Alternative Scenario	Begins when the transport status provider determines it is time to send a transport status notification. Continues with...		
	Step #	Actor	Activity Step
	1	Provider	Issues a transport status notification
	2	Requestor	Receives the transport status notification
	Ends when the requestor has processed the transport status notification.		
Related Requirements	Not applicable		
Related Rules	Not applicable

4 Business Information View

4.1 Transport Status Request (message)

Class diagram

GDD report

The content of the TransportStatusRequest class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequest

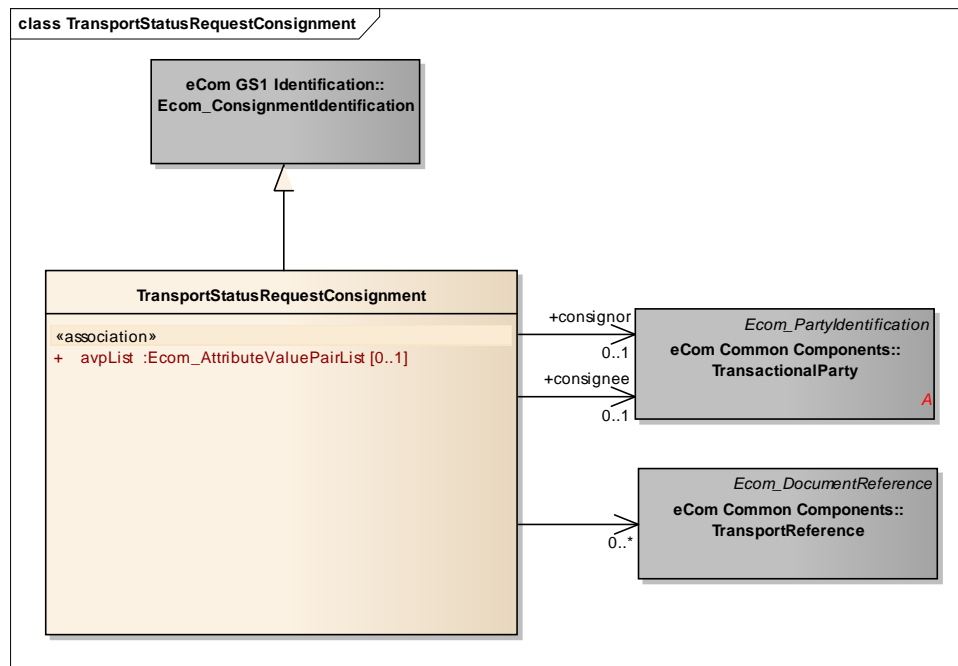

Content	Attribute / Role	Datatype / Secondaryclass	Multiplicity	Definition	Requirements
TransportStatusRequest				Message requesting information on the transport status and movements of a transport related object.	
Association		TransportStatusRequestShipment	0..*	Information identifying the shipment for which transport status information is being requested.	
Association	transportStatusProvider	TransactionalParty	1..1	A party that provides transport status information to another party.	
Association		TransportStatusRequestTransportEquipment	0..*	Information identifying the piece of transport equipment for which transport status information is being requested.	
Association		TransportStatusRequestLogisticUnit	0..*	Information identifying the logistic unit for which transport status information is being requested.	
Association		TransportStatusRequestTransportMeans	0..*	Information identifying the transport means for which transport status information is being requested.	
Generalization		EcomDocument		Basic information about the content of the message including version number, creation date and time.	WR 14-000110
Association	reportingPeriod	DateTimeRange	0..1	The date time range for which transport status information is being requested.	BRAD new requirement
Association		TransportStatusRequestConsignment	0..*	Information identifying the consignment for which transport status information is being requested.	
Association	transportStatusRequestor	TransactionalParty	1..1	A party that requests transport status information from another party.	
Association	transportStatusRequestIdentification	Ecom_EntityIdentification	1..1	The identification of the transport status request document.	
Attribute	transportStatusInformationCode	TransportStatusInformationEnumeration	1..1	Code specifying the type of transport status information that is being requested. Example: STATUS_ONLY.	
Attribute	transportStatusObjectCode	TransportStatusObjectEnumeration	1..1	Code specifying the type of object for which transport status information is being requested. Example: CONSIGNMENT.	

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.1.1 Transport Status Request – Consignment

Class Diagram

GDD Report

The content of the **TransportStatusRequestConsignment** class, its structure and component definitions can be accessed in the Global Data Dictionary: http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequestConsignment

Content	Attribute / Role	Datatype / Secondaryclass	Multiplicity	Definition	Requirements
TransportStatusRequestConsignment				Information identifying the consignment for which transport status information is being requested.	
Association	consignor	TransactionalParty	0..1	The party despatching a consignment of goods.	BRAD TM CON1

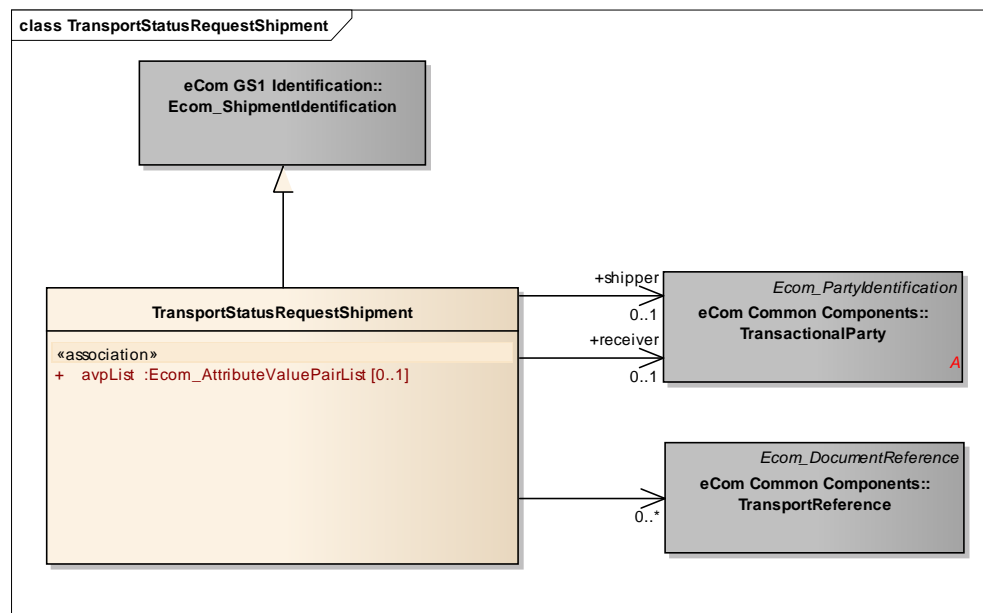

Content	Attribute / Role	Datatype / Secondaryclass	Multiplicity	Definition	Requirements
Generalization		Ecom_ConsignmentIdentification		The unique identifier for this consignment.	BRAD TM CON3 WR 15-000314
Association	consignee	TransactionalParty	0..1	The party receiving a consignment of goods.	BRAD TM CON1
Association		TransportReference	0..*	References to the commercial transaction or to transport or legal documents related to the consignment.	BRAD TM CON19
Attribute	avpList	Ecom_AttributeValuePairList	0..1	Temporary attributes introduced between minor versions.	WR 14-000110

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.1.2 Transport Status Request – Shipment

Class Diagram

GDD Report

The content of the TransportStatusRequestShipment class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequestShipment

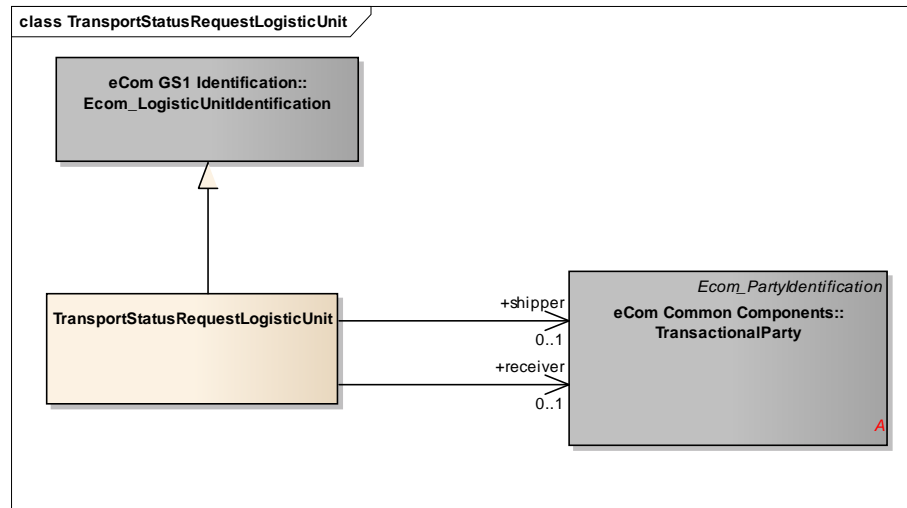

Content	Attribute / Role	Datatype / Secondaryclass	Multiplicity	Definition	Requirements
TransportStatusRequestShipment				Information identifying the shipment for which transport status information is being requested.	
Association	shipper	TransactionalParty	0..1	A party which engages in shipping this shipment of goods.	BRAD TM SHM1
Association	receiver	TransactionalParty	0..1	A party which engages in receiving this shipment of goods.	BRAD TM SHM1
Generalization		Ecom_ShipmentIdentification		The unique identifier for this shipment.	BRAD TM SHM4 WR 15-000314
Association		TransportReference	0..*	References to the commercial transaction or to transport and legal documents related to the shipment.	BRAD TM SHM16
Attribute	avpList	Ecom_AttributeValuePairList	0..1	Temporary attributes introduced between minor versions.	WR 14-000110

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.1.3 Transport Status Request - Logistic Unit

Class Diagram

GDD Report

The content of the TransportStatusRequestLogisticUnit class, its structure and component definitions can be accessed in the Global Data Dictionary:
http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequestLogisticUnit

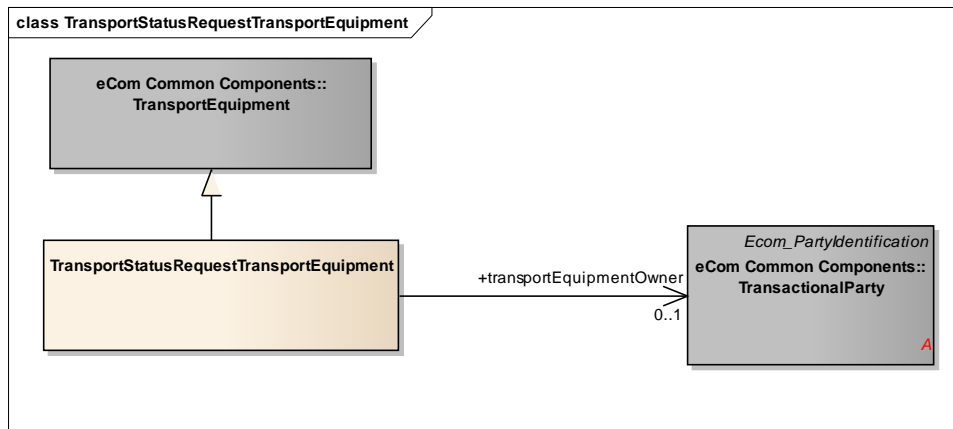

Content	Multiplicity	Attribute / Role	Datatype /Secondary class	Definition	Requirements
TransportStatusRequestLogisticUnit				Information identifying the logistic unit for which transport status information is being requested.	
Generalization			Ecom_LogisticUnitIdentification	The unique identifier for this logistic unit.	WR 15-000314
Association	0..1	shipper	TransactionalParty	A party which engages in shipping this shipment of goods.	
Association	0..1	receiver	TransactionalParty	A party which engages in receiving this shipment of goods.	

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.1.4 Transport Status Request - Transport Equipment

Class Diagram

GDD Report

The content of the TransportStatusRequestTransportEquipment class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequestTransportEquipment

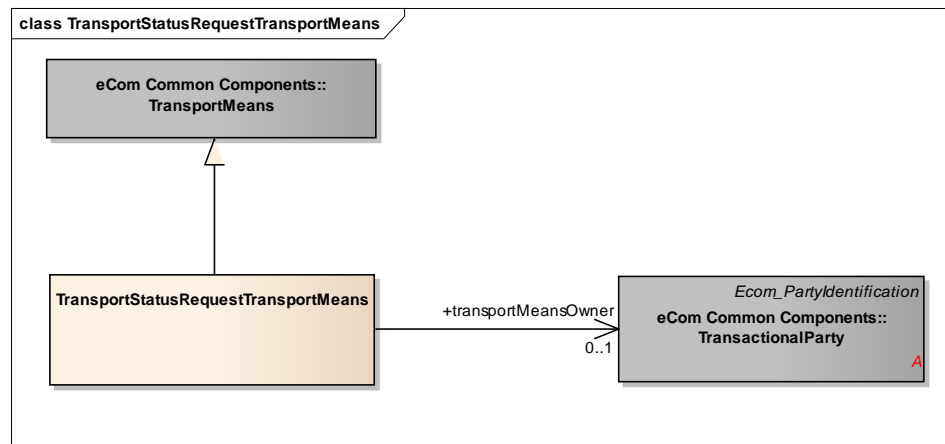

Content	Multiplicity	Attribute / Role	Datatype /Secondary class	Definition	Requirements
TransportStatusRequestTransportEquipment				Information identifying the piece of transport equipment for which transport status information is being requested.	
Generalization			TransportEquipment	Details describing and identifying the piece of transport equipment.	BRAD TM TEQ1,7
Association	0..1	transportEquipmentOwner	TransactionalParty	The party who owns the piece of transport equipment.	BRAD TM - new requirement

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.1.5 Transport Status Request - Transport Means

Class Diagram

GDD Report

The content of the TransportStatusRequestTransportMeans class, its structure and component definitions can be accessed in the Global Data Dictionary: http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusRequestTransportMeans

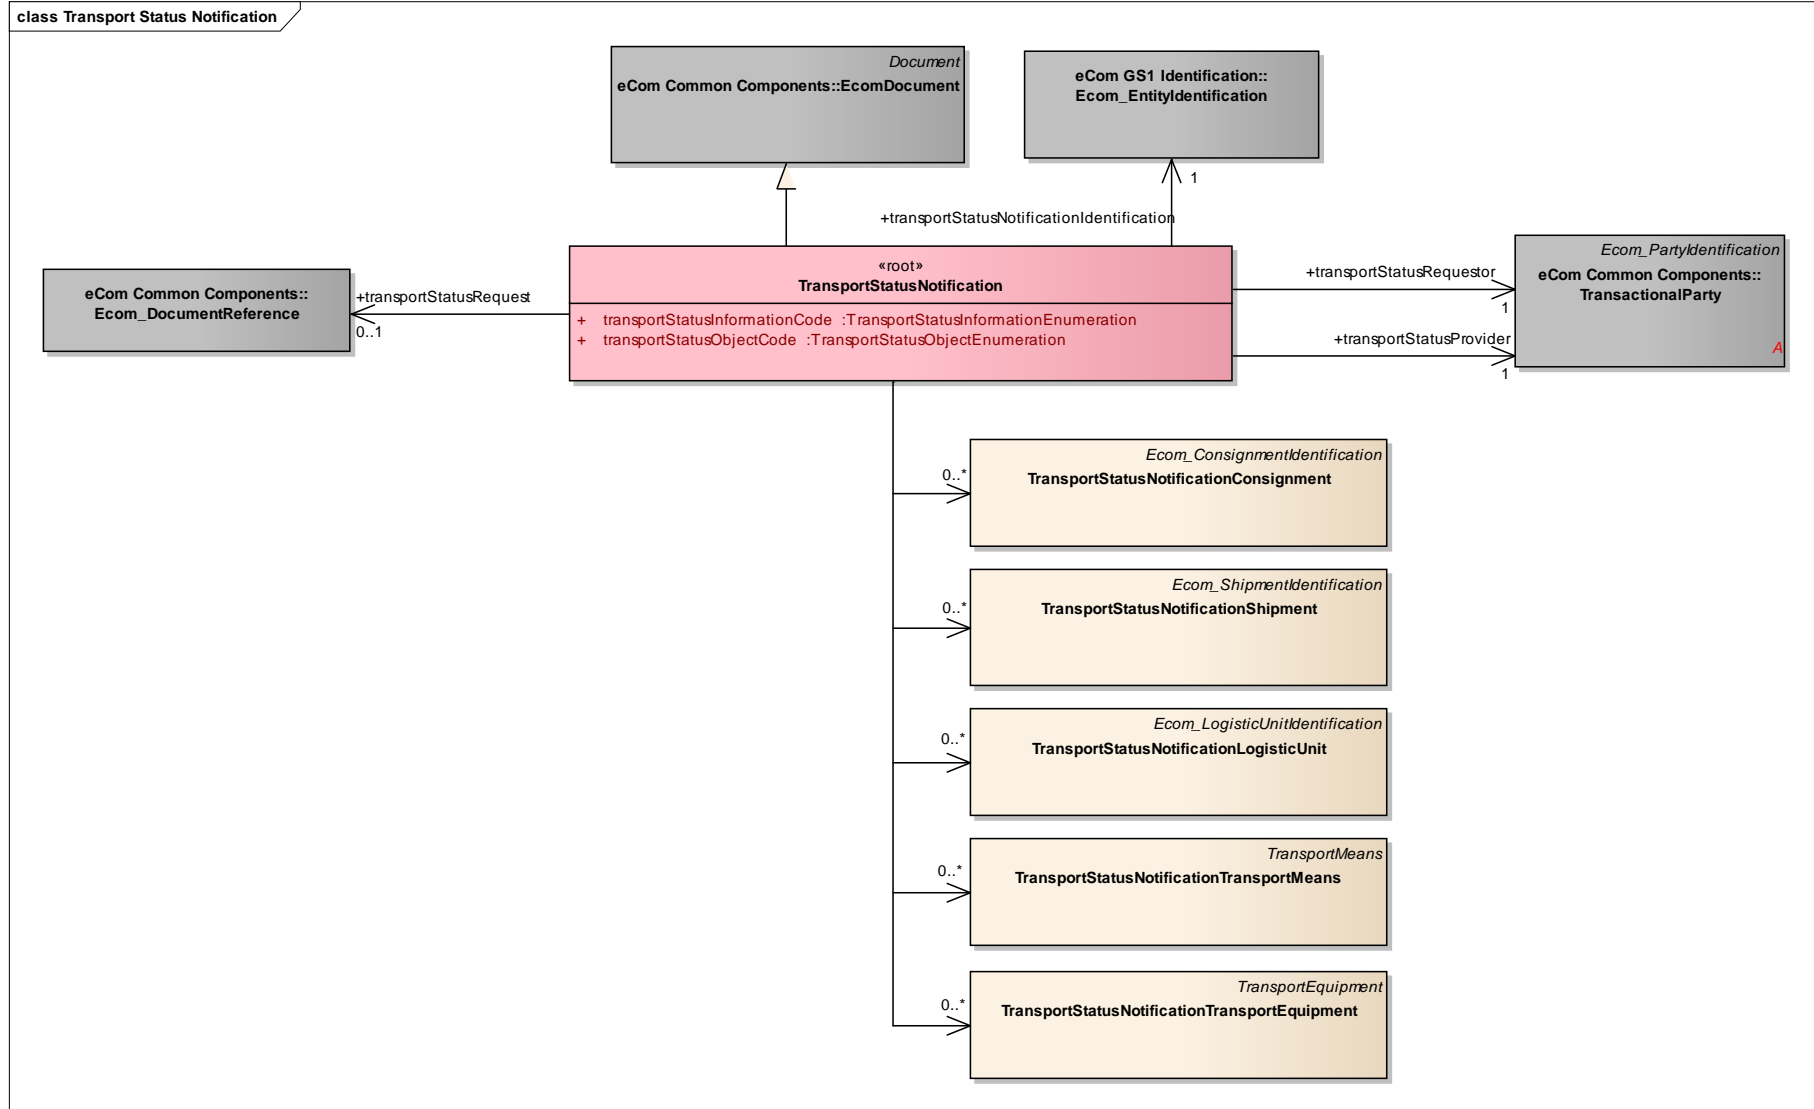

Content	Multiplicity	Attribute / Role	Datatype /Secondary class	Definition	Requirements
TransportStatusRequestTransportMeans				Information identifying the transport means for which transport status information is being requested.	
Generalization			TransportMeans	Details describing and identifying the transport means.	BRAD TM TME1,2,3
Association	0..1	transportMeansOwner	TransactionalParty	The party who owns the transport means	BRAD TM - new requirement

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2 Transport Status Notification (message)

Class Diagram

**GDD Report**

The content of the TransportStatusNotification class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotification

Content	Attribute / Role	Datatype /Secondary class	Multiplicity	Definition	Requirements
TransportStatusNotification				Message providing information on the transport status and movements of a transport related object.	
Association		TransportStatusNotificationShipment	0..*	Information on the status and movements of a shipment.	
Association	transportStatusRequestor	TransactionalParty	1..1	A party that requests transport status information from another party.	
Association		TransportStatusNotificationLogisticUnit	0..*	Information on the status and movements of a logistic unit.	
Association		TransportStatusNotificationConsignment	0..*	Information on the status and movements of a consignment.	
Association	transportStatusNotificationIdentification	Ecom_EntityIdentification	1..1	The identification of the transport status notification document.	WR 15-000314
Association	transportStatusRequest	Ecom_DocumentReference	0..1	Optional reference to the transport status request that triggered the sending of the transport status notification.	WR 15-000314
Association		TransportStatusNotificationTransportEquipment	0..*	Information on the status, movements and event log of one or more pieces of transport equipment.	
Association		TransportStatusNotificationTransportMeans	0..*	Information on the status, movements and event log of one or more means of transport.	
Generalization		EcomDocument		Basic information about the content of the message including version number, creation date and time.	WR 14-000110
Association	transportStatusProvider	TransactionalParty	1..1	A party that provides transport status information to another party.	
Attribute	transportStatusInformationCode	TransportStatusInformationEnumeration	1..1	Code specifying the type of transport status information that is being reported. Example: STATUS_ONLY.	
Attribute	transportStatusObjectCode	TransportStatusObjectEnumeration	1..1	Code specifying the type of object for which transport status information is being reported. Example: CONSIGNMENT.	

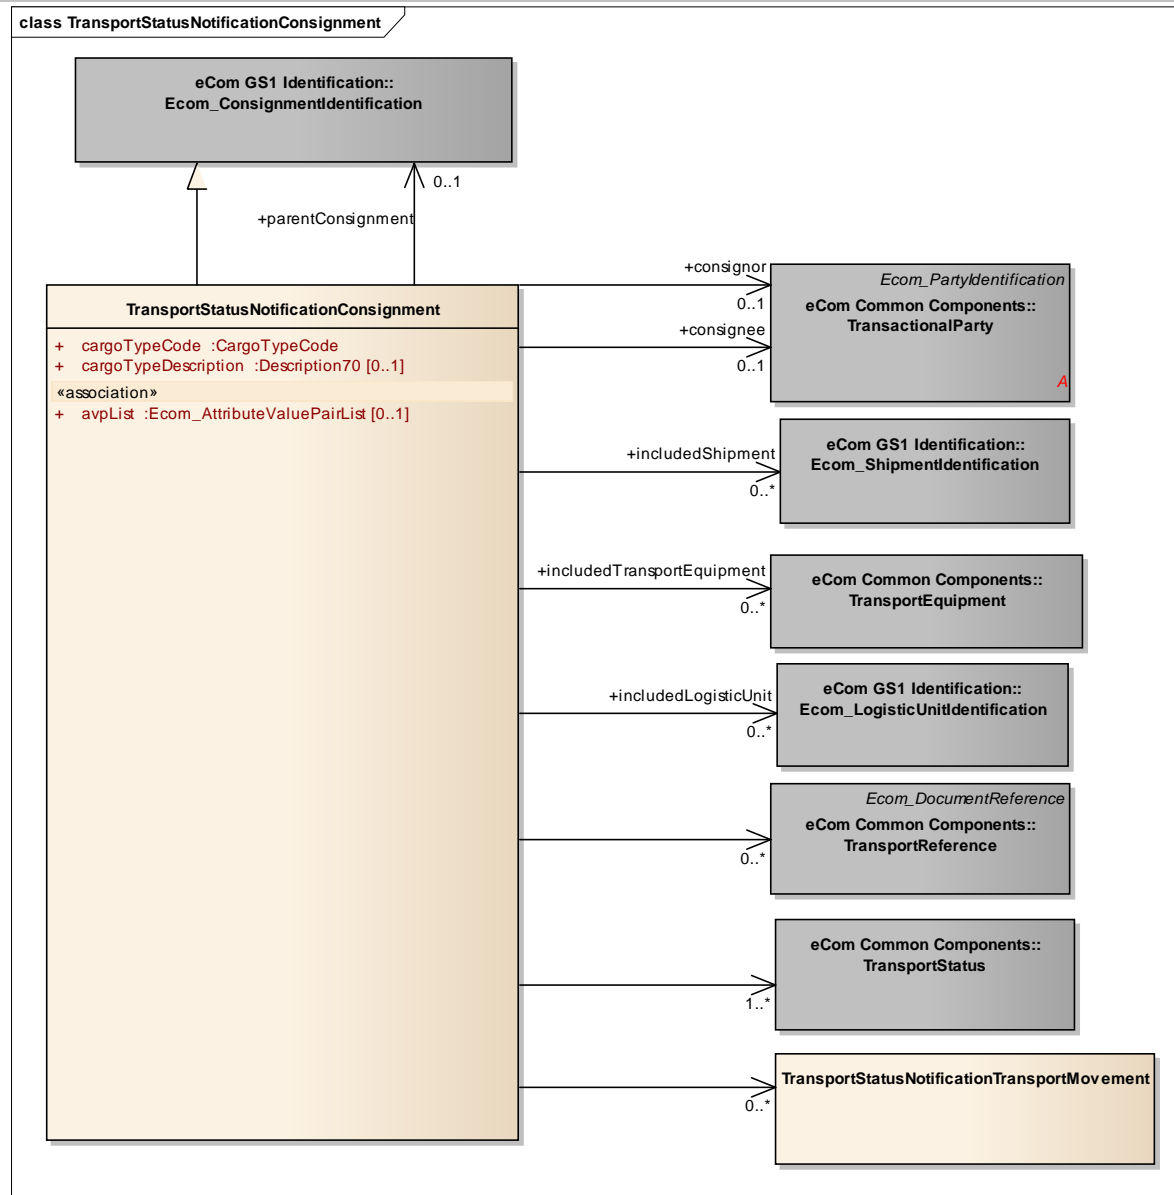

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.1 Transport Status Notification – Consignment

Class Diagram

**GDD Report**

The content of the TransportStatusNotificationConsignment class, its structure and component definitions can be accessed in the Global Data Dictionary: http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationConsignment

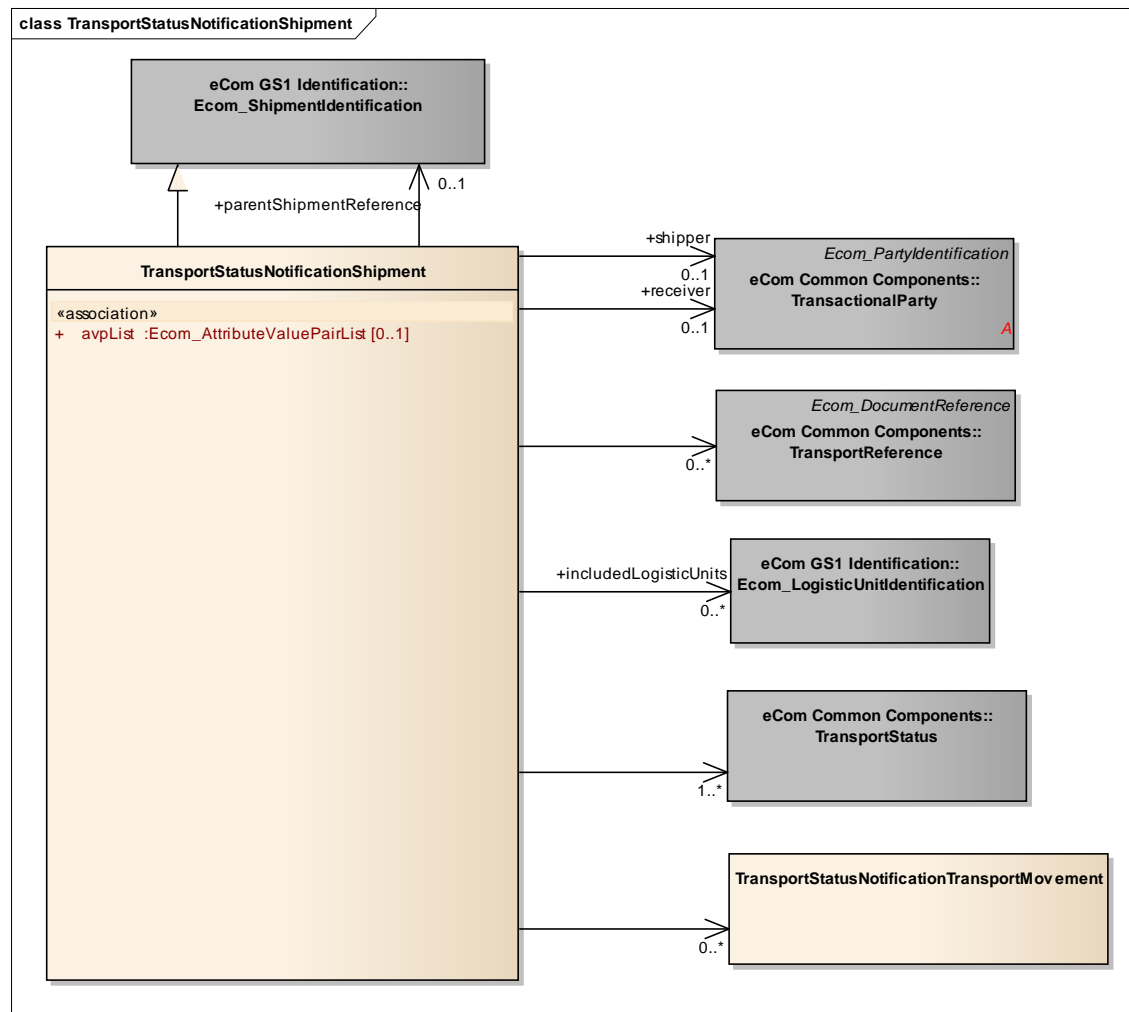

Content	Attribute / Role	Datatype /Secondary class	Multiplicity	Definition	Requirements
TransportStatusNotificationConsignment				Information on the status and movements of a consignment.	
Association		TransportReference	0..*	References to the commercial transaction or to transport or legal documents related to the consignment.	BRAD TM CON19
Association	parentConsignment	Ecom_ConsignmentIdentification	0..1	Reference to a consignment that contains this consignment (and several other consignments)	BRAD TM CON22 WR 15-000314
Association		TransportStatusNotificationTransportMovement	0..*	The transport movement details for this consignment.	
Association	includedShipment	Ecom_ShipmentIdentification	0..*	Reference to the shipment(s) contained in this consignment.	BRAD TM CON28 WR 15-000314
Association	consignee	TransactionalParty	0..1	The party receiving a consignment of goods.	BRAD TM CON1
Association	consignor	TransactionalParty	0..1	The party despatching a consignment of goods.	BRAD TM CON1
Association		TransportStatus	1..*	The transport status details for this consignment.	
Association	includedLogisticUnit	Ecom_LogisticUnitIdentification	0..*	Identification of the logistic units contained in the consignment.	WR 15-000314
Association	includedTransportEquipment	TransportEquipment	0..*	Details on the transport equipment contained in the consignment.	
Generalization		ConsignmentIdentification		The unique identifier for this consignment.	BRAD TM CON2
Attribute	cargoTypeCode	CargoTypeCode	1..1	Code specifying the classification of a type of cargo for example hazardous cargo.	BRAD CON8, CIT4, SHI4
Attribute	cargoTypeDescription	Description70	0..1	Free text specifying the classification of a type of cargo.	BRAD CON8, CIT4, SHI5
Attribute	avpList	Ecom_AttributeValuePairList	0..1	Temporary attributes introduced between minor versions.	WR 14-000110

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.2 Transport Status Notification – Shipment

Class Diagram

**GDD Report**

The content of the TransportStatusNotificationShipment class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationShipment

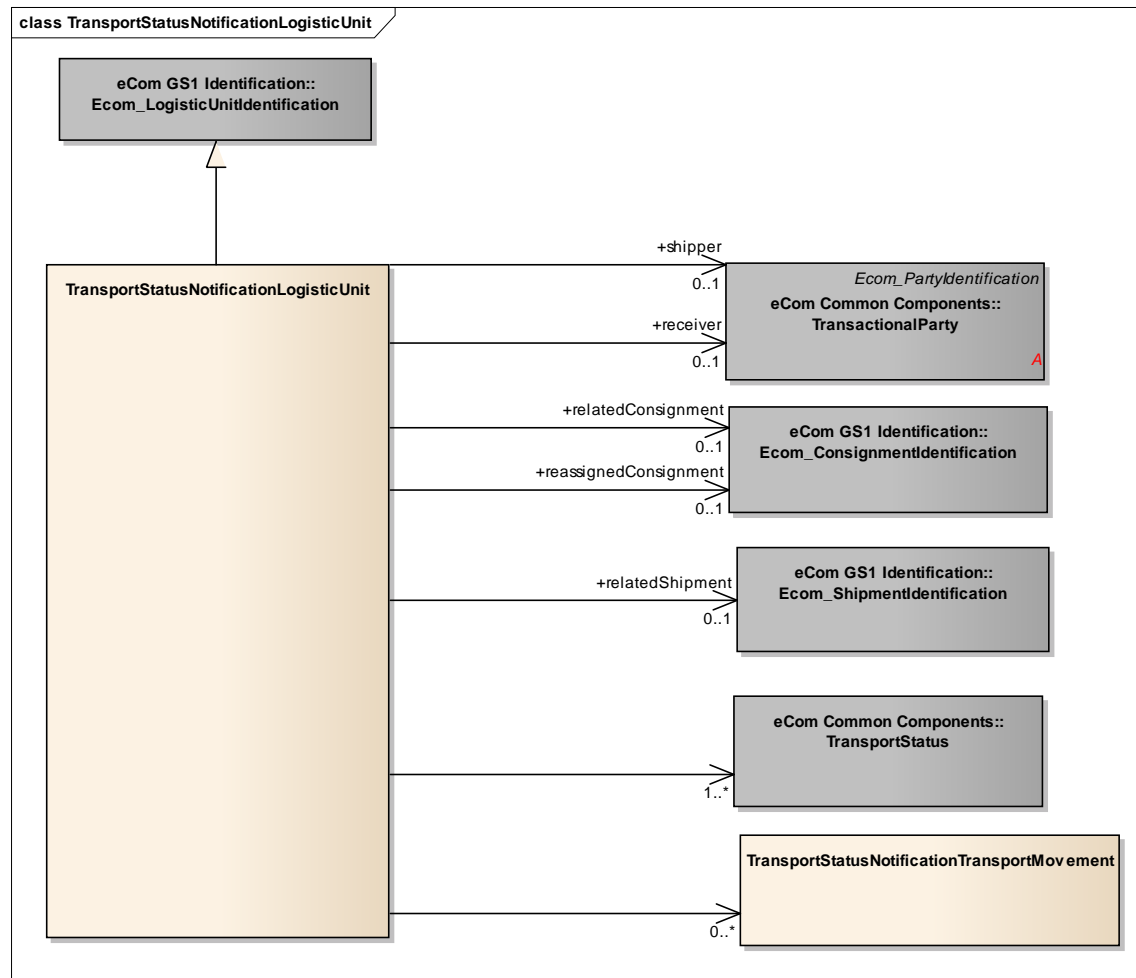

Content	Attribute / Role	Datatype /Secondary class	Multiplicity	Definition	Requirements
TransportStatusNotificationShipment				Information on the status and movements of a shipment.	
Association	receiver	TransactionalParty	0..1	A party which engages in receiving this shipment of goods.	BRAD TM SHM1
Association		TransportStatusNotificationTransportMovement	0..*	The transport movement details for this shipment.	BRAD TM SHM3
Association		TransportReference	0..*	References to the commercial transaction or to transport or legal documents related to the shipment.	BRAD TM SHM16
Association		TransportStatus	1..*	The transport status details for this shipment.	
Association	shipper	TransactionalParty	0..1	A party which engages in shipping this shipment of goods.	BRAD TM SHM1
Association	parentShipmentReference	Ecom_ShipmentIdentification	0..1	The unique identifier of a shipment in which this shipment is included.	WR 15-000314
Association	includedLogisticUnits	Ecom_LogisticUnitIdentification	0..*	Identification of the logistic units contained in the shipment.	WR 15-000314
Generalization		Ecom_ShipmentIdentification		The unique identifier for this shipment.	BRAD TM SHM4 WR 15-000314
Attribute	avpList	Ecom_AttributeValuePairList	0..1	Temporary attributes introduced between minor versions.	WR 14-000110

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.3 Transport Status Notification - Logistic Unit

Class Diagram

GDD Report

The content of the TransportStatusNotificationLogisticUnit class, its structure and component definitions can be accessed in the Global Data Dictionary: http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationLogisticUnit

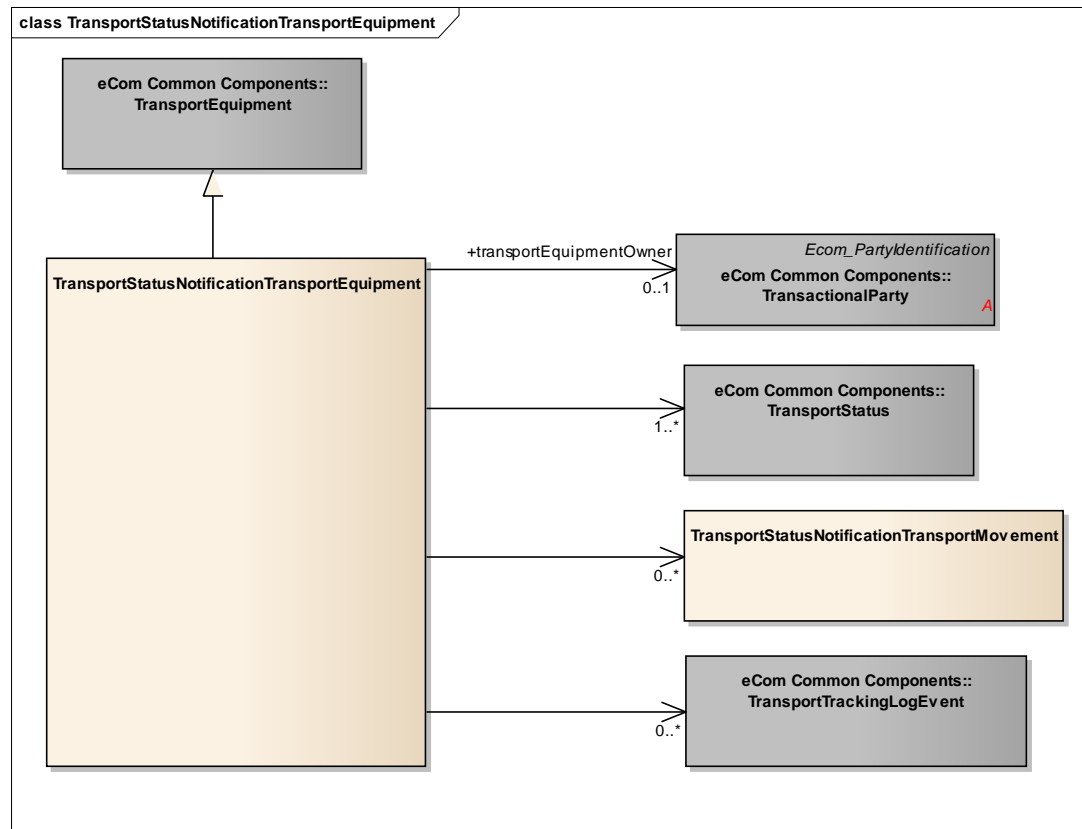

Content	Datatype / Secondary class	Attribute / Role	Multiplicity	Definition	Requirements
TransportStatusNotificationLogisticUnit				Information on the status and movements of a logistic unit.	
Association	Ecom_ShipmentIdentification	relatedShipment	0..1	Identification of the shipment in which the logistic unit is contained.	WR 15-000314
Association	Ecom_ConsignmentsIdentification	reassignedConsignment	0..1	Identification of the consignment to which the logistic unit has been reassigned.	WR 15-000314
Association	TransactionalParty	shipper	0..1	A party which engages in shipping this logistic unit.	
Association	TransactionalParty	receiver	0..1	A party which engages in receiving this logistic unit.	
Association	TransportStatus		1..*	The transport status details for this logistic unit.	
Association	TransportStatusNotificationTransportMovement		0..*	The transport movement details for this logistic unit.	
Generalization	Ecom_LogisticUnitIdentification			The unique identifier for this logistic unit.	WR 15-000314
Association	Ecom_ConsignmentsIdentification	relatedConsignment	0..1	Identification of the consignment in which the logistic unit is contained.	WR 15-000314

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.4 Transport Status Notification - Transport Equipment

Class Diagram

**GDD Report**

The content of the TransportStatusNotificationTransportEquipment class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationTransportEquipment

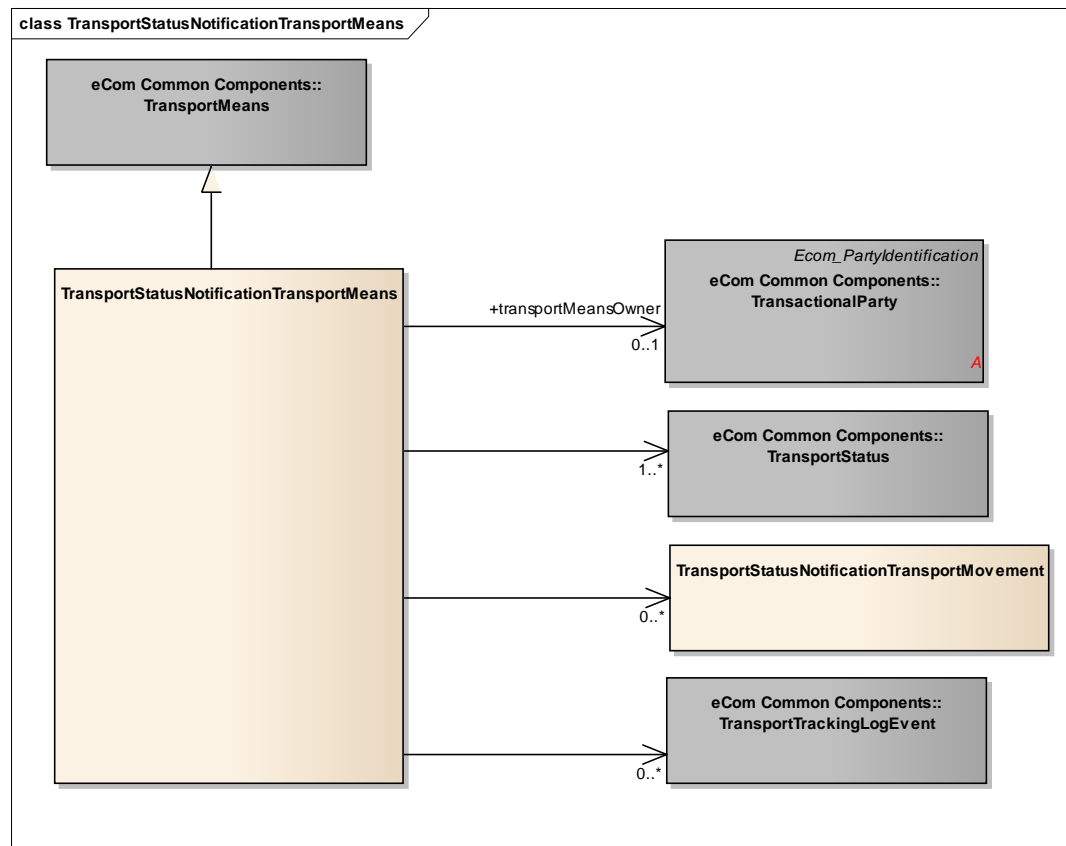

Content	Datatype /Secondary class	Attribute / Role	Multiplicity	Definition	Requirements
TransportStatusNotificationTransportEquipment				Information on the status, movements and event log of a piece of transport equipment.	
Generalization	TransportEquipment			Details describing and identifying the piece of transport equipment.	BRAD TM TEQ1,7
Association	TransactionalParty	transportEquipmentOwner	0..1	The party who owns the piece of transport equipment.	BRAD TM - new requirement
Association	TransportStatus		1..*	The transport status details for this piece of transport equipment.	
Association	TransportStatusNotificationTransportMovement		0..*	The transport movement details for this piece of transport equipment.	
Association	TransportTrackingLogEvent		0..*	The transport tracking details for this piece of transport equipment.	

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.5 Transport Status Notification - Transport Means

Class Diagram

**GDD Report**

The content of the TransportStatusNotificationTransportMeans class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationTransportMeans

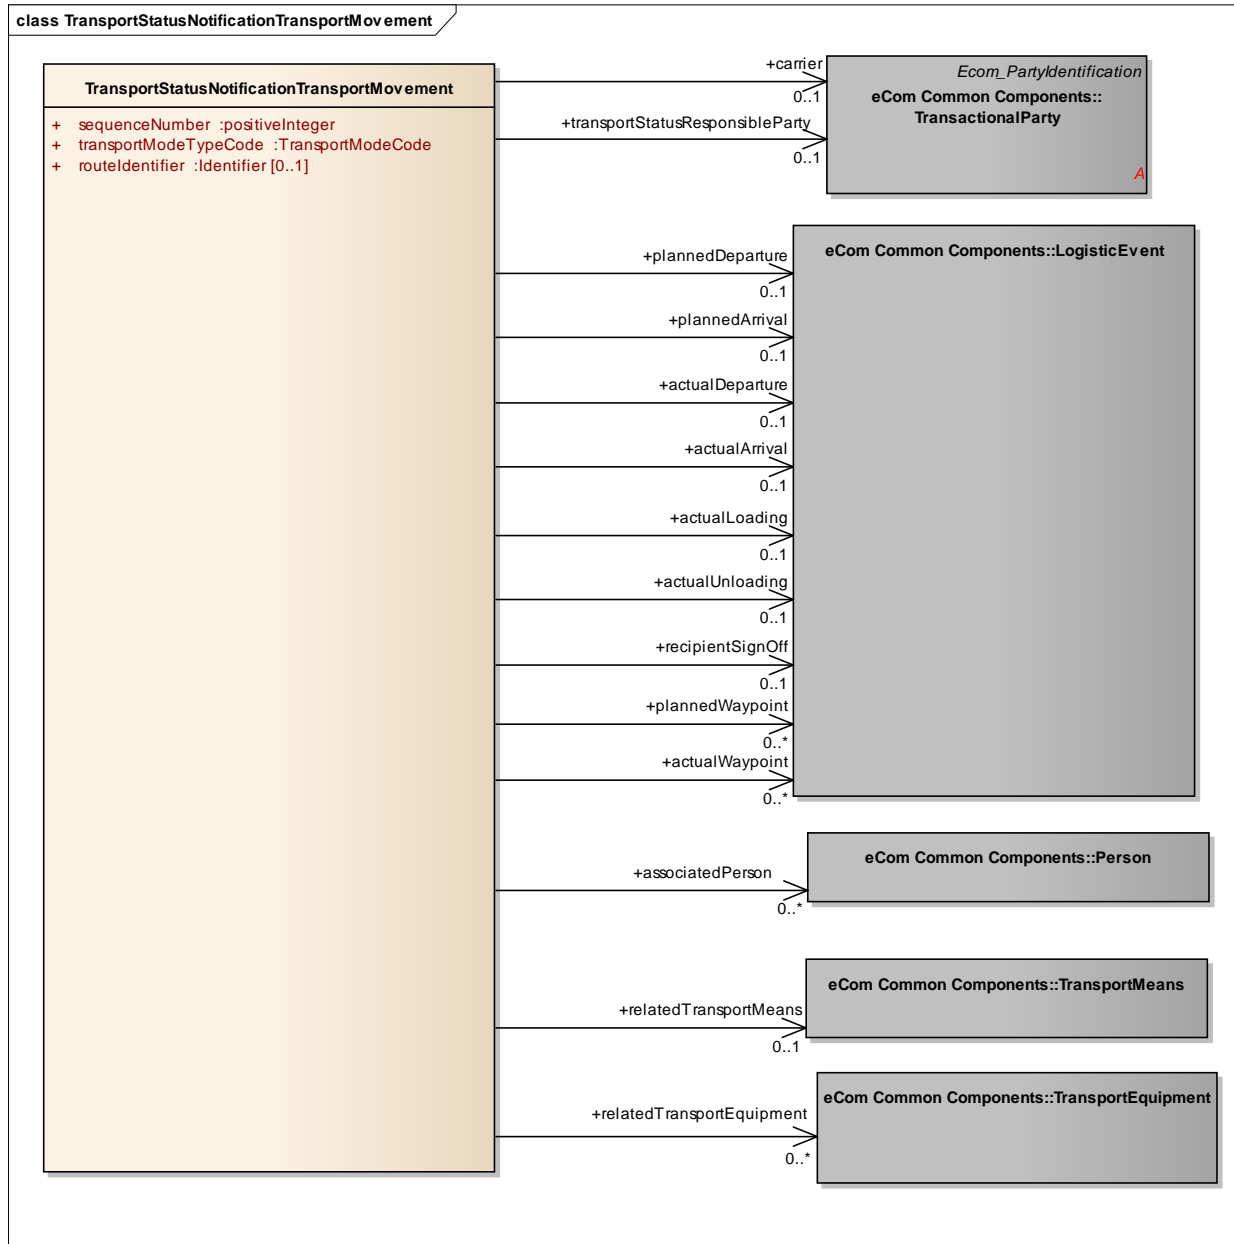

Content	Datatype /Secondary class	Attribute / Role	Multiplicity	Definition	Requirements
TransportStatusNotificationTransportMeans				Information on the status, movements and event log of a transport means.	
Generalization	TransportMeans			Details describing and identifying the transport means.	BRAD TM TME1,2,3
Association	TransactionalParty	transportMeansOwner	0..1	The party who owns the transport means	BRAD TM - new requirement
Association	TransportStatus		1..*	The transport status details for this transport means.	
Association	TransportStatusNotificationTransportMovement		0..*	The transport movement details for this transport means.	
Association	TransportTrackingLogEvent		0..*	The transport tracking details for this transport means.	

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.2.6 Transport Status Notification - Transport Movement

Class Diagram

**GDD Report**

The content of the TransportStatusNotificationTransportMovement class, its structure and component definitions can be accessed in the Global Data Dictionary:

http://apps.gs1.org/GDD/bms/Version3_4/Pages/bieDetails.aspx?semanticURN=urn:gs1:gdd:bie:TransportStatusNotificationTransportMovement

Content	Datatype /Secondary class	Attribute / Role	Multiplicity	Definition	Requirements
TransportStatusNotificationTransportMovement					
Association	TransportMeans	relatedTransportMeans	0..1	The type of vehicle, aircraft, vessel or other device used for the transport of goods in this transport movement.	BRAD TM TMV19
Association	TransportEquipment	relatedTransportEquipment	0..*	The type of trailer, container, ULD or other device used for the transport of goods in this transport movement.	BRAD TM TMV19
Association	TransactionalParty	carrier	0..1	A party that physically transports goods from one place to another.	BRAD TM TMV5
Association	Person	associatedPerson	0..*	A person associated with the execution of this transport movement, for example the driver.	BRAD TM TMV9
Association	TransactionalParty	transportStatusResponsibleParty	0..1	Party in charge of collecting and forwarding the information about the transport movement.	BRAD TM TMV17
Association	LogisticEvent	recipientSignOff	0..1	Details on the sign-off of the receipt at the arrival location, such as the responsible person.	BRAD TM - new requirement
Association	LogisticEvent	actualArrival	0..1	The actual time of arrival on the designated arrival location.	BRAD TM TMV11
Association	LogisticEvent	actualDeparture	0..1	The actual time of departure from the designated departure location.	BRAD TM TMV10
Association	LogisticEvent	actualLoading	0..1	The actual time and location of loading.	BRAD TM TMV14
Association	LogisticEvent	actualUnloading	0..1	The actual time and location of unloading.	BRAD TM TMV15
Association	LogisticEvent	plannedDeparture	0..1	The expected time of departure from the designated departure location.	BRAD TM TMV12

Content	Datatype /Secondary class	Attribute / Role	Multiplicity	Definition	Requirements
Association	LogisticEvent	plannedWaypoint	0..*	An administrative procedure taking place at a specific location that may have an effect on the lead time of a transport movement, such as dangerous goods handling, customs clearance, ...	
Association	LogisticEvent	actualWaypoint	0..*	An administrative procedure taking place at a specific location that may have an effect on the lead time of a transport movement, such as dangerous goods handling, customs clearance, ...	
Association	LogisticEvent	plannedArrival	0..1	The expected time of arrival on the designated arrival location.	BRAD TM TMV13
Attribute	positiveInteger	sequenceNumber	1..1	Unique number identifying the sequence of this transport movement with respect to the other specified movements.	
Attribute	TransportModeCode	transportModeTypeCode	1..1	Code specifying the transportation mode used for this transport movement.	BRAD TMV2
Attribute	Identifier	routeIdentifier	0..1	Unique identifier of the standard route that will be used for this transport movement.	BRAD TMV8

Note: Reference Shared Common Library Business Message (BMS) Release 3.4 and eCom Domain Common Library Business Message (BMS) Release 3.4 for all common information.

4.3 Enumerations (message specific)

Not applicable

4.4 Code Lists

Class	Codelist	GDD Link
TransportStatusRequest, TransportStatusNotification	TransportStatusInformationEnumeration	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportStatusInformationEnumeration
TransportStatusRequest, TransportStatusNotification	TransportStatusObjectEnumeration	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:TransportStatusObjectEnumeration
TransportStatusNotificationConsignment	CargoTypeCode	http://apps.gs1.org/GDD/Pages/clDetails.aspx?semanticURN=urn:gs1:gdd:cl:CargoTypeCode

6 Implementation Considerations

6.1 User Guide

The Functional User Guide contains more information about the structure and content of the Transport Status Request and Notification message:

http://www.gs1.org/docs/ecom/xml/3/3.4/eCom-Trade_messages.html#TransportStatusRequestandNotification

6.2 Message Specific Considerations

Not applicable

7 Summary of Changes

Any change in the GS1 standards is done based on the Work Request (WR) submitted by the GS1 User Companies or Member Organisations. All Work Requests are documented in the Work Request system available on the GS1 website: <http://wr.gs1.org>. The system is accessible to registered users. New visitors need to register first, to be able to access it. WRs can be searched by the number referenced in tables below, see: Search Work Requests. The number starts with the two last digits of the year when it was submitted, followed by the consecutive number within that year.

Note: WRs submitted earlier than February 2012 should be searched in Old Change Requests.

7.1 BMS Release 3.0

First publication

7.2 BMS Release 3.1

Change	Associated CR
<ul style="list-style-type: none"> TransportStatusRequest: changed cardinality of associations to Consignment, Shipment, Log Unit, Transport Means and Transport Equipment from 0..1 to 0..* TransportStatusNotification: changed cardinality of associations to Consignment, Shipment, Log Unit from 0..1 to 0..* 	12-000193 12-000194 12-000195 12-000196 12-000197

7.3 BMS Release 3.2

Change	Associated WR
<p>Added Attribute Value Pair at the root, line item and sub line item levels</p> <div> <p>class TransportStatusRequest - maintenance view</p> <pre> classDiagram class TransportStatusRequest { +transportStatusInformationCode :TransportStatusInformationEnumeration +transportStatusObjectCode :TransportStatusObjectEnumeration } class TransportStatusRequest { <<root>> } class TransportStatusRequest { maintenance } </pre> <p>Change: (Complete) 3.1 changed cardinality of associations to Consignment, Shipment, Log Unit, Transport Means and Transport Equipment from 0..1 to 0..*</p> <p>Change: (Verified) 3.2 changed generalisation from Document to eComDocument class to include AVP (WR 14-110)</p> </div>	14-000110
