Disclaimer

GS1 seeks to minimise barriers to the adoption of its standards and guidelines by making the intellectual property required to implement them available, to the greatest extent possible, on a royalty-free basis, or when necessary, under a RAND licence. Such royalty-free and RAND licences are provided pursuant to the GS1 IP Policy (available here: <https://www.gs1.org/standards/ip>), which governs the work of work group participants who contribute to drafting standards and guidelines, including this document. In addition to licences, the GS1 IP Policy provides various benefits and obligations that apply to all implementers of GS1 standards and guidelines, and all implementations of GS1 standards are subject to those terms.

Nevertheless, please note the possibility that an implementation of one or more features of this standard or guideline may be the subject of a patent or other intellectual property right that is not covered by the licences granted pursuant to the IP Policy. In addition, the licences granted under the IP Policy do not include the IP rights or claims of third parties who were not participants in the corresponding standard development work group.

Accordingly, GS1 recommends that any person or organisation developing an implementation of this standard or guideline should determine whether any patents or other intellectual property may encompass such implementation, and whether a licence under a patent or other IP right is needed. The implementer should determine the potential need for licensing in view of the details of the specific implementation being designed in consultation with that party's patent counsel.

The official versions of all GS1 standards and guidelines are provided as PDF files on GS1's online reference directory (<https://ref.gs1.org>) (the "GS1 Reference"). Any other representations of standards or guidelines in any other format (e.g., web pages) are provided for convenience and descriptive purposes only, and in the event of a conflict, the GS1 Reference document shall govern.

THIS DOCUMENT IS PROVIDED "AS IS" WITH NO WARRANTIES WHATSOEVER, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY, NONINFRINGEMENT, FITNESS FOR PARTICULAR PURPOSE, ACCURACY OR COMPLETENESS, OR ANY WARRANTY OTHERWISE ARISING OUT OF THIS DOCUMENT. GS1 disclaims all liability for any damages arising from any use or misuse of this document, whether special, indirect, consequential, or compensatory damages, and including liability for infringement of any intellectual property rights, relating to use of information in or reliance upon this document.

GS1 makes no commitment to update the information contained herein, and retains the right to make changes to this document at any time, without notice. GS1® and the GS1 logo are registered trademarks of GS1 AISBL.

1 Business Domain View

1.1 Introduction

Message Definition

Logistics Inventory Request Message Definition

The Logistics Inventory Request message enables a party to request an inventory report from another party, using specific selection criteria.

Logistics Inventory Report Message Definition

The Logistics Inventory Report enables a party to report on inventory status and events as registered in his system.

Principles

These messages support the inventory management process.

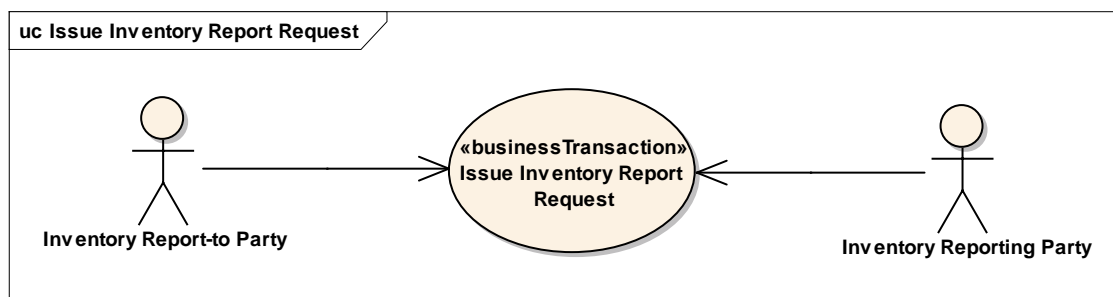

2 Business Context

Context Category	Value(s)
Industry	All
Geopolitical	All
Product	All
Process	Warehousing – Outbound Operations
System Capabilities	GS1 System
Official Constraints	None

3 Business Transaction View

3.1 Business Transaction – Issue Inventory Report Request

Use case diagram

Use case description

Use Case Name	Issue Inventory Report Request
---------------	--------------------------------

Use Case Description	The Inventory Report-to Party informs the Inventory Reporting Party that an inventory report is requested.
Actors (Goal)	Inventory Report-to Party Inventory Reporting Party
Performance Goals	Not applicable
Preconditions	none
Post conditions	The Inventory Reporting Party has been informed on the report request.
Main Scenario	<ul style="list-style-type: none"> Inventory Report-to Party sends the request to the Inventory Reporting Party. Inventory Reporting Party receives the request.
Alternative Scenario(s)	Not applicable
Related Requirements

4 Business Information View

4.1 Logistics Inventory Report Request (message)

Class diagram

**Report**

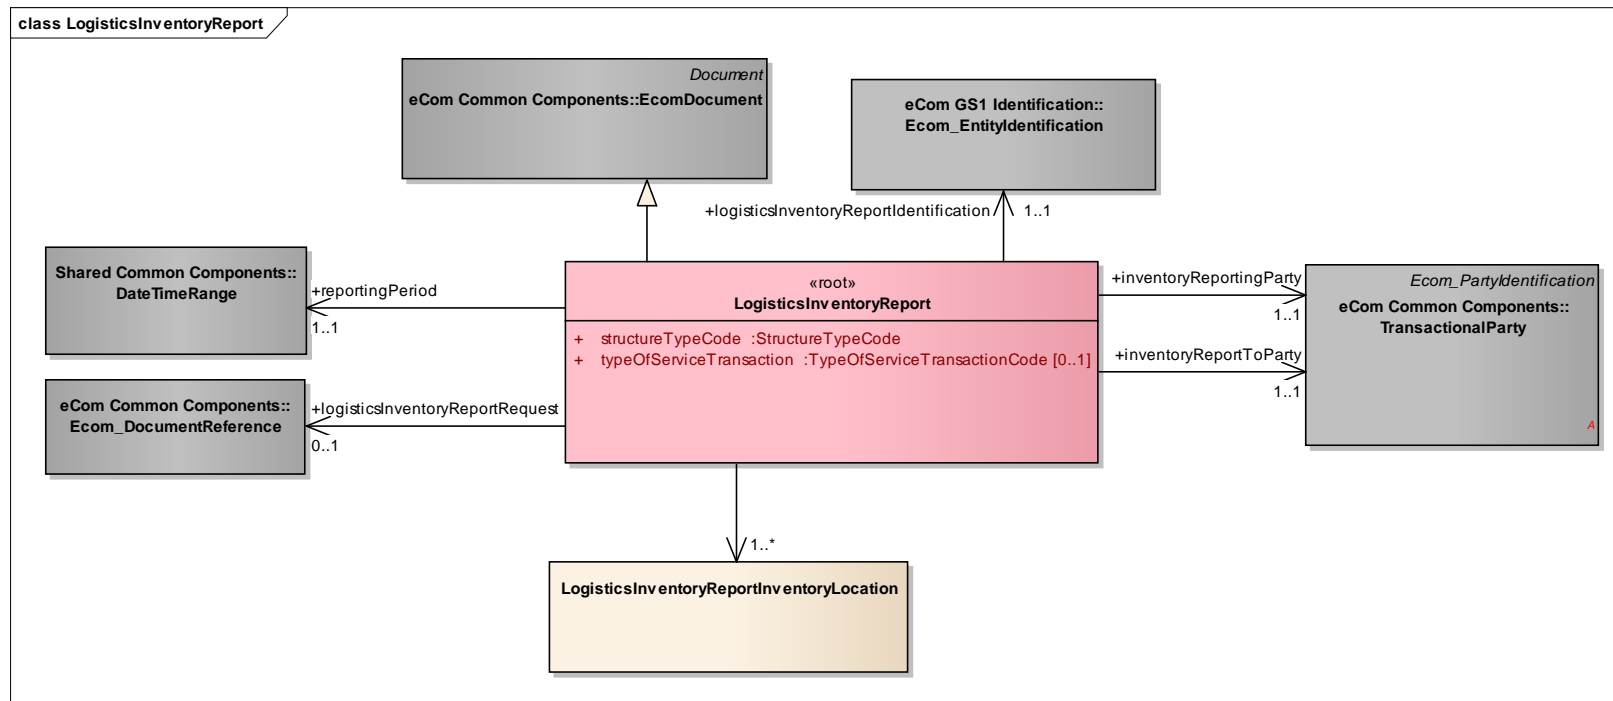

The content of the LogisticsInventoryReportRequest class, its structure and component definitions can be accessed in the GS1 Navigator: [Navigator link](#)

Content	Attribute / Role	Datatype / Secondary class	Multiplicity	Definition	Requirements
LogisticsInventoryReportRequest				The Logistics Inventory Report Request enables a party (the inventory report to party) to request information on inventory levels and inventory changes to another party (the inventory reporting party).	
Association		InventoryDutyFeeTaxStatus	0..*	The inventory duty, fee or tax status on which inventory information is being requested.	[brad-wim:invrpr-10,11]
Association	reportingPeriod	DateTimeRange	1..1	The time period for which the inventory information is being requested.	[brad-wim:invrpr-5]
Association		TransactionalTradeItem	0..*	The trade items on which inventory information is being requested.	[brad-wim:invrpr-6]
Association		LogisticsInventoryRequestLocation	1..*	Contains the inventory location and related sub-locations for which inventory information is being requested.	
Association	inventoryReportingParty	TransactionalParty	1..1	The identification of the party reporting about the inventory.	[brad-wim:invrpr-2]
Generalization		EcomDocument		Basic information about the content of the message including version number, creation date and time.	WR 14-000110
Association	logisticsInventoryReportRequestIdentification	Ecom_EntityIdentification	1..1	Unique identification of the logistics inventory report request, assigned by the inventory report to party.	[brad-wim:invrpr-1] WR 15-000314
Association	inventoryReportToParty	TransactionalParty	1..1	The identification of the party to which the inventory is being reported.	[brad-wim:invrpr-2]
Attribute	logisticsInventoryReportTypeCode	LogisticsInventoryReportTypeEnumeration	1..1	Code specifying the type of report that is requested.	
Attribute	inventoryDispositionCode	InventoryDispositionCode	0..*	Denotes the business states of trade items for which information is being requested.	

Content	Attribute / Role	Datatype / Secondary class	Multiplicity	Definition	Requirements
LogisticsInventoryRequestLocation				Contains the inventory location and related sub-locations for which inventory information is being requested.	
Association	inventoryLocation	TransactionalParty	1..1	The inventory location for which inventory information is being requested	[brad-wim:invrpr-7]
Association		InventorySubLocation	0..*	The inventory sub-locations for which inventory information is being requested.	[brad-wim:invrpr-8]

4.2 Logistics Inventory Report (message)

Class Diagram

**Report**

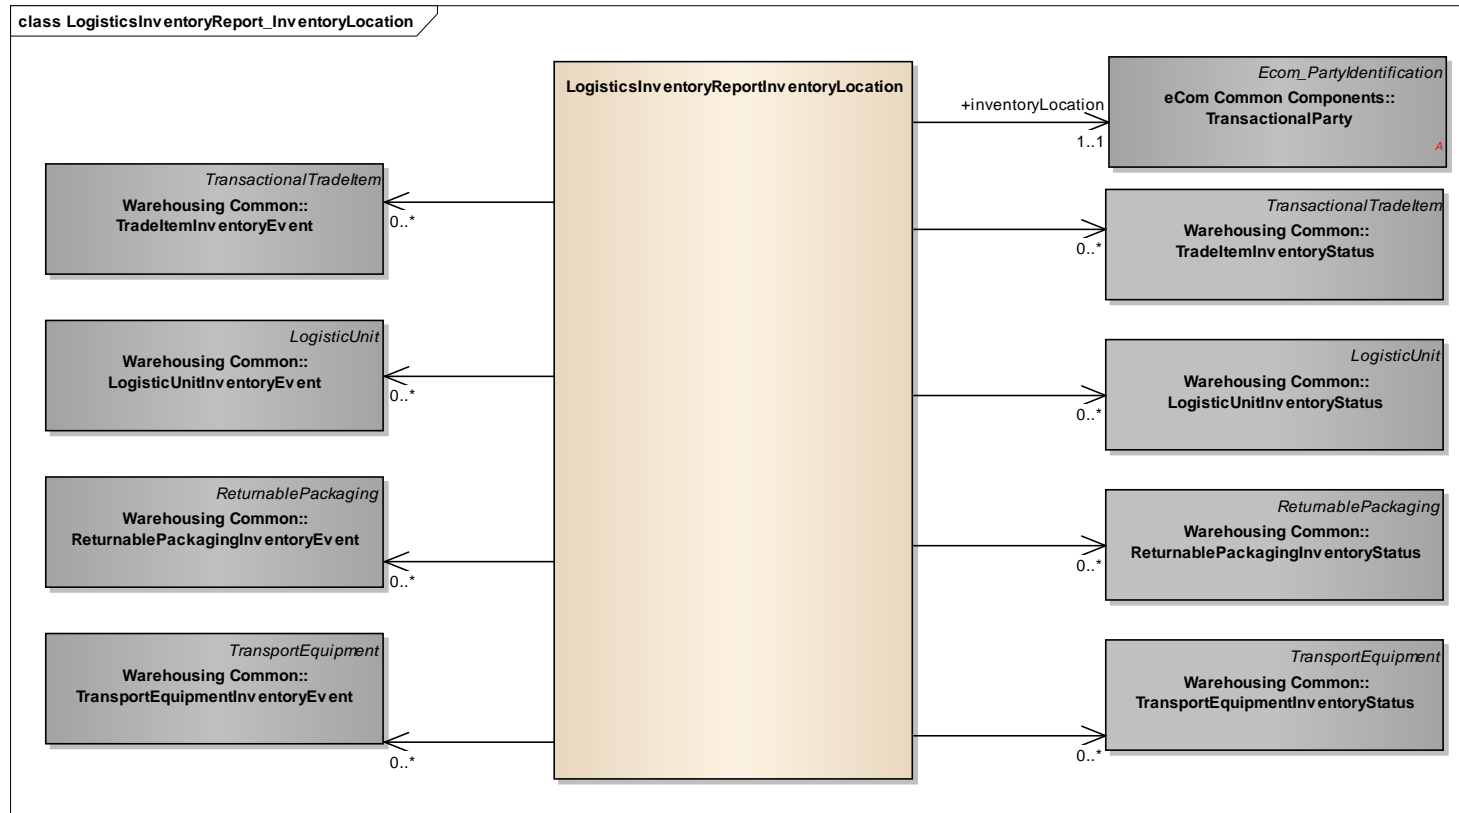

The content of the LogisticsInventoryReport class, its structure and component definitions can be accessed in the GS1 Navigator: [Navigator link](#)

Content	Attribute / Role	Datatype / Secondary class	Multiplicity	Definition	Requirements
LogisticsInventoryReport				The Logistics Inventory Report enables a party (the inventory reporting party) to provide information on inventory levels and inventory changes to another party (the inventory report to party).	
Association	logisticsInventoryReportIdentification	Ecom_EntityIdentification	1..1	Unique identification of the inventory report, assigned by the inventory reporting party.	
Association	logisticsInventoryReportRequest	Ecom_DocumentReference	0..1	Reference to the logistics inventory report request, if applicable.	
Association	reportingPeriod	DateTimeRange	1..1	The time period for which the inventory report provides information.	
Association	inventoryReportingParty	TransactionalParty	1..1	The identification of the party reporting about the inventory.	
Association		LogisticsInventoryReportInventoryLocation	1..*	Contains the inventory information per inventory location.	
Generalization		EcomDocument		Basic information about the content of the message including version number, creation date and time.	WR 14-000110
Association	inventoryReportToParty	TransactionalParty	1..1	The identification of the party to which the inventory is being reported.	
Attribute	structureTypeCode	StructureTypeCode	1..1	Contains the type of sequencing of the inventory report	
Attribute	typeOfServiceTransaction	TypeOfServiceTransactionCode	0..1	Specifies whether inventory report is generated according to schedule or triggered by a specific event.	WR 15-000046

4.3 Logistics Inventory Report Inventory Location

Class Diagram

**Report**

The content of the `LogisticsInventoryReportInventoryLocation` class, its structure and component definitions can be accessed in the GS1 Navigator: [Navigator link](#)

Content	Attribute / Role	Datatype / Secondary class	Multiplicity	Definition	Requirements
LogisticsInventoryReportInventoryLocation				Contains the inventory information for an inventory location.	
Association		ReturnablePackagingInventoryStatus	0..*	Information specifying the inventory status of a set of returnable packaging items (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:eCom-1]
Association		LogisticUnitInventoryEvent	0..*	Information specifying an inventory activity of a specific logistic unit at a specific sub-location at a specific point in time.	
Association		TransportEquipmentInventoryEvent	0..*	Information specifying an inventory activity of one or more pieces of transport equipment (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:eCom-1]
Association		ReturnablePackagingInventoryEvent	0..*	Information specifying an inventory activity of one or more returnable packaging items (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:eCom-1]
Association		TradeItemInventoryEvent	0..*	Information specifying an inventory activity of one or more trade items (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:IR-301,302,3003,304]
Association		TransportEquipmentInventoryStatus	0..*	Information specifying the inventory status of a set of pieces of transport equipment (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:eCom-1]
Association		LogisticUnitInventoryStatus	0..*	Information specifying the inventory status of a logistic unit at a specific sub-location at a specific point in time.	

Content	Attribute / Role	Datatype / Secondary class	Multiplicity	Definition	Requirements
Association		TradeItemInventoryStatus	0..*	Information specifying the inventory status of a set of trade items (of the same type) at a specific sub-location at a specific point in time.	[brad-wim:IR-100,200]
Association	inventoryLocation	TransactionalParty	1..1	Identification of the site where the items are located.	

4.4 Enumerations (message specific)

4.4.1 LogisticsInventoryReportTypeEnumeration

Code Value	Code Definition
FULL_REPORT	Report containing activity and status information on multiple trade items and non-trade items.
FULL_STATUS_REPORT	Report containing status information on multiple trade items and non-trade items.
TRADE_ITEM_REPORT	Report containing activity and status information on one or more trade items.
TRADE_ITEM_STATUS_REPORT	Report containing status information on one or more trade items.
NON_TRADE_ITEM_REPORT	Report containing containing activity and status information on multiple non-trade items.
NON_TRADE_ITEM_STATUS_REPORT	Report containing containing status information on multiple non-trade items.

4.5 Code Lists

Class	Codelist	Navigator Link
LogisticsInventoryReport	StructureTypeCode	https://navigator.gs1.org/edi/codelist-details?&name=StructureTypeCode
LogisticsInventoryReportRequest	InventoryDispositionCode	https://navigator.gs1.org/edi/codelist-details?&name=InventoryDispositionCode
LogisticsInventoryReport	TypeOfServiceTransactionCode	https://navigator.gs1.org/edi/codelist-details?&name=TypeOfServiceTransactionCode

Note: Refer to the GS1 Navigator (Navigator) for the code values.

5 Business Message Examples

5.1 Example 1

This is an example of the Logistic Inventory Report message used to communicate the periodical status.

Party Information

GS1 Global Location Number	Party Type
3333333000001	Inventory Reporting Party
2222222000004	Report To Party
3333333000018	Inventory Location

Message Example 1

Attribute	Value
LogisticsInventoryReport	
creationDateTime	2012-07-11 00:00

6 Implementation Considerations

6.1 User Guide

The Functional User Guide contains more information about the structure and content of the Logistics Inventory Report Request and Report message:

http://www.gs1.org/docs/ecom/xml/3/3.4/eCom-Trade_messages.html#LogisticsInventoryReportRequestandReport

6.2 Message Specific Considerations

Not applicable.

7 Summary of Changes

Any change in the GS1 standards is done based on the Work Request (WR) submitted by the GS1 User Companies or Member Organisations. All Work Requests are documented in the Work Request system available on the GS1 website: <http://wr.gs1.org>. The system is accessible to registered users. New visitors need to register first, to be able to access it. WRs can be searched by the number referenced in tables below, see: Search Work Requests. The number starts with the two last digits of the year when it was submitted, followed by the consecutive number within that year.

Note: WRs submitted earlier than February 2012 should be searched in Old Change Requests.

7.1 BMS Release 3.1

First release of this message standard.

7.2 BMS Release 3.2

Change	Associated WR
<p>Added Attribute Value Pair at the root, line item and sub line item levels</p> <div> class LogisticsInventoryReportRequest - maintenance view <div> <div>«root»</div> <div>LogisticsInventoryReportRequest</div> <div> + logisticsInventoryReportTypeCode :LogisticsInventoryReportTypeEnumeration + inventoryDispositionCode :InventoryDispositionCode [0..*] </div> <div>maintenance</div> <div>Change: (Verified) 3.2 changed generalisation from Document to eComDocument class to include AVP (WR 14-110)</div> </div> </div>	14-000110
